Peterborough builders hardware, locks and knobs, have been increased ten per cent., the discount being changed from 50 and 10 to 45 and 10 per cent. American padlocks are also being advanced and new lists are to be issued on wrought brass butts. Another line showing an advance is Japan handled shears, they being subject to a 5 per cent increase.

Shipments being made include large quantities of cutlery, skates, sleighbells, cow ties, etc., in addition to general sorting goods. The trade in rifles and ammunition has been enormous and jobbers' stocks are almost depleted. A let-up is looked for on this line very soon, however. Horse blankets and building paper are being sold largely by the retail trade.

AXES AND HANDLES—While shipments have already been very large, demand keeps up well and the season's trade will make a record total.

CUTLERY AND SILVERWARE — Cutlery and silverware have sold well and large shipments are being made. Japan handled shears have advanced 5 per cent.

SPORTING GOODS—Demand for shooting materials has been enormous and jobber's stocks have been almost cleared out, while some sizes of loaded shells are cleaned out. Skates are being shipped in nearly every order.

CHAIN—We continue to quote : 1 inch, $6.60 ; 5-6 inch, $4.55 ; 3-8 inch, $3.95 ; 7-16 inch, $3.80 ; 1-2 inch, $3.65 ; 9-16 inch, $3.55 ; 5-8 inch, $3.45 ; 3-4 inch, $3.35.

RIVETS AND BURRS—Prices hold firm and demand is keen.

SCREWS—Demand keeps up to the limit of the factories output.

BOLTS AND NUTS—Stocks continue very light and prices firm. Relief is not expected before New Years.

TOOLS—A heavy trade has been done in mechanics' tools and the demand is still brisk.

SHOVELS—Demand is brisk and dealers are sorting in snow shovels.

LANTERNS — Cold Blast lanterns are now quoted at $6.50 per dozen. Shipments of lanterns, lamps and all lighting goods are extraordinarily large. Higher prices can be looked for on brass fixtures.

EXTENSION AND STEP LADDERS —Prices continue as follows : Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote : 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING — Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31 ; gauge 11, $2.37 ; gauge 12, $2.45 per 100 lbs.

WIRE NAILS—We quote $2.10 base, with no rebate. Stocks are light and the market advancing.

CUT NAILS—We quote : $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows : P.B. base, $3.65 ; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80 ; No. 1 and smaller, $4.05 ; snow, No. 2 and larger, $4.05 ; No. 1 and smaller, $4.30 ; light steel shoes, No. 2 and larger, $4.15 ; No. 1 and smaller, $4.40 ; featherweight, all sizes, 0 to 4, $5.75 ; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra ; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—Call for horse blankets is becoming general and shipments are fairly large. Bells are not so active.

STABLE FITTINGS—This line is being included in most sorting orders and cow ties are in good demand.

BUILDING PAPER—Trade has livened up as a result of the cool weather.

CEMENT—We quote : For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30 ; American low-grade, $23 to $25 ; high-grade, $27.50 to $35.

The fur season is just opening and prices here are based upon those obtained at the recent London auction. There are generally three of these sales in the year—October, January and March—sometimes four. Following are the total offerings at the recent London October sale and that of a year ago, with a percentage indication of the prices obtained :

TOTAL OFFERINGS.

	1905	1906	Price obtained
Raccoon	9,986	4,000	Same as in March.
Muskrat	22,675	38,000	Same to 10 per cent. higher than in Jan.
Skunk	15,234	21,100	25 per cent. lower than in March.
Mink	6,950	29,625	Same as in March.
Martin	5,409	10,203	5 per cent lower than in March
Red fox	1,480	5,150	15 per cent. lower than in March.
Lynx	3,731	7,500	7½ per cent lower than in March.
Ermine	1,070	5,100	10 per cent higher than in March.

It is known that besides the number given the Hudson Bay Co. sold many thousand lynx.

The prices made here for No. 1 prime are as follows :

	No. 1,	Prime
Raccoon	....	1 40
Mink, dark	4 50	5 00
" pale	2 50	3 00

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 2, 1906.

Possibly the action of the Bank of England in advancing discounts to 6 per cent., temporarily depressed the metal market, as it did other trading interests. At any rate, metals are not so uniformly buoyant this week as they have been for some time past.

Copper has eased a little, although there does not seem to be any increase in the visible supply. While Montreal prices remain nominally the same as last week there is a tendency to shade a little on quantity orders.

Lead is also slightly weaker during the past few days. In this case, too, however, the same remarks apply as have been made about copper. Prices remain the same, but easier conditions prevail.

Several advances have been made in sheet metals. Galvanized iron has gone up all around, as has been predicted in these columns. Increased quotations hae also been made in all Canada plates, except full-polished.

As foreseen in our last week's report, tin plates have gone up, though the advance has been only 15 cents per box instead of 25, as was expected. Terne plates have also gone up in sympathy.

COPPER—Although somewhat easier, the market still supports last week's prices. On quantities, however, better quotations are available. Our prices: Ingot copper, 24c. to 24 1-2c.; sheet copper, base sizes, 31c.

INGOT TIN—Fluctuations have occurred during the week, but prices have steadied again and are quoted the same as last week: 46c. to 46 1-2c. per lb.

ZINC SPELTER—Conditions are unchanged. We quote: $7 to $7.25 per 100 lbs.

ANTIMONY—The market is firm at 27 1-2c to 28c. per lb.

PIG LEAD—Lead is somewhat easier, quotations remain: $5.15 to $5.25 per 100 lbs.

PIG IRON—We are still quoting: Leading brands are now quoted as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—We still quote: British and American tubes, 1¼ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15½c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6¼c. to 7c.; Jowitt's best, 11c. to 11½c.

GALVANIZED IRON—Prices have advanced and we are now quoting: Queen's Head, 28 gauge, $4.50 to $4.75; 26 gauge, $4.35; 22 to 24 gauge, $3.80; 16 to 20 gauge, $3.65; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40: Comet 28 gauge, $4.35 to $4.60; 26 gauge $4.20 to $4.45; 22 and 24 gauge, $3.65 to $3.90; 16 to 20 gauge, $3.50 to $3.75; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 and 24 gauge, $3.65; 16 to 20 gauge, $3.50; Gorbal's "Best Best," 28 gauge, $4.40 to $4.65; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.35 to $4.60. In less than case case lots 25c. extra.

BLACK SHEETS—No change has yet taken place. We continue to quote as follows: 28 gauge, $2.50; 26 gauge, $2.45; 22 and 24 gauge, $2.30; 20 gauge, $2.25; 17 and 18 gauge, $2.25; 8, 10, 12 and 14 gauge, $2.55.

CANADA PLATES—Further advances have been made this week and we are now quoting: 52's, $2.65; 60's, $2.70; 75's, $2.80; full polished, $3.75 to $4; galvanized, 52's, $4.35; 60's, $4.60.

TIN PLATES—As predicted two weeks ago, prices have advanced. Our figures now are: Cokes, base size, 1C 14 x 20, $4.15; charcoal, base size, 1C, 14 x 20, $4.40.

TERNE PLATES—We are now quoting an advance of 30 cents, as follows: $7.15.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Last week's advance is firmly held. Prices: 2½ lbs., 6¼c. by the roll; 3 lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

MERCHANT STEEL—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING — Our prices are: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

BAR IRON—We are still quoting $2.10 base, f.o.b. Montreal.

OLD MATERIAL — Dealer's prices are as follows: Light copper, 16c.; heavy red brass, 15½ to 16c., yellow brass, 12c.; light brass, 8½c.; lead, 3¾c.; zinc, 4c.; machinery cast scrap, $15.50; wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubber, 8c. to 8¼c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, N. 2 1906.

While few price changes have been recorded on ingot metals bars and sheets have been adjusting themselves to the recent advances on pig iron and ingot tin, and we report this week the advances we predicted a week ago on tin plates, the increase including tin and terne plates as well as tinned sheets. Bar refined and horseshoe iron, and hoop, tire and sleighshoe steel have also been moved up higher.

Pig iron is no more plentiful than in recent weeks, while bars are in the same position. Business is very active in both lines. Bolts and nuts are growing harder to secure and no relief can be looked for before New Year.

Ingot tin is not so strong in foreign markets, but tin plates are firm and active with local stocks very light. Galvanized Canada plates used by roofers have advanced and ordinary and all bright Canada plates are expected to move upward.

Copper is unchanged, but stocks are getting lower, the demand keeping up in spite of high prices.

Lead and spelter are more active and are firm in price. Antimony is unchanged.

Stocks of all metals have been run down to a low point by the heavy demand, and in the opinion of one dealer stocks in jobbers' hands have never been so low as at present.

PIG IRON — Market is very active with the shortage becoming more acute. We quote as follows: Radnor at furnace $33; Hamilton at furnaces, No. 1, $23; Londonderry, f.o.b. Toronto, No. 1, $24; Middleborough, $23.50; Summerlee, $25.

BAR IRON—We now quote $2.25 base, f.o.b. Toronto, with discount of 2 per cent. net cash, an advance of 5c. over last week.

INGOT TIN—Conditions are unchanged locally but outside markets are weaker. We quote: 45c. to 46c. per lb.

TIN PLATES—The advance of 25c. per single box predicted a week ago has been made and buying is lively at the advance. Stocks are very light.

GALVANIZED SHEETS — Canada plates are expected to advance. Galvanized sheets are very firm and black sheets unchanged.

BRASS—Business is active and it is difficult to obtain deliveries. We quote: Sheets, 23c. to 24c. per lb.

COPPER—Stocks are rapidly being depleted. We quote prices as follows: Ingot copper, $24 per 100 lbs., and sheet copper $30 per 100 lbs.

LEAD—Stocks continue scarce and the market firm and active. We quote as follows: $5.25 for imported pig and $5.75 for bar lead.

ZINC SPELTER—Both outside and local markets are active and prices firm. We quote: 7¼c. per lb. for foreign and 6¼c. per lb. for domestic. Sheet zinc has been advanced 25 per cent.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 3-16 inch, $2.50; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—Trade is active at 27c. to 28c.

OLD MATERIAL — Dealers' buying prices are: Heavy copper and wire, 16½c. per lb.; light copper, 15c. per lb.; heavy red brass, 14c. per lb.; heavy yellow brass, 12c. per lb.; light brass, 8½c. per lb.; tea lead, $3.40 per 100 lbs.; heavy lead, $3.60 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $12; No. 2 wrought, $5; machinery cast scrap, $15; stove plate, $11; malleable and steel, $6; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars,

f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

For Manitoba, British Columbia and Maritime Provinces markets see pages following.

U. S. Iron and Metal Trades

From the Iron Age, Nov. 1, 1906.

In respect to foundry iron, demand has grown more urgent and inquiry for foreign iron has increased. One of the unusual conditions resulting is the practical establishment of a uniform price of $25 for spot No. 2 foundry iron, both east and west, and in the Chicago market as high as $25.50 has been paid. Southern furnaces have advanced their prices for 1907 to $17.50, Birmingham; for No. 2, and in the eastern market $22 at furnace is now quite general. That the necessities of buyers are growing more imperative is indicated by their willingness to pay what would have seemed a fortnight ago an improbable figure.

Bessemer iron for 1907 has gone to $22, at Valley furnace; one buyer took 16,500 tons, delivery in the first half, paying $21, at furnace, for 10,000 tons, and $22 for a 5,000-ton lot.

The fact that sellers of lake ores will ask 75c. a ton advance for Bessemer grades for 1907 shipment and at least 50c. a ton advance for non-Bessemer, while coke for next year is selling at $3.10 and $3.15 at the oven, has stiffened the views of furnacemen as to prices for next year, and these have advanced all along the line. It is understood that as high as $1 a ton above the 1906 level has been obtained for lake ores for 1907.

Imports have reached good proportions and the indications point to an increase in the movement. Considerably more than 50,000 tons is represented in the purchases of importing firms. Sales have been made at $23, tidewater, for No. 1 Scotch; $21.50 to $22 for No. 1 Middlesborough, and $20.75 for No. 3. One fact bearing on the continuance of imports is that foreign irons are now only $1 a ton below domestic irons, while in the big movement of 1902 and 1903 the spread was $2 to $3. Since the first purchases for the United States early in October Middlesborough warrants have advanced about $1 a ton, or from 54s. to 58s.

The largest pig iron transaction of the week is 30,000 tons of malleable Bessemer at Chicago for a wheel foundry, deliveries covering the last nine months of 1907. In the east a large business has been done in low phosphorus iron, both foreign and domestic, at about $26, delivered at eastern Pennsylvania works.

The effect of the strain for larger outputs in October is more pronounced in steel making lines. In some cases ore and coke supplies have not been sufficient for record-breaking operations. The Steel Corporation finishes the month with a general breaking of its previous high records of March, this year. Up to October 27 its ingot production had reached 1,120,000 tons. In the same time the finished material output was 825,000 tons, as against 770,000 tons in an equal period in March. The Edgar Thomson rail mill had reached on October 27 the remarkable record of 79,000 tons.

Export business has kept up well. After several months of inability to take on new rail business for export, the mills are again booking orders. In the past week 30,000 tons was closed for the Guayaquil & Quito, the well-known Ecuador line, for shipment in the latter half of 1907 and the early months of 1908. Domestic rail business pending amounts to over 200,000 tons, including a large block for trolley lines.

Structural contracts of the week include 6,000 tons for the Detroit tunnel and an increase of the Northern Pacific bridge order to 17,000 tons. Plate mills are receiving specifications from steel car works at the rate of 2,500 tons a day. On structural steel from 6 to 10 in. the mills find the pressure relaxing.

The expected advance in tin plates from $3.75 to $3.90 a box, Pittsburg, became effective October 25. The sheet mills have put up prices on the heels of an unprecedented demand, $1 a ton for blue annealed and $2 a ton for black and galvanized.

The report of a pending contract for 450 miles of 8-in. line pipe has put the pipe trade on the qui vive.

At Pittsburgh a $3 advance in bar iron by leading producers is reported, or to $1.75. The expected advance of $2 in hoops, which was to be effective November 1, was not made.

United States Metal Markets

From the Iron Trade Review, Cleveland, Nov. 1, 1906.

The first extensive importations of British iron have been begun as the result of the extremely high prices of the domestic product for immediate delivery. Some 30,000 tons of Middlesboro iron has been secured and the first two cargoes were sold at about $21.50 on the docks before their arrival. This will be consumed principally along the coast, though a part of it will go as far west as the central states. Quick delivery iron in all of the northern centres is selling as high as $25 per ton for No. 2 foundry, and at $20 or above for the southern grade. It is not believed, however, that unfilled requirements call for any extremely large tonnage and consequently present prices are not affecting consumers generally. During the week about 20,000 tons of malleable Bessemer sold at Chicago for $21 for delivery during the last nine months of the year; 11,000 of Bessemer for first half delivery brought $21.50 valley, and large sales were closed at New York.

Several advances have become effective during the week, the leading interest has raised the price of sheets, tin plate and roofing, and jobbers have followed the advance. The principal bar iron producer has raised its price to $1.70 Youngstown, and large tonnages have been disposed of to car building interests. Ferro-manganese has risen sharply, and the demand for crude steel can be gauged from the fact that open-hearth billets sold during the week at $31.50 Pittsburg. The Steel Corporation reports unfilled orders at the close of the third quarter of the year amounting to 7,936,884 tons, the largest on record.

While October ore shipments are not yet tabulated, it is known that the movement has been the largest in history, and with any kind of favorable conditions until the close of navigation the season's shipments will be in the neighborhood of 37,000,000, a gain of 3,500,000 tons over last season. With the exception of one interest which has been selling ore for 1907 for the past fortnight, ore producers are still declining to enter the market for next season.

London, Eng., Metal Markets

From Metal Market Report, Oct. 31, 1906.

PIG IRON—Cleveland warrants are quoted at 58s., and Glasgow standard warrants at 57s. 6d., making prices as compared with last week 4½d. lower for Cleveland warrants and 3d. lower for standard warrants.

TIN—Spot Tin opened weak at £192 10s., futures at £194 10s. and after sales of 360 tons of spot and 460 tons of futures closed easy at £192 12s. 6d. for spot, £194, 2s. 6d. for futures, making price compared with last week £5 12s. 6d. lower on spot and £3 17s. 6d. lower on futures.

COPPER—Spot Copper opened weak at £97 5s., futures £98, and after sales of 50 tons of spot and 250 tons of futures, closed easy at £97 2s. 6d. for spot, £97 17s. 6d. for futures, making price as compared with last week £1 lower on spot and 5s. lower on futures.

LEAD—The market closed at £19 2s. 6d. making price as compared with last week 7s. 6d. lower.

SPELTER—The market closed at £27 15s. making price as compared with last week 5s. lower.

N.S. Hardware Trade News

Halifax, N.S., Oct. 30, 1906.

The hardware business keeps on the boom, good orders coming in from all quarters. The Cape Breton trade this season is phenominal, in fact it was never better. Prices are very steady now, though some lines show a strong tendency to advance. There is a scarcity of glass on the market, and the iron pipe situation shows no improvement over last week. There has been a very good sale for fire arms and also powder and shells. Fishing supplies continue to sell quite freely, and the demand for camera supplies good. Turpentine is steady at 95 cents, boiled oil at 65 cents, and raw oil at 60 cents. Some of the jobbers are now engaged in filling big orders for lumbermen's supplies.

* * *

The destruction by fire last week of the Bankhead at Reserve Colliery, Cape Breton, caused a temporary set back to business there, but work will soon be resumed again. The machine shop was also destroyed. Over 1100 men were thrown out of employment. It is the intention of the Dominion Coal Co. to start operations again as soon as possible. A new bankhead and shops will be erected and modern machinery installed.

* * *

At a special general meeting of the Robb Engineering Co. of Amherst, the stockholders unanimously passed a resolution ratifying the amalgamation (referred to in last week's issue) of the Robb Engineering Co. and the Robb Mumford Boiler Co. of Fremington, Mass.

Advices received from Ontario stove manufacturers recently advise an advance in prices which the makers have been compelled to make owing to the greatly increased cost of iron and all other materials. No advance has yet taken place among the lower province makers.

* * *

Gasperaux River in King's County, N. S., is to be utilized for a pulp and also a power plant. T. W. Kneeland, of Rochester, N. Y., has acquired water privileges and about 30,000 acres of pulp wood land, and is organizing a company to develop them. He has built two dams. He proposes to flume the water four miles to near White Rock, where it will be conveyed by pipe to the mills. The river has a fall of 400 feet, and one of 220 feet in a distance of 1 3-4 miles. The object of the dams and flue is to preserve the water at the higher levels where it can be utilized.

* * *

Rumor has it that in the course of a few weeks great changes and improvements will take place at the Nova Scotia Steel & Coal Company's plant. So favorable have been the results, and so well has the product of the company been received on the market that the supply can by no means meet the demand. It is said that at present orders are being received by the big company which necessitates their increasing their plant at the blast furnaces and other departments of their works. Next week, if possible, the furnace will be closed down to give it a thorough overhauling, and it is likely within a short time the blast furnace at Ferrona will be re-erected alongside the present one, Sydney mines. In addition to this the company will increase their open hearths by three or four, which will mean employment for more men.

B.C. Hardware Trade News

Vancouver, B.C., Oct. 25, 1906.

Streets are being laid out in Prince Rupert, the Grand Trunk Pacific terminal on the northern coast of B. C. The first street which is 100 feet wide has been cleared and is being planked. in lieu of paving which will come later. Within three months the embryo city is to be lighted by electricity, is the assertion of Thos. Dunn the pioneer hardware merchant of Vancouver, who has already concluded arrangements which make him the pioneer of the new terminal city. Mr. Dunn has just returned from a visit to the new city, prior to making final arrangements to take his stock there and establish the first hardware emporium.

Some 300 acres of the new town site are now being laid out and a force of seventy men under engineer Pillsbury are busy with laying out the first sections. Other survey parties are busy making final locations for the railway line on Kaien Island, as the land is locally known, where Prince Rupert is to stand. The lines are being finally laid out, and grading will follow. At the same time Dominion Hydrographic Engineer Dodge is located at Prince Rupert for the winter, engaged on surveys of the harbor of Prince Rupert and contiguous waters. The lumber for construction of the first house which the railway company will erect has been sent forward by steamer to Prince Rupert. It is not the present intention to place lots on the market, but leases of lots for business and other purposes will be made, and the railway company will also build a number of houses and other buildings which will be rented to the first locators in the new city.

* * *

A joint body called the Trades and Industries Committee organized under the auspices of the Vancouver city council meets regularly in the city. It comprises members from the City Council, the Board of Trade and the Trades and Labor Council, the latter being the organization of union labor men in the city. The prime object of the committee, when originated, was to foster and promote establishment of industries in Vancouver. As indicated at the meeting held on Tuesday evening of this week, the fact that cheap power cannot be offered to proposed industries was urged by Ald. Heaps, chairman of the committee as a reason why they could not hope to secure new industries. He related his own experience, where he had asked the B. C. Electric Co. for a rate to provide power for his saw mill. They had quoted him a figure of $5,000 annually which worked out to $50 per horse power per annum. He claimed that for a working expense of $1,500 per annum he could produce the same power, using a steam plant. The action of the Ontario government in regulating rates for light, heat and power, was favorably referred to, with the suggestion that something similar would have to be done here. Finally the decision was reached to secure data from neighboring cities as to methods used in inducing location of new industries, also to enquire from the Ontario government what legislation had been passed on the point.

* * *

New Westminster is to have a glass works, equipped to turn out bottles for all the breweries in the province, for the B. C. Distillery, New Westminster, and also to manufacture other articles of glass. The capital stock of $50,000 has been subscribed for to the extent of $38,000. It is expected that very soon the balance of the stock will be taken up. Then work will proceed. The site secured, and in which the new concern is very fortunate, is the old Automatic Can Factory, Sapperton. The property has water front on Fraser river, has both lines of railway passing it, and ample room to expand into a large industry. The buildings of the old can factory are in excellent repair and will be utilized for the new concern. Most of the capital has been subscribed in the three coast cities, leading business men being chiefly interested. Some stock has been taken in Winnipeg and in Montreal, but the great majority of it is local.

* * *

Completing the fourth unit of installation, the Vancouver Power Co. has just installed a Pelton water wheel which brings up the total of power generated at the big power plant on Burrard Inlet, North Arm, to 12,000 h.p. That is, for the operation of the B. C. Electric Railway's lines in this city, and the city of New Westminster, besides for the interurban line, and for power and light in both cities and adjacent suburban districts, there is now 12,000 h.p. available. It is considered that this total will not greatly exceed the demand this winter. The Company has space and power, undeveloped, to instal in all ten units, to generate a total of 30,000 h.p. The plant is located at Lake Beautiful, some fifteen miles from Vancouver on the North Arm of Burrard Inlet, where the water is conducted by great pressure pipes down to the wheels, whence it flies direct into the sea.

* * *

The announcement this week by the V. W. & Y. Railway Co.—The Great Northern's coast line—of its intention to establish a terminal on the deep water harbor front of Burrard Inlet, has been accompanied by the filing of its plans in the registry office. The plans show a location east of the Hastings mill property, and extending eastward to the Sugar Refinery's property. The space is ample for wharfage accomodation quite equal to the present establishment of the C.P.R. That portion of the property on the west side, next to Heatlev Ave. is already owned by the Great Northern, its purchase from the Vancouver Engineering Works having been announced some months ago. The Engineering Works Co. is now preparing to remove its plant and business to another site. The remainder of the water frontage sought, according to the plans, belongs to several parties, one of whom is the C.P.R. Oddly enough that railway corporation may be credited with having been at least partly instrumental in having secured legislation permitting of expropriation proceedings for such lands as a railway company may require for terminal and yardage facilities. The power to expropriate carries with it also the power to secure the property at the price generally current at time of filing plans, hence no doubt the action of the Great Northern at this time in filing plans so that inflated values may be rung in.

* * *

Logs scaled by Provincial Government scalers in September totalled 28,413,467 feet, according to the returns filed by A. Haslam, in charge of the government's scaling department. This is a falling off from the previous month's returns of seven million feet. As winter operations are handicapped on this coast it may be expected that there will be a further reduction in the quantity of logs marketed during the winter As the lumber demand is still as active as ever, and mills are months behind with their orders, there is no question but that there will be a scarcity of logs to keep the big mills going during the winter season. British Columbia is a good place for skilled woodsmen and loggers who are sober, steady and willing to work. Wages are top-notch now, and the logs are selling at $8 to $11 in the water.

While conditions in the raw product market are as described, the mill-men have not been overlooking any opportunities. The actual number of raises in the price of lumber has been hard to keep track of this season. But a recent decision has added another dollar per thousand to the price of rough common with a corresponding increase in other grades. The price of rough common is now $16 at the mill an unprecedently high figure, and one which indicates the high price of the better grades and of finished lumber.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Nov. 2, 1906.)

Office of HARDWARE AND METAL,
Room 511, Union Bank Building,
Winnipeg, Man.

The present active movement of heavy goods is likely to continue until the close of lake navigation. Business is exceptionally active in all general lines, wholesale houses reporting the busiest October on record. Values are steady in most lines but lead has taken another upward jump and accordingly all goods manufactured wholly or in part from lead are likely to be further advanced.

LANTERNS—Prices are firmly maintained at the following quotations: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 per keg.

PRESSED SPIKES—Prices have been advanced and our quotations are now as follows: ½ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅝ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Copper rivets have been advanced and revised quotations will be noted below: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ½, $4.10; ¼, $7.20; ⅜, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—Business is particularly active at present in axes and handles. Prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Manila rope is steady at the recent advance. We are still quoting as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Shot is likely to be advanced again owing to the increasing strength of the pig lead market. Prices are: Cartridges, Dominion R.F., 50 and 5; Dominion, C. F., pistol, 30; military, 20; American R. F., 33⅓; C. F., pistol, 5 p.c.; C. F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Prices are Bar iron (basis, $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—The price has been advanced again and it is now $5.85 for ordinary lots with slight concessions for ton orders.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The recent advance to $7.80 is likely to be followed by another as a result of the condition of the pig lead market.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Prices have been steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.; Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE —We quote prices: White lead, pure, $7; bladder putty in bbls., 2½c.; in kegs, 3¾c.; turpentine, barrel lots, Winnipeg,

TENDERS WANTED

Wire Nail, White Lead and Putty Plants

TENDERS will be received, by registered post only, addressed to

Fred. Somerville, 59 Richmond St. E., Toronto, Ont., up to noon, Wednesday, Nov. 7th, 1906,

FOR

WIRE NAIL PLANT—Stock of Wire and Wire Nails.

WHITE LEAD PLANT—Stock of Dry White Lead, White Lead ground in oil, Refined Linseed Oil.

PUTTY PLANT—Stock of Putty, Whiting and Raw Linseed Oil.

The highest or any tender not necessarily accepted.
Tenders must be separate for Wire Nail Plant, White Lead and Putty Plant.

For further particulars apply

ONTARIO LEAD & WIRE CO., Limited, 59 Richmond St. E., Toronto, Ont.

96c.; Calgary, $1.03; Lethbridge, $1.03; Edmonton, $1.04. Less than barrel lots 5c. per gallon advance. Linseed oil, raw, Winnipeg, 64c.; Calgary, 71c.; Lethbridge, 71c.; Edmonton, 72c.; boiled oil, 3c. per gallon advance on these prices.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the **Western Trade** to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

A Smart Catalogue.

One of the most striking and effective price lists that we have seen for some time is that issued by the Canada Paint Co. for their Winnipeg branch, the new lists going into force on the 1st of January, next. The color scheme of red and green, which dominates all the price lists of the Canada Paint Co., is adhered to, and the words Winnipeg Edition, running diagonally across the face of the book, boldly proclaim that this is the Northwest issue. The covers are lithographed by the Benallack Engraving Co. from a design furnished by the Advertising Department of the Canada Paint Co. The book itself is printed entirely by this company's own printing staff, and the work is first-class throughout.

Carriage Heaters.

The Chicago Flexible Shaft Co., La-Salle avenue, Chicago, one of whose specialties is the Clark heater for carriages, has gotten out a neat booklet and several leaflets drawing attention to the unique qualities of the heater and Clark coal for use in the heaters. The sale of carriage heaters should be enormous in Canada during the Winter months and dealers who have not yet gone after this trade should send for a copy of the booklet, which can be had if this paper is mentioned. Price lists are included.

INTERIOR DECORATION

THAT RETAINS IT'S BEAUTY!

Our Metallic Ceilings AND Walls

are in highest favor with practical and artistic people alike.

We make countless beautiful designs, with borders, friezes, dados and every detail to match; they are easily applied, in old buildings over plaster, or in new ones where plaster is not required.

They are suited for every building where practical, durable beauty is desired in the decorative finish, and are fire-proof and sanitary.

EXPENSIVE? Not at all. First cost is small. The plates are so carefully made they fit accurately.

We will give you an estimate if you send an outline showing shape and measurements of your ceilings and walls. Let us hear from you.

M.R Co.

The Metallic Roofing Co. Limited, Toronto, Canada.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

REVIEW OF REVIEWS BESTED.

It has long been the custom both in this country and England to disparage the attempts of Canadians to produce popular magazines. That the tide has turned is evidenced by the remarks of the editor of one of Ireland's leading periodicals, the Irish Monthly, who asserts that there is in Canada a magazine—The Busy Man's Magazine—which outdistances anything in the same field yet attempted in England. In the course of a long eulogy of this magazine he said: "It seems to realize the ideal that Mr. W. T. Stead proposed to himself better than Mr. Stead himself has done in his Review of Reviews. He, too, proposed to reproduce for busy people the cream of the world's magazines; but he is too original a man, he has too much of his own, to be merely a reproducer. Every page is sure to be studded with Steadisms. His magazine is not the less interesting for that, but it is the less able to give with adequate fullness the best articles of the periodicals of the previous month. The Busy Man's Magazine keeps more steadily—that is the best adverb, and the possible suspicion of a pun must not make us fling it aside—keeps more steadily to its purpose of reproducing for busy men and women the best articles from the current magazines of the world. The form, too, of the magazine is much more pleasant, of a convenient size and shape, and the type large and readable."

PECULIAR EXPLOSION.

The adjourned inquest into the circumstances attending the death of the four men who were killed by the explosion on the Russian battleship Rurik, was concluded on Sept. 17. It appeared from the evidence that the apartment adjoining that in which the explosion occurred had been painted with a mixture of pine oil and benzine, and that the gases from the later had in some way come into contact with a naked light, these vapours being rendered more dangerous owing to the very sultry state of the weather at the time of the accident. The jury returned a verdict of "accidental death," and recommended that more explicit instructions should be given in future, and that the men should observe greater care.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

Richards Door Hangers.

C. A. McDonald, Montlach, Sask., writes:—Kindly let me know if there is a firm in Winnipeg who I could procure a set of Richards Door hangers from, or if not where I could get them as the wholesale firm I deal with claim they cannot get them in Winnipeg. Thanking you for your information regarding springs, I remain,

Answer—The door hangers referred to are carried in stock by Geo. D. Wood & Co, J. H. Ashdown Hardware Co., the Marshall Wells Co. and by the Miller Morse Hardware Co., all well known Winnipeg jobbing houses.—Editor.

FOUNDRY AND METAL INDUSTRIES

The Dominion Iron & Steel Co., of Sydney, N.S., state that they can manufacture cement from slag much cheaper than it can be manufactured of marl in Ontario. They are going after the Northwest market.

A contract has been given by the Chicago and St. Lawrence Steam Navigation Co. to the Canadian Shipbuilding Co. for a steel freight steamer to be 510 feet long over all, 500 feet on the keel, 56 feet beam, and 31 feet deep.

Preliminary work on what is expected to be one of the biggest coal docks in the district of the lakes was started at Detour, near the Soo, yesterday. The dock is to be 1,000 feet long, 300 feet wide, and the estimated cost, with machinery complete, is $400,000. Several boats at a time will be able to coal there. Construction will be started in the Spring.

The Belleville Rolling Mills, under the superintendency of V. S. Clowes, formerly of Hamilton, has started operations. Eighty-five men are on the register, and the number will be gradually increased till between 200 and 300 are employed. The 18 inch mill is now running and the two others will start almost immediately.

ZINC RESOURCES OF B. C.

The report of the commission appointed by the Dominion Government to investigate the zinc resources of British Columbia and the conditions affecting their commercial exploitation, has been issued. The volume comprises nearly 400 pages, the contents covering a wide scope of matter, historical, statistical and descriptive of the markets for ores, cost and processes of production, mines and smelters working, methods of assaying, etc. Copies of the work can be procured from the Department of Interior, Ottawa.

HOARDING OLD METALS.

Most of those who have had a long experience of the trade in old metals are aware that a miserly habit of hoarding often takes possession of the men who collect copper, gun metal, brass, and even old iron. In many cases it is not so much the hope of making an extra profit which induces them to hoard as the recoil from the well defined feeling of pain they experience in parting with their stock—a feeling similar in character to that of the miser who keeps his gold and starves himself to death. This feeling undoubtedly militates against the free selling of old metal, and in times of moderate prices large quantities are kept back from the market for this reason only. There must be a point in the price-movement of copper, however, when a large proportion of these old-metal hoarders can be tempted to part with their accumulations, and this point may lie between £90 and £100 per ton for standard copper. As the market approaches this level the hidden stores of old copper, gun metal, and brass should begin to return into composition. Those who remember the Secretan copper boom will recollect that an extraordinary quantity of old metal was poured into the market when copper passed the limit of £100; and taking into consideration the fact that what may be called the "latent copper supply" of the world is now five or six times as great as it was in 1887-9, there is at least the possibility of an enormous outpouring of old metal should the market price of standard be carried very much higher than it is at present. But even if such an outpouring should take place, the fact that the consumption of copper is now much greater than it was in the early eighties should prevent serious market troubles as a result of the release of large quantities of old metal. Still the possibility of their release is worth bearing in mind both by dealers in old and by consumers of new metal. —Ironmonger.

A PAYING SPECIALTY

Winter months are seasonable for certain paint specialties. *SHERWIN-WILLIAMS ALUMINUM PAINT*, for instance, has a ready demand. The housewife can use it to splendid advantage on gas stoves, ranges, water boilers, radiators, gas, steam and water pipes, fixtures, mail boxes, etc. It gives a peculiarly rich velvety lustre that lasts.

S-W. ALUMINUM PAINT is free from disagreeable odor, has great covering capacity, stands extreme heat and cold, and is the best paint of this nature on the market. You can handle it with profit. Suppose you place an order now for this good specialty and secure a paying trade. Write today.

CANADIAN RUBBER CO. EXPANDS.

The Canadian Rubber Co. have purchased the Maple Leaf Rubber Co., of Port Dalhousie, Ont. The purchase price is not stated, but the Maple Leaf Co. have a capital of $300,000.

Practically all brass and composition chips that are found on the scrap metal market contain lead. A short chip indicates lead. A long, stringy chip is usually free from it. As all automatic and screw machines require leaded brass, very little brass without lead is used where machine work is to be done.

Paint, Oil and Brush Trades

INTEREST WOMEN IN PAINT.

"The best way to clean house is to paint," is a timely motto containing more of fact than of fiction. Paint is a great renovator, not simply brightening up, but literally making clean. Further, it is a little recognized insecticide, destroying both egg and adult; and those unfortunate in getting into apartments infested with vermin will find it a more satisfactory remedy than carbon bisulphide.

Convince a woman on one or two of these points, and you have an interested listener. Few women who have never substituted the paint brush for the scrub brush are aware that they can do the most of their own painting and varnishing. With prepared paint and a few simple directions regarding care and selection of brushes, which the dealer should be prepared to throw in, creditable work is not beyond the reach of the most inexperienced. But the successful salesman should familiarize himself with the common problems of the housewife, anticipating her needs and showing a cordial interest. He should know what colors harmonize—for the color cards are not fully satisfying to the novice; how to prepare sizing for the kitchen wall if it is not hard finished plaster; to warn her against using anything but iron paint on tin. These and other "kinks" will be appreciated and prove profitable on both sides; for the real home-maker delights in using her own hands in every posible way in beautifying her home, and the newly acquired manual skill will find two ways to use paint where one was found before.—Hardware.

LINSEED OIL AND WHITE LEAD.

For some time past a spirited controversy has been waged in the Oil & Colourman's Journal, of London, Eng., as to whether linseed oil combines with white lead? A contribution to the subject by the well known chemist, George H. Hurst, of Manchester, is of interest to all who have looked into this subject. He says:

"I am not going to discuss the controversy in detail, but would like to be allowed to record the result of some experiments which I have had in progress for some weeks. I have had in my possession some old samples of paste white lead, and it occurred to me that if such a thing as saponification did occur these would be likely to show it. I proceeded to extract these samples with methylated ether, petroleum ether, and alcohol. The solutions obtained were submitted to evaporation to get rid of the solvent, and the oil obtained was quite clear and fluid (none was got with alcohol). This oil was tested for lead, which was found to be absent. The residual lead was quite dry and powdery when the solvent had been evaporated off, and on examination showed no sign of containing any oily or fatty matter. Evidently the mere grinding of white lead with linseed oil in the ordinary course of work does not cause and saponification to occur.

"The question arose: Is linoleate of lead soluble in ether, petroleum ether, and alcohol? Some was made by boiling linseed oil with caustic soda to make a linseed oil soap, care being taken to have the saponification complete and to produce a perfectly neutral soap. This was then poured into a solution of lead acetate, the lead linoleate formed carefully washed free from any excess of lead acetate or sodium acetate and dried. Weighed amounts were next put into methylated ether, petroleum ether, and alcohol. I found that methylated ether will take up 2 to 3 per cent. of lead linoleate, petroleum ether takes up 3 to 3 1-2 per cent., while alcohol only takes up 1 per cent. All these solutions show markedly the presence of lead. These results go to show that if, when white lead is mixed with linseed oil, any saponification does occur, the linoleate of lead would dissolve in the ethereal solvent used, and its presence could be detected in the oil left behind. As stated above, such was not found to be the case."

SEASONABLE LINES.

Dealers should make a special effort just now to push paints, varnishes and enamels used for interior finishing. In the cool evenings before Winter sets in householders will do considerable repairing if suggestive advertising brings the matter to their mind. The experiences of the large retail houses of the continent and the conclusions of foremost advertisers endorse the method of constantly offering the trade special lines and bringing new goods to their notice. It keeps the attention of the buying public upon your business, it shows that you are enterprising—and the public is always partial to the enterprising man or enterprising business.

NO WONDER

there has been such an increase in ELASTILITE VARNISH sales. Nothing remarkable about it though when you consider the quality of the varnish at such a reasonable price.

In tins only from ½ pints to 1 gallons. For outside or inside. "Wears on the job, not off it."

Paint and Oil Markets

MONTREAL.

Office of Hardware and Metal,
232 McGill Street,
Montreal, November 2, 1906.

Although the price generally quoted on turpentine, last week, was 95 cents, in single barrel lots, some dealers were asking only 93 cents. Even these, however, have advanced their quotations this week. It was found that, with a ready demand and somewhat short supplies, an extra 2 cents per gal. was warranted. There is every indication of higher figures ruling for some time.

Linseed oil is extremely firm, and sales are readily made upon the present scale of prices. In view of the approaching close of navigation, the paint manufacturers seem to be working at their full capacity to get orders out on time.

A strong demand is dominating this branch of the hardware trade, and, considering also, the firmness of the primary markets, it is said that higher prices may be looked for in the near future, in staple and general lines.

LINSEED OIL—The market is very firm. We quote as follows: Raw, 1 to 4 barrels, 52c.; 5 to 9 barrels, 51c.; boiled, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.

TURPENTINE—Demand is good, and the supply rather short. We quote: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—We quote: Best brand Government standards, $6.50 to $6.75; No. 1, $6.15 to $6.40; No. 2, $5.80 to $6.15; No. 3, $5.55 to $5.80, all f.o.b. Montreal.

DRY WHITE ZINC—We quote as follows: V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5½c. to 6½c.

PUTTY—Orders are large and numerous. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—Conditions are unchanged from those of last week. We are quoting: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

GUM SHELLAC — This week's quotations still remain as follows: Fine are constantly advancing, but Canadian jobbers quote the following prices: Fine orange, 60c. per lb.; med. orange, 55c. per lb.; bleached shellac (white) 65c. per lb.

SHELLAC VARNISH—The market in this product continues very firm, in sympathy with the conditions in the gum shellac trade. The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

REFINED PETROLEUM— We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20½c. in barrels.

WINDOW GLASS—Prices currently quoted are as follows: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100feet, $3.20; second break, break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of Hardware and Metal,
10 Front Street East.
Toronto, November 2, 1906

Mixed paints and white lead are not being booked for delivery by paint manufacturers after Dec. 1, and it is safe to assume that higher prices will rule on all orders for next season's business, deliveries of which are not made immediately. Red lead is much firmer and we are revising our quotations on hundred pound lots.

Linseed oil has also advanced another cent as a result of the high prices of seed in the Western States, and there does not seem to be much probability

of prices lowering any during the Winter as shipments of American seed to Europe are reported large. Only about one quarter of the seed required for the oil crushed for Canadian use is home grown, and consequently prices are subject to outside influences. The amount of seed grown in Canada could safely be increased from less than half a million to upwards of a million bushels. One bushel of seed makes two gallons of oil.

Turpentine keeps firm in the south and as stocks are bare locally the market continues strong.

Paris green is another line on which higher prices are looked for next season. Arsenic is both scarce and dear.

WHITE LEAD — Ex Toronto, pure white, $6.55; No. 1, $6.17½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $5.40.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6.50; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.25.

DRY WHITE ZINC— In casks, 7 1-2c.; in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 80c. per gallon.

PARIS WHITE—90c. in barrels to $1.25 per 100 lbs.

WHITING—60c. per 100 lbs. in barrels; Gilders' bolted whiting, 90c. in barrels, $1.15 in smaller quantities.

SHELLAC VARNISH—Pure orange in barrels, $2.70; white, $2.82 1-2 per barrel; No. 1 (orange) $2.50.

LINSEED OIL—Our quotations are: Raw, 1 to 4 barrels, 54c. to 55c.; 5 to 9 barrels, 53c. to 54c.; boiledl 1 to 4 barrels, 57c. to 58c.; 5 to 9 barrels, 56c. to 57c. Toronto, Hamilton, London and Guelph; net 30 days. Advance of 2c. for delivery to outside points.

TURPENTINE—Single barrels, 97c.; 2 to 4 barrels, 96c.; f.o.b. point of shipment, net 30 days. Less than barrels, $1.02 per gallon.

GLUES—French Medal, 12 1-2c. per pound; domestic shee , 10 1-2c. per lb.

PUTTY—Ordinary, 800 casks, $1.50; 100 drums, $1.75; barrels or bladders, $1.75; 100-lb. cases, $1.90;; 25-lb. irons, $1.85; 25-lb. tins (4 to case) $1.90; 12 ½ lb. tins (8 to case) $2.10.

LIQUID PAINTS—Pure, $1.20 to $1.35 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS—Gals., 70c. to 80c.

BRIDGE PAINTS—Gals., 75c. to $1.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

HOW CRUDE OCHER IS WASHED.

The crude ocher, brought in cars from the mines, is either dumped directly into a log washer or dumped on a platform and shoveled into the washer. The log washer consists of a log 12 to 20 feet in length and 8 to 14 inches in diameter. Iron teeth or paddles are set along the log in an irregular spiral. The log revolves in a trough (into which water flows) by power applied to gearing at one end of an axis passing lengthwise through the log. The paddles, during the revolutions of the log, break up the material (crude ocher) fed in and gradually force the sclid residue (sand, etc.) to the upper end of the trough, while at the same time the water carries off the lighter portion (containing the ocher and the finer particles of sand and clay) at the lower end of the washer. The ocherous water is led through a series of settling troughs 300 to 800 feet in length, set at a gentle slope. The heavier particles are deposited in these troughs, while the water, still carrying the finer ocher, has settled to tanks. Here it is allowed to stand until the ocher has settled to the bottom. The overlying water, fairly clear, is then drained off through pipes set in the sides of the tanks.

The ocher in the tanks is allowed to dry, under the action of the sun, until it is solid enough to be handled. It is then shoveled out and taken to the drying house. The final drying takes place either on racks in the open air or over coils of steam pipe. The latter process is, of course, quicker, but results in the loss of part of the ocher, as that portion nearest the pipes is dehydrated too much and takes a reddish tint. After drying, the material is finely ground. The machine used for this purpose is a Clark pulverizer or other mill of the same type.

ALABASTINE POPULAR.

R. E. Haire, general manager of the Alabastine Co., Paris, Ont., was a caller on Hardware and Metal in Toronto this week, he reporting that the demand for Alabastine this year is greater than any previous year. The company is operating a gypsum mill at Caledonia in addition to their plant at Paris, the gypsum being sold to the Portland cement companies for mixing with the cement to deter the setting. A very rich vein of gypsum, ten feet wide, has recently been discovered, and is now being worked at Caledonia, it being right alongside the railway track and the most accessible for shipment of any in Ontario.

Alex. Bertram, brother of the late John Bertram, M.P., is now Ontario sales representative of the Alabastine Company.

If we had all the money that has been sunk in gold mines we would not care to have all the money that has been taken out of gold mines.

* * *

The Crown Bank has had new plans prepared for a branch in Burford, Ont., having disposed of the building originally begun by it to the Bank of Toronto.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

Turpentine works will shortly be established at Killaloe, Ont.

The Massey-Harris Co. will erect a warehouse in Humboldt, Sask.

The Dowswell Mfg. Co. is erecting an $8,000 addition to its plant in Hamilton.

The J. H. Ashdown Hardware Co., of Winnipeg, will erect a branch warehouse in Calgary.

The name of the Toronto Contracting & Paving Co. has been changed to the Orpen Co., Limited.

The Seaman-Kent Co., of Toronto, is considering the establishment of a branch in Fort William.

The North American Wrecking Co. has registered in Montreal, with Thomas J. Drummond as president.

The buildings of the Rapid Tool Co., at Peterboro, have been completed, and machinery is now being installed.

The Chapman Double Roller Ball Bearing Co. is erecting a $10,000 factory on Sorauren avenue, Toronto.

The American Metal Co., of Winnipeg, has sold out, and the Detachable Boiler Flue Mfg. Co. has been incorporated.

Hespeler has carried a by-law granting $15,000 to a firm who will manufacture forge blowers, dust blowers, etc.

W. J. Copp & Son, of Fort William, stove manufacturers, have appointed McDonald & Voigt their agents in Dauphin, Man.

The Ideal Concrete Machinery Co., with head offices in South Bend, Ind., has opened a Canadian branch in London, Ont.

It is reported that the United Zinc Co., of Boston, will establish a branch on the south side of Adelaide street, Toronto.

A hydraulic plant has been installed two miles out of New Liskeard, to supply that enterprising town with light and power.

Representatives of the Dominion Steel Co., of Sydney, C.B., have been in Port Arthur with a proposal to establish a wire works there.

The Elder Carriage Co. is building a $9,000 factory in Toronto. The Sharpless Separator Co. is erecting a building which will cost $15,000.

A million dollars will be spent by a new company, of which the Rev. Dr. A. S. Grant is head, in revolutionizing power conditions in the Yukon.

The ratepayers of Alvinston, Ont., will vote on a by-law to loan $6,000 to J. Smith for the establishment of a basket and nail-keg factory in that town.

Contracts for improvements to the power plant of the Lake Superior Corporation at the Michigan Soo, amounting to about $1,000,000, are being let.

Canada Lighting Fixtures, Limited, Winnipeg, has purchased the lighting fixture stock of the James Stuart Electric Co., Limited, and is seeking incorporation.

Work on the mountain drain improvements at Hamilton is being rushed, but there is little prospect of completing it this year. Scarcity of labor is one of the main drawbacks.

The International Acheson Graphite Co., of New Jersey, has been licensed by the Ontario Government to carry on the manufacture of graphite in its various forms. The capital is limited to $40,000.

The concrete foundation for the new steel water tower which the Town of Fort Frances, Ont., is erecting in connection with its waterworks system, has been commenced. The tower will be 92 feet high, with a capacity of 100,000 gallons.

John Robson, A.M.I.M.E.; J. M. Wilkinson and M. J. Miller, have taken over the Miller Reversible Gasoline Engine Co., of Toronto. The name of the new company is the British Canadian Engineering Co., and its capital is $250,000.

The last issue of the Manitoba Gazette contains notices of incorporation of the Western Fire Clay Products, Limited, dealers in building supplies; and the Commercial Cement Co., capital $150,000, provided mainly by North Dakota capitalists.

Work on the 30 new dwellings for the employes of the Ontario Iron & Steel Co., at Welland, is being rushed by the Welland Construction Co., who have the cantract. Fifteen of the houses are to be finished by Jan. 1, and the remainder by the 1st of March.

The new factory of the McGlashan, Clarke Co., at Niagara Falls, Canada, is now in operation. The site of the factory is on the direct line of the Michigan Central Railway, and the main building is 70 x 300 feet. It is equipped with the latest machinery. Electric power is used throughout. Flat ware and cutlery, both in silver and nickel-silver, are being manufactured. The officers of the company are: E. G. Clarke, president; J. G. Cadham, vice-president; Lee McGlashan, general manager, and S. Woods, secretary and treasurer. John C. McCain is superintendent.

The United States Steel Corporation has perfected plans to dominate the Portland cement industry of the United States. This step is in keeping with the modern tendency of big corporations to utilize every ounce of by-products. The steel corporation will make use of its slag, which has heretofore been of practically no value, and by this means it is hoped to add materially to revenue. The demand for cement is growing at a rapid rate, and the industry is regarded as a peculiarly profitable one for the steel trust, with its unrivalled facilities, to engage in. Official announcement is made of the plans by which the steel corporation not only will control the Portland cement industry in Chicago, but will invade the east by building a plant near Pittsburg. The Universal

Portland Cement Company, capitalized at $1,000,000, took over on October 1 the plants and business of the cement department of the Illinois Steel Company. It is planned to increase the output of cement by nearly 150 per cent. by the erection of a new plant near Pittsburg. To do this $3,000,000 will be expended—taken from an appropriation made by the management of the steel corporation last Spring. When the plants are completed the yearly putput will be about 6,000,000 barrels and will exceed by 10 per cent. that of the entire country. This will give the corporation the premier position in the industry, and it is probable that other plants will be started to keep pace with what is expected to be a rapidly growing demand.

BUILDING NOTES.

A handsome Masonic temple will be erected in Calgary.

The Adams furniture Co. is erecting a $30,000 warehouse in Toronto.

The Rubber Tire Wheel Co. will erect a large garage on Guy street, Montreal.

The Y.M.C.A. of Vancouver is erecting a $3,500 frame and concrete addition.

Stanley Mills & Co. will erect a large store and factory building on John street, Hamilton.

Tenders for the new Morris street engine house, Halifax, will be asked for by the city clerk.

T. H. Smyth is erecting a $7,000 store and dwelling block on Dundas street, Toronto Junction.

Improvements are being made to the premises of the Canadian Bank of Commerce in Ponoka, Alta.

It is stated that the J. D. King Co., boot and shoe makers, of Toronto, will locate a branch at Calgary.

The Massey-Harris Co. has taken out a permit for a $15,000 extension to their main building in Brantford.

Vancouver citizens will vote next month on a by-law permitting a $47,000 addition to the Lord Roberts School.

The Hamilton Y.M.C.A. proposes to erect a four-storey building for the boys' department, at a cost of $30,000.

A four-storey Turkish bath building, to cost $100,000, is to be erected in Montreal by the Crescent Turkish Bath Co.

The Merchants' Check Book Co. will erect a factory on the corner of Camden street and Spadina avenue, Toronto.

The Prince Albert School Board has secured a site for a Collegiate Institute and will erect a first-class building next year.

The Metropolitan Bank is reported to have purchased property in Streetsville, Ont., for the erection of a branch in that town.

The new Presbyterian church at Wolseley, Sask., will be finished shortly. The building will cost in the neighborhood of $25,000.

St. Germain & Black, Ottawa, are erecting a $4,000 dwelling on Besserer

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish —we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is **soaked** and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?

It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

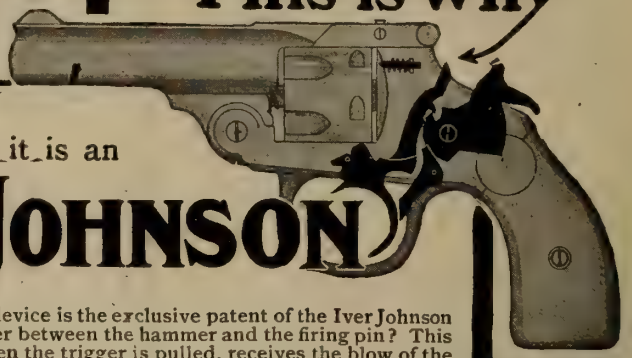
street, and W. D. Morris and A. MacLaren will build an addition on Rideau street to cost $4,500.

The Union Bank has bought the lot at the corner of May and Victoria streets, Fort William, for the erection of a branch in that town.

Kelly Bros. & Mitchell, of Winnipeg, have been awarded the contract for the erection of the new building in Vancouver for the Canadian Bank of Commerce. The cost will be in the neighhood of $400,000.

E. H. Rodgers, building inspector, Winnipeg, has begun a campaign to compel owners of buildings over three storeys in height to provide fire escapes. Sixty-three owners, who have already been notfiied, will be prosecuted unless they comply with the requirements at once.



The Stephens Paint Co., of Winnipeg, is erecting a $30,000 warehouse in Calgary. T. Underwood and Christie & Co. are the contractors. T. Underwood also has the contract for the new Y.M.C.A. building, which is to cost $75,000. R. C. Thomas is erecting a store and dwelling block, three storeys in height, at a cost of $15,000.

Last week's building permits in Montreal include six stores to be erected by Ald. J. Robinson at a cost of $16,000; an extension to Sir Thomas Shaughnessy's residence, $8,000; stables for Meldrum Bros., $6,900; express office for C.P.R., $38,000; factory for the Montreal Rolling Mills, $25,000; and a new building for the Southam Printing Co., $35,000.

Accidental Discharge Impossible—

This is why

True only if it is an

IVER JOHNSON

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Plumbing and Steamfitting

THE PLUMBING OF A COTTAGE

By J. A. F. Cardiff in the National Builder, Chicago

Article XI.

Installation.

Figure 54 is a plumbing section of a modern cottage and is given as a further example of the installation of the piping for the drainage system. It also shows how a cellar may be drained when the cellar floor is below the level of the sewer.

Starting at the sewer connection, which should be made at the top of the sewer as shown, a 5-inch earthenware house sewer is run in to within two feet of the front wall of the house. From this point a 5-inch cast iron house drain is run in through the cellar to the base of the soil stack "B."

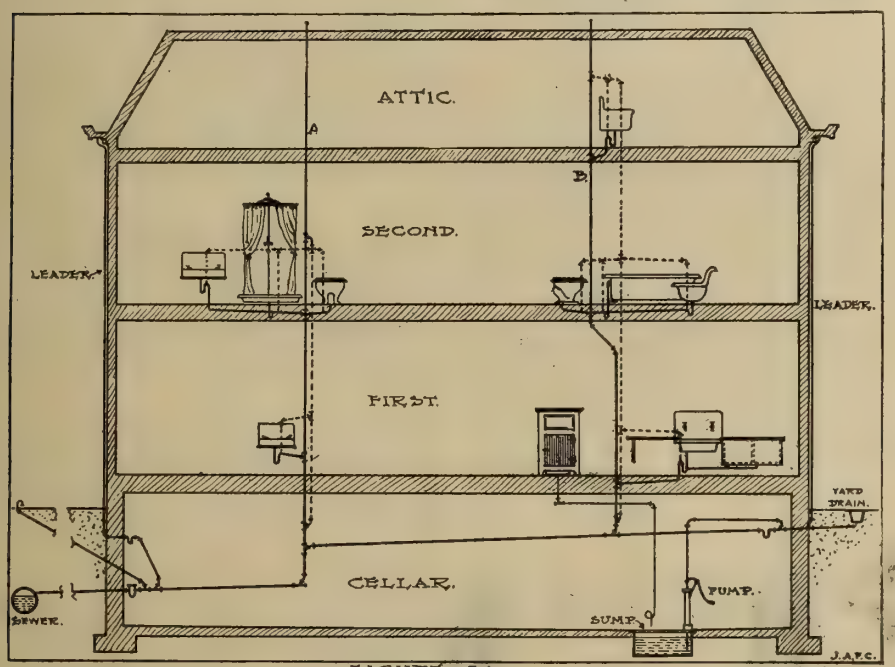

FIGURE 54.

Just inside the front wall a house trap with clean-outs is provided; and from a tee fitting on the house side of the trap a cast iron fresh air inlet is run to the lawn in front and terminates with a return bend as shown, or a vent hood, placed at least fifteen feet from any window or door to the house.

The front leader is next connected, from a point about five feet above grade where the sheet metal leader stops, with cast iron pipe provided with a running trap just inside the foundation wall.

A clean-out is provided on the house drain at the base of the vertical stack "A." This stack receives the discharge from a lavatory on the first floor, and from a lavatory, water closet and shower bath receptacle on the second floor.

Line 'B" receives the discharge from the kitchen sink and wash trays on the first floor; a water closet, bath tub and sitz bath on the second floor and a slop sink in the attic.

A branch of the house drain is run to the rear of the house to receive the discharge from the rear leader and yard drain. One running trap is made to serve for both the leader and drain.

The cellar floor is drained to a cast iron sump pit provided with a grating cover. The sump pit being below the level of the street sewer, makes it necessary to raise the water to and discharge into the house drain by means of the hand pump indicated. The discharge from the pump should always be connected to the main house drain on the outside of a leader trap. The seal in the trap prevents the foul air and gases generated within the drainage system from escaping through the pump discharge.

The refrigerator safe and the hot water boiler blow-off may also be connected to the sump pit.

The vent stacks and their branch vents are indicated by the dotted lines.

MANY FAILURES IN TORONTO.

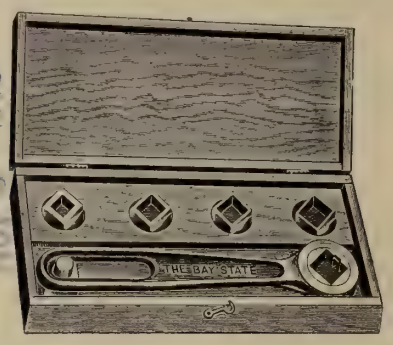
The aftermath of a season's strenuous strife amongst Toronto plumbers is being felt at present. Some plumbing firms have already gone under, more will succumb during the next two or three months, while still others are having special sales of gas fixtures, etc., in order to stand off their creditors.

This situation is only what was to be expected after the breaking up of the old Master Plumbers' Association. As a result of organization the trade was securing a profit of twenty-five per cent. one-fifth of which went towards keeping the organization together, maintaining its officers, extending the membership and holding educational and social gatherings. True, certain of the larger firms abused the power of the organization, but the great majority received benefits only in the way of doing business on a fair margin of profit without the annoyance and loss of having to compete with price cutters.

With the death of the association an era of commercial anarchy was ushered in. Instead of holding to a profit which would allow the payment of rent and necessary business expenses, wages, jobber's accounts, etc., as well as providing a salary for the master plumber and interest on the money he had invested, price cutting became prevalent and the percentage of profit was gradually cut down from twenty to fifteen, then to ten and five, and in too many cases down below the zero mark. Only one result was possible—the harvest of failures which has only just commenced.

Last Spring, Hardware and Metal expressed the view that it would be better to do a small business on a fair margin of profit, or even to sit in the shop and do only those jobs which were handed in, rather than attempt to compete with the price cutters at the low figures jobs were being contracted for. This position has been accepted by quite a number. One prominent master plumber who had a dozen men working last year had only four during 1906 and he also took a months' holidays during the early Summer. He found he could not get in on contracts even when he figured on a 10 per cent. margin so he went back to fifteen per cent. and has managed to keep four men going and make a fair profit on the business he has done. Others have run their legs nearly off, done jobs for architects for nothing and after a season's hard work find that doing contracts on a zero or five per cent. basis may allow them to pay wages but it means hard scratching to pay the supply house for materials used, and it leaves the master plumber in a worse position than before.

Most of the supply houses have protected themselves by cutting down their line of credit to a very small figure on old customers and to practically nothing to the hundred new firms which have butted in to the game in Toronto since the association became defunct.



The attempt made to reorganize the trade into a branch of the Employes' Association met with considerable success early in the Summer, but little has been done in recent months. The present is an opportune time to make another effort to get the trade together.

SELF-LIGHTING ARRANGEMENTS.

Although it is not generally admitted, there can be little doubt that the principal attraction which electricity offers to the non-technical private person lies in the switch wherewith the lamps are lighted or extinguished. The switch is so simple, cheap, and perfect that it has become universal, and it is quite common to find two or three switches put just inside the door of a room, so that one, several, or all the lights can be turned on by the movement of the finger. There are self-lighting devices for gas-burners, but none of them can compare practically with the electric switch. Even when they work satisfactorily they involve an additional fitting, which means complexity and expense; and if they are not absolutely trustworthy they become more trouble than they are worth. It is hardly too much to say that if some invention should be brought out actually comparable with the electric switch —one, that is, independent in its action of a pilot or by-pass flame kept constantly alight—a very great advance would be made in the gas-lighting industry. An interesting discovery, which may perhaps ultimately lead in the desired direction, has been made recently. As is well known, the incandescent-gas mantle is composed of the oxides of two "rare earth" metals, thorium and cerium, the substances present in the mantle being termed thoria and ceria. Now, the metals themselves, and the other metals with which they are generally associated in nature, form alloys with other metals in the usual way. Some of the alloys formed by these rare-earth metals with iron have been found to possess the property of emitting sparks when rubbed with a file, and the sparks appear to be competent to fire a stream of gas without hesitation or delay. It has thus been suggested that if a fitting with a rough end is suitably attached to the gas-cock of a burner, and a piece of the iron alloy is held in such a position that the rough end scratches it when the cock is turned, the mere turning of the cock will suffice to ignite the gas. Experiments hitherto carried out seem to be satisfactory, but it remains to be seen how the alloys will bear prolonged exposure to air in close contact with a gas flame. Even if the alloys do not lose their sparking power in time, the electric switch will not be equalled, because the device will only be suitable for application to burners which are accessible to the hand, and the cock must be immediately at the base of the flame that has to be lighted. Alloys of iron with some of the allied rare metals emit sparks of high illuminating power, and it has been proposed to employ them for the temporary production of a light for signalling purposes. Further experience is needed to gauge the true practical value of these alloys.—Ironmonger.

NEW WRENCH AND CLAMP.

The interchangeable ratchet and socket wrench shown in the accompanying illustrations is manufactured by the Bay State Tool Co., 98-100 Beacon street, Worcester, Mass., and is an extension of the line of ratchet wrenches

Interchangeable Ratchet and Socket

which has been described in these columns. By means of interchangeable bushings five sizes of wrenches are obtainable in one. By reversing the bushing when inserting in the wrench, a socket wrench is obtained. Two sizes of sets are included in this line, set No. 2 consisting of a wrench with a 1⅛-in. hexagonal opening, and the four bushings, with openings of ¾, 13-16, ⅞ and 1 in. Set No. 3 consists of a wrench with 1⅞-in. hexagonal opening and four bushings, with openings of 1⅛, 1¼, 1⅜ and 1½ in. Fig. 2 shows the tool used as a socket wrench.

The feature of the Bay State Lightning clamp, which is also illustrated, is the quick adjustment, which is obtained by means of an eccentric nut,

Bay State Lightning Camp.

through which the screw passes. The screw is of slightly less diameter than the nut, so that when the nut is turned by means of the butterfly handle the screw slides easily. When the eccentric is brought around to seize the thread of the screw the clamp acts like any other. The screw is so loose when released by the nut that it slides by gravity. The body of the clamp is double ribbed throughout and consequently cannot get out of alignment.

BRASS AND COPPER TUBING.

The raw materials for brass tubing, says the Valve World, about one-third spelter (unrolled zinc) and two-thirds copper, are first melted in a crucible. The proportions of this mixture may be varied according to the quality of tube desired. After being thus melted and mixed, the composition is poured into a mold and around a bar that is supported in the mold, thus producing a hollow casting. This casting, when cooled, is removed from the mold and taken to the drawing room.

The machine for drawing the tubing has somewhat the appearance of a long trough. In the centre of it is permanently fastened a support for holding a die, through which the casting is drawn, the outside of the tubing being thus formed. The inside of the tubing is formed by a mandrel of proper size placed inside the casting, this mandrel being held in position by a long bar. The casting is clutched on one end by a clamp , or "dog" as it is called, and is then drawn through the die and over the mandrel, which operation reduces its size and at the same time gives it a finish. This drawing process is repeated again and again, each time through a smaller die, until the tubing is brought down to the diameter and thickness required. As drawing has the effect of hardening the metal, it is necessary that the tubing should be annealed after each drawing; otherwise it would become so hard and brittle as to break while being drawn. Annealing consists in heating the metal to a red heat and then allowing it to cool gradually.

PLUMBING NOTES.

The corporation of Mount Forest have awarded the contract for about a mile of mains extension to the water works system to J. P. Noonan, hardware merchant, Mount Forest.

* * *

Lead pipe made from old lead is superior to that made from new metal. The small amount of tin and antimony in old lead strengthens the pipe and renders it more non-corrosive.

* * *

As a result of the recent fire in that town, Summerside, P.E.I., has decided to have at the earliest possible date an adequate system of water works. The electric light plant will also be restored, and both works will be owned and operated by the town.

The James Robertson Co. are securing additional room for their plumbing supply business at Toronto by the removal from their ground floor premises of the Simonds Canada Saw Co. who after December 1 will be located at 103-109 Adelaide street west, Toronto.

* * *

W. H. Meredith, sales manager for the Monarch Brass Mfg. Co., Toronto and Port Colborne, is calling on the plumbing trade in Montreal and Quebec this week. The doubling in size of the Monarch plant has given them a very substantial increase in business.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 2, 1906.

Everything in brass goods is away up. On account of the uncertainty existing in primary markets, the majority of makers prefer not to quote prices except on application, but in all cases, considerable advances are shofn. So long as the present high prices in copper continue, the situation in brass goods will no doubt be unchanged.

In iron pipe, the supply houses report that the shortage in all sizes up to 2 inch is being more keenly felt, all the time. Moreover, there does not seem to be any relief in sight, and it is expected that, before many weeks are over the scarcity will be still more pronounced.

General business is rushing, the demand for heating supplies being especially brisk.

RANGE BOILERS—The recently advanced prices for copper boilers are held firm. Sales are good. We give prices as follows: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon. $29.50; 40 gallon, $32 net.

LEAD PIPE—No change has taken place in market conditions since our laest report, and we are still quoting prices as follows: 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—A good demand is being maintained at the following discounts from list: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent.; 3½ in. to 6 in., 72½ per cent.; couplings, ¼ in. to 2 in., 55 per cent.

IRON PIPE—The shortage continues and is daily becoming more acute. Our quotations are as follows: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, black pipe, 1-4 inch, 62 per cent.; 3-8 looked for. At present we quote: inch, 62 per cent.; 1-2 inch, 71 per cent.; 3-4 inch and upwards, 73 per cent. Discounts on galvanized pipe: 1-4 inch, 47 per cent.; 3-8 inch, 47 per cent.; 1-2 inch, 61 per cent.; 3-4 inch, and upwards, 63 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 $36; 2 inches, $50. The discount for inch, $22; 1 1-4 inches, $30; 1 1-2 inches, black pipe is 71 per cent., and for galvanized, 61 per cent.

SOIL PIPE AND FITTINGS — A moderate trade is reported. We still quote the following discounts: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Nothing new has transpired and we continue to quote: Bar solder, half-and-half, guaranteed, 25c.; No. 2, wiping solder, 22c.

ENAMELWARE—Business is active, and prices very firm owing to the high quotations ruling for pig iron. We quote as follows: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65; plate E11 and E21, 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.2[illegible]; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

ANSWER THIS QUESTION:

In your judgement is it essential that every closet connection to soil pipe stack should be provided with a Breaksyphon?

If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a Breaksyphon, and give the reasons why it would not be required

For the best answer received by December 1, we will send a cheque for $5.00 and to every one sending a satisfactory reply for publication we will give a year's subscription to Hardware and Metal. Send in a reply at once and answer the question as fully as possible.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, November 2, 1906.

New lists on brass goods are now out and quotations are from five to ten per cent. higher on the various classes of work. Compression work remains at 60 off on half inch but all others are 50 per cent. Cushion work is 10 per cent. and fuller work 70 off for half inch, and others 60 per cent. Flatway stop and waste cocks are now 60 and roundway 50 per cent. All special 10 per cent discounts for gross lots are to be cut out in future. All standard valves are to be 52½ per cent. and quick opening valves 65 per cent.

Large sizes of iron pipe have been advanced materially, but the smaller lines have been moved up only one cent per hundred feet. In the States fittings have been advanced but no similar move has taken place locally as yet.

Business continues remarkably lively in both plumbing and heating goods.

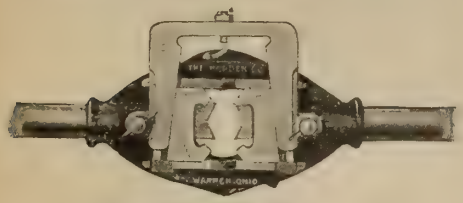
LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 5½c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—The shortage still continues. One-inch black pipe is now being quoted at $4.46, and one-inch galvanized at $6.10. Full list in current market quotations.

IRON PIPE FITTINGS — New lists are as follows: Cast iron elbows, tees, crosses, etc., 62½ per cent.; cast iron plugs and bushings, 62½ per cent.; flange unions, 62½ per cent.; nipples, 70 and 10 per cent.; iron cocks, 60 per cent.; Canadian malleable, 30 per cent.; malleable unions, 65 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain or nickel-plated, 65 per cent.; cast iron floor, 75 per cent.; hook-plates, 62½ per cent.; expansion plates, 67½ per cent.; headers of branch tees, 62½ per cent.; ring hangers, black, 75 per cent.; galvanized, 65 per cent., standard list.

GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.



RADIATORS—Quotations have advanced about ten per cent, as follows. Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain very firm as follows: Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE—We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25: plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

Cluff Bros., Toronto, have gotten out a novel picture post card announcing the calls to be made by their Eastern and Western Ontario travelers, Messrs. Wilson and Groff. The card shows a photographic reproduction of the salesmen rushing a shipment of "Daisy" boilers, iron pipe, valves and fittings to their customers via the automobile route.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

"Ideal" Carriage Heaters

Warm Feet

Many people drive in winter for pleasure, and others because they can't help themselves.

Whether on business or pleasure, cold feet spoil any drive.

Many farmers put a hot brick in the bottom of their sleighs, but if the drive is long, the brick is not of much use, as the cold is only felt worse after a temporary toasting.

Warm Sellers

It is predicted that we will have a long, cold winter this year ; this means a big season for Carriage Heaters.

If you want the lion's share of the business, stock **"Ideal" Carriage Heaters.** They ***sell***, because they're everything a good heater should be ; economical, handsome, perfectly safe, simple, and of a shape that makes a practical foot-rest, as well as a heater.

For further particulars, ask our travellers, or write us.

WE ALSO STOCK "IDEAL" COAL,
FOR USE IN THIS HEATER.

It mixes batter for Cake with much better results than the old hand method.

Booklet of cake recipes goes with each machine.

The bowl of the Universal Cake Maker holds 4 quarts of batter. All parts are heavily tinned and well finished.

The Universal Cake maker can be used as an egg beater and cream whipper.

Universal Bread Maker

DOES ITS WORK IN 3 MINUTES

Made in two sizes.

No. 4—4 to 6 loaves. No. 8—8 to 10 loaves.

When you sell Universal Goods you make a liberal profit. They are easy to sell too.

The Louis XV

We are now manufacturing in Plate this popular pattern, and are using to do so the same dies as we use for making it in Sterling Silver. This necessitates, particularly in the fancy pieces, a certain amount of hand fashioning, which gives the pattern an individuality not possessed by the ordinary machine-made pattern.

Below we give a list of the individual pieces made and the list prices for same. Prices stated are per dozen.

		A1 or Extra Plate	*Gilt Extra*
Spoons			
	Tea	$1 75

The TORONTO SILVER PLATE CO., Ltd.

Silversmiths and Manufacturers of Electro Silver Plate

WEST KING STREET - - TORONTO, CANADA

E. G. GOODERHAM, Managing Director

The Universal Steel Range is constructed to suit the requirements of the Canadian Trade. **BUILT LIKE A STEAM BOILER AND WILL LAST A LIFE TIME.** It has all the requisites suitable for a Farmer's Range. Will burn a 29-inch stick, and both the fire box and fire box door are unusually large to admit of rough and coarse wood. Lots of room on the top and in the oven to do the busy morning's work.

RETURNED
Nov/19/06
to Ottawa
Cut Book No. 5-7
Page No. 78

Made with
18 and 20-inch Ovens

Both sizes
Burn 29-inch Wood

This Range with coal will cook and bake perfectly and no trouble to retain a fire day and night. When this Range is connected to Hot Water attachments the grates and all other linings can be removed without disturbing the water front.

The linings can be changed from Coal to Wood or vice versa in five minutes without the removal of a bolt.

Now Mr. Dealer is not this a grand feature, for in most of Ranges to change the linings from Coal to Wood is an awful job, particularly after it has been in use for some time. In the Universal Favorite the woman of the house can change the linings herself so simple and perfect is the arrangement.

The Universal Favorite has more REAL features of Merit and more good talking points than any other Range on the market.

Manufactured by

FINDLAY BROS. CO., LIMITED

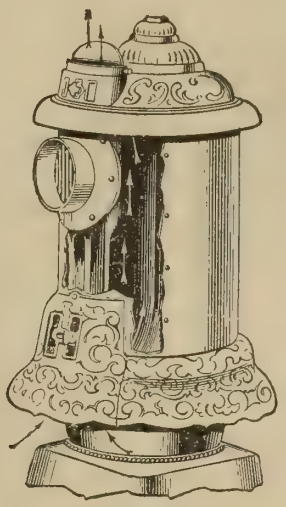
Makers of the smoothest and best fitted Stoves in Canada



Western Agents: Rattray, Cameron Co., WINNIPEG

The "Good Cheer" Oak

NEW SERIES

Single and Double Heater

SECTIONAL VIEW.

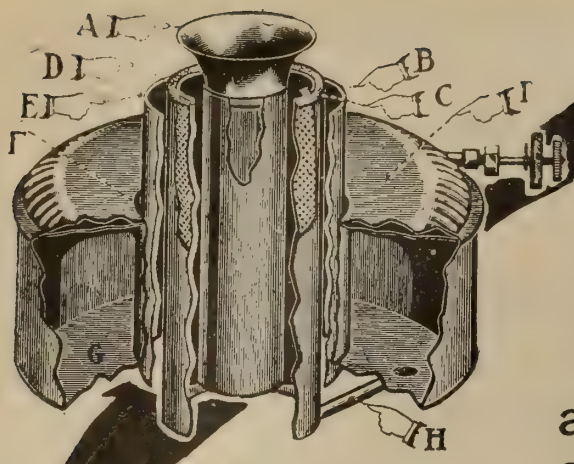
Supplied with Feeder if Required

REAR VIEW.

Made in two sizes —either Single or Double Heater

No. 54, 13½ in. Firepot

No. 56, 15½ in. Firepot



This handsome Oak exactly fills the want between the low-priced heater and the more expensive base burner. The double-heater attachment we are able to include at a very small advance over price of a single-heater Oak, and is a feature which will be appreciated. Its construction as illustrated in the Sectional and Rear Views shows what a powerful heating adjunct it is.

Body of Stove is of heavy polished steel, handsomely nickel trimmed. Large feed door with good sized mica lights, making it a very cheerful stove, while screw dampers in both upper and lower doors make it easy to regulate the fire.

A shaking ring draw centre grate is provided, as also a good sized ash pan.

THE JAMES STEWART MFG. CO. Limited

WOODSTOCK, ONT.

Note Construction of Grand Safety Burner

A—Flame Spreader. **B**—Air Space outside of Wick Tube. **C**—Air Space inside of Wick Tube. **D**—Wick. **E**—Outside Casing to Burner. **F**—Air Space between Fount and Outer Casing. **G**—Fount for Oil. **H**—Feed Pipe conducting oil from Fount to Burner. **I**—Shield resting on top of Fount with Air Space underneath.

ALUMINUM OIL HEATER

The heater that attracts attention, that holds the interest, that is overflowing with selling points.

People live on the floor, not on the ceiling. Yet in using other oil heaters the upper half of the room is hot—the lower half cold. Not so with the Aluminum Heater.

A Stationary damper across the centre of the stove throws the heat **downward** at will. Do you note the significance of that—the unique possibilites in it? **It radiates the heat from the bottom and sides** just like a base burner.

Get in line now with the shrewdest and most successful dealers in the United States and Canada by ordering the Aluminum Heater—either of your jobber or us. Let us send you our booklet. We will be glad to.

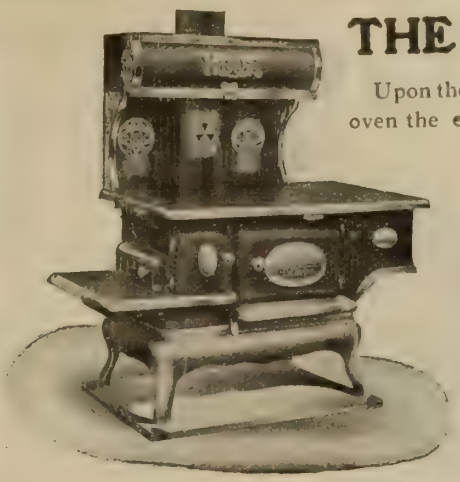
S S S

That's what

The Joy Malleable Range

is

Stay Satisfactory Sort



All ranges are made to cook and bake, and all ranges made in Canada will cook and bake. The manufacturer who would make one that wouldn't would be the biggest kind of an idiot. Almost all ranges will cook and bake equally well at first, but right here is "**the parting of the ways.**" Stay Satisfactory Sort will go right along — improving with use — but the "**Unsatisfactory Sort**" keeps declining until it is soon out of business. Stay Satisfactory Ranges can only be made of **Steel** and **Malleable Iron**, riveted together, making joints forever tight.

Dealers, why not sell your customers **S S S**

TEES & PERSSE CO., Western Distributors, Winnipeg

CHAS. H. FOX, Agent for British Columbia, Vancouver

THE OVEN

Upon the efficiency of the oven the entire usefulness of a range depends. In

THE EMPIRE QUEEN RANGE

a high degree of success has been achieved. As a result the oven of this range applies heat evenly on all sides; thus perfect baking is made possible. Such good workmanship as this must tell in "stove-buying time" and it **does** tell. If you have never sold **The Empire Queen Range** resolve to change your policy in the future. It will pay you. **Send for Booklet.**

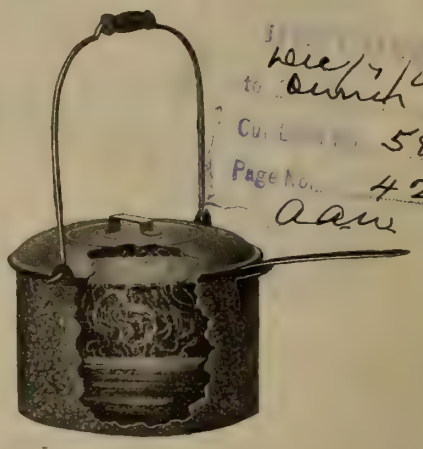
One Woman said "it is the best cooker I have ever seen."



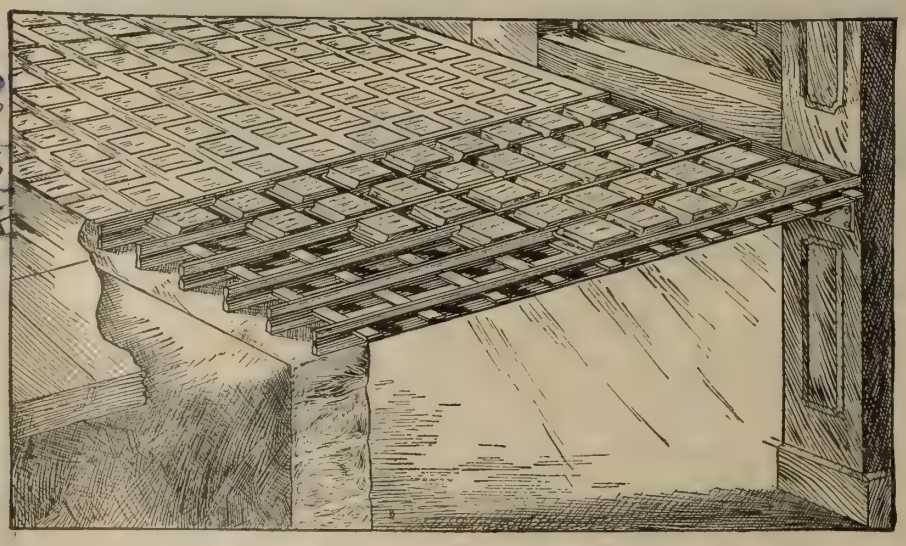
Patented

OUR "FAMOUS" QUICK-SELLING TRI-USE COOKER

Can be used in various ways, viz., as a double boiler for cooking cereals of all kinds, as a steamer for vegetables, puddings, stale buns, bread or cake, or as two separate saucepans, etc.

Sufficient room has been allowed for the steam to circulate between the two saucepans and under the outer cover into the inner saucepan, thus cooking the food by steam, making it appetizing and more easily digested.

Patented



The Tri-use Cooker is a great seller and every one of your customer's should have one. Introduce it and follow results.

How to Buy Horse Nails

If you are not particular, just order the number of boxes and the size required, and take whatever brand the wholesale dealer may have in stock. But if you want the best made or sold in Canada, without any exception, you will not make any mistake in specifying on your future orders that you want the "C" brand Horse Shoe Nails made by this Company.

You can do all your farrier trade with the "C" brand. They will fulfill the most exacting conditions required as tests of quality. They are of the best designs, especially made for Canadian use. Have the finest hardened bevelled points, which will penetrate easily into the hardest hoofs; they will not bend in driving, nor will the heads fly off on striking an obstruction. This is because they are hot-forged from a special quality of Charcoal Steel Nail Rods, made for our purpose, and imported direct by us from Sweden. It is the best material known or used in the world for the purpose of making horse nails. We challenge any maker in the world to give better results than are obtained by the use of the old reliable "C" brand Horse Nails, which has been made in Canada for the past forty years, and is the standard for quality to-day among all its competitors.

All the leading wholesale hardware dealers have them for sale, or will accept orders for same at our discounts (40, 10 and 7½ %), plus freight. Your orders are respectfully solicited.

Too Expensive For My Business!

BUSINESS SYSTEMS LIMITED
SYSTEM THE SECRET OF SUCCESS
TORONTO

Any retailer who says that about Business Systems, is laboring under a delusion.

The size of a business is the factor that determines the cost of installing Business Systems.

Business Systems are, proportionately, just as much an economy for the smallest retail store as for the largest factory.

■ ■ ■ ■ ■ ■

In different businesses, Business Systems are designed to fit different ends.

In your business, Mr. Retailer, Business Systems, instead of being "too expensive," are time savers and an actual economy.

You can understand why a system that posts your books and writes out your bills at the same time, is economical, can't you?

That's only one of the things Business Systems will do for you.

■ ■ ■ ■ ■ ■

Let us tell you more.

Drop us a post card and we will send you all the details.

It will only cost you a cent to know more.

The Best Laid Out Store

is the one which displays the most goods.

There are very few men who can describe just what they want, but if they see it sampled on a shelf box they can point it out. Which is the easier—for a man to point out the article he wants, or for you to untie half a dozen packages to show him what you have in stock?

Your salesmen should be employed in selling goods, not in looking for goods, in untying packages and tying them up again.

Shelf Boxes improve the appearance of your store 100%.

The Bennett Steel Shelf Box is the best box on the market in Canada or the United States.

It has galvanized steel sides and bottom, and thus saves at least 20% shelf room. The steel is not nailed to the wood front, but is locked in by our own patented process.

The Bennett Box is more durable than a wooden box. It has been tested for fifteen years and we have never heard of one man who was dissatisfied.

Note the "lip" on box, this renders it dust proof. Write for catalogue and price list.

CAMERON & CAMPBELL, SOLE MANUFACTURERS **TORONTO**

HARDWARE AND METAL, Picton, Ont.

Toronto.

Dear Sirs—I wish to thank you for the number of enquiries received through the condensed advertisement which I inserted in your paper, advertising my Hardware and Tinware business for sale. I certainly consider your columns a good medium for advertising any business of this nature.

Yours truly,
A. H. ILLSEY.

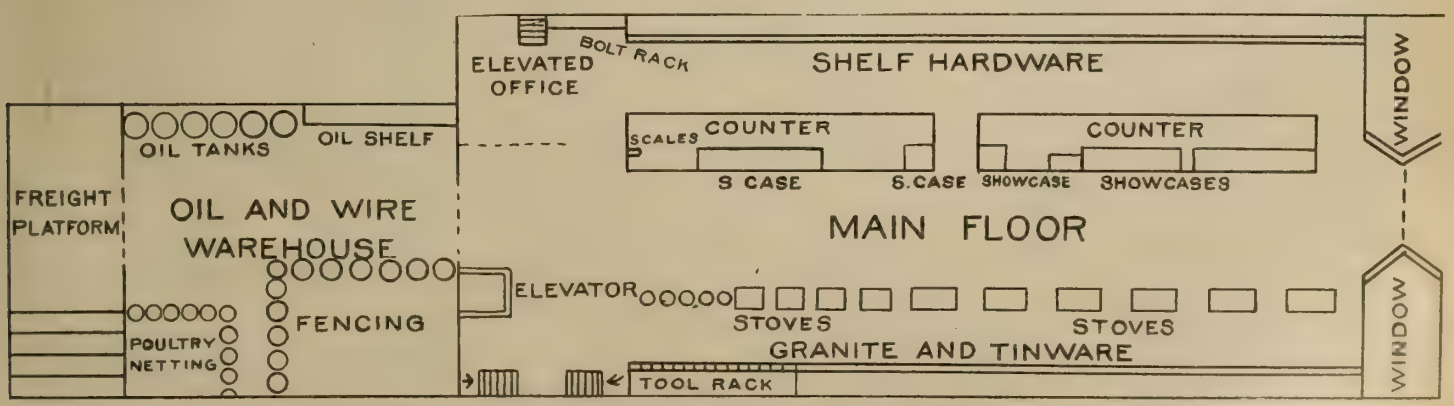
INTERIOR STORE ARRANGEMENT

A gentleman who intends to establish a hardware store in a Western Ontario town has written asking if Hardware and Metal will answer questions of interest to the hardware trade. He begins by asking: "What suggestions would you give to a hardware merchant intending to open a store 24x60 feet in size?"

The publishers of this paper invite readers to ask as many questions as possible. For some months we have been publishing "Our Letter Box" and some very interetting information has been brought out in reply to questions asked—interesting not only to the merchants seeking information but to the entire trade. Any matter which puzzles any one in the trade should be sent to us and replies will be promptly published.

The arrangement of store interiors is an interesting subject and this week we give a floor plan and photo showing the arrangement of a successful store in one of the smaller towns in Western Ontario and invite correspondence and suggestions from dealers who are planning to build new stores or rearrange old buildings in keeping with modern store arrangement.

Next week we will give a floor plan plan drafted on the size suggested by our correspondent together with some ideas gathered by one of our staff who has made a close study of hardware store arrangement in the leading American cities as well as in all parts of Canada.



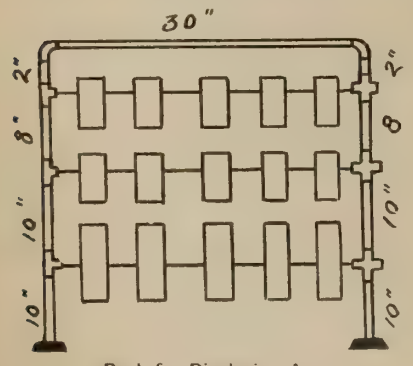
E. M. Shildrick's Store at Paris, Ont., recently purchased by Wilson & Koening, formerly of Mitchell.

DESCRIPTION OF PARIS STORE

The accompanying engraving and floor plan, illustrate the store of Wilson and Koening, Paris, Ontario, until a few months ago conducted by E. M. Shildrick. The store is situated in the centre of the buisness part of Paris which has a population of 4,000 of whom nearly 1,500 work in the factories.

The site of the store is 120 x 25 feet, the main floor of the store being 20 x 60 ft. The building is two storeys high, with a ten foot basement full size. At the rear, and attached to the main building is an iron covered warehouse for storing oils and wire. The store has two large plate glass windows, with an entrance of double doors, in the centre. Prism glass is used above the plates, and windows extend to within 24 inches of the pavement, the bottom of the window on the inside being flush with the bottom of the glass.

On the right hand side, coming in the door, is located the shelf hardware. Counters are on this side only, on them being placed three eight foot show cases, and three smaller ones. The shelving, and boxes, how cases and all wood work are finished in natural wood. The boxes are assorted sizes and are divided by partitions. The back end of this side of the store has a full set of pigeon holes, where is kept bolts, coach screws, etc. On the left side is a row of Imperial Oxford ranges and the stock of base burners and oak heaters. All stoves are kept on stove trucks for convience. The shelving on this side of store is divided into nine sections, and contains the nickel plated goods and aluminum ware, granite ware, and tin ware, at the end of this shelving is situated the fork and shovel rack, and stairway leading to second floor, at the rear end of main floor in front of the



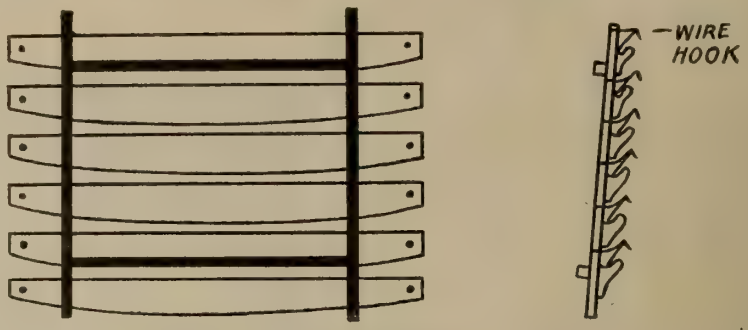
Floor Plan of Wilson & Koening's Store at Paris, Ont.

elevator, which is cased in, is situated the mixed paint shelving, which reaches from floor to ceiling, making a fine display to a person coming in the front door.

The office is suspended from the ceiling at the rear end corner. It is always comfortable even in the coldest weather, because of its location, although a little unhandy on account of stairs leading up to same. But the floor space is increased by having the office elevated. In the rear of the main floor is a door opening into the fireproof warehouse, which is made of a skeleton frame of scantling, covered with corrugated galvanized iron, making a cheap and durable building. And as the building contains all the oils, this arrangement of inflammable goods lessens the fire hazard a third. Behind the warehouse is a platform, the top being on a level with the floor of the store, making it very easy for one man with a truck to handle alone any goods received. The elevator situated at rear of main floor is accessible from either floors or basement, so that freight can be handled conveniently.

The second floor is reached by either stairway or elevator, and is divided into two departments. The one is used for cleaning second-hand stoves—a splendid paying department—as all second-hand stoves are put in a first-class condition. All parts inside are painted white and red, outsides well polished, and nickled parts cleaned up nicely. Sometimes they are sent away and re-nickled. All old micas are also replaced with new ones. The remainder of this floor is used as a second-hand store show-room. On balconies on either side in this room are stocked goods not in season. This room is kept in as good and clean a condition as the main floor.

In the basement is stocked all sizes of rope on revolving reels, the ends extending to first floor. Suspended from the ceiling on shelves and racks along the walls is the stock of building paper,



Rack for Displaying Axes.

handles of all kinds, and band, hoop and round iron. In the centre of the floor is a double-sided box rack, where a complete stock of all kinds of ploughshares are kept. This is usually a stock that gets mixed up, but with a system of numbering each box to correspond with the number opposite each name of share, with a complete set of names kept on a large card on side of rack, this trouble does not occur. A No. 500 Sunshine hot-air furnace heats the building, while both floors and basement are well lighted with gas.

USEFUL DISPLAY FIXTURES.

Bridge Bros., Thessalon, who are known in all parts of Canada for their enterprising methods of doing business some time ago forwarded rough sketches of display fixtures which they have used to advantage in their business.

The first one is an axe rack made of half inch iron pipe and fittings and is made to hold fifteen axes by using the following material: Two pieces of pipe 8 inches long, four 10 inches long, three 32 inches long, one 30 inches long, two 2 inch nipples, two elbows, three tees, three crosses and two flanges. It makes a very effective display rack and can be made any size to suit the number of samples to be displayed, it can be fastened to the counter or floor, and practically takes up no room, to remove the axes it is only necessary to pull out the iron bars.

Fixture for Displaying Saws, Curtain Poles, Etc.

The second is a rack for displaying cross cut saws or curtain poles and can be made in a very short time. It can be suspended from the ceiling or placed against the wall, while it is also useful for a window display. Bridge Bros. use it for displaying curtain poles in the summer season, and cross cut saws in the winter season. When displaying saws a short piece of wire (stove pipe wire will do) should be attached to the frame, and hooked over top end, and by use of the wire the saws can be given a proper slant forward. The rack is made of four pieces of one inch square strips, 42 inches in length and six pair of wood curtain pole brackets.

When sending the drawings Bridge Bros. stated that they did not desire to compete for any prize but were "always pleased to receive new ideas and just as pleased to let the other fellows have ours." Hardware and Metal's artist is at the service of all readers of the paper and we invite other merchants to forward rough drawings of display fixtures used by them and not generally adopted. By this exchange of ideas the columns of the paper can be made of greater value to each subscriber.

A proposition for the erection of a $400,000 rolling mill plant at Sydney, N.S., with a bonus of $50,000 upon completion, exemption from taxes for thirty years, and reduced water rates, is being considered by the council. Should the proposition not be considered, the company may locate in Montreal.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

SIGN WRITING OUTFITS.

A. R. Dundas, plumber and tinsmith, Cobourg, asks for the name of some firms selling reasonably priced outfits for writing window cards.

Answer—The Martel-Stewart Company, Montreal, are Canada's leading show card dealers and they can probably supply outfits at prices to suit almost and purpose. B. Cairns, rubber stamp manufacturer, 23 Adelaide street west, Toronto, sells cheap rubber outfits as low as $2.50 per set. Thayer & Chandler, 160-4 West Jackson Boulevard, Chicago, supply expensive air brush outfits to cost about $25.—Editor.

WORLD'S RUBBER SUPPLY.

An enormous increase in the demand for India-rubber has taken place in the last few years, and last year the production was not less than 60,000 tons. Until recently the supply of rubber came chiefly from two sources—the forests of Brazil, which contain the tree known as Hevea brasiliensis, furnishing the Para rubber of commerce which commands the highest price, and the forests of Africa, where climbing plants, generally of the Landolphia class, also furnish rubber. The increased demand for caoutchouc has led to the extensive planting of the Para rubber tree, especially in Ceylon and in the Federated Malay States. Systematic cultivation and improved methods of preparation are responsible for the fact that the product of the cultivated tree, which begins to furnish satisfactory rubber when six or seven years old, is now commanding a higher price than the product of the wild tree in Brazil. It is estimated that within the next seven years the exports of cultivated India-rubber from Ceylon and the Federated Malay States will reach between ten and fifteen million pounds annually, and that after fifteen years they may exceed the exports of the so-called wild rubber from Brazil.

PUBLIC-SPIRITED HARDWARE MERCHANTS
NO. 2

Among the new towns in Saskatchewan that have sprung into prominence during the last two or three years none is more widely known than Saskatoon. Its marvellously rapid growth and the confident faith of its citizens in the bright future which they expect for their city have already become almost proverbial throughout Western Canada. That future seems to be assured not merely nor chiefly by the undoubted natural advantages of the city but by the enterprise and energy of the people of Saskatoon; and foremost among those who have devoted so much time, energy and originality to the promotion of the interests of the city is Frank R. Oliver, President of the Board of Trade of Saskatoon.

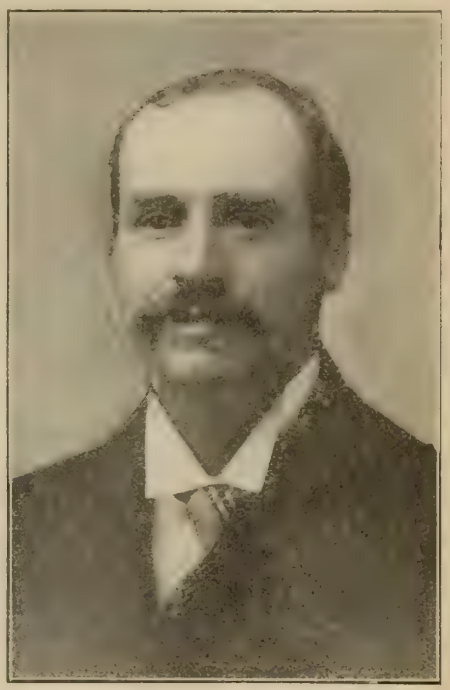
Frank Oliver has not been very long in the West but he is a well known character. In 1903 he resigned his position as assistant manager of The Percival Plough and Stove Co. of Merrickville, Ont., to move west to Saskatoon to open a hardware and furniture business which has in three years grown to large proportions.

In 1903 Saskatoon was a small hamlet of 150 people but those 150 people had visions of great things to come. From the first Mr. Oliver was a moving spirit in the Board of Trade although he took no part in municipal politics.

When there seemed a liklihood that the G.T.P. would pass Saskatoon by, it was Frank R. Oliver who organized a deputation to go to Ottawa to secure the road. That deputation was successful. It was Mr. Oliver who first suggested the amalgamation of Riverdale, Nutana and the town of Saskatoon to make the city of Saskatoon. It was Mr. Oliver who was perhaps the most active in the enterprising but unsuccessful campaign to make Saskatoon the Capital of the new Province of Saskatchewan. If Saskatoon is to-day one of the best advertised towns in the West this is largely due to the originality of Frank R. Oliver who has been the man responsible for the unique and highly successful methods which have been followed.

FRANK R. OLIVER,
President Saskatoon Board of Trade.

Mr. Oliver has not neglected his hardware business to promote the interests of his city: that is quite evident from the rapid growth of his trade. It is often the busy man who can be relied upon to find time to do a little more and Mr. Oliver is that type of the busy man. He is brim full of enthusiasm and confident that what Saskatoon has accomplished in the last three years is but an earnest of the development to be experienced in the next three. "I have unbounded faith in Saskatoon," said he recently to Hardware and Metal, "believing that it will be the wholesale centre of Saskatchewan as it is now the hub of the hard wheat belt of Western Canada."



C. EDWARD WOOD,
Recently Appointed General Sales Manager Dominion Cartridge Co., Montreal.

NEW SALES MANAGER.

We are glad to be able to introduce to the Canadian hardware trade this week, C. Edward Wood, the recently appointed general sales manager of the Dominion Cartridge Co., whose likeness appears on this page.

Mr. Wood was formerly associated with the widely-known Simmons Hardware Co., one of the largest hardware jobbing houses in the United States. Six months ago, he was appointed to the management of the United States business of the Dominion Cartridge Co. In this capacity his success was instant and his abilities have been recognized by his promotion to be general sales manager of the same firm.

If this is Canada's growing time, it must be admitted that the Dominion Cartridge Co., are keeping fully in pace with the country's progress. The organization of an extensive sales department is another step forward in the history of the company. "Dominion" goods are now being sold in always increasing quantities, in every part of the world, and Mr. Wood will have a wide field for displaying his energy and resource.

M. F. IRWIN,
Appointed Manager of the McClary Mfg. Co's Branch at St. John, N.B.

McCLARY COMPANY CHANGES.

John J. Foote, manager at St. John of the McClary Manufacturing Co., London, has been promoted to an important position in the home office. He will be succeeded by M. F. Irwin, who has been general sales manager at London and in the employ of the McClary Company for seventeen years, during which time he has filled many positions. As an old traveller, with headquarters at Toronto and London, he is favorably known to the trade in all parts of Ontario.

SMELTING ORE IN TORONTO.

It is anticipated in the near future that Moose Mountain ore will be smelted at Toronto, where a proposition has been made for the utilization of a large tract of land at Ashbridge's Bay as a site for blast furnace and steel works. Mackenzie & Mann interests are at the bottom of this to afford an outlet for the extensive ores at Moose Mountain, in Northern Ontario. A furnace of 200 tons daily capacity is considered and it is expected that this will be in operation two years hence. The ore haul will be slightly less than 300 miles, and it is believed Toronto is ideally situated for this on account of its boat transportation facilities both east and west.

The Taylor Pattison Company's, saw mill, Victoria B.C., have started operations. It is one of the most complete and up-to-date mills on the Island with a cutting capacity of 40,000 ft. per day.

STOVES AND TINWARE

SOME GOOD CONTRACTS.

E. P. Paulin, Goderich, has sold to the trustee board of the New North St. Methodist church an entire new heating apparatus, combination steam and hot air. The auditorium and lecture room will be heated by warm air supplied by two No. 600 McClary "Sunshine" furnaces, and a steam boiler will be used as an auxiliary to heat the smaller rooms, library, vestry, chair rooms and class rooms. Cold air will be drawn from the auditorium at six different points, and instead of being piped to the furnaces will be conducted to the floor of the basement. The Goderich Signal says: "Mr. Paulin's practical knowledge of the requirements of the case gained for him the contract. Although a new comer in our business community, he has succeeded in gaining the confidence and good-will of a large constituency." In addition to the above $650 job, Mr. Paulin has just completed that of heating the Sovereign Bank at Goderich, and has succeeded in securing the contract for heating the Clinton branch of the same bank, at a cost of between $700 and $800.

PROFIT IN OLD STOVES.

Every stove dealer can increase the profit from his business by using the right methods. It is only necessary to reflect a moment to be almost astounded with the number of stoves in kitchens and used for heating in a given community that are in such bad repair that they are quite nuisances. A man is always looked upon as a public benefactor, says the Metal Worker, when he abates a nuisance. The stove dealer is not only a public benefactor, but a benefactor to himself when he reduces the annual out-of-repair stove epidemic. He can occupy this role by announcing in season and out of season on all occasions that he buys old stoves. Of course, if the old stove is bought a new one must be purchased to replace it. If he has paid a generous price for the old stove the customer is very much in the position of the man who could not look the gift horse in the mouth, and in consequence the price paid for the new stove will necessarily be satisfactory to both parties to the bargain. A little good judgment and some tact will enable exchanges of this kind to be made with satisfaction to all concerned, and at such a price that the old stove is practically a gift to the stove dealer. The old stove would have to be in a very bad condition if it could not be repaired and sold at the same price that was paid for it or a little more. It would not be a difficult matter for some salesman to impress on the mind of the buyer that the old stove, when it is repaired and in good condition, is being offered at the same price or a little more than was paid for it, making the new owner also pleased with the bargain. There is room for considerable good judgment to be displayed in this line of trade, and a visit to the room where the old stove is in use will give a pretty clear idea of its condition and the repairs needed before a price is set. It is not necessary for the price to be set at that time, but an invitation for the possible customer to visit the showroom and see the new stoves and arrange for a trade. The lazy man who waits for his customer to come to him will not be successful in this line of work. The active, energetic, alert, enterprising man, will not only find it profitable, but will also find work for his roofers, tinsmiths and plumbers, when he is on his tour to buy old stoves. This is the time to make the effort pay.

ABOUT PUDDING STEAMERS.

This is the time of year when visions of plum puddings insist on pressing themselves on our minds, and the busy housewife is already making elaborate preparations for her Christmas culinary efforts. In view of this, the hardwareman can easily do a little business in up-to-the-minute pudding steamers, if he has them in stock.

The M.B. Pudding Steamer is being energetically pushed by F. W. Lamplough & Co., the Montreal hardware importers. It consists of an enamelled bowl with a retinned cover, held with a patent wire clasp. The bowl is made of best quality enamelled steel, and is practically indestructible. Its use is very simple, and no directions are required. It is put in a saucepan with a close-fitting cover, and a little water to generate steam. The steamer should not be covered with water, for, as its name indicates, it is a "steamer" and not a "boiler." Burning is impossible, and good luscious puddings are always produced.

Among the novelties peculiar to the season, this is one of the best selling, and, as the price is moderate, there is no doubt but what a good demand can be worked up in any part of the country.

WALKER COMPANY TO ENLARGE.

The Walker Steel Range Co., Grimsby, state that there is no truth in the report that they intend withdrawing from the Western Canada business. Their trade in the west, they state, has wonderfully increased since last year as well as their local business, so much so, that they will find it necessary to increase their plant next year. Their business connections in the west will remain as heretofore.

MADE IN CANADA STOVES.

A few weeks ago a representative of Hardware and Metal was in one of the hardware stores of Victoria, B.C., when a lady came in to buy a stove. The lady was well-dressed and the dealer concluded he would sell her one of his highest priced stoves.

He had a very fine looking assortment of ranges, but the lady refused to even look at them, because they were not "Made in Canada." I believe Canadians can make just as good stoves as the Yankees, and I think you should at least carry one Canadian line in stock," she remarked as she left the store.

There are few lines in which Canadian made goods are not the equal of those which are imported, and in such a line as stoves, dealers should handle at least one Canadian line in order that customers may compare it with the imported goods.

NOVEL AMERICAN RANGE.

It is nothing unusual for an American manufacturer of kitchen stoves to announce that he has devised something entirely new for the edification of his consumers, but it is something out of the ordinary to hear of a new range, possessing five or six different features, most of which are strangers to the stove trade according to a New York paper. Such a range has just appeared in Albany, and its leading features are worthy of a moment's consideration. Perhaps the most interesting feature of the range as at first observed is the novel method of putting coal on the fire by means of a lift-up top plate. A section of the top is made in T-plate form, hinged on the back, and by means of the wire handle, the plate can be raised, thus opening up the top of the firebox. The plate can be adjusted at two different heights, without allowing the covers or their centre to fall.

Another feature is the top oven plate. This is made in one piece, but it has a central bridge or arch in the centre to take care of any unusual expansion and prevent the oven plate from bulging or cracking. It also divides the products of combustion as they are discharged from the firebox, preventing the heat from being drawn to one side of the top and thereby starting the flow of gases down the end flue in one broad sheet, so that the back end of the oven is uniformly heated.

This arch also has an important function to perform in connection with the oven ventilation. The oven is ventilated by an entirely new system, the air being taken into the stove through an upright row of holes in the front, then passing into a chamber formed by a plate placed back of the fire brick and resting against the front oven plate. The air is drawn the full length of the chamber through its upper portion, then turns and passes into the lower chamber, entering the oven in a highly-heated condition. After circulating through the oven it is drawn into a hollow chamber in the top oven plate, which, being intensely heated, helps to increase the rapidity of the circulation. The air passes out of this chamber into the flues and then out of the range.

The oven door drops instead of swings so that the baking or roasting can be drawn out on the inner surface of the open door, where it can be examined without difficulty. The door when opened forms a shelf practically 14 inches wide on a level with the oven botton. This door is balanced by a long coil spring entirely outside the range and protected by a handsome nickel-plated cap.

Another important feature of this range is the hot-air draft. This chamber is made of sheet metal which heats quickly, so that the air before reaching the fire is raised to a high temperature. By supplying very hot air to the fire

the combustion is improved, less clinkers are formed and a saving in fuel is effected. The swinging hearth plate is fitted to be tight and thus prevent air reaching the fire except through the damper. The latter has an absolutely flat surface where it joins the hearth and the damper is held tightly against the hearth by a spring knob.

What is referred to as a new departure is the curved water front, which it is claimed, will heat water quickly and intensely as well as in large volume. The curved face extends out over the firebox slightly at the top, so that the fire strikes the face of the water front all the way from the bottom to the top, and the curve results in an increased amount of surface exposed to the fire. The ashpit extends a little further than the firepot, so that the pan catches all the ashes without the necessity of using any chutes and slides to convey them to the pan.

The handle to operate the check damper is placed in a convenient position, and can be operated without reaching across the top of the hot range, while the indicator shows whether the damper is open or closed.

Among other features are cemented oven bottom, graduated sheet flues, double covers and lined centres, new style bottom plate made in two parts to avoid cracking, and clean-out for the flues which is directly in front, behind the removable name plate.

THE ADVANCE ON STOVES.

The higher prices now ruling on stoves and other heating goods, announced recently is by no means as great as the advances made in the United States by stove manufacturers following the rise in the price of pig iron. The large stocks carried over by some manufacturers as a result of the mild winter a year ago prevented Canadian manufacturers from making an advance in proportion to the increased cost of raw materials and labor.

The retail trade having their fall orders placed and much of their stocks in hand, are now in a position to demand better prices from their customers and when they require to re-order to "sort up" they will still be able to make as good profits as in former years.

Manufacturers are having their troubles in keeping their foundries and workshops going owing to the difficulty in securing shipments of suitable pig iron. Those using malleable have the same difficulty as, despite the fact that several new malleable foundries have been established, the demand is so great that supplies cannot be secured with any degree of promptness even on old contracts. The scarcity of labor, especially molders, has also handicapped the manufacturers this fall and the one thing which has saved many of them in their shipments has been the exceptionally fine weather up to the present time.

Owing to the peculiar conditions which existed last winter many dealers have been conservative in buying this season. The rise in prices and the possibility of a shortage due to two causes, scarcity of raw material and labor and the expected heavy winter will, however, justify those who bought liberally in their foresight.

EFFECTIVE STOVE ADVERTISING

How are you advertising your stoves and ranges—with an eye to getting fall and winter trade? Are you advertising at all? Now is the time when activity has to be written everywhere in your store. Don't be satisfied to use last year's methods unless you are dead sure those methods piled up profits. Get the clerks around you and ask for ideas on stove advertising.

If one clerk has an original notion take it and look at it from all sides. If it is better than your own don't hesitate to adopt it because the clerk was the source from whence it came. All ideas are not hatched in one head, neither do they flock there. One of our notions is: "Something ought to be done to create more stove sales."

Sales Should Be Encouraged.

The fact stares right at every stove dealer that certain people only buy a range about once in ten years. Do stoves last too long, or do people put up with poor stoves too long? It makes little difference, which, because it is only a matter of opinion. The fact to be dealt with is that more orders are necessary.

People change sewing machines before they fall to pieces, same with furniture, baby carriages, etc. Why not stoves? Why shouldn't a person get a new stove say every four years, and have an allowance made for the old one. How would you start the ball rolling? Just this way:—

How to Make a Start.

Write a neat little folder on the stove question, stating everything you know about stoves, but state it in the briefest form possible. Look at the subject from the consumers point of view and explain away the mistaken conception, that because a stove will take a coat of polish it is safe to entrust a loaf of bread too. Then get down to the matter of costs. Show that $30 or $40 expended on a stove, say every four years means only $10 per year, or about $1 per month for satisfaction.

Show to the consumer that they can add to that the "second-hand" rebate which brings down the satisfaction cost to a mighty small mark. Then come along with your ranges and their merits and their prices, and leave the rest to common sense. One page of the folder might be after the following style:

The folder could be sent out early in December, and a note worked in to the effect that a suitable Christmas gift would be to present yourself with a new range.

STOVE ADS CRITICIZED.

J. & T. M. Piper, Fort William, run a forty line single column ad in the "Times-Journal." The ad is worded to the point, but errs on the side of brevity. Consolidation of ideas is all right, but it dosen't mean sacrifice of necessary information.

Ross & Matthews, of Cannington, Ont., have a good ad but it is miserably set. Dealers should refuse to pay for smeared printing, broken letter impressions, etc. Ross & Matthews are right on the track of what has been suggested on this page regarding old and new stoves, but the chances are their statements went to nought.

Westville, N.S., has a lively advertiser in Crockett Bros. They place a big pile of enthusiasm back of the Monarch steel range, and include telling lots of information too. The cut shows up well and the matter is displayed with fair taste.

A. A. B.

DEAR FRIENDS,—

Coal is burning in that kitchen range of yours and heat should be circulating, but it is possible some of it is escaping.

After a stove has seen three or four years' continuous service it is bound to have a few scars—just in proportion to the goodness of the stove at the outset.

These scars may be in the grate (affecting the burning), in the flues (affecting the smoking), or in the oven (affecting the heating).

I am not posing as an M.D. who would say "Doctor up!" My recommendation is that of a dealer who says "Remove!" It is cheaper to put in a new stove, because if you get the right "new one," it will work just that much harder for you. Then if you decide to install one of my ranges I'll make an allowance for the old one, which will considerably reduce the price.

On the next page will be found a description of ——— range with net price cash.

BY-LAW QUASHED.

By the action of the courts in Montreal, the by-law regarding early closing of the stores, which was adopted by the city in 1905, becomes null and void. Under the recent by-law all stores, with the exception of fruit, tobacco, liquor and such stores, were forced to close their doors on Wednesdays and Thurs- the retail merchants in the city were days each week at seven o'clock.

At the time it became law, most of in favor of it, but some, did not appear to be of the same way of thinking, for they remained open the nights on which the law said they should be closed and action was taken against them. One of the protesting firms took action against the city, declaring that the by-law was unconstitutional. It was showed by them, through their attorneys, that the by-law was null and void, because the enabling act, 57 Vict. ch. 50 was ultra vires of the powers of the Provincial Legislature, as an infringement of the duties of the Federal power to regulate trade and commerce of the Dominion. Further, the by-law exceeded the power conferred by the said enabling act.

The contention of the city was to the effect that the by-law was enacted for the benefit of public order and morality. The right rests with the provinces to regulate taverns, and to adopt regulations which will preserve public order and decency and prevent drunkeness. The court held, however, that there was no such question in the present case. It was not an instance where there would be any justification for interference on the part of the Legislature, and besides this, the by-law adopted by the city was in excess of the powers conferred. Consequently, as the case stands now, it is not against the law for the retail trade to keep open after seven o'clock on the evenings mentioned.

MANUFACTURERS AND TIN PLATE DUTY.

Some time ago there was published in "The Canadian Manufacturer" an article which painted in very rosy colors the prospects of the Canada Tin Plate and Sheet Steel Co. of Morrisburg. From this it has been supposed by some that the Canadian Manufacturers' Association are backing the application of this company for a duty of 33 1-3 per cent. on the sheet metals which it proposes to manufacture.

There is, however, no connection between the paper referred to and the Canadian Manufacturers' Association, which has its own official organ, "Industrial Canada." No utterance of "The Canadian Manufacturer" necessarily voices the sentiments of the Association, and, in the present instance, we have every reason to believe that they were quite contradicted.

Tin plates, Canada plates, black sheets and sheet steel form the raw material for so many manufacturing industries in this country, that the adoption of the tariff in respect to these articles would seriously cripple many branches of Canadian industry in their competition with foreign makers. As has been frequently pointed out in these columns, the innumerable qualities, sizes and gauges consumed by these manufacturers would make it impossible for the Morrisburg plant to supply the market, and foreign metals would still have to be imported. This would make the cost of such raw material a third, and the finished product fully a quarter greater than it is now. When manufacturers, even now, are forced to watch their costs very closely in order to compete with foreign manufacturers, it is easy to see what their position would be in such an event.

Although the Canadian Manufacturers' Association as a body is not opposing the duty on tin plate, the sympathies of its individual members must be against an action which would necessitate a general revision of the tariff, with its attendant uncertainties, even if it were proposed on behalf of a bona fide concern.

XMAS GOODS OPENING DAY.

An idea which has been taken hold of in the States by the Hardware trade is to have an Opening Day for Christmas Goods, similar to the Millinery openings held by the dry goods stores. So far we have not heard of any Canadian stores adopting the plan but there is a good opportunity for some to make a good advertising feature of the suggestion.

The live merchant has his plans well laid for holiday business and is about ready to bring his goods and his customers together in order to arrange to transfer some of the ready cash from the customer's purse into his till in exchange for the select goods he has gathered from the various jobbing and manufacturing houses. Before inviting the customers to visit the store, however, every detail should be arranged for the proper display of the cutlery cases, the silverware, skates, sleds, house furnishings, etc., not only in the window but in the inside of the store. Everything being ready the public should be invited by circulars and local newspaper advertising to attend the Christmas Goods Opening.

It is wise to encourage early buying as it will ease off the rush which is bound to develop during the closing days of the holiday season. Then, too, it helps to break in and give experience to the extra employes added to the staff for the Christmas trade.

Arrangements should be made to store articles sold for delivery before the holiday and it will pay to spend something extra on having all parcels wrapped up daintily in extra nice paper. The delivery and packing departments should be organized early in order to avoid friction at the last moment when everyone has plenty of work to do and it costs money to look after the minor details.

Mark all goods in plain figures if possible and have reserve stocks handy so that broken lines can be speedily replaced. Another good plan is to group articles of a similar value together on tables where they will sell themselves.

The time to plan special sales such as the holiday season calls for is from two to three months ahead. But if any merchants have neglected it they should give the Christmas trade their undivided attention during the coming week so that they will have at least a full month's benefit of the trade which comes at this season when most people's pockets are full and purse strings are held more loosely than at any other time of the year.

THE METAL SITUATION.

Not much change is noticed in the condition of the Montreal Metal market this week. Price changes have been few, but all in the direction of higher figures, and, taken all in all, the situation shows even greater strength than at any time during the present boom.

Pig lead has been fluctuating from day to day but always tending higher, with the net result that we are now quoting figures ten cents above the previous record. A large demand and short supply are responsible for this jump to a much greater extent than speculation, as bull operations have practically ceased their efforts, owing to the stringency of the money market. Tin, antimony and zinc spelter remain unchanged.

The past week has been a remarkable one for pig iron inquiries. The largest tonnage since early spring has been reported, some very large orders having been received from Winnipeg and the West. Some iron is now to be had for present import, and Montreal dealers are quoting on Middlesborough for direct shipment. The scarcity of low phosphorous iron is acute, in all the producing countries. Hematite iron, in Old Country markets have advanced 1 to 2 shillings during the week and are very difficult to obtain at that.

For some time past, Canadian jobbers have been selling Canada plates at prices which barely covered the cost of importation, under the circumstances. During this week, however, an advance of 15 cents has been made on black Canadas and the market is firm at this new price.

The Canadian agents for one of the largest British manufacturers of galvanized iron have been advised by their principals to discontinue selling, until they are in receipt of further instructions. Judging from this information, it would seem that galvanized sheets will again advance before long.

THE VALUE OF WINDOW TICKETS.

There isn't a merchant who will contest this proposition: "Show windows are valuable to attract trade." You display your goods and if they are attractive, you will do some business. How much more you could do with price tickets properly displayed is perhaps a question, but there is no question but what your trade would be increased, and materially.

There are many people who are backward in the matter of pricing goods. They feel some little compunctions against asking questions and then going away without buying. You will find this trait much more highly developed in the man than in the woman. The latter leans a little too much the other way.

If you have a good location, there are people passing your store every minute in the business day. The prices plainly shown talk to them as they pass, and they strike home. The average man knows little about bargains. He may think an article looks too high-priced for his pocketbook, but the actual price may be within his reach.

Use the tags and the cards with prices in plain figures throughout your entire establishment, and they will increase your sales. New goods are going on the shelves and tables. Plain marking helps the customer and it helps the salesmen.

Plain marking is taken to mean one-price, and in this day and age of sharp competition, no merchant can afford to play favoritism with his trade. One price is the surest safeguard. If you have sliding scales you run the risk, and a big one at that, of offending your good customers.

Women talk and they gossip on trade matters as well as on social. Overcharge one and let her find it out and your competitor will control her trade hereafter. Use price cards. They may be had cheap. Use home-made cards and learn to make them neat and attractive. If you are a failure at it, your print shop will gladly accept the order, or you can send to the city for samples. Tag everything. If you have not been following this practice, try it and you will find your returns for the next year better by a material percentage.

Here's a Good Thing

E. J. Bennett, the popular Ontario sales representative of the Gurney-Tilden Company, Hamilton, is responsible for the following:

"If two trains are made up, one leaving Toronto and travelling 50 miles an hour and the other leaving Hamilton travelling 40 miles an hour, each leaving at the same time, which train will be nearest to Oakville when the trains pass?"

The distance between Toronto and Hamilton by rail is 39 miles. Oakville is 21 miles from Toronto and 18 from Hamilton.

A year's subscription to HARDWARE AND METAL will be given to the thirteenth person sending in a correct answer to the Editor.

MERCHANDIZING METHODS.

The merchant who adopts a policy that is calculated to give him a high standing as to reliability—and the term embraces a good many essential qualities—is on the road that will lead him to success, with the greatest amount of satisfaction and the fewest number of grey hairs. And this brings us to the conclusion that the steady method of merchandizing is the best. The direct result is the acquirement of a reputation, which represents that element in a business known as good will, and which, if given a capital value, would show big dividends.

On the other hand we have the man who erects his business structure upon the uncertain foundation of sensational sales. He may build high—and, doubtless, often does—but at no time has he acquired any standing with the public that has an appreciable quality of permanency about it. He holds his trade just so long as he continues to hand out bargains, and loses it just so soon as someone steps in with a little better bargain proposition than he has been offering. Cheap prices, not quality at commensurate values, form the keynote of his advertising, and the only way in which he can get the people into his store is by always having bargains to hold out as an attractive force. When reliable goods are desired, and quality is the paramount consideration, the stores that have applied themselves to the up-building of reputations for uniform reliability get the trade.

We do not wish to convey the impression that bargains, in their proper place are undesirable. Every store has a bargain sale at intervals for the purpose of clearing out lines that are backward, or liable to become passe as to styles. Some have a special sale of this kind every week, but it does not interfere with the regular methods of merchandizing.

The Union of German enamelled-ware works have decided in conference at Cologne upon a general increase in sale prices of from 7 1-2 to 10 per cent, and have thrown the trade open at these higher rates until the end of March. A committee of the union are still considering the question of improving the organization of the association and of arriving at an understanding with foreign enamelled-ware manufacturers.

J. H. Simmons, Talmo, Ga., has secured a patent, the object of which is to provide a lock that may be adjusted for either the right or left hand side of a door, that may be used as an automatic latch which may be opened by either knob, and that may be used as a lock operated from the inside knob, and locked from the inside of the door without a key, but which cannot be unlocked from the outer side excepting with a suitable key.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

CURTAILMENT OF CREDIT

Interesting Letter from Secretary J. E. McRobie, of the Western Canada Retail Hardware Association.

Secretary J. E. McRobie of the Western Retail Hardware and Stove Dealers' Association writes Hardware and Metal as follows :—

Winnipeg, Oct. 26, 1906.

Editor Hardware & Metal:—In perusing your issue of the 20th the letter of "Manitoba General Merchant," it struck me that if we had a few more members with the same backbone, it would be a good thing for the dealers in general.

The trouble with all or nearly all of our members is just the want of that necessary ability to say no and stick by it. As you are aware, in order to get an expression of opinion from the members regarding the curtailment of credit, I sent out to each one a circular letter requesting an expression of their views on this much vexed question; but although 350 letters were sent out, I regret to say that I received only 56 replies. Of this 56 one half dozen came out straight with the statement that they would close their books, but the others replied that they were willing to do so if their opposition would do the same. These same dealers are the ones who cry out the loudest against the credit system, who say they want to have it abolished at any cost, but who are afraid to take the first step lest they lose a little trade. I don't doubt that the trade lost would be of the same kind as that mentioned by "Manitoba General Merchant," trade that has never been of any profit at any time. Merchants are carrying many accounts from year to year, and in the long run are losing everything. If the Association is going to be of any service to the members in this respect, it is time for them to come together in their local meetings and do something. There could not be a better year than the present, for with the country prosperous there is no reason why the average farmer cannot pay his account to date, and still have enough money left to pay cash for his goods from now until April 1st.

The Association in many other respects has been a benefit to most members, it has made it's usefulness felt, and I fail to see why it should not be able to grapple successfully with the credit problem. I am sure that if each dealer would approach his competitor with this end in view, he will be surprised to find how eager his competitor will be to fall in line.

J. E. McROBIE.

* * *

Mr. McRobie and "Manitoba General Merchant" have each written sound common sense for the consideration of the western hardware trade. At every meeting of the Western Hardware Association considerable time is taken up in the discussion of the evils of the credit system as it obtains in the West. Whenever two or three retailers meet together at any place this topic is sure to be discussed, there is more discussion of this subject than of any other and yet it always ends in—talk. "Manitoba General Merchant" and Mr. McRobie have pointed out very effectively that what is wanted is not more discussion of the subject but a little more backbone on the part of the average merchant. "Manitoba General Merchant" has succeeded in shutting off all credit during the winter months and he has succeeded in an average Western village no better and no worse than the others in which other dealers who have less backbone have failed in the undertaking. Many have failed because they have never made a determined and intelligent effort.

An association of hardwaremen can do very much towards grappling with this credit problem provided its members have a little backbone : if they haven't it could do nothing were the Angel Gabriel its Secretary. It is up to the individual hardware merchant.

SETTING UP STOVES.

In speaking on stoves and their troubles before the Missouri convention of the Retail Hardware and Stove Dealers' Association, F. P. Hans, a stove salesman, said :

"I have come to the conclusion that the safest way to figure is that every one who buys a stove is going to set it up wrong, when they have the setting up to do, and then run it just as it should not be run.

"I went to see a range once which the dealer said was put up right to good flue with 7-inch pipe to a good chimney having a tin 7-inch flue hole, and found the parties had lacked one joint of pipe and helped out by using a 6-inch joint held in place by driving pieces of rock as wedges at both ends of the 6-inch joint, and I have come across many cases just as bad.

"There are few if any stoves or ranges made to-day that won't work if set up properly to a good flue and good fuel used There is no mystery about heating an oven. It becomes hot because the heat from the flame and hot gas coming from the fire box are absorbed by the plates of the oven as they pass over and around it and is radiated on the other side or into the oven. Then what is needed is a clean fire and draft enough to draw the heat around quick enough so that most of it is not absorbed by the top of the stove or range and top of the oven before it reaches the bottom of the oven. Ashes allowed to accumulate on top of the oven do not help the baking. It is well to remember that a stove or range of itself has no draft. That is a thing separate and apart from the range or stove and should be furnished by the flue to which they are connected."

MANUFACTURERS' MUTUAL INSURANCE.

At a recent meeting of the Provincial directors of the two mutual fire insurance companies organized by the Canadian Manufacturers' Association, it was decided to make the necessary application to the Dominion government for a bill incorporating them.

The new companies will be known as the Eastern Canada Manufacturers' Mutual Fire Insurance Company, and the Central Canada Manufacturers' Fire Insurance Company. The former's head office will be in Montreal, and the latter's in Toronto. It now looks as though a third company will be formed, the Western Canada Manufacturers' Mutual Fire Insurance Company with headquarters at Winnipeg.

CITY AND TOWN ASSOCIATIONS.

In many towns and cities in Ontario and the West local associations of retail hardwaremen have been formed and fortnightly or monthly meetings are being held. In one Western Ontario city the trade has gotten together and as a result of a couple of month's work can report many advantages gained, both in the way of stopping injurious price cutting on staple lines but also in overcoming unfair competition from jobbers who have not been content with trade from retailers but have sold liberally to consumers. These local associations should be formed wherever two or more hardwaremen compete for local trade.

MARITIME MERCHANTS INTERESTED.

A prominent Nova Scotia hardwareman writes that he has followed with interest the discussion on wholesalers selling to retail customers in Ontario and Western Canada. "This evil is very prevalent here and I hope in time it will be stopped," he adds. The writer is in favor of organizing a Maritime Retail Hardware Association and if other Nova Scotia, New Brunswick or P.E.I. dealers are willing to join such an organization the name of the Nova Scotia merchant can be secured from the editor of Hardware and Metal.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Copper Rivets and Burrs—Discounts changed.
Lanterns—Advanced.
Wire Nails—Now quoted at $2.20 base.
Pig Lead—Advanced to $5.25 and $5.35.
Canada Plates—Black plates up 15 cents.
Bar Iron—Now $2.15 base f.o.b. Montreal.
Old Material—Lead, 4c.; machinery cast scrap, $16.
White Lead—Advanced 25c.
Linseed Oil—Increase of 2 cents.
Iron Pipe—New discounts issused.
Brass Wire Sure Rivets—5 per cent. discount.
Brass Wire Clinch Rivets—5 per cent. discount.

TORONTO.

White Lead—Advanced 25c. as predicted.
Linseed Oil—Now quoted at 56 and 59 cents.
Gum Shellac—Advancing.
Iron Pipe and Fittings—Sharp advances.
Brass and Copper Wire—Now 45 per cent.
Copper Rivets and Burrs—Lower discounts.
Copper Pitts—Now 33 1-3 per cent.
Copper Kettles, Tea Pots and Boilers—Now 40 per cent.
Screen Doors—1907 quotations higher.
American Padlocks—New list announced.
Builders' Hardware—Belleville 10 per cent. advance.
Cutlery — English, German and Canadian manufacturers advancing flat ware prices.
Canada Plates—Advanced 25c. per box.
Hoop and Sleigh Shoe Steel—Advanced.
Old Material—Copper, brass and lead higher.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Nov. 9, 1906.

It is said on the street here, that the fight which is now on between the Dominion Coal Co., and the Dominion Iron & Steel Co., is bound to effect the hardware manufacturing interests of this country, especially those which consume rods and billets. Already, several of the Steel company's blast furnaces have to close down owing to the lack of coal, and, if the dispute, as expected, continues much longer, the entire plant had to close down owing to the lack of this would mean to the hardware trade will be clear, when it is considered that the Dominion Iron & Steel Co. are the largest producers in Canada, of the raw material used by many of the leading hardware manufacturers. Even now, there is a decided shortage of raw material, with the result that dealers have for some time past been receiving their shipments from jobbers, in incomplete shape. Wire nails are the latest to become scarce, this being due to the shortage of rods. Current prices this week are up to $2.20 per keg.

Montreal jobbers have now readjusted their quotations on lanterns, and the price-cutting war in these articles is over. The advance made is a big jump, and present quotations are just as we predicted some weeks ago.

AXES—Sales of good magnitude are being made right along. We continue to quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES—Trade conditions are unchanged, and prices remain firm as follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—The advance recently declared by the manufacturers has come into force here, and prices now ruling are: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES—This line continues to be a good seller. We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Shipments are becoming more numerous. We quote prices: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—As predicted the price of copper rivets and burrs has gone up, owing to the big advances in primary markets. We give the following discounts; Best iron rivets, section, carriage, and wagon box black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half pound boxes.

HAY WIRE—We still quote: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS—Our discounts remain as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.; Felisterhead, brass, 25 per cent.

BOLTS AND NUTS—Bolts are still scarce as ever, and they will become even more so, if the supply of raw material is curtailed by the dispute between the steel and coal companies. Discounts quoted are: Carriage bolts, ⅜ and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—A brisk trade is being carried on. Discounts are C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—The scarcity reported last week continues, and is becoming more acute. Prices have again been advanced, and we are now quoting $2.20 per case f.o.b. Montreal.

CUT NAILS—Prices are unchanged, at $2.20 per keg base, f.o.b. Montreal.

HORSESHOES—The market is very firm, on account of the scarcity of raw material. We quote as follows: P. B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Trade is becoming more and more active, as the close of navigation approaches. Prices are unchanged.

CEMENT AND FIREBRICK—We are still quoting as follows: "Lehigh" Portland in wood, $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05 Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—Shipments are large, and the heavy demand is keeping stocks very light. The following prices are firm: 5-16 in., $4.30; 3-8 inch $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT—As pig lead is higher than ever, the market is remarkably firm at the following figures: Shot, packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION — Quotations remain: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50, 10 gauge, $23.50.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Nov. 9, 1906.

Advances are again reported, the chief lines this week being Belleville builders hardware, comprising locks, knobs, door pulls, latches, handles, etc., from 50 to 45 per cent. Copper rivets and burrs, kettles, teapots and boilers are also subject to lower discounts.

American padlocks, referred to last week are now quoted as follows: all steel lines selling at $2 or less, 15 per cent; at from $2.01 to $2.50, 12½ per cent; over $2.51 10 per cent. All brass or bronze selling at $4 or less, 25 per cent; $4.01 to $5.00, 20 per cent; $5.01 to $6,000 15 per cent; over $6.01, 10 per cent.

English nickel-plated cutlery has been advanced 5 per cent and the recent increases on German ware are now being marked up. Higher prices are now looked for on Ontario Silver Company lines and "1847" goods. Jobbers report a great difficulty in securing supplies of several lines, orders being as much as two months behind. Children's sets is one line which is very short and many orders have been shipped to retailers minus the goods.

Christmas goods are being called for and shipments of all holiday goods are very large. The close of navigation orders are also being sent in by upper lake dealers and a rush in these shipments will develop during the coming fortnight.

Nails are very firm at $2.10 flat and the cutting off of rod supplies owing to the closing down of the Dominion plant at Sydney will tend to make nails even firmer. In some quarters, however, the trouble in Nova Scotia is connected with the expected tariff changes. With the exception of rods for wire mills the Nova Scotia mill is not a factor in the Ontario market.

AXES AND HANDLES—Demand keeps up well and the season's trade will make a record total.

CUTLERY AND SILVERWARE — Large holiday orders are being filled by jobbers, although shortages in many lines have developed. Advances are being made by English, German and Canadian manufacturers.

SPORTING GOODS—Demand for shooting materials is falling off some and some sizes of loaded shells are cleaned out. Skates are included in every order.

CHAIN—We continue to quote: 1 inch, $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

RIVETS AND BURRS—Copper rivets are now 27½ per cent. and copper burrs 15 per cent.

SCREWS—Demand keeps up to the limit of the factories output.

BOLTS AND NUTS—Short stocks are still the rule with plenty of goods looked for after the beginning of the new year.

TOOLS—A heavy trade has been done in mechanics' tools and the demand is still brisk.

SHOVELS—Demand is brisk and dealers are sorting in snow shovels.

LANTERNS — Cold Blast lanterns are now quoted at $6.50 per dozen. Shipments of lanterns, lamps and all lighting goods are extraordinarily large. Higher prices can be looked for on brass fixtures.

EXTENSION AND STEP LADDERS —Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING — Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS—We quote $2.10 base, with no rebate. The market is very firm.

CUT NAILS—We quote: $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—Call for horse blankets is general and shipments are large. Bells are moving better, especially to the lumbering districts.

STABLE FITTINGS—This line is being included in most sorting orders and cow ties are in good demand.

BUILDING PAPER—Trade is brisk and shipments large.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES, WOOL AND FURS—Prices for hides have declined 1-2c.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 9, 1906.

It is almost impossible for metal dealers to keep track of prices. Every day sees fluctuations in primary markets, and finished products have begun to move up in a most bewildering way. The heavy demand keeps up, and everything is humming on the metal market.

Copper is the same in price as last week, though, if anything they are more firmly held. This metal seems to have more than recovered anything lost during the period recently when speculators ceased operations for want of money. The same may also be said of tin, which remains stationary, at the same figures.

Pig lead scored one more advance this week, and, at time of writing, is being quoted at the unheard of price of $5.25 per hundred pounds. It is stated by local merchants that, when winter prices come into force, even these record-breaking figures will be bettered.

The pig iron situation is about the same, as at our last report, with quotations really firmer than the published figures show. Although not changed from last weeks, the very lowest price now obtainable for immediate shipment in car lots, could have been made last week on smaller easier terms. Inquiries during the past week have concerned double the tonnage sold during any other week during the past six months.

In the United States, the output of ahead as the third and fourth quarter of phorus iron), is now being sold as far some furnaces (especially of low phos- 1907. English foundry iron has not increased in price, during the past week, but hematites have shown an advance of 1 to 2 shillings and are daily becoming more difficult to obtain, owing to the large inquiry from American consumers.

Canada plates (black), have again been subject to an advance, and are quoted 15 cents higher than last week. This is the only change of importance in sheet metals.

Bar iron has advanced 5 cents, and a couple of changes have been made in

the quotatians of old material, with others pending.

COPPER—A recovery has been effected and the quotations given for the past two weeks, are now firmer. Our prices are: Ingot copper, 24c. to 24½c.; sheet copper, base sizes, 31c.

INGOT TIN—This metal has also recovered its strength and the following prices are stronger this week, 46 to 46½c. per lb.

ZINC SPELTER—Conditions are unchanged, and we are still quoting $7 to $7.25 per hundred pounds.

ANTIMONY—We continue to quote 27½c. to 28c. per lb.

PIG LEAD—Another advance has taken place, bringing quotations to another record: $5.25 to $5.35 per hundred pounds.

PIG IRON—Prices are unchanged, but conditions are firmer. We quote as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—We still quote: British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15½c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

GALVANIZED IRON—Prices have advanced and we are now quoting: Queen's Head, 28 gauge, $4.50 to $4.75; 26 gauge, $4.35; 22 to 24 gauge, $3.80; 16 to 20 gauge, $3.65; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet 28 gauge, $4.35 to $4.60; 26 gauge $4.20 to $4.45; 22 and 24 gauge, $3.65 to $3.90; 16 to 20 gauge, $3.50 to $3.75; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 and 24 gauge, $3.65; 16 to 20 gauge, $3.50; Gorbal's "Best Best" 28 gauge, $4.40 to $4.65; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.35 to $4.60. In less than case case lots 25c. extra.

CANADA PLATES—Still further advances have been shown in black plates. We are now quoting: 52's, $2.80; 60's, $2.85; 75's $2.95; full polished, $3.75 to $4; galvanized, 52:e $4.35; 60's, $4.60.

TIN PLATES—We continue to quote as follows: Cokes, base size, 1C 14x20 $4.15; charcoal, base size, 1C, 14x20, $4.40.

TERNE PLATES—We are still quoting $7.15.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6½c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

MERCHANT STEEL—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

BLACK SHEETS—Our prices remain: 24 gauge, $2.30; 20 gauge $2.25; 22 and 24 gauge, $2.30; 20 gauge, $2.25; 17 and 18 gauge, $2.25; 8, 10, 12 and 14 gauge, 42.55.

COLD ROLLED SHAFTING — Our prices are: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

BAR IRON—Owing to advances in raw materials, we are now quoting $2.15 base f.o.b. Montreal.

OLD MATERIAL—High prices this week being commanded by old lead and machinery cast scrap. New quotations will also soon be forthcoming on rubber, the matter at present being in abeyance. We quote: Light copper, 16c.; heavy red brass, 15½ to 16c., yellow brass, 12c.; light brass, 8½c.; lead, 4c. zinc, 4c.; machinery cast scrap, $16.00 wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubber, 8c. to 8½c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Nov. 9, 1906.

The usual conditions of firmness and scarcity continue with few changes. The market is much stronger than a week ago but the chief advance made is in Canada plates which are 25c per box dearer. Hoop steel is now $2.75 and sleigh shoe steel, $2.30. Changes have also been made in old copper, brass and lead.

English iron is selling well with good Canadian hard to procure and American off the market entirely. The Canadian furnces will not accept orders for delivery earlier than next summmer and, in fact, booking of all metals has practically gone out of style, as a result of the big advances made in the leading metals in recent months.

The trouble between the coal and iron companies in Nova Scotia will have little effect on the local market.

PIG IRON—Market continues active with English iron as practically the only selling. We quote as follows: Radnor at furnace $33; Hamilton and Midland off the market but quoted nominally at $23 for No. 1 at furnace. Londonderry, f.o.b. Toronto, No. 1. $24; Middlesborough, $23; Summerlee, $23.50.

BAR IRON—We now quote $2.25 base, f.o.b. Toronto, with discount of 2 per cent. net cash with some looking for conditions to ease off after New Years, but not much appearance of this at present.

INGOT TIN—Conditions are unchanged locally, but outside markets have strengthened. We quote: 45c. to 46c. per lb.

TIN PLATES—Buying is lively at the advance. Stocks are very light.

GALVANIZED SHEETS — Canada plates have advanced 25c. per box as predicted a week ago. Galvanized sheets are very firm and black sheets unchanged.

BRASS—Business is active and it is difficult to obtain deliveries. We quote: Sheets, 23c. to 24c. per lb.

COPPER—Stocks are rapidly being depleted. We quote prices as follows: Ingot copper, $24 per 100 lbs., and sheet copper $30 per 100 lbs.

LEAD—Stocks continue scarce and the market firm and active. We quote as follows: $5.25 for imported pig and $5.75 for bar lead.

ZINC SPELTER—Both outside and local markets are active and prices firm. We quote: 7¼c. per lb. for foreign and 6¼c. per lb. for domestic. Sheet zinc has been advanced 25 per cent.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 316 inch, $2.60; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—Trade is active at 27c. to 28c.

OLD MATERIAL — Dealers' buying prices are: Heavy copper and wire, 17 1-2c. per lb.; light copper 15c. per lb.; heavy red brass, 15c. per lb.; heavy yellow brass, 13 1-2c. per lb.; light brass, 9c. per lb.; tea lead, $3.50, per 100 lbs.; heavy lead, $3.75 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $12; No. 2 wrought, $6; machinery cast scrap, $15; stove plate, $11; malleable and steel, $6; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

United States Metal Markets

From the Iron Age, Nov. 8, 1906.

Advices from Cleveland show that some of the ore interests have opened their order books for the coming season and have entered a very considerable tonnage at advanced prices. The position of furnace managers who must now contract for ore consumption up to the spring of 1908 is not an enviable one.

The pig iron markets continue in an unsettled condition, with little doing in the Central West, where there is very little available. On the seacoast and the territory tributary to it foreign pig

iron is playing an increasing role. Aside from the Spiegel and ferromanganese, of which we always import some, and low phosphorus iron, of which at least one cargo of about 4000 tons has been sold at $26.65 delivered in eastern Pennsylvania, there has been one cargo of foreign Bessemer ordered at a shade over $23 delivered. The grades, however, of which the largest quantities are being ordered are Middlesborough and Scotch foundry irons. The English trade papers talk of purchases of warrants for American account aggregating 250,000 tons. This, of course, is very much exaggerated. So far as we can learn, shipments so far arranged during the whole of this movement will foot up about 75,000 tons, some of which has arrived or is afloat, and the balance is to come forward during the next two months. This is certainly not an alarming quantity and must be rather regarded as a welcome relief to embarrassed melters.

All our plants are being driven at top notch speed, which is reflected in the October records that are now being published. The mills of the Steel Corporation report the breaking of 121 records, of which 71 are to the credit of the Carnegie Steel Company. The blast furnaces of the Steel Corporation produced in October 1,008,433 tons, as against 999,103 tons, the best previous record, March, 1906. The steel plants made a record in October of 1,282,750 tons of ingots, as compared with 1,270,834 tons in March last.

With the exception of structural steel, the volume of orders keeps up at a tremendous rate, and runs in excess of current capacity, great as that is. Shipbuilders have booked four additional lake vessels, which call for 40,000 tons of plates and shapes, which have not yet been placed. There are some further large orders for steel cars in the market and some large requirements for locomotives have been placed or are being arranged for.

One of the leading Eastern makers of cast iron pipe has taken the largest order ever booked by this long established concern.

In tubes, some very important oil lines are being figured on, and there has come to hand an inquiry for 275 miles of 10-in. pipe for Burmah.

The principal bar iron makers of the Pittsburg District have advanced their prices to 1.80c., but some of them are figuring on a lower basis in competitive markets like Chicago.

From the Iron Trade Review, Cleveland, Nov. 8, 1906.

The cost of production of pig iron during the coming year, is certain to be considerably higher than during the year just closing by reason of the heavy advance in prices of raw materials. In the item of ore this will amount to about $1.80 per ton for Bessemer pig iron and $1.20 for other grades. The formal opening of the ore buying season early developed the fact that the advance was heavier than had been anticipated. It had been understood that this was to be 75 cents on Bessemer and 50 cents on non-Bessemer over this seasons prices, but in addition a change was made reducing the iron content of the ore so as to make the actual advance about 90 and 60 cents respectively. Ore is selling readily and the buying movement will be extremely brief and active.

Foreign iron continues to arrive in considerable quantities and is relieving the domestic demand to a certain extent though prices continue to rise. Furnaces generally are retiring from the market for the first half in occasional instances yielding to the demand to sell sparingly for third quarter.

Finished products, with the exception of structural shapes and plates, are eagerly sought and the pressure on mills continues strong. Light rails have advanced $1 per ton and cast iron pipe $2 per ton. The scrap market is active with general advances.

London, Eng., Metal Markets

From Metal Market Report, Nov. 9, 1906.

PIG IRON—Cleveland warrants are quoted at 57s 1 1-2d., and Glasgow standard warrants at 56s 7d., making prices as compared with last week 10s. 1-2d. lower for Cleveland warrants and 11d. lower for standard warrants.

TIN—Spot tin opened irregular at £194 15s futures at £195 15s, and after sales of 450 tons of spot and 300 tons of futures closed easy at £194 for spot £195 for futures making price compared with last week, £1 7s. 6d higher on spot and 17s 6d higher on future.

COPPER—Spot copper opened firm at £99 10s, futures £100 5s, and after sales of 100 tons of spot and 400 tons of futures, closed easy at £99 for spot, and £100 for futures making price as compared last week £1 17s 6d higher on spot and £2 2s 6d higher on futures.

LEAD—The market closed at £19 7s 6d, making price as compared with last week 5s. higher

SPELTER—The market closed at £27 10s, making price as compared with last week, 5s. lower.

London Hardware Trade News

London, Ont., Nov. 7, 1906.

John Foote, manager of the St. John, N.B., branch of the McClary Manufacturing Co., will return to the head office here, January 1, and take the important position of sales manager. Mr. Foote is a native of London, and has a large circle of friends in this locality who will be pleased to learn of his transfer. He has been at St. John for several years past. M. F. Irwin, of the London office, will succeed Mr. Foote as manager at St. John.

* * *

William Wyatt, who for thirty-seven years conducted a stove and tinware business here, left this week on an extended visit to the Western Provinces. Mr. Wyatt retired from business a year ago. He was a member of the London city council, and resigned from that body before leaving for the West. The vacancy was filled without holding another election. Under a new Act, the aldermanic candidate who, in the election at the beginning of the year, stood first on the list of unsuccessful candidates, could take the place of a retiring alderman, and Mr. William Scarlett of the Wortman & Ward Manufacturing Co. is, in consequence of this new Act, the successor of Alderman Wyatt at the council board. Both gentlemen have long been widely and favorably known among the hardware and metal trade.

N.S. Hardware Trade News

Halifax, N.S., Nov. 6, 1906.

Activity continues in the local hardware markets, and prices have a tendency upwards. Some lines have been advanced by the manufacturers, but the jobbers here have not as yet made any change in the listed prices. There is a good demand for black sheet iron, which is quoted at $2.40 for 24 gauge. The stocks of bar iron held here are very light, and is quoted at $2.30. Zinc is firm at 8 1-2c. for casks, and 9c. for less than casks. Galvanized iron is quoted at $4 to $4.50 for 26 gauge, and cast steel from 9c. to 13c. Sheet lead is quoted at $6.50 for rolls and $7 for smaller quantities, and lead pipe is jobbing at $7. Prices for tin plates rule about as follows: IX charcoal, $5 to $5.25; IC charcoal, $4.25 to $4.50, and IC coke, $3.80 to $4. There is a good demand for steel, iron pipe, and building materials in general.

* * *

The Dominion Iron and Steel Co. and the Dominion Coal Co. are in a deadlock over the supply of coal, and the trouble promises to assume very serious proportions. The Steel Co. claim that the quality of the coal supplied to the Steel Co. is not good enough for use at their plant, and as the Coal Co. has not seen fit to improve it, the big rail mill was closed down to-day, and the Dominion Tar and Chemical Co. may also close up. The business men of Sydney are greatly alarmed over the situation, as the closing down of these big works will have a most disastrous result on trade.

* * *

The tests of the steam fire engine "Alexandria," built by the Canadian Fire Engine Company of London, Ont., not proving satisfactory to the city, the latter declined to take the engine over, and it has been shipped back to London. The city will now probably purchase a Merryweather of 700 gallons capacity. John Starr & Son, and Clark & Macdonald, representing R. Wonham & Son of Montreal, both agents of the Merryweather, have submitted tenders to the city for a 700 gallon engine. The Waterous Engine Co. have also asked

leave to submit tenders for a 1,000, 700 and 500 gallon engine.

* * *

Several days ago a valuable find of coal was made about five miles from Sydney. The seam is on areas owned by E. W. Moseley and others, who intend to secure powerful drills and prospect thoroughly all over the property. The seam is four feet seven inches thick, and was discovered only seven feet below the surface. It is thought this will mean the opening of another colliery in Cape Breton.

B.C. Hardware Trade News

Vancouver, B.C., Nov. 1, 1906.

A direct steamer service from Canada to Mexico, with Vancouver as one of the home ports, will begin in March next. The vessels will each make twelve round trips per year, thus giving a bimonthly service. Vancouver and Victoria will be the B.C. ports, and Manzanillo and Vera Cruz the Mexican ports. The steamers will carry the British flag, and will be of not less than 3,500 tons carrying capacity. The Canadian subsidy of $50,000 is payable quarterly. The Mexican subsidy is $100,000 (Mex.) per annum. The term of the contract is for two years.

* * *

A big pressed brick manufactory is to established at or near Prince Rupert, when that city is permanently given headquarters. It is the intention to manufacture brick for use in the buildings that will go up in the city that is to be. The G.T.P. is said to be backing the project, and excellent clay deposits have been found in a suitable location for the purpose. All indications are that active developments will soon be noted at the new northern city. The first stock for the new hardware firm of which Thos. Dunn is to be manager, will go north in a short time.

* * *

The lumber mills are up against a shortage of cars, the railway company having issued orders that nothing but flats shall be given to load lumber, owing to the big demand for box cars at the present moment on the prairie to move the wheat crop. Even flat cars are welcomed by the mill men at present, for the trade is keeping up as strongly as at any time in the season. Not a mill but is months behind on its orders.

The returns of lumber scaled by the Provincial Government for the month of October show an increase over September, contrary to expectations, as at this time of year there is usually a lessening of activity in logging camps owing to bad weather. But many booms of logs held stored at up-coast points for some time were brought down the past month. The total scaled in October was 35,329,890 feet, as against 28,413,467 feet in September.

* * *

A big timber deal is reported from the upper country, whereby twenty square miles of timber lands on Crazy Creek, about ten miles from Revelstoke, has been sold to Messrs. Hood Bros. of Spokane, by the Eagle River Lumber Co. S. A. Mundy, the Three Valley lumberman, and Dr. McRae of Revelstoke, handled the transaction for the vendors. This is considerel the best tract of timber in the interior, consisting chiefly of cedar of fine quality, white pine and fir of high grade description. The new owners will in all likelihood build a mill on the Columbia river, possibly at Arrowhead.

* * *

To regulate the trade in red cedar shingles in the Eastern States, the market for most of the product from the coast States, the Shingle Association of Washington has decided on a shut-down from Dec. 22 to Feb. 1. Last year they closed down for two months, beginning Dec. 1. This year it is thought that the B.C. shingle manufacturers may be induced to join the movement, and the Washington State shinglemen will approach the B.C. manufacturers with that purpose.

* * *

Another copper mine on the coast, which promises to be a good second for the famous Britannia, the big Howe Sound producer, is that at Gribble Island, some 400 miles north of Vancouver. This property has been developed for some years past, and will next Spring be on the list of producers. The ore will be brought to one of the smelters on Vancouver Island. An advantageous feature of the Gribble Island ores is that they are in large measure self-fluxing, containing sufficient iron ore and limestone for that.

The Britannia people, who own the Crofton smelter on Vancouver Island, announce that a 600-ton furnace will be built to meet the demands on the smelter by the heavy shipments of ore which are to increase also. The present capacity of the smelter is 550 tons per day, a 350-ton stack and a 200-ton stack being used. A small fifty ton stack has never been used, but as the new 600-ton furnace cannot be ready for months, and there is plenty of ore at the smelter now, in dumps and bunkers, to keep the plant going, the small furnace may be blown in also.

* * *

The smelters and mines of the interior of the Province are in a bad way through the big strike of coal miners at Fernie, whence a large percentage of the coke for the various smelting plants comes. The Eugene mine is shipping high grade contrates to Illinois and storing low grades at the Trail smelter, which is shut down at present. The Granby smelter at Grand Forks is still running, and so is the Hall Mines smelter at Nelson, the West Canadian Collieries, with coke ovens at Lille, near Frank, having arranged to supply sufficient to ensure the smelter operating.

The Granby smelter at Grand Forks is endeavoring to increase its output again by returning to its full capacity of eight furnaces, six only having been operated for some time. Copper is now at its very highest, so that it is hardly likely a serious shut down will be anticipated. The Dominion Copper Co. is increasing its capacity at the Boundary Falls smelter by adding another copper furnace, the machinery now having arrived. The B.C. Copper Co., which has one large furnace in blast, will probably blow in the second giant furnace in a fortnight, and a third in a few weeks from that. The new furnace of the Dominion Copper Co. is to be the largest of any yet installed, though all of these big Boundary district smelters have very large equipment.

* * *

In building trade circles the difficulty to get lumber has been hampering work all season. There is, however, considerable new work commencing right along, and as a consequence builders' hardware is in good demand, and the merchants find trade correspondingly good. Prices are, of course, in sympathy with the world's markets, on the upward tendency. The present price of Manila rope here is 16 1-2c., an advance recently of 1-2c. Turpentine, with an advance of 25c., is now quoted at $1.25. Bar iron has gone up slightly on local market, the price now quoted being $2.75 base.

THE CALIBER OF A GUN.

There is surely no word in the nomenclature of guns, big and little, which has caused, and is causing, so much confusion in the lay mind as the word caliber. Evidence of this is to be found in the large number of letters which we receive, asking for the exact meaning of the word as used in its different applications. The majority of these letters indicate that the confusion arises chiefly from the use of the term in an adjec tival sense to indicate length, as when we say, a 50-caliber, 6-inch gun. The word caliber as applied to artillery signifies essentially and at all times the diameter of the bore of a gun measured diametrically from face to face of the bore, the diameter measured on the rifling being, of course, somewhat larger. A gun, then, of 6-inch caliber is a gun whose bore is just 6 inches. For convenience, and because the power of a gun, when once its bore has been decided upon, depends so greatly upon its length, artillerists are in the habit of defining the length of the gun in terms of the caliber. Thus, the 12-inch United States naval gun, which is 40 feet in length, is spoken of as a 40-caliber, 12-inch, the length being just forty times the bore. The 6-inch rapid-fire gun, as mounted on the latest ships of the navy, is a trifle under 25 feet in length and is, therefore, known as a 50-caliber gun. From this it will be evident that the term may refer either to the diameter of the bore, or to the diameter of the bore used as a unit of length. In the case of small arms, the caliber is expressed in hundredths of an inch, as when we say a 22-caliber or 32-caliber pistol, meaning that the bore is 0.22 or 0.32 of an inch in diameter.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Nov. 9, 1906.)

Room 511, Union Bank Building, Office of HARDWARE AND METAL, Winnipeg, Man.

Winnipeg wholesale houses report the biggest autumn trade on record in all general lines.

LANTERNS—The recent advance in wholesale prices is believed to have had some effect in stopping retail cutting in this line, as a general advance was necessary in all stores. Quotations are as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 base per keg.

PRESSED SPIKES — Prices are quoted as follows since the recent advance: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Discounts are quoted as follows since the recent advance in the price of copper rivets: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ¼, $7.20; ⅜, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—Business is particularly active at present in axes and handles. Prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Manila rope is steady at the recent advance. We are still quoting as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Quotations are as follows: Cartridges, Dominion R.F. 50 and 5; Dominion, C.F., 33½ C.F., pistol, p.c.; C.F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Prices are Bar iron (basis, $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—As noted last week, the price has been advanced to $5.85 per cwt.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The recent advance to $7.80 is likely to be followed by another as a result of the condition of the pig lead market.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Prices have been steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.; Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE —We quote prices: White lead, pure, $7; bladder putty in bbls., 2½c.; in kegs, 3¾c.; turpentine, barrel lots, Winnipeg, 96c.; Calgary, $1.03; Lethbridge, $1.03;

Edmonton, $1.04. Less than barrel lots 5c. per gallon advance. Linseed oil, raw, Winnipeg, 64c.; Calgary, 71c.; Lethbridge, 71c.; Edmonton, 72c.; boiled oil, 3c. per gallon advance on these prices.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

WESTERN TRADE NOTES.

Geo. D. Wood, of Geo. D. Wood & Co., Winnipeg, is still confined to his house through illness.

The Capewell Horse Nail Co., Toronto, have established a branch office and warehouse at Winnipeg.

Walter Sadler, of Sadler & Haworth, Montreal, called at the Winnipeg office of Hardware and Metal last week on his return to Montreal from an extended business trip as far west as Vancouver.

Armitage & Laverington's hardware store and the implement warehouse of B. Francis were destroyed in the recent fire at Armstrong, B.C. The insurance amounted to $2,100 and $2,000, respectively.

W. W. Chown, hardware merchant, Belleville, has purchased the building and stock of J. Henderson, Edmonton. The price paid for building was $24,000 and $15,000 for stock carried. Mr. Chown's son, Roy, moved from Belleville to Edmonton some months ago. Mr. Chown'sbrother and sons will manage the Belleville store and Mr. Chown will join his son at Edmonton.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the Western Trade to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

The Western Stove Makers

W. J. COPP SON & CO

MANUFACTURERS OF

EMPIRE STOVES & RANGES

Fort William, Ontario.

DAVID REID & CO.

Hardware Commission Merchants

Room 22 Stanley Block, - Winnipeg, Man.

Correspondence is solicited from manufacturers wishing a representative in Winnipeg and the North West.

We have sub-agents throughout Western Canada.

BRONZING SEASON

means bronze business, and the question you should ask yourself is: "Am I prepared to take care of this business?"

We have a large stock of Bronzing Materials—Gold, Aluminum and Colored Bronzes, Flitters, Metallics, Banana Oil, Gold Leaf Substitute, on which we would be pleased to quote you for immediate delivery.

THE WINNIPEG PAINT AND GLASS CO., LIMITED

Warehouses—CALGARY, EDMONTON WINNIPEG, CAN.

GENUINE Pratts Astral Lamp Oil

Sold in all countries and recognized as the highest grade oil manufactured.

WHOLESALE ONLY

THE QUEEN CITY OIL COMPANY Limited, - TORONTO, ONT

Everything for the Painter

Wire Glass

This is the season of the year when buildings are being completed—Wire Glass will be needed for Skylights, Metal Frames, etc.

Wire Glass is now almost universally used instead of Rough Rolled Plate on account of the ultimate economy. It may crack but the wire mesh keeps it intact and just as serviceable as ever.

Wire Glass is practially indestructible.

Special prices in case lots—write for them. Samples furnished on request. You may have an enquiry any day, better be prepared.

G. F. STEPHENS & CO., Limited

WINNIPEG, CANADA

HARDWARE TRADE GOSSIP

Ontario.

Walter Holborn of Sutton West called on the wholesale trade in Toronto this week.

M. A. Rodman is opening a hardware store on Dundas street, near Bloor, Toronto.

A. H. Ashton, of the Ontario Lead and Wire Co., Toronto, was married on Wednesday.

W. Howie, hardware merchant, Port Rowan, is recovering from an attack of typhoid fever.

Messrs. J. E. Doner and W. Watson, hardware merchants, Stayner, are on a fortnight's hunting trip.

A. E. Bottom, hardware merchant, Bobcaygeon, has returned home after a fortnight's hunting trip.

J. W. Allan, hardware merchant of Newmarket, called on the wholesale trade in Toronto this week.

C. M. Robertson, sec.-treas. The James Robertson Co., Montreal, spent a few days in Toronto during the week.

The Booth Copper Co., Toronto, have been granted a permit to erect a factory on Sumach street, to cost $5,000.

Whitton & Drummond, Toronto, are going out of the hardware business and will replace their stock with dairy supplies.

W. Woodman, clerk with D. Brockabent & Son, Arthur, has accepted a position with the Bond Hardware Co., Guelph.

Bert McDonald of the metal department of Rice Lewis & Sons, Toronto, has returned from a hunting trip in Muskoka.

H. J. Hamilton, Toronto Manager for Drummond, McCall & Co., metal merchants, is unable to attend business this week.

Geo. Rice of Rice & Barnes, hardware merchants, Whitby, was in the city several days this week calling on the whole sale trade.

J. C. Binghan of Rice Lewis & Sons, Toronto, and T. E. Hoar, Toronto Junction, are up near Haliburton on a hunting trip.

Mr. Neilly of the Victoria Mercantile Co., "Victoria Harbor," was in Toronto for a few days this week calling on the wholesale trade.

George Howard, of the James Morrison Brass Mfg. Co., has been absent from the office for several days this week owing to illness.

The Dominion Radiator Co., Toronto, have secured a site on Dufferin street adjoining the C.P.R. tracks, and will double the size of their plant.

The hardware store of John Bishop & Son of Brantford was robbed early Thursday morning. Two arrests were made and most of the stolen goods returned.

Harvey Wilson, late of F. A. Campbell's hardware store, Mitchell,, who is now in partnership with Adam Koening in the hardware business in Paris, has moved his family and effects to that town.

George Houghton's stock of hardware at 204 Dundas street, Toronto, was sold by the assignee on Wednesday to L. Legrow at 71 1-2c. on the dollar, the stock being valued at about $1,000. Mr. Houghton intends locating at Winnipeg.

J. E. Paine, managing director of Geo. Wostenholm & Son, cutlery manufacturers, Sheffield, Eng., who is making a tour through Canada, stayed several days in Toronto. B. and S. H. Thompson & Co., Montreal, represent Geo. Wostenholm & Son in Canada.

W. R. Hobbs, hardware merchant, Tillsonburg, is at Preston, Ont., endeavoring to restore his health by using the famed mineral baths secured at that resort. His store at Tillsonburg is again in charge of William Pow, who for some months past has been on the road for the Hobbs Mfg. Co. of London.

W. H. Cottingham, vice-president and general manager of the Sherwin-Williams Paint Co., passed through Toronto on Monday on his way from Cleveland to Montreal to attend the conference of Sherwin-Williams' travellers in that city this week. All of the Ontario travellers went down to Montreal Tuesday night.

Quebec.

E. H. Sabourin, general merchant of Rapide de L'Original, was in Montreal on business this week.

The St. Lawrence Hardware Co., of Montreal, have assigned, on demand of J. E. Merrizzi, accountant.

H. Pitts, hardware merchant, of Cornwall, paid a visit to some of the Montreal wholesalers this week.

F. W. Bauer of Montreal, has been appointed secretary-treasurer of the General Supply Co., Ottawa.

J. D. McRae, general merchant of Eganville, Ont., was among the buyers to visit Montreal wholesale houses this week.

Chas. Leblanc, hardware merchant of Joliette, visited his wholesale connections in Montreal during the present week.

Geo. C. Davis, of Frothingham & Workman, Montreal, was detained from his office through illness, for a few days this week.

F. Ross Newman, the recently appointed manager of Caverhill Learmont & Co's Winnipeg, branch, visited headquarters this week.

Mr. Kinsman, representing North Bros. Manufacturing Co., of Philadelphia, called on the Montreal wholesale trade a few days ago.

E. Archambault, hardware merchant, Montreal, has returned from a very successful shooting trip in the Laurentian Mountains. Mr . Archambaults friends are eating venison these days.

Mr. Paine, representing Geo. Wostenholm & Sons, manufacturers of IXL cutlery, Sheffield, is at present on a trip to Canada, and spent a portion of last week calling on the Montreal trade.

W. N. Courtney, manager of the Williams Gauge Co.'s Canadian branch in Montreal, has returned from a seven weeks' visit at headquarters in Pittsburg. The firm will begin manufacturing their products in Montreal as soon as suitable premises can be secured.

An important development in the industrial world during the past week or so, has been the purchase by the Canadian Consolidated Rubber Company, Montreal, of the Maple Leaf Rubber Company, who operate a large plant at Port Dalhousie, Ont. The paid up capital of the Maple Leaf Company was $350,000. The purchase was a cash transaction. Although the output of the Maple Leaf factory is confined to rubber footwear, several hundred hands are employed, and a large business is being done in these lines. The Montreal concern has already assumed control of the Maple Leaf factory, and its capacity will be considerably increased in the near future.

Maritime Provinces.

W. J. McGowan, formerly of Sydney, N.S., has left for Frank, Alberta, where he will manage the hardware store of A. F. Tracy.

Western Canada

C. A. McDonald & Co., hardware and lumber merchants, Mortlach, Sask., have disposed of their lumber business to the Imperial Elevator Co.

W. A. Sturdy, of Revelstoke, has lately purchased the stock and business of the Hartney Hardware Co., Hartney. Mr. Sturdy has had a number of years experience in the hardware business in different parts of Western Canada, and as he is thoroughly familiar with the business and has a large well assorted stock at his command, there is no doubt but that he will build up a good business in this important centre.

United States.

The Carborundum Co., of Niagara Falls, N.Y., manufacturers of carborundum products, is building a branch works at Reisholz, near Dusseldorf, Germany. Carborundum wheels will be one of the principal products.

The branch factory of the Wm. A. Rogers Co., Limited, at Northampton, Mass., manufacturers of silverplated wares, is to be moved to Niagara Falls, N.Y., and will be merged with the parent establishment. The electroplating will now all be carried on at Niagara Falls.

PERCIVAL STOVE WORKS SOLD.

It is announced that the Percival Plow & Stove Works, of Merrickville, has been sold to the National Mfg. Co., of Pembroke, manufacturers of cream separators, scales, etc., the latter company being controlled by Delehaye Bros., Pembroke. The plant at Merrickville will be continued on stoves and plows, but some of the leading lines of stoves will hereafter be manufactured at the place on Dec. 1.

CATALOGUES AND BOOKLETS

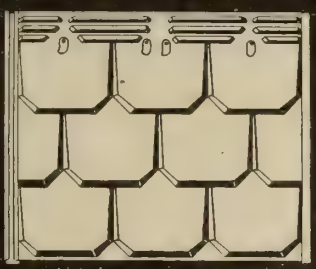
When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

A Fine Pocket Catalogue.

A new pocket catalogue dealing with various lines of hot water and steam boilers and radiators, and steamfitters' goods generally, has been issued by the Gurney-Massey Company, of Montreal. With this booklet in his pocket the fitter or architect has all the information necessary to enable him to figure on any kind of heating jobs. Attention is drawn to the new lines of "Bright Idea" and "Comfort" boilers and the "Tremont" or three row radiators. The booklet is a convenient size for the pocket, being 6½ by 3½ inches. The cover is in best morocco, and the pages are gilt-edged. It has been sent out pretty generally to the trade, but if there are any architects or fitters who have not received a copy, a card to the Gurney-Massey Company, 385-387 St. Paul St., Montreal, will bring one.

CUT GLASS FACTORY.



The well-equipped factory of the George Phillips Co., in the Packard Building, Montreal, is an interesting place. It is a comparatively new industry in Canada, and only the big jewelery houses heretofore attempted to cut glass to order in large quantities. Mr. Phillips and his directors saw a need in the country and have amply met it. The whole fourth floor of the large building is required in this work. A glance at the work room itself, shows a long lane of what at first sight look like finely fashioned grind stones. They are all operated by electricity, and activity is evidenced by sixty hands being engaged at the glass-cutting industry. Tables show the crude, plain glass, or as the cutters call it, metal without a cut or scratch on it. The first step is the designers work. He carefully outlines the stars and fret work for the carvers to follow, then these designs are worked out by the cutters who hold the bowl or dish or plate, whatever may be the article in course of moulding over the stones. The principal cutting apparatus is embodied in stones, but there are fine steel wheels that are used for grooving the early stages of the designs in the glass. These stones are very costly, and the operators of fine work are very high-salaried. These sharp glistening angles which appear so attractive and beautiful in fine cut glass, require much time and labor to accomplish. After the crude cutting of design has been completed, then there is a staff of polishers and waxers. The exterior and interior of the various vessels made are waxed and then follows an acid bath, which gives the final sheen and diamond-like beauty.

The Phillips Company have special names for certain designs, which run through their whole output, such as the Buxton, Oriental, Empress, Butterfly. These names each signify some exclusive patterns which are made only by this firm, and can be seen for ordering purposes pictured in their handsome catalogues. In Henry Morgan's window is a huge punch bowl, claimed to be the largest in the Dominion. This bowl was made complete in the Phillips factory. It has attracted marked attention for some time in the big uptown store. The beauty of this work is that family crests are cut to order, names, initials, love tokens, holiday notes and monograms, all made to suit the customer. To show how popular the work has become is proven best by the fact that the company is three months behind in its orders. Their travelers have been told to stop selling cut glass for immediate delivery. Their big shipping room is piled with goods destined for all parts of the Dominion. Skilled workmen, high class machinery and all the up-to-date methods, give this firm an easy lead for this trade.

In addition to the cut glass business, this company have their own cutlery and silverware factory in Sheffield, Eng. The lines, cut glass and silverware and cutlery harmonize well, and a large and growing trade has been steadily built up. They have four special branded razors, namely, Strathcona, Edward VII, A Bit of Old Sheffield and Earl Minto.

THE METALLIC ROOFING COMPANY LIMITED

"EASTLAKE"

STEEL SHINGLES

TORONTO, CANADA.

FOR THE ROOF

There's truest economy in choosing

"EASTLAKE"

STEEL . . . SHINGLES

They last indefinitely.

Are fire, lightning, rust and leak-proof.

Fit together perfectly by means of their special patented side lock, can't possibly work apart.

GALVANIZED "EASTLAKES" are heavily coated on both sides with all the galvanizing material that will adhere to them.

PAINTED "EASTLAKES" are thoroughly covered on both sides with Sherwin-Williams best paint.

"Eastlakes" have been tested by years of service in all climates, everywhere giving thorough, lasting satisfaction.

Write and let us give you further information.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

J. J. HILL'S BIG DEAL.

According to an American writer it was James J. Hill's sons, J. N. and L. W., who succeeded in getting J. J. Hill to consent to the purchase of the Wright & Davis road and the Mesaba iron range lands, the sale of which to the United States Steel Corporation for an immense sum startled the iron world and made J. J. Hill a competitor with John D. Rockefeller as the first billionaire. After that L. W. Hill went on acquiring lands for the company to such extent as he could, all the time being hampered for want of funds. He would buy or lease property and then sell it to some other concern, at small profit, taking a time contract for the haulage of ore. Then with this profit he would acquire another property. James J. Hill constantly discouraged the whole scheme, and told his sons it would be wiser to stick to straight transportation business than to meddle with mining properties.

FOUNDRY AND METAL INDUSTRIES

The North Ontario Reduction & Refining Co. have commenced work on their new plant at Sturgeon Falls, which will be in operation next Summer with a capacity of 100 tons per day.

The Dominion Iron & Steel Co. made a great record during October. The quantity of steel ingots turned out in the thirty-one days exceeds by 2,825 tons the best previous output for any corresponding period. The output of the various departments was: Coke, 34,400 tons; pig iron, 23,325 tons; ingots, 25,425 tons; blooms, 22,553 tons; rails, 12,621 tons; rods, 5,214 tons. During the month three blast furnaces were operated. The blooming mill and rail mill worked double shift, while the billet mill and rod mill were on single shift. Of the various materials finished for market 16,500 tons were shipped, and, in addition, about 5,000 tons of rails were stocked. These will be loaded on the steamship "Bergenhus" now in port. Over 125,000 tons of ore and limestone were brought in, and the tonnage of materials handled in and out amounted to over 200,000 tons.

The Dominion Iron & Steel Co., Sydney, N.S., were forced, Nov. 3, to stop their blast furnaces for the lack of coke. The trouble appears to be over the supply of coal for the manufacture of coke. The steel company contend that they were being supplied by the coal company with an inferior quality. This became so pressing that they began the importation a few months ago of a supply from the Nova Scotia Steel & Coal Company at Sydney Mines. They brought over 30,000 tons, and have ordered more. This coal cost them considerably more at the plant than the Glace Bay product, and the company, it is understood, charged the Dominion Coal Co. with the difference in cost. President Ross refused to pay this, and went further by practically shutting down their supply. Such is the common version of the cause of the difficulty. Should this continue, even for a few days, the entire plant will have to close down, and throw 1,700 men out of employment.

Here is a seasonable specialty that will make sales for you.

SHERWIN-WILLIAMS
STOVE PIPE AND IRON ENAMEL

Moves quickly and pays a good profit. It gives perfect satisfaction to the purchaser, too. This is the time of year when stoves, pipes and iron work need repairing and repolishing. It can be done in one process with S-W. STOVE PIPE AND IRON ENAMEL. The lustre is durable—heat does not cause it to become dull, smoke or burn, when applied according to directions. There is no waste. It gives long service, therefore it is economical. You can order S-W. STOVE PIPE AND IRON ENAMEL with confidence that it will sell and net you a good profit this fall and winter. Write us about this seasonable specialty.

NEW MACHINERY AT BELLEVILLE.

The Belleville Rolling Mills, which started operations a fortnight ago, is running to its full capacity during the day hours, but will not run at night for the present. The plant comprises three rolling mills, 18, 12 and 9 inch, and a fully equipped machine shop. An up-to-date horseshoeing department is under construction, and a large cement cistern has been built near the proposed dock. Much new machinery has been installed during the past summer. One machine the "Squeezer," makes it possible for the mills to economize greatly in the matter of labor. Big piles of scrap go into the furnaces, come out in a molten condition, and then go into the "squeezer," from which they come in the shape of a big red-hot ball. This ball goes to the "rollers" at the 18-inch mill, and is gradually worked along till it becomes bar iron. The "squeezer" weighs 80,000 pounds. The new shears purchased in Pittsburg weigh 100,000 pounds, and will shear iron six inches thick. The lack of such shears as these militated greatly against the successful operation of the mills in old times.

INGERSOLL FOUNDRY CHANGES

W. J. Telford, of the sales department of the D. Moore Stove Company, Hamilton, and J. A. McCullough, formerly foreman for the Western Foundry Company, Wingham have purchased the Gobey foundry at Ingersoll and intend estimating and taking contracts for all kinds of iron castings. The new firm will be known as the Ingersoll Foundry Co., and, starting at a season when everything is brisk and lively, should soon establish themselves in a large and successful business.

MALLEABLE PLANT TO MOVE.

The Pratt & Letchworth Malleable Iron Company, whose headquarters are at Buffalo, may remove all or part of their Brantford plant to Montreal because of interference with their Sunday operations by representatives of the Lord's Day Alliance. The Brantford plant was established to meet the demands of the Canadian trade in 1899, and has been largely extended since that time. It now has an annual output of $200,000, employs over five hundred men steadily the year round, and pays $100,000 per year in wages.

Paint, Oil and Brush Trades

WATER IN PAINTS

A rather curious problem recently confronted me, writes, C. D. Holley, Ph.D., in the Hardware Trade in connection with the analysis of mixed paints which is being carried on under the provisions of the North Dakota paint law. The examination of a well-known brand of paint revealed the presence of water in unusual quantities, upwards of 20 per cent of the liquid portion being found to be water. The analysis being reported to the manufacturers by Com. E. F. Ladd, the statement was made in reply, that the water obtained by the method used at this station was not present in the paint as such, but was the result of the decomposition of organic compounds in the paint due to the heat employed, the method used for the separation of the water being in brief the mixing of a weighed amount of the paint with a dry inert substance like silica or sublimed lead until the mass ceased to be sticky, and distilled in a retort, a current of illuminating gas being used to help carry over the water. The neck of the retort serves as the inner tube of the condenser and the retort is heated by means of an oil-bath. The inert material is used to prevent the paint from hardening in the retort which would render its removal a difficult matter. Suitable correction is also made for the combined water of the white lead present in the paint.

The manufacturers claimed that the linseed oil had been subjected to a special process, in which the major portion of it had been converted into a series of compounds containing hydroxyl groups and these on being subjected to heat split off water, which accounted for the water obtained by the above method. In support of this assertion they quoted from Allen, where in discussing linolic acid, he states that on exposure to air it "absorbs oxygen, becoming thick and ultimately so viscid as scarcely to flow, but remains unchanged in color. The product is said to have the composition of a hydrate of oxylinolic acid $C16H26O3.H2O$. When heated to 100 deg. C. this gives off 6.7 per cent of water."

It was evident that any method which the writer attempted to use for the estimation of water involving the aid of heat would be at once subject to the above criticism on the part of the manufacturers, and in order to avoid such criticism the following experiments were carried out. A can of the paint in question was obtained in which the pigment had settled out. The clear oil was siphoned off and the remaining paste thoroughly stirred. In 100 grams of the paste was placed 3.1217 grams of the gelatin which was allowed to stand with frequent stirring for twenty-four hours. It was then washed free of adhering paint with petroleum ether, pressed between sheets of filter paper and weighed. The gain in weight was 0.809 grams. Three and seventy-nine-thousandths grams of gelatin were placed in 100 grams of the clear oil for twenty-four hours and received exactly the same treatment with petroleum ether; the gain in this case was only 0.017 gram. This indicated that there was a large amount of uncombined water in the paste portion of the paint, as it does not seem probable to the writer that hydroxyl groups would be held in such a loose combination as to be broken down by the presence of gelatin. On the supposition that gelatin would absorb water until an equilibrum had been established between the water in the fluid portion of the paste and that in the gelatin, the volume occupied by the gelatin was ascertained, also the volume of the fluid portion in the paste, and from this data the percentage of water was calculated, the result obtained being 22.4 per cent. With this same paste the distillation method with sublimed lead showed 26.0 per cent of water. These results are in as close agreement as would be expected from the nature of the determination and the errors necessarily introduced.

The clear oil on being distilled with the sublimed lead yielded no more water than might be expected from ordinary oil, a fraction of 1 per cent only. This fact in connection with the above results indicates that there was no such compound present in the paint as the manufacturers had claimed. This being the case it was evident that the large amount of water present was held in the paste by some other means than being simply ground in or by drastic saponification, often resorted to in the manufacture of cheap paints.

A careful examination was made of the paste portion of the paint after the removal of the oil, and the following substances were obtained in the aqueous extract in sufficient quantity to warrant the belief that they were intentionally added ' glue, sodium carbonate, borax and acetate of lead.

With the aid of these substances it is very easy to see how a large amount of water may be ground into paint without betraying its presence by an undue thickening of the product or difficulty in subsequent thinning with oil. At the same time the replacing of one-fifth of the linseed oil in a gallon of this paint with water means a considerable profit to the manufacturer.

NO WONDER

there has been such an increase in ELASTILITE VARNISH sales. Nothing remarkable about it though when you consider the quality of the varnish at such a reasonable price.

In tins only from ½ pints to 1 gallons. For outside or inside. "Wears on the job, not off it."

Paint and Oil Markets

MONTREAL.

Office of Hardware and Metal,
232 McGill Street,
Montreal, November 9, 1906.

The leading event in the week's transactions, has been a sharp advance of 25 cents per hundred pounds, on white lead. The reason for this taking place is easily seen when it is known that dry white lead in large casks, of first-class make, would cost $6.30 per hundred pounds, laid down in Montreal. And it is hard to get, at that.

There has also been a jump of 2 cents per gallon in linseed oil, while turpentine is steady at the same prices as last week.

The advance in lead and oil will naturally affect the price of liquid paints. Higher quotations may be expected at any moment.

LINSEED OIL—An advance of 2 cents was made this week and present quotations are: Raw, 1 to 4 barrels, 54c.; 5 to 9 barrels, 53c.; boiled, 1 to 4 barrels, 57c.; 5 to 9 barrels, 56c.

TURPENTINE—No change in conditions has developed. Quotations remain as follows: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—The advance in this product was the feature of the week. We quote: Best brand Government standards, $6.75 to $7.00 No. 1, $6.40 to $6.65; No. 2, $6.05 to $6.40; No. 3, $5.80 to $6.05, all f.o.b. Montreal.

DRY WHITE ZINC—V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5½c. to 6¼c.

PUTTY—Orders are large and numerous. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100 lb. kegs, 8½c.

RED LEAD—Conditions are unchanged from those of last week. We are quoting: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

SHELLAC—This market has been advancing for some time and another jump was declared this week. We are now quoting: Shellac Bleached, in bars or ground 47c. per lb., f.o.b. Eastern Canadian points; Bone Dry, 58c. per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 49½c. per lb. f.o.b. New York.

SHELLAC VARNISH—The market in this product continues very firm, in sympathy with the conditions in the gum shellac trade. The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

REFINED PETROLEUM — We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20½c. in barrels.

WINDOW GLASS—Prices currently quoted are as follows: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100feet, $3.20; second break, break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of Hardware and Metal,
10 Front Street East.
Toronto, November 9, 1906

As predicted by us a fortnight ago, white lead has advanced again and is now 25c. higher, owing to further advances of pig lead. Stocks are low and shipments very hard to get.

Linseed Oil has advanced 2c. owing to the high price of seed in the United States, and the general firmness in both foreign and local markets. Manufacturers are advancing gum shellac, but liquid remains unchanged.

Trade is brisk, buying being large in expectation of higher prices after Dec. 1.

Representatives of an American house were in Toronto this week looking over the trade with a view of establishing a turpentine supply house here. The estimated consumption of turpentine in

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

NEW LINSEED OIL MILL.

The Sherwin-Williams Company's new linseed oil mill at Montreal which has been under construction for the past six months, is expected to commence crushing seed this month. This latest addition to their already large plant comes as a result of the company's experience in the making of linseed oil in the States, where for years they have made all the oil used in their products.

One of the most interesting points in connection with the new plant is the introduction into Canada of a greatly improved method of crushing the flax-seed. The presses, known as screw presses, are being built after patents controlled in Canada exclusively by the Company. The main feature of these presses is their ability to crush the seed at a much lower temperature than heretofore, thereby greatly improving the quality of the oil. In the old method of expelling the oil it is necessary to crush the seed at a high temperature in order to obtain a satisfactory yield of oil. The higher the temperature the greater the yield; the lower the temperature (down to a certain point) the better the quality of the oil. Of course, the temptation has been to increase the temperature and get as much oil as possible from each bushel of seed, even at the sacrifice of quality.

In the "screw press" a method has been devised by which the maximum yield of oil can be obtained at a low temperature, producing oil of the very highest quality.

The Company claim they have never taken a more important step in the interest of good paint and varnish than when they entered upon the manufacture of linseed oil.

The Montreal plant will be large enough to meet the company's own requirements and supply the trade as well. The buildings are so constructed that the capacity can be readily doubled simply by the addition of more machinery. In addition to the buildings for the crushing mills, filter presses, storage tanks, etc., the company are building a large elevator for the handling of the seed and three large steel tanks of 150,000 bushels capacity for seed storage. Age is an important factor in the proper production of linseed oil, and to provide for this the company have installed a number of steel tanks, where the oil will be stored at a uniform temperature during the "ripening" period.

The Company will use Manitoba seed, which is in every respect equal to Calcutta or the No. 1 Nortwestern of the Dakotas.

TALK QUALITY.

Talk quality every hour during the business day and make prices secondary to it, advises the Hardware Trade. Your trade is reasonably well fixed financially and there is always a certain percentage of the population of the town or contingent territory that is willing to pay high prices for good goods, and if you can satisfy them in this respect you have made customers of them until such a time as you disappoint them.

Never recommend anything to a customer unless you actually know that it is what you say it is or have been told by others in whom you have faith that they have used it with satisfaction. People are willing to pay high for quality and when you have the right kind of goods it will be very much easier to get your prices. People know that good goods cost more than medium grades in all lines.

Build up a reputation for having the best goods in town and you will find that it will add to your sales and materially to your profits.

BERRY BROTHER'S VARNISHES

are one grand story of success

BECAUSE THEY ARE THE BEST

They are the safest goods to handle,

Is Your Paint Trade Growing?

If not there is something wrong. You can be assured of a large increase in your paint business if you handle

ARK BRAND PAINT

It is the most durable and best looking paint made. Read what it has done for one of our customers, and it will do the same for you. You really cannot afford to be without it.

Toronto Junction, Nov. 2nd, 1906.

Messrs. Francis-Frost Co., Limited, Toronto, Ont.

Gentlemen,—We have handled your "Ark Brand" Paint for three years, and during that time we have had better satisfaction in our paint department than ever before. The increase in our sales this year so far is over 300 per cent. more than our first year. It is a great pleasure to handle it, as there are no kicks, and no come backs except for more. From our experience we are firmly convinced it is the best prepared paint made, and especially adapted for outside painting.

Muresco: We are doing a splendid trade in this wall finish, and cannot now sell any other kind, even at half the price. It is certainly the finest wall finish we ever saw, and we will handle no other wall finish but Muresco in future.

Let us know if there will be any advance in price of above for 1907, as we wish to cover ourselves with a good stock. Youry truly, C. M. CUTTS & CO.

Have You Ordered Muresco?

If not, wait until our traveller calls on you before placing your order. It is the best wall finish made. Anyone can use it without showing laps or brush marks.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

A new leather goods factory has been started at Brampton.

A Chatham firm will erect a large stair mill, at Rainy River.

A breakwater, is to be built at Port Arthur, at the cost of $350,000.

A new factory to manufacture clothing has been opened at Oakville.

The Scott Lumber Company, are building a lath mill at Fredericton, N.B.

Fort Frances is to have a new street water tower with a capacity of 100,000 gallons.

Goderich may install a producer gas Engine in connection with their electric light plant.

Tenders have been asked for the new Public Buildings, to be constructed at Edmonton, Alberta.

Work on the Toronto Type Foundry's new plant at Toronto Junction, is rapidly nearing completion.

The Fort Street Brewing Company have asked tenders for the erection of a new Fireproof Brewery.

Edmonton, Alberta, has issued building permits to the extent of $1,744,829 to date, $1,000,000 more than last year.

The Walter's Lumber Co. of Strathcona, has taken out a permit for the erection of a $15.000 saw mill at Edmonton.

The cement mill at Longue Point, Que., is being enlarged, and when finished will have an output of about 4,000 barrels per day.

The contract for the new $60,000 Bank of Commerce building, Saskatoon, was awarded the Canadian White Company of Montreal.

Kaye Bros & Co. of Winnipeg, sold the patent right of a cash register, invented by them, to a Paris firm for which they received 30,000 francs.

Sherwin Cooper & Company, manufacturers of gasoline engines, have secured a factory site on the Don Flats in Toronto. They will employ 50 to 75 men.

The Dominion Bearings Company, have purchased a block in St. Catharines, and are installing machinery for the manufacture of Henderson roller bearings.

Fire at St. John, N.B., caused considerable damage to W. F. & J. W. Myers, machinists. Wm. E. King, brush manufacturer and others. Loss estimated at $25,000, insurance $14,000.

The Meisle Manufacturing Company of Port Huron, may locate a branch of its factory in Port Arthur, for the manufacture of harvest machinery, and are asking the town for inducements.

Building has been started on the plant of the Lehigh Portland Cement works near Belleville. It is claimed by this time next year they will be turning out cement at the rate of 50,000 barrels a day.

The Prince Albert, Sask., Board of Trade, may ask Ames Holden Co., shoe manufacturers Montreal, to establish a branch there. It is also suggested that a by-law be passed granting the C.N.R., a bonus of $25.000.

The Silvia Brick & Lime Co. Victoria B.C., have opened a $30.000 plant, capable of turning out 20,000 brick per day, and $10.000 will be expended in machinery for refining raw lime, with a daily capacity of 200 barrels.

The building permits issued in Montreal this year, is $8,083,383, just two and a half million in excess of the value of 1905 for the entire year and fifty-seven and one-third per cent in excess of the value for the same ten months of that year.

The Atikokan Iron Company, at Port Arthur are busy on the construction work of their new plant, which will cover an area of forty acres, containing 100 coke ovens which will make 200 tons of coke per day, and a furnace producing 100 tons of iron per day.

A charter has been granted The Volcanic Oil & Gas Co. of Chatham, who propose to produce and make petroleum and natural gas. The share capital is $300,000. The provisional directors are D. A. Cash, Port Colborne; H. D. Symmes, Niagara Falls and J. T. O'Keefe, Chatham.

Building permits to the amount of half a million dollars, were issued in Stratford this year. The by-law to guarantee the bonds of the Kemp Manufacturing Company, was carried and the above company take over the old Kemp factory, heretofore occupied by the Massey-Harris Company, and will manufacture agricultural implements.

The Electric Development Company, started a unit of their power plant at Niagara Falls on Nov. 3. When the headgate was opened and the water filled the long penstock the twelve thousand horsepower turbine wheel began to spin as smoothly as a top, and the biggest vertical electric generator ever started in the world was put in motion.

The Canadian Refining Company, Ottawa, has been organized with Dominion charter to refine and smelt minerals. The capital stock is placed at $2,000,000 and the provisional directors are:—H. Ray, Ottawa; F. W. Rolt, Rossland, B.C; J. Jean Baptisti, Notre-Dame-de-Standridge, Quebec; E. Hoffman, New York; R. Dieffenbach, New Jersey; J. J. Fleulot, Frank, Alberta.

BUILDING NOTES.

Calgary Oddfellows intend erecting a $60,000 Temple Building.

The Union Bank will erect a bank and office building at Brandon, Man.

The Royal Bank will build a new six storey bank and office building in Toronto.

The Bank of Montreal will erect a new bank and office building at Portage la Prairie.

L. C. Todd is to erect a brick warehouse on Wellington St., Toronto, to cost $50,000.

Contracts have been awarded for the erection of a new brick block with an 88 foot frontage.

Stanley Mills Company, Hamilton will erect a large building for manufacturing purposes.

The Crescent Turkish Bath Company, Montreal, will erect a four-storey building to cost $10,000.

Regina is to have a new City Hall at the cost of $150,000. Also a new Fire Hall to cost $40,000.

A building permit has been issued F. J. Lyne, Toronto, for a $14,000 brick dwelling on Sanford Avenue.

Winnipeg has had a banner building year. Permits have been issued to the extent of $12,000,000 to date.

Hamilton will have a record breaking year for the amount of building permits issued. It is expected they will exceed $2,000,000.

A permit has been granted Stewart McPhie of Hamilton for the building of "a new brick" roller skating rink to cost $10,000.

Guelph is to have a new factory. The Standard Knitting Company has been secured. The Anton Berg & Son Company have asked for a loan of $25,000 which will be decided upon by a vote of the citizens.

The White Company has been awarded the contract for building the terminal station for the Cataract Power Company at Hamilton. The building will cost $200,000 or $250,000, and will be the terminus of the electric lines controlled by the company.

The building boom in Toronto goes on apace. During the month of October just closed 570 permits were issued by the city, as against 271 for the same month in 1905, or more than double the number. So far this year there have been granted 3,041 permits, as against 2,314 for a like period of last year, for a total estimated outlay of $11,102,903, as against $8,954,789, while the comparative values for October, 1906, and parative values for October, 1906,, and $1,009,005. The new buildings erected this year are 4085, as against 2695 for the first 10 months of 1905. The permits issued for the ten days ending Oct. 31 are 81 in number, and represent an estimated value of $438,100. They include $10,000 for a brick bank at the northeast corner of Bay and Adelaide streets, to be erected by the Farmer's Bank; a brick and iron factory on Sumach-street by the Booth Copper Company, $5000; and storage sheds on River street, by the Stewart Hartshorn Company, to cost $4000. The remainder are all dwellings.

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish —we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is **soaked** and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?

It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1303. Wire of all kinds, etc.— Yorkshire engineering firm would be pleased to quote wire rods, wire of all kinds, crucible, Siemen's or Bessemer steel, rolled steel, special steel for bicycle rims, umbrella wire, and invites correspondence with Canadian buyers.

1304. Cranks, forgings, shafts, etc.— A Yorkshire engineering firm manufacturing all descriptions of locomotive and round bent cranks, forgings, shafts, and high-grade tool steel, invites correspondence with Canadian buyers.

1305. Steel goods, etc.—A Yorkshire engineering firm manufacturing all descriptions of rolled steel goods, steel wire, spiral springs, hammers, files, carriage springs and axles, invites correspondence with buyers in Canada.

1310. Welded steel and iron tubes— A Yorkshire engineering firm manufacturing every description of welded steel and iron tubes for locomotives, marine and other boilers, crucible cast steel, files, hammers, etc., invites correspondence with Canadian buyers.

1311. Cutlery—A Yorkshire cutlery firm manufacturing all classes of table and fancy cutlery, desire to place their goods on the Canadian market, and invites correspondence.

1312. Knives, etc.—A Yorkshire cutlery firm manufacturing all classes of pocket and desk knives, etc., for advertising purposes, desire to place their goods on the Canadian market, and invite correspondence.

1313. Rules and gauges.—A Yorkshire firm manufacturing all kinds of boxwood, ivory, xylonite rules and gauges to any requirements, desire to get in touch with wholesale buyers in Canada, and invites correspondence.

1314. Steel goods, files, etc.—A Yorkshire enginering firm would be pleased to send catalogues and price-lists, and to quote for all classes of steel goods, files, hammers, picks, etc., and invites correspondence.

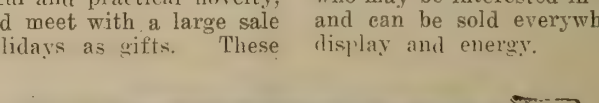
1323. Fire-bricks, fire-clay, etc.— A Scotch firm of manufacturers of fire-bricks, fire-clay, etc., is seeking to extend business connections with Canada.

1325. Agents—A London firm manufacturing high-class stable fittings, patent stoves, disinfecting apparatus, and art metal work, contemplates appointing agents in Toronto and Winnipeg.

1326. Ores—A French firm having a connection for the sale of molybdenite, vanadium, antimony and other ores, is desirous of corresponding with Canadian producers.

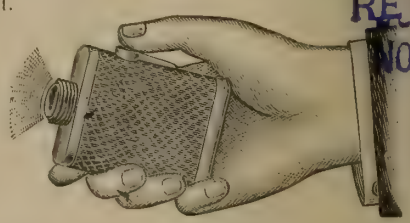
1330. Agent—The manufacturers of a patent boiler fluid and similar specialties are open to appoint a suitable Canadian resident agent.

1331. Portland cement.—A Glasgow firm would like to get into touch with Canadian manufacturers of Portland cement in a position to undertake export trade.



ELECTRICAL NOVELTIES.

The two electric pocket flash lights described on this page, are a most novel as well as useful and practical novelty, and they should meet with a large sale around the holidays as gifts. These pocket lamps can be used by everybody, who has use for a light. They are absolutely safe and in no way can cause the danger of fire with the old coal oil lamp They can be conveniently carried in the pocket, and are always ready for use by a simple pressure of the contact spring on the flash light. You get an illumination fully fifty feet ahead of you.



The No. 1 is the most practical size being nine inches long and 1 1-2 inches wide. With ordinary usage it should last from 2 to 3 months with one charge. The vest pocket size is 3 1-2 by 5 inches and can be conveniently carried in the vest pocket, and is a very handy little light to have with you when out late at night, traveling dark roads or finding your way down and about the cellar, and should last from one to two months with ordinary care. The batteries in these lamps can be renewed at any time, in any part of the world, being standard size.

This is merely a suggestion for those who may be interested in this little lamp and can be sold everywhere by proper display and energy.

No. 1 Flash Light—9 inches long and 1¼ inches wide.

There is a good margin of profit and this is one of the lines hardware dealers can stock for Christmas trade to advantage. Price lists can be had from the Berlin Electric Mfg Co., King street, west, Toronto, if this paper is mentioned.

Vest Pocket Flash Light—3½ inch by 5 inches.

Old cutlery and flat-ware cannot be successfully re-plated without stripping the silver and re-polishing them. This frequently entails so much labor that it costs more to re-plate them than the cost of new ones

Plumbing and Steamfitting

A NEW VENTILATION PROBLEM.

The unlooked-for rise of temperature in the New York Subway, due to the operation of the trains, proves, once more, how essential it is, in planning a new work of this kind, to consider carefully the effect of any novel conditions that enter into it, says the Scientific American. It is seldom that a great engineering project of this magnitude receives such exhaustive consideration as was given to the preliminary plans for the Subway. Moreover, no expense was spared either in the construction of the tunnel or in its equipment, to render it in every particular absolutely first-class. And yet, it was discovered, as soon as the first spell of hot weather was encountered, that instead of the air in the Subway being, as was confidently predicted cooler than that of the streets above, it was considerably warmer. The trouble was found to be due to the radiation of heat from the powerful motors. That electric motors, doing such heavy duty as those which drive the Subway trains, become heated and radiate a large amount of heat into the surrounding atmosphere was, of course, well known; but until the opening of the Subway, electrical traction in New York had been confined to the street car and elevated railroad service; and since the cars were run in the open, where the heat was quickly dissipated, no inconvenience resulted, and there was nothing to suggest that heat from the motors might, under other conditions, become a serious problem.

As the result of a very thorough investigation of the problem, the Rapid Transit engineers have installed a system of ventilation and cooling which, up to the present, has been showing highly satisfactory results. A plant for cooling the air has been established at the Brooklyn Bridge station, and a series of ventilating chambers has been built between the Bridge station and Ninety-sixth Street. The ventilating openings are placed midway between the stations. Each consists of a large chamber, opening out from the side of the tunnel, equipped with a series of shutters arranged somewhat after the plan of Venetian shutters, which are so balanced that normally they remain closed. At the approach of a train, the pressure of the air which is being driven forward in front of the train raises the shutters and the heated air is driven out into the chamber. The vacuum created at the rear of the train causes the shutters to close as the train passes by, and the same suction tends to draw the air in through the openings at the station which the train has just left, the double, action of expulsion and suction thus serving to renew continually the whole body of air within the Subway. At each ventilating chamber there is an electrically-driven exhausting fan, which is used during the night when traffic is light, the combined capacity of the fans being sufficient to exhaust the heated air and bring in fresh and cold night air from the outside.

The Bridge station was selected for the experiments in air cooling for the reason that it is the warmest station on the whole system. The plant consists of four driven 6-inch wells, 45 feet deep, which take water from the level about 20 feet below the station platform. The water is pumped at a temperature of 61 deg. F., and distributed through two large cooling coils, which contain an aggregate length of nine miles of one-inch pipe. The coils are inclosed in sheet-iron casing, and air is forced through them by four motor-driven fans capable, together, of delivering 150,000 cubic feet of air per minute. After

Arrangement for Saving Oxide of Zinc in Brass Melting.

passing through the coils the air is forced through two large distributing ducts, which are suspended from the ceiling, immediately over the two platforms. The cooled air is finally discharged from the bottom face of the ducts and flows directly upon the platforms. The plant has proved to be a great success, as is shown by the fact that, whereas before it was put in, the Bridge station was always several degrees warmer than Fourteenth Street station or that at Forty-second Street, the conditions are now reversed, and the Bridge is always cooler than the other stations, on some occasions by as much as 6 degrees. Tests taken during one of the warmest days of the summer showed that the temperature had been lowered as much as 8 deg. below what it would have been before the cooling plant was put in. With the erection of similar plants at Fourteenth Street and the Grand Central station, and the completion of the system of ventilating chambers, it is confidently expected that the temperature of the subway will be restored to normal conditions.

NEW WAY TO TREAT SCRAP BRASS.

A method of treating scrap brass has been patented by Henry J. Krebs of Wilmington, Del. (U.S. Patent 831,010, Sept. 11, 1906), which may be of interest to scrap manufacturers who desire to investigate the recovering of the zinc which always volatilizes when brass is melted. While this process is intended to treat the brass primarily for the recovery of the oxide of zinc, the same principle may be used for the recovery of the oxide of zinc in brass melting.

The principle of the appliance and process will be seen in the illustration. A cupola (1) is used for melting the brass. The blast of air that is used in the cupola oxidizes the zinc in the brass and the oxide of zinc passes to the chamber (2). This chamber is intended to divert the oxide of zinc in the cooling chamber (5). Auxiliary cooling chambers (6) are also provided through which the fumes pass. These chambers are directly connected to an exhaust fan (8) and then the fumes pass to a tower (15) which is filled with brickwork similar to an acid tower. An acid solution, say sulphuric acid, is sprayed through pipes 13 and 14 and converts the oxide of zinc into sulphate of zinc. From the tower the fumes pass to bags (10) which catch any excess of oxide of zinc which passes through the tower. A valve (12) may control the passage of the fumes so that only a portion is obtained as sulphate of zinc while the rest are obtained in the bags.

In order to use an appliance of this nature in the recovery of the oxide of zinc which escapes in brass melting, it would be necessary to use an exhaust fan in the flue of the furnace as natural draught would otherwise be choked so that it would be difficult to obtain the necessary heat in the melting furnaces.

LEAD-PIPE MAKING.

The machine for making lead pipe is composed of hydraulic and lead cylinders. In the hydraulic cylinder is what is called a "water ram," and on top of this water ram is placed the lead cylinder, the hydraulic pressure being applied at the bottom of the water ram. In the centre of the lead cylinder is a steel core, and as the melted lead is run into this lead cylinder it congeals, forming a solid mass around the steel core. A lead ram is hung directly over the lead cylinder, fitting it exactly; and in the bottom of this ram is a die, having in its centre a hole the exact size of the outside of the pipe. It will be seen that by this arrangement the space which is

left between the centre core in the lead cylinder and the die above it is just the thickness and size of the pipe that is to be made.

After the lead has been melted and run into the cylinder and has congealed, the hydraulic pressure is applied in the cylinder, which raises the lead cylinder up against the lead ram (which ram, it will be remembered, fits the lead cylinder exactly). The pressure applied is so great (sometimes being as high as 28,000 pounds to the square inch) that it forces the congealed lead to flow out in a "stream," as it might be called, which completely fills the space between the steel core and the die, the latter forming the outside of the pipe, while the former makes the inside. As the pipe comes out of the machine it is coiled up and is then ready for use.

STREET LIGHTING BY CLOCK WORK.

Consul Albert Halstead, of Birmingham, reports that an automatic gas controller has been patented and is now on sale in England which may materially lessen the cost of public lighting in the municipalities of the United States if in practical operation it fulfills the claims of its owners.

The controller is said to be adaptable to any type of incandescent burner, to fit any lamp, and to be instantaneous in its lighting and extinguishing. The mechanism consists of a clock which can be so set as to light the gas each night and extinguish it each morning, so as to make an automatic variation of the time of lighting and extinguishing according to the calendar. In short, by means of a chart, the street lights are turned on and off, lighted and extinguished, at a different moment each day throughout the year, according to the season. This is an advantage, it is claimed, over any other controller now on the market, one adjustment a year being sufficient.

It is claimed that the apparatus would require no attention except winding once a fortnight, and that once set it would not have to be reset for a year. The gas can be turned on and off in the ordinary way, quite independently of the gas controller. This is important, as it might be necessary to turn off the gas for the renewing of the incandescent mantles.

These controllers are now on trial at Bath, and the engineer of the gas company there informs the municipal gas department in Birmingham that so far as their experience goes it gives satisfactory results. In the city of Birmingham proper there are 13,860 street lights, and in the district outside which is supplied by the municipal gas department of Birmingham there are 7,108 street lights, their caretaking costing $102,488 per annum. To equip these street lights with this gas controller would involve an expenditure of $153 061. The cost of operating, it is claimed, would be just one-half. The price of a controller is now $7.29.

NOVEL VENTILATING SCHEME.

In the Auburn State Prison the ventilating plan carried out when the building was constructed was found after years of trial to be too inefficient to expect even a criminal to put up with. The old plan was to provide registers in the ceiling, each of which were connected to an antiquated type of ventilator directly above.

The new scheme consists of installation of 14 ventilators. The old register openings in the ceiling of the cell rooms are to be made somewhat larger and several of these connected by a single galvanized iron duct from which the new ventilators draw. From some of the cells small openings extend through the partition walls to the top of the building and in this case the upper ends of these openings are to be connected with the main galvanized iron duct of the nearest ventilator.

A difference in temperature between the inside and outside air, or any movement across the top of the ventilator of the air outside causes at once a partial vacuum to be produced in the chamber at top of the ventilator, and consequently air from the inside of the building is drawn out. One great advantage of the general plan is that the hottest air—that next the ceiling—will be withdrawn first. Yet while the ventilator offers a free exit of air from the inside of the building, it effectually prevents any back currents. The contract for the system outlined was awarded to the Buffalo Forge Co., of Buffalo, N.Y.

NEW STEAMFITTINGS FACTORY.

The Standard Fittings Company is the name of a new concern which is to be established at Guelph. A factory is to be established at once and sixty men put to work making steam and gas fittings, valves and hydrants.

NEW AUTOMATIC SPRINKLERS.

H. Glassford, who for seventeen years managed the automatic sprinkler business for H. G. Vogel & Co., Montreal, has now complete charge of the Standard Sprinkler Co. in the same city. This new company now control the now famous Rockwood patent releasing trap. It is a simple improvement that cannot fail to be convincing to everyone. As an illustration of the ease with which one of these small valve-like traps may be released when attached to a long line of pipes full of water, Mr. Glassford lighted a match near a trap and before the head of the match had been consumed the cap holding the water fell off. With myriads of these running all over a building what fire could stand against them? What makes the little bars so sensitive to heat is that they are made of real gun metal and clutch together by solder.

They cling in the form of a keystone to an arch, so that pressure upon them only makes them tighter. When the solder responds to the heat, the bars fall apart and the clasp holding the water cap falls also. When the trap opens at 160 degrees its responsive usefulness may be understood readily. There is a spray cap which whirls the water, running like a fountain effect. In addition to having a large and influential connection in Montreal and Canada, Mr. Glassford is a mechanical engineer.

NEW ELECTRIC LAMP.

An Austrian chemist, Dr. Hans Kuzel, has, after many years' hard work, succeeded in constructing a new electric lamp, which he calls the Syrius lamp. As is well known, incandescent gas light is cheaper than electric light, because the carbon filaments of the latter are very expensive and the glass bulbs soon wear out. Doctor Kuzel has now invented a new substitute for the incandescent filament by forming out of common and cheap metals and metalloids colloids in a plastic mass, which can be handled like clay and which, when dry, becomes hard as stone. Out of this mass very thin filaments are then shaped which are of uniform thickness and of great homogeneity. These two characteristics are of great value in the technics of incandescent lamps. The Kuzel lamp, it is claimed, uses one-quarter of the electric current which the ordinary electric lamp with a filament wire requires. Experiments, it is asserted, have shown that the lamp can burn for thirty-five hundred hours at a stretch. Another advantage is that the intensity of the light of the new lamp always remains the same, the lamp bulbs never becoming blackened, as is now the case.

NOTES.

O. J. Deegan, of Winnipeg, will start a branch plumbing shop in Port Arthur.

The Supreme Heating Co. will begin the erection of their buildings at Welland at once.

H. L. Mitchell is one of the latest to join Toronto's 400 master plumbers. His shop is at 78 Wickson avenue.

Norris & Maxwell, late journeymen with the John Ritchie Co., Toronto, have opened a plumbing and steamfitting shop on Clinton street, Toronto.

The Canadian Pipe Co., of Vancouver, have supplied half a million feet of wooden pipe to different points in Canada. The City of Vancouver is installing 3 miles of 36-inch continuous stave pipe built by this company. The pressure from a head of 195 feet is 80 lbs. per square inch. This is for the intake of the city water supply, it having been decided to go three miles further up the mountains to get a better pressure.

An intermittent filter will shortly be completed from the temporary treatment of the Ludlow reservoir supply of the Springfield, Mass., water works. Its object is to remove tastes and odors from the water during the Summer season, and it is not for Winter use or for removing a large proportion of bacteria. It was designed by Allen Hazen, and is being constructed by levelling off an area of about four acres on a point projecting into the reservoir, and covering it with coarse sand. Water will be pumped from the reservoir through a 24-inch pipe to an aerating fountain and thence distributed over the filters. The effluent will be collected in 8-inch drains 12½ feet apart, leading to a collector which terminates in a chamber where aeration will take place.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 9, 1906.

The unusual continuance of mild weather seems to have rather encouraged the trade than otherwise. The heating trade is not made any the less brisk on this account, as it is sufficiently cold for furnaces to be going, and orders are coming to jobber's hands more regularly than supplies from the manufacturers. On the other hand, the mildness of the weather is actually permitting drains to be dug and oil pipe laid down. The supply houses have the advantage of being called upon for unseasonable goods.

The iron pipe shortage is becoming more and more acute, and must continue to do so, considering the difficulty experienced by manufacturers in securing their raw materials. Discounts have been revised this week, showing advanced prices, as has been predicted in these columns.

RANGE BOILERS—Business is excellent, and prices are firmly maintained We give prices: Iron clad, 30 gallon, $5 ; 40 gallon, $6.50 net list. Copper, 30 gallon, $25 ; 35 gallon. $29.50 ; 40 gallon, $32 net.

LEAD PIPE—A further advance in pig lead has stiffened the market, and still higher prices are looked for. We are quoting : 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—Discounts remain as follows : Discounts on nipples, 1-4 inch to 3 inch, 75 per cent.; 3½ in. to 6 in., 72½ per cent.; couplings, ⅛ in. to 2 in., 55 per cent.

IRON PIPE—With supplies becoming constantly shorter, prices have been advanced and we are now quoting new discounts. Our prices Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50 ; 3-8 inch, $5.50 ; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50: 1 1-4 inches. $22.50; 1 1-2 inches. $27 ; 2 inches, $36.50; discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36: 2 inches, $50. The discount for black pipe is 70 per cent., and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—Considerable work is still being done which calls for these goods. Our discounts are as follows : Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Conditions on this market are steady, and prices remain: Bar Solder, half-and-half, guaranteed, 25c.; No. 2 wiping solder, 22c.

ENAMELWARE—We quote: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65 ; plate E11 and E21 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

ANSWER THIS QUESTION:

In your judgement is it essential that every closet connection to soil pipe stack should be provided with a BreaKsyphon?

If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a BreaKsyphon, and give the reasons why it would not be required.

For the best answer received by December 1, we will send a cheque for $5.00 and to every one sending a satisfactory reply for publication we will give a year's subscription to Hardware and Metal. Send in a reply at once and answer the question as fully as possible.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, November 9, 1906.

Iron pipe and fittings are the features of the week's advances, the new lists being issued this week showing stiff advances in pipe and a lowering of discounts on cast iron fittings of five per cent. One inch black pipe is now quoted at $4.62, an advance of 16 cents per hundred, while galvanized has been moved up from $6.10 to $6.27.

Other prices are as quoted by us last week although some supply men are asking higher prices on solder.

Business in plumbing suppliesikeeps up well, particularly in finishing goods. Shipments are still behind but manufacturers are working hard to fill all orders in hand. In heating goods the shortage in iron pipe is delaying many jobs. Half inch is about a week behind and shipments of one to one and one half inch nearly three weeks behind orders. The supply of boilers and radiators is well up to the demand.

LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 5½c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote : Medium and extra heavy pipe and fittings, 65 per cent. off ; light pipe and fittings, 60 per cent. off ; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—Stiff advances are reported this week with some sizes fully three weeks behind orders. One-inch black pipe is now being quoted at $4.62, and one-inch galvanized at $6.27. Full list in current market quotations.

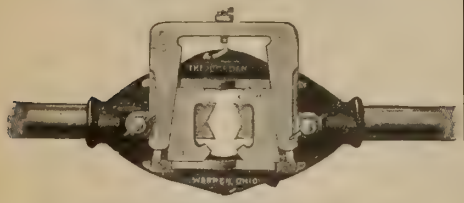
IRON PIPE FITTINGS—Advances on new lists are as follows : Cast iron elbows, tees, crosses, etc., 60 per cent.; cast iron plugs and bushings, 60 per cent.; flangle unions, 60 per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.

GALVANIZED IRON RANGE BOILERS—We quote : 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75 ; extra heavy, $6.75 ; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75 ; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20 ; 82 gallon, standard, $21; extra heavy, $24 ; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47 ; extra heavy, $55. Copper range boilers are now net list.

RADIATORS—Quotations have advanced about ten per cent, as follows . Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain very firm as follows : Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE—We quote as follows : Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25 : plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.



PLUMBING PARAGRAPHS.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

WRITE FOR PRICES

RICE LEWIS & SON

LIMITED

TORONTO.

The Crain Monthly Account System

$17.75

is the price we have always charged for this excellent system for the retail trade.

It cannot be purchased cheaper

that is in the 14 x 11 size. True, the Monthly Account System is being quoted cheaper. We can supply you with a complete outfit for ***$14.75*** in our 8½ x 11 size, but we do not recommend it as it is more expensive in the long run to the merchant, and it is not as easily handled. The sheet being short only accommodates one account, while with the 14x11 size you can have three accounts to sheet.

When purchasing a Monthly Account outfit consider first the size of the sheet, then the cost of supplies. In the first cost of putting in a system a couple of dollars should not be considered. In an 8½ x 11 size one thousand billheads; in the 14 x 11 size, assorted one, two and three accounts to the sheet, you get from two to three thousand billheads.

Write us for further information.

What's in a Name Without Quality to Back it Up?

"STERLING" PURE PREPARED PAINT is not particularly unlike many other mixed paints in the liquid form, or when first applied.

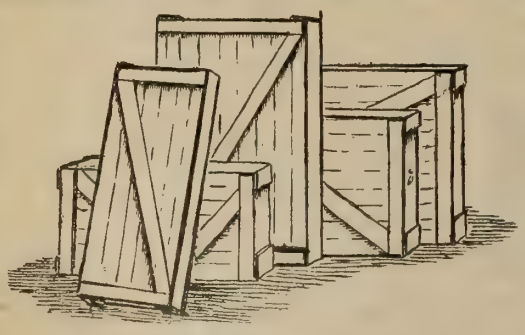
But the difference becomes more and more apparent as the months and years roll by, for "Sterling" Paint will present a smooth, bright, glossy appearance long after other paints have faded, peeled and disappeared. It Lasts.

"Sterling" Paint is always uniform, has more body, covers more surface and is more durable than any other paint Made in Canada.

We are determined that, cost what it may,

"STERLING" PURE PREPARED PAINT

shall always be known as the best paint.



"STERLING" IN NAME. "STERLING" IN QUALITY.

The "Good Cheer" Oak

NEW SERIES

Single and Double Heater

SECTIONAL VIEW.

Supplied with Feeder if Required

REAR VIEW.

Made in two sizes —either Single or Double Heater

No. 54, 13½ in. Firepot

No. 56, 15½ in. Firepot

This handsome Oak exactly fills the want between the low-priced heater and the more expensive base burner. The double-heater attachment we are able to include at a very small advance over price of a single-heater Oak, and is a feature which will be appreciated. Its construction as illustrated in the Sectional and Rear Views shows what a powerful heating adjunct it is.

Body of Stove is of heavy polished steel, handsomely nickel trimmed. Large feed door with good sized mica lights, making it a very cheerful stove, while screw dampers in both upper and lower doors make it easy to regulate the fire.

A shaking ring draw centre grate is provided, as also a good sized ash pan.

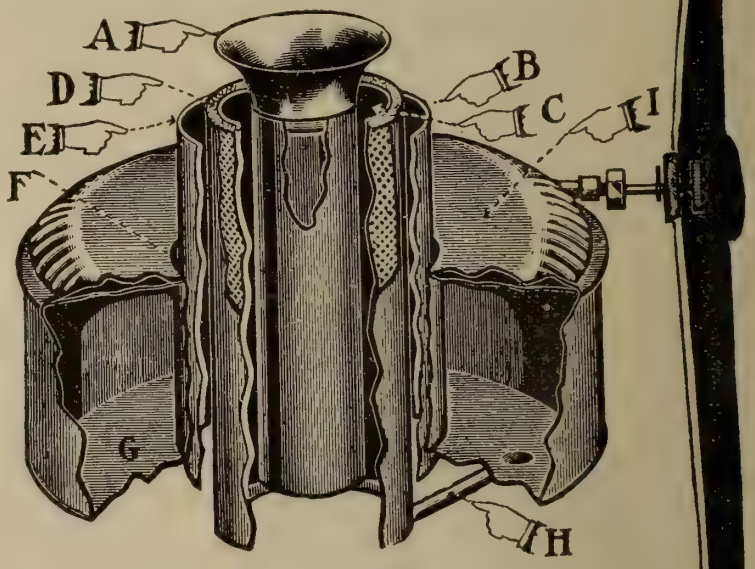
WOODSTOCK, ONT.



ALUMINUM OIL HEATER

The Heater that Makes Money for Dealers

How, because it gives your customer ***continued*** satisfaction. It does not get out of order after short usage and require you to send out a man to adjust or repair it, thereby dissipating the profits of your sale.

Listen to this, from Butler & Johnson, Syracuse, N.Y.: "We have sold over 50,000 Aluminum Heaters during the last ten years, and have never returned a single one for repairs or otherwise."

That's the kind of heater that there's money in for you.

These are a few of its advantages

1st. It has a stationary damper extending across the heater. This reflects the heat to the sides, so that it is radiated from sides and bottom as well as the top—just like a base burner.

2nd. It has perfect combustion, due to the ***three*** spacious air passages extending clear through the burner.

3rd. It is so simple that a boy or girl can operate it—can even re-wick it.

Note Construction of Grand Safety Burner.

A—Flame Spreader. **B**—Air space outside of Wick Tube. **C**—Air Space inside of Wick Tube. **D**—Wick. **E**—Outside Casing to Burner. **F**—Air space between Fount and Outer Casing. **G**—Fount for Oil. **H**—Feed Pipe conducting Oil from Fount to Burner. **I**—Shield resting on top of Fount with Air Space underneath.

Hurry your order in to us or to your jobber. This is the season. Shall we send you our free book?

How to Buy Horse Nails

If you are not particular, just order the number of boxes and the size required, and take whatever brand the wholesale dealer may have in stock. But if you want the best made or sold in Canada, without any exception, you will not make any mistake in specifying on your future orders that you want the "C" brand Horse Shoe Nails made by this Company.

You can do all your farrier trade with the "C" brand. They will fulfill the most exacting conditions required as tests of quality. They are of the best designs, especially made for Canadian use. Have the finest hardened bevelled points, which will penetrate easily into the hardest hoofs; they will not bend in driving, nor will the heads fly off on striking an obstruction. This is because they are hot-forged from a special quality of Charcoal Steel Nail Rods, made for our purpose, and imported direct by us from Sweden. It is the best material known or used in the world for the purpose of making horse nails. We challenge any maker in the world to give better results than are obtained by the use of the old reliable "C" brand Horse Nails, which has been made in Canada for the past forty years, and is the standard for quality to-day among all its competitors.

All the leading wholesale hardware dealers have them for sale, or will accept orders for same at our discounts (40, 10 and 7½ %), plus freight. Your orders are respectfully solicited.

Manufacturers of strictly high-grade Portland Cement made by the most improved method of manufacture in existence. Each barrel contains three hundred and fifty pounds of pure Portland Cement with no adulteration.

A NEW GLAZIER POINT

The above cut illustrates the lucky thought of an Ontario man.

He, like most of us, has had the disagreeable experience of attempting to drive a common Glazier Point into a sash with ordinary tools The tool never fails to slip, with the result that either the glass or the sash is damaged.

With the New Glazier Point you can drive it home with a common nail hammer, without the least danger of damaging the glass or sash. It is obvious that the New Glazier will at once meet with general favor with the public.

Any Manufacturer wishing to secure the sole rights of manufacture for Canada, will please address himself to Manager HARDWARE AND METAL, Toronto,

The Best Laid Out Store

is the one which displays the most goods.

There are very few men who can describe just what they want, but if they see it sampled on a shelf box they can point it out. Which is the easier—for a man to point out the article he wants, or for you to untie half a dozen packages to show him what you have in stock?

Your salesmen should be employed in selling goods, not in looking for goods, in untying packages and tying them up again.

Shelf Boxes improve the appearance of your store 100%.

The Bennett Steel Shelf Box is the best box on the market in Canada or the United States. It has galvanized steel sides and bottom, and thus saves at least 20% shelf room. The steel is not nailed to the wood front, but is locked in by our own patented process.

The Bennett Box is more durable than a wooden box. It has been tested for fifteen years and we have never heard of one man who was dissatisfied.

Note the "lip" on box, this renders it dust proof. Write for catalogue and price list.

CAMERON & CAMPBELL, SOLE MANUFACTURERS **TORONTO**

HARDWARE AND METAL, Toronto. Picton, Ont.

Dear Sirs—I wish to thank you for the number of enquiries received through the condensed advertisement which I inserted in your paper, advertising my Hardware and Tinware business for sale. I certainly consider your columns a good medium for advertising any business of this nature.

INTERIOR STORE ARRANGEMENT

What suggestion would you make regarding the lay out of a store 90 x 24? This enquiry was received a few days ago from the Wilberforce Lumber Co., who are opening up a hardware store in Durham. We have not only drawn out a floor plan for the store, but have dealt with the question of displaying goods in a general way.

Counters Passing Away.

The central idea in the lay out of a hardware store seems to be to arrange fixtures and stock so that customers can conveniently examine all articles which are for sale. For this reason the old wooden counter at the front of the store is passing away, shelving is built in most cases right to the ceiling in order that every inch of space may be utilized and as many articles as possible may be seen by customers at one time. Wherever practicable an open space is left in front of shelving.

Of course every up-to-date hardware store has shelf boxes. They improve the appearance of the store greatly as hardware articles are not done up in attractive packages. There is no uniformity in size among the packages and when they become broken they are an eyesore to the customer and an exasperating and irritating sight to the dealer.

Shelf boxes save the dealer's or clerk's time and what is of far more importance they save the customer's time. A dealer with a reputation for quickness of service will secure the trade of the man in a hurry. This is a busy age and the trade of the people whose time is limited is worth having. They have no time to haggle over price but pay willingly a good price for what they want.

Shelf boxes display goods better and in this way increase sales. Goods properly displayed in neat and attractive boxes will often suggest articles which the customer had not thought of buying. Times are good, men have money in their pockets and if they see what they want they are willing to pay the price.

We have sketched out a rough floor plan, embodying some of our ideas in connection with store arrangement.

Store Fixtures Suggested.

For a store 90x24 feet we would suggest on the right hand side as you enter a case about 60 feet long, something similar to section illustrated on this page. The base with two shelves should be left open and such goods as graniteware, lanterns, tinware, etc., could be shown off to advantage. It would be well to have say half of the base with only one shelf for showing off such large articles as boilers, large tea kettles, etc.

Above this base we would place shelf boxes for about 30 feet on which as many articles as possible should be sampled. The large boxes with the heavy goods should be placed at the bottom and the small boxes at the top as they can be lifted down easily. The other 30 feet would be open shelving.

The top of the base should have a projecting ledge of from 8 to 15 inches. This can be used for wrapping up small articles.

It is a mistake to take up space at the front of the store with such unsightly looking stock as nails which do not need to be well displayed to be sold. Keep them in the rear with the bolts, screws, etc., and have a counter there for weighing and wrapping parcels.

To the left as you enter the store we would place a glass gun and tool case about sixteen feet long to sit on a base similar to the above mentioned section. The glass case to

SECTION OF SHELVING AND SHELF BOXES,
Made by Cameron & Campbell, Toronto.

sit on this base would be about seven feet high and have sliding glass doors and cornice on top to set it off. Stoves and other heavy articles could then be placed along the left hand side in rear of the gun case.

Silent Salesmen in Centre.

Two or three silent salesmen should be placed in the middle of the store to form a quadrangle. This allows customers to walk up and down the side of the store and inspect the stock. In fact it would be well to place cards in the windows inviting people to come in and see your stock. Impress on them that clerks will be glad to answer any questions asked but make it clear that they will not be obliged to buy anything. Get the people into the store and if the goods are properly displayed in nine cases out of ten they will buy something before they leave.

We think there is a distinct advantage in having no counters at the front of the store. A much better view of the shelving and shelf boxes is obtained and the customers are more anxious to examine your stock closely. The very fact that you invite them to examine your stock assures them that you have confidence in your goods, and that the quality is of the best.

As far as possible arrange the stock so that women do not have to go too far back in the store. A stove is usually more attractive at the front than at the back and women pay more attention to the appearance than men do.

All exposed wood should be well finished. Don't use cheap wood. Remember if your store looks like a second hand junk shop, customers will only feel like paying second hand prices. There is as much in a setting of a diamond as there is in the diamond itself.

It is pretty hard to convince a customer his house or his barn needs painting when the only evidence of paint in your own store is what is in the cans on the shelves. How can you induce them to throw away their old lawn mower and buy a new one with ball bearings, which a child can run with ease, how can you induce the farmer to replace his old stump fence with a new locked wire fence which is far more useful and a hundred times more ornamental and how can you expect them to adopt the latest improvements when your own store is an advertisement for everything that is out of date.

No investment which improves the store and facilitates waiting on the trade is excessive.

HOW TO MAKE A CLEARANCE SALE SUCCESSFUL

A clearance sale should gain two results for the merchant. It should clear his shelves of all undesirable goods—or a major portion of them—and it should make new customers for his store. These objects in view, it pays to hold semi-annual clearance sales.

Before a merchant decides upon holding a clearance sale he should be sure he has the goods to deliver. A few odds and ends and antique styles will not make a sale a success even if they are cut in price. It would seem that many merchants believe to the contrary and when their sales do not materialize they wonder why. They spend good money in advertising special bargains that they do not have to deliver. The odds and ends that are desirable are picked up in the first day of the sale and on the second the crowd find nothing but everyday values. Is it any wonder the sale does not last two weeks?

A clearance sale, as its name signifies, is a clearance of odds and ends, broken lines, seasonable goods that will not be seasonable if held any longer, slow moving lines, etc. These lots may be large or small, but usually when bunched together will make a respectable showing. To these the wise merchant adds sufficient other lines to make it an object for the public to buy at that time.

Cut prices is the mighty lever that sets a sale going. Bargains are the fuel that keeps the steam up to running power. The sale goods must be cut in price. How deeply? As slightly as possible, to save the merchant all the profit he can, as deeply as necessary to attract trade. Policy must determine which lots to be sold at a loss, which lots to be sold at cost and which lots are to bear a slight profit. There should always be enough goods sold at a profit, even in a clearance sale, to overbalance the losses.

On the other hand, if there are not genuine and attractive bargains there will be no sale, only a splurge. Besides the lines to be cleared there should always be a number of leaders used during the sale. Any low-priced article of known value will make a good leader. The value should be genuine and moreover it must be such that the cut in price is easily recognized. For instance, any article that usually sells at fifty cents offered at twenty-five will be a good leader in a sale, provided the public know that it has always sold at fifty cents or can easily see that it is worth much more than a quarter. Leaders should be sold at less than cost or at no profit at the best. They are baits with which to catch the public eye—to draw them to the store where they can see the other lines on display.

Display Goods on Tables.

This brings the matter of displaying the goods in the store. There is only one rule for the merchant to follow, and that is, display as many of the cut price goods as possible. They should be spread out on tables and counters where they can easily be seen and handled. The public are rather skeptic about value at a sale, but when they are allowed ample opportunity to examine the goods and compare the prices with former ones their confidence is gained.

The display in the store should extend to the window. Goods advertised in the papers should be shown in the windows even if the window display has to be altered every day. When lots are large enough to permit it a solid window of one line of goods at the one price—if it is a low one—is likely to make the best impression upon the people who see it. But one idea is carried away and that is the low price at which the line is offered.

This part of the sale planned, there remains the advertising. This should be on as extensive a scale as costs will permit. Large newspaper spaces. Large bill board spaces. Large signs on windows and store front. Everything should point to a large sale at a large reduction in price.

Advertising Announcements.

Where a daily paper can be used a page or half page should be taken to announce the sale. This announcement should give the reason for the sale and the extent of it. It should teem with prices—cut prices. Following this on succeeding days smaller spaces can be used where only one or two lines are exploited. These lines must be extraordinary bargains. They should make the people wonder how the merchant can do it. Once get that kind of thing in the public mind and the crowds will come.

On Saturdays, market days and pay days, there is always reason to expect a large influx of customers. On the day preceding these large spaces should be taken and filled with tempting offers.

Besides the papers large dodgers should be printed and circulated throughout town and city and in the country for miles around. The more people that are invited to come to the sale the more will come.

A special sale must be fed constantly. Its course must be carefully followed. If it seems to lag new leaders must be added, fresh inducements must be offered. By carefully keeping up the interest a sale could be extended over many weeks, but in most places two weeks is long enough for the merchant to get the best there is out of a sale. In some localities, especially where there is much country trade, it is policy to extend the sale period to cover a whole month.

The merchant who follows this plan of procedure will succeed in having a profitable sale. The salespeople should be impressed with the importance of selling the clearing lines when possible and in cases of the more undesirable lines a little enthusiasm might be engendered in the mind of the clerk if a small P. M. was put on them.

The requisites for a clearance sale are: 1, bargain lots; 2, leaders; 3, display of goods; 4, advertising; 5, enthusiasm.—Brains.

AUTOMATIC SCREWDRIVER.

A machine for applying screws at the rate of fifty a minute, if necessary, has recently been placed on the market, and consists of a hopper connected by a vertical flexible shaft and tube to the driving mechanism below.

The withdrawal of the bit from each screw as it is driven causes a new screw to drop out of a magazine and fall in line with the bit, and also allows a screw to fall from the hopper into the magazine. The use of the intermediate magazine was found necessary, as the operation of the machine is so rapid that too much time would be wasted in waiting for it to drop from the hopper.

The screws are caused to revolve at the rate of 1,200 revolutions per minute by means of a friction drive so adjusted that the screw stops after it has been driven the required distance.

WINDOW AND INTERIOR DISPLAYS

MOVING DEVICE FOR CHRISTMAS WINDOWS.

Good old Santa and his reindeer are familiar as the central objects in Christmas windows, and it is doubtful if any better one can be devised, or one that can begin to equal him in interest. But the decorator who has been steadily using Santa for this purpose, year after year, may be glad of a suggestion by way of a change. Perhaps not many hardware merchants go in for mechanical contrivances to add to the attractiveness of their holiday windows, but here, is a simple one which some ingenuous good shift man might like to try. It is the form of a toboggan slide and could be used to advantage in connection with a display of skates, sleds, toboggans, snowshoes or other winter sporting goods.

The diagram shows how simple it is.

The Staging.

Two wheels, one higher than the other, connected by a belt to which are attached the brownies on their toboggans. It could be operated by a small motor.

The second illustration shows the staging. The housed background is merely suggestive. A piece of painted canvass with some trees, or simple winter scenery would answer. The mechanical contrivance would be placed behind the hill and adjusted to make it appear that the little fellows were coasting. The hill could be made out of batting, kalsomine and diamond dust. The belt which carries the tobogganers might be covered with cotton to prevent it showing.

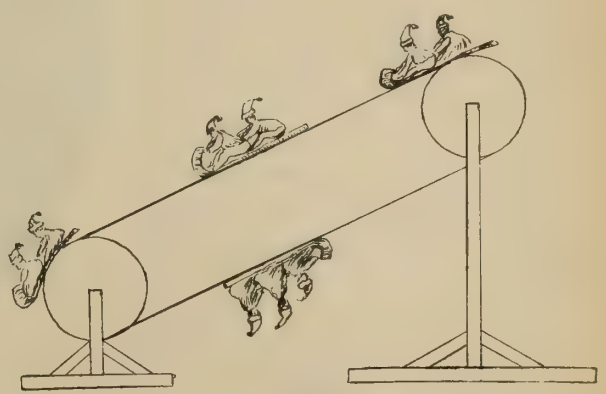
Have your local newspaper man write an article drawing attention to the novelty of the window display. It is good news matter for him and good advertising for you.

CALL ATTENTION TO DISPLAY.

One of the largest of the Chicago retailers recently placed a large card in the newspapers calling attention to his windows. The idea is an excellent one. The card stated that it was to the interest of everyone who was at all interested in good goods at low prices to watch the windows, as there were many goods shown there all the time that were not advertised in the newspapers. Attention was also called to the fact that the store devoted a large amount of care and money to the decoration of its windows, and that they were well worth looking at. This is a good idea to put into practice when it is desired to call particular attention to some article or line of goods which you wish to push, or when there is a special sale on. Make the window, the newspaper advertising and the interior of the store all join forces in booming the special event, whatever it may be.

KEEP WINDOWS CLEAN.

A walk through the principal streets of any big city will bring to view a surprising number of stores whose windows are by no means as bright as they should be. Some of them would pass all right at a casual inspection, and others seemed just a little bit dingy at the first glance. In some cases the dealer had arranged an excellent and attractive window display, the value of which was entirely lost by the fact that the dull window made the goods look anything but fresh as they appeared through the glass.



PRIZES FOR XMAS DISPLAYS.

Last year Hardware and Metal awarded prizes for the three best displays made during the Xmas season. This year we will give five prizes, but the displays must be of goods sold in hardware stores and suitable for Christmas presents, such as silverware, razors, cutlery, sporting or house furnishing goods, hardware specialties, etc. The prizes are:—

1st prize. $6 00
2nd prize. 4 00
3rd, 4th and 5th, a year's subscription to Hardware and Metal.

All protographs of displays must be mailed to us not later than December 31, 1906, and they should be accompanied by a short description of how the display was constructed, the display artist's name and, if possible, samples of the Christmas advertisements in the local papers backing up the window display advertising.

In addition to the above we offer a special prize of a handsome fountain pen for the best Xmas advertisement in a local paper pushing the goods shown in the window displays.

The Slide.

NEGLECT MEANS LOSS.

The attractively arranged window display will bring trade, no matter what sort of a town you happen to be doing business in. Show the people that you're up to date in your methods and that you've got the goods in your store. The show windows cannot be neglected nowadays without loss of business and prestige.

BANQUET TO MR. C. C. BALLANTYNE

If sincere and ardent appreciation is a reward for conscientious performance of a heavy task, then C. C. Ballantyne, ex-president of the Canadian Manufacturers Association, should consider himself amply repaid for the successful manner in which he discharged the duties of his high office. This appreciation found its expression in a splendid banquet given by the association in honor of its retiring president, in the Canada Club, Montreal, Tuesday night of this week.

Rarely in the history of Canada's business life, has such a large and influential body of men gathered for such a purpose. Over two hundred representative manufacturers, many of whom had come from distant parts of the country, sat down at the tables. J. S. N. Dougall, chairman of the Montreal branch of the association, presided and with him at the head table were: Hon. R. Lemieux, Hon. L. Gouin, Hon. J. D. Rolland, F. D. Monk, M.P., H. B. Ames M.P., H. A. Ekers, (Mayor), C. C. Ballantyne, R. Munro, Lloyd Harris, (Brantford), the Ontario vice-president of the association; G. A. Vandry, the Quebec vice-president; F. H. Mathewson, president of the Montreal Board of Trade; A. V. Roy, of the Chambre de Commerce; J. J. McGill and R. S. White.

After the king's health had been disposed of in the conventional style. Mr. Dougall arose to propose the guest of the evening. He traced Mr. Ballantyne's career from an office boy to one of the leading manufacturers in the country, and, in referring to his presidency of the Canadian Manufacturers' Association, declared that he was a man whose office had not so dignified him as he his office.

Mr. Ballantyne, when he rose to respond, was greeted with a tumultuous reception, he said that he looked upon the banquet not so much as a personal tribute to him as a tribute to the great national work the association had done in the past and as an earnest of their determination to do equally good work in the future. He proceeded: 'If there is any one principle which the association has stood for, and which during my term of office I am endeavoring to emphasize, it is the fact that we should encourage in Canada a broad Canadian citizenship, hand in hand with hearty national sentiment. It has been one of the pleasant features of our work that we have accomplished a great deal in this direction through the annual excursions, which have now come to be looked on both educational and enjoyable.

"What has been accomplished in the way of uniting the scattered provinces of our great country and establishing a community of interests between business men in every portion of it, to say nothing of the strong imperial sentiment which radiates beyond our own shores, may never be fully put into words; but it is enough to say that at a time when Canada needed self-reliance, when her people had wearied themselves of looking to Washington for commercial favors. this association rose above the difficulties of the hour, and has instilled into its own members and the Canadian people as a whole, those principles which have done so much to make us what we are to-day. I can never express to you the appreciation which I feel for the expressions of good-will so heartily extended to me in laying down the reins of office.

Policy of Protection.

"Criticism, both favorable and unfavorable, comes to all men in public positions, but I must say that the members of this association, as well as all others with whom I came in contact during my term of office, have been exceedingly generous to me in this regard. During the entire period, I have learned of only one criticism which might be called 'unfriendly,' and I think it well on this occasion to vindicate my position. Shortly after the publication of my annual address, which was delivered at Winnipeg. two or three leading news-

C. C. BALLANTYNE, Montreal.
Ex-President of the Canadian Manufacturers' Association.

papers, in as many of our large cities, took advantage of the statements which I made there to create in their own minds a great gulf between the manufacturing and farming interests of this country. Thorough protection was declared to be a boomerang, and the sentiment for a strong Canadian policy which exists throughout this country was called a 'bluff.' My statement that both political parties in Canada were 'Protectionists' was also stoutly denied.

"Now, I wish to state that I shall not enter into any argument on the subject of protection to-night, and further, that anything which I shall say has no political significance whatsoever. In my Winnipeg speech, I stated facts to show the absolute necessity of protection in Canada at the present time—its value to the Canadian farmer in building up a great home market; its value to the Canadian workingman in his competition with the cheaper labor of other countries; its value to the Canadian consumer in securing lower prices on the commodities of life, because of the fact that we have these industries at our own doors, and its value to the Canadian people as a whole in developing every resource which providence has bestowed on us, and providing diversified work and opportunities at home for our sons and daughters. On these four important planks my argument stands. I have nothing to retract; in fact, every day convinces me more fully of the soundness and safety of the policy of thorough protection for every Canadian industry, whether it be farming, fishing, lumbering, mining or manufacturing.

"A statement has also been made by one of the newspapers referred to that the Canadian Manufacturers' Association is demanding a tariff of 75 per cent. or 100 per cent. This statement, as you know, is absolutely untrue. We have a tariff in Canada to-day which averages about sixteen per cent. We have asked for a revision, not only in our own interests, but for the good of all concerned. This association has never adopted any expression of opinion which would indicate that we favored a tariff as high as 75 per cent. or 100 per cent. What we want is a careful adjustment on a business basis from a national standpoint, introducing the same sound business principles into the administration of Canadian affairs that the sensible business man would use in the development of a growing industry.

Tariff Revision.

"With regard to the coming revision I have nothing to say, except that I believe that the Parliament of Canada will act wisely and well. Anyone who is familiar with the commercial development of Canada, and who takes a broad outlook on the future, will know that now is the critical period when our tariff must be strengthened and our industries defended. As a business man, I cannot understand how anyone having a comprehensive knowledge of Canadian conditions can advocate a lowering of the tariff as being in the best interests of this country. I repeat that nothing could be more detrimental to us as a nation at the present time than a reduction in our present tariff.

"I have said nothing with regard to the Imperial policy of the association, and it may be well to restate the position on this great question which we have taken, and have so often confirmed. Our policy is simple and clear; we wish to manufacture everything in Canada that can reasonably be made here, and to buy as far as possible our surplus requirements from British sources. In other words, we want a higher tariff against our foreign competitors and an equalizing tariff with

Great Britain. We have plainly stated what we mean by an 'equalizing tariff,' namely, that Canadian manufacturers and workingmen should have a sufficiently high duty to offset the lower cost of production in Great Britain; so that the Canadian ,when competing with the British manufacturer, will at least be on a equal footing. This is the policy which is designed first of all to build up our own Canadian industries, and at the same time to strengthen by material ties the strong bond between the Mother Country and ourselves.

"It is gratifying to all Canadians, I am sure, to know that our imports of manufactured goods from Great Britain this year have increased more proportionately than imports from the United States. British imports show an increase of thirteen per cent., against United States increase of eight per cent. The total figures, however, show that the United States manufacturer still exports to this country nearly three times as much as we buy from Great Britain. Any lowering of our tariff would mean that the British manufacturer would export less to Canada, and the foreign manufacturer more."

Concluding, Mr. Ballantyne said: "If in closing I have one message to give you, it is the call for a broad Canadian citizenship. We have successfully passed the early stages of our development. The task before us of developing this great country will not permit of strife on factions; we must have strong national co-operation if we would accomplish what is given us to do. The life of this great association must be woven into our national development; national conditions must be studied even more closely; national difficulties must be faced and overcome; progressive movement, whether commercial, social or educational, must be sustained, and through all our work 'Canada and her ultimate highest success' must be our one prevailing aim."

Hon. J. D. Rolland proposed the next toast, "The Dominion Government," and referred to the expected change in tariff at the coming session of Parliament.

Hon. Rodolphe Lemieux, who responded, appealed strongly for a national rather than a provincial sentiment in Canada. At the conclusion of an eloquent address, he, as the representative of the Cabinet said, that, at the next session, the Government would "Work out for the Canadian people, a sound, strong and wise fiscal policy." A statement that was received with cheers.

F. D. Monk, M.P., also acknowledged the toast in a humorous speech. He closed with a warm tribute to Mr. Ballantyne, declaring that in spite of his great success, he was still the same modest gentleman he had always been.

Col. Burland, in proposing "Provincial Legislatures," spoke of the need for technical schools, and from these remarks, Premier Gouin, took his cue in his reply. He stated the determination of the Quebec Government to seriously undertake this work, and he called for the co-operation of the manufacturers and the public.

G. W. Stephens, M.L.A., also responded briefly to this toast.

"Montreal and Its Commerce," was proposed by Lloyd Harris and responded to by Mayor Ekers, who praised the financial condition of the city, and deplored the indifference of English-Canadians to municipal affairs.

F. H. Mathewson responded for the Board of Trade, A. V. Rov. for the Chambre de Commerce, and R. S. White, in his capacity as Collector of Customs.

The toast of "The Chairman," brought the banquet to a close.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

WESTERN DEALER HAS NERVE.

L. F. Sherrin of Holland, Man., is one of several progressive hardware dealers in the West, who are making a serious and determined effort this fall to grapple with the long credit problem. In an advertisement which ran in his local paper during the month of October, he announced to his customers his determination to close his books absolutely from November 1st to April 1st, and in a few plain, business-like words he explained his reasons for this step. A little later when Mr. Sherrin has given the experiment a fair trial Hardware and Metal hopes to be able to report the measure of success which has attended his efforts. There can be no doubt that Mr. Sherrin and others who are inaugurating this policy, can carry it out if they are entering into it with sufficient determination. There are three requirements which are absolutely necessary in order to deal successfully with the credit evil in the West and these are backbone, more backbone and still more backbone.

Advantages of Organization.

A large and prosperous retail hardware firm in a thriving western town have written to J. E. McRobie to the effect that they appreciate the indirect advantages which they derive as members of a strong Retail Hardware Association, and also that their membership in the association has been worth many dollars to them in actual cold cash through the better understanding which they now have with their opposition. This better understanding is the direct result of meeting business rivals in the local and general association meetings. There can be little doubt that this experience has been that of many other members of the association throughout the West, but it is only once in a long time that members speak a good word for their association. They let the secretary know when things go wrong but they seldom think it worth while to mention when things go right.

Unbusinesslike Business Methods.

Only a very few hardware dealers will deny that the Western Association has been of direct benefit to them and all who can see a few inches past their own noses will acknowledge the immense indirect benefit to the retail hardware trade in having some organization to protect their interests and to speak for retail hardware men as a body in dealing with the other branches of the trade. All this goes without saying but sometimes the members forget that the Association must be financed from their fees and that it cannot live on nothing. There are expenses in connection with to spend so much of his time in efforts and these expenses must be paid. It is not right that the secretary should have to spend so much of his time in efforts to collect the membership fees. If membership in the Association is worth anything it is worth at least 20 cents per week. And the annual fee of $10 should be paid as soon as a notification is sent by the secretary to the effect that it is due. The business-like hardware men of the West believe in their Association, but many of them in very unbusinesslike manner neglect to attend to the payment of their membership fees. Some day the writer, in collaboration with Mr. McRobie, intends to write an article for this department on "The Unbusinesslike Methods of Business Men."

MRS. HUMPHRIES DEAD.

Friends of A. W. Humphries, Parkhill, president of the Ontario Retail Hardware Association, will sympathize with him in the loss of his wife, who died in St. Joseph's Hospital, London, on Thursday, after undergoing a serious operation. Mrs. Humphries has been an invalid for a long time, and it was a heavy sacrifice for Mr. Humphries to make, to be absent from home on association business. At the time of the last convention, Mr. Humphries stated that it would be necessary for him to dispose of his business in Parkhill and remove elsewhere, in order to help his wife to regain her health. The funeral takes place in Parkhill to-day (Saturday).

Mrs. Peart, the young wife of J. Walton Peart, of the St. Mary's Hardware Co., is recovering from her recent attack of typhoid fever. She suffered a relapse, and after six weeks still has the fever, but strong hopes are held for her recovery.

Vice-President Scott, Mt. Forest, and executive officer D. Brocklebank, Arthur, have been kept busy recently with a very active business and a shortage of help owing to clerks leaving for Western Canada and Ontario cities.

HARDWARE MEN IN MUNICIPAL POLITICS.

In a recent issue we commenced a series of sketches of hardware men in Western Canada, who are giving evidence of public spirit by serving their fellow citizens, either as Mayor of their town, or in some important office in connection with their local Board of Trade. The object of this series is to give the business men of Canada a few examples of leading business men in the West, who are able, while leading the strenuous and successful business life, to find time for public duties.

That our towns and municipalities require the services of business men in the conducting of their affairs, goes without saying, and it is usually the ease that the live, successful hardware merchant, is the best business man in every town. Consequently, it is to the hardware men that most of our towns and cities must look for the best business candidates.

Western Canada is particularly fortunate in the number of business men who have been induced to take an active part in municipal life, and of these, a good proportion are hardware merchants.

There seems to be little doubt that the next Mayor of Winnipeg, will be Jas. H. Ashdown, the millionaire hardware merchant; in fact, his election by acclamation is considered not unlikely. It is to be hoped that many other hardware merchants will follow the worthy example of Mr. Ashdown, and consent to some slight sacrifice of their business interests in order to advance the general interests of their municipalities. Generally speaking, the successful hardware merchant is the man in every town best qualified to be its Mayor.

UNIFORM FREIGHT RATES.

Every year at about this period there is great activity in the warehouses of wholesale establishments, due largely to the general desire to make as many shipments as possible before the close of navigation. There are numerous lake and river ports which are more easily and speedily reached by water than by rail; some of which can only be reached conveniently by water. Transportation by rail is made difficult by the lack of sufficient freight cars. The principal cause of the unwonted shipping activity winter freight rates come into force on the railways and are considerably higher than the summer freight rates.

Why should there be a difference in the rates for the two seasons? Certainly with conditions such as they are to-day one would not think it necessary that there should be any difference. True, the railway companies may have greater difficulties to contend with from fall to spring, but they don't justify an advance of 20 per cent. to 25 per cent.

The practice is an old one and conditions are greatly changed since it was inaugurated. Business men do not feel that they are being fairly dealt with by the railways.

HIGHER DUTIES ON ZINC.

British Columbia zinc mine owners are forwarding a petition to Finance Minister Fielding, asking that certain changes be effected in the tariff for the benefit of the zinc industry in Canada. It is asked that galvanized barb wire, brass blocks, wire (galvanized) and spelter blocks, pigs, sheets, etc., now admitted free, be subject to a tariff of 25 per cent., that the present tariff on zinc white, 5 per cent., be increased to 30 per cent.; that the tariff on galvanized plates, now 5 per cent. be increased to 25 per cent.; that the tariff on galvanized tubing, now 15 per cent., be increased to 20 per cent., and that the 25 per cent. tariff on zinc manufactured of N. E. S., be increased to 35 per cent.

The petition briefly sets forth the grounds of these demands and refers the tariff commissioners to the report of the zinc commission for confirmation of the statements made and fuller discussion of the various phases of the subject. It is urged that the protection asked for will aid in the development of a great zinc industry in British Columbia, and will mean the employment of a great deal of highly paid labor, directly and indirectly; besides giving a splendid impetus to the development of the mines of the Slocan and Ainsworth districts and providing another substantial market for the coal product of the Crow's Nest Pass.

It is doubtful, however, if the Government will make the heavy advances asked, at this session of Parliament, as they are being criticised considerably for establishing the 35 per cent. tariff on white lead a year ago, before the lead corroders were in a position to supply the demands of the country. There is, in fact, quite a feeling amongst paint manufacturers on this matter, they having had to import large quantities of white lead from England, in spite of the high duty.

TARIFFS AND COMMISSIONS.

The United States government is sending a commission of experts to Germany to arrange terms by which the States will enjoy the minimum German tariff. Next to Great Britain, Germany is the United States largest customer. Trade between the two countries last year totalled nearly $370,000,000 of which the States sold nearly $235,000,000.

Less than a year ago Germany enacted a tariff law which provides for two rates of duty, one a general rate and the other a conventional rate, which is enjoyed by those countries with which Germany enters into commercial agreements. Upon representations made by the American government the time for the higher rates of duty to become operative against American importations was postponed until July 1, 1907, and in turn the President extended to German importers, the provisions of section three of the Dingley law.

Large American exporters to Germany have been stirring themselves to hasten government action which would prevent the operation of the maximum tariff against American goods next July. Germany's complaint against the United States tariff is in regard to rules and regulations rather than the weight of duty and no doubt is entertained that the commission will be successful.

Canada's trade relations with Germany are on a different basis. Since the absorption of Great Britain several years ago of the favored nation treaty according to Germany equal rights with the Mother Country in colonial mark-

ets, the Fatherland has been distinctly unfriendly. Of course the new maximum tariff is imposed against us. Before the unpleasantness arose the trade was increasing gaily, eight millions in 1901, thirteen millions in 1902, fourteen millions in 1903 Last year it was down to seven millions.

Germany has got the most of it. In 1903 our imports from Germany were over twelve millions and our exports thither just above two millions. Last year our imports were over six and a half millions and our exports eleven hundred thousand German trade lost nearly six millions; Canadian less than a million. There have been indications that trade interests would like to recover the lost ground. Germany's total importations are over a billion five hundred millions. Canada wants a share of it and is not likely to stand in its own light. We must, however, maintain our right to give whole British preference we please without consulting our foreign customers.

Parliament sits on Nov. 22 to give us a new tariff Mr. Fielding has promised it will be of the latest fashion, with minimum, maximum and general schedules. Doubtless the maximum will be imposed against American goods in view of the high American tarff against us. When Uncle Sam gets busy to save his trade with us, in 1905, a hundred and fifty-five millions, we may witness the interesting development of a tariff commission coming our way.

SCHOOL EQUIPMENT.

Many hardware merchants are probable not aware that the Educational Department of the Province of Ontario lays down a list of the equipments required by each school under the jurisdiction of the Department. The following is the minimum equipment necessary and if any dealer can discover that any schools in his district are deficient in any particular, the matter should be brought to the attention of the School Board, and an order solicited for such articles as can be supplied through a hardware store.

A globe, not less than nine inches in diameter and properly mounted; a map of the hemispheres; a map of each continent; a map of Canada; a map of Ontario; a map of the county (if a suitable one is published); a map of the British Empire; a map of the British Isles; an atlas or a gazateer; a standard dictionary for each class room (with English pronounciations); a numeral frame (or an adequate supply of loose cubes); a good clock for each class room, kept in good condition; a set of mensuration surface forms and geometrical solids; a blackboard set for each class room (one protractor, 15 1-2 inches; triangle, 24 inches; a pair of compasses, two pointers, a graduated straight edge); a pair of scales, with weights, to weigh from half-ounce to ten pounds; a set for measure of capacity (pint, quart, gallon); a set for square and cubic measures; a school library of the minimum value of $20.00 for each teacher employed, increased annually after December, 1907, by at least $10.00 until the value for each teacher employed reaches $100.00. A suitable book case shall also be provided.

THE METAL SITUATION.

Pig iron is much stiffer than at the same period last week, although prices have not actually changed. The demand continues as active as before, and higher figures in the near future may be anticipated. There is very little stock in the chief metal centres of the country. One of the largest Montreal firms sold all their pig iron from the wharf (amounting to 250 tons) to one consumer, this week, thus leaving them only their warehouse stock with which to meet current demands for iron.

Pig lead is still soaring, an advance of ten cents per hundred pounds is the latest development, and prices now quoted by the metal merchants are from $5.35 to $5.45. Prominent dealers state that there is every likelihood of exceeding even these figures when winter rates come into force. Copper continues firm and scarce, many producers being sold out for several months ahead.

Cold rolled shafting has stiffened, and it is expected that, in keeping with the tone of primary markets, this product will shortly command higher prices.

Black sheets are very firm. At time of writing, one large importing firm has already advanced prices approximately ten cents, and, judging from the reports of producers this will have to be generally followed almost immediately. Market conditions certainly justify the advance.

Galvanized iron shows just the same conditions as were apparent last week. Dealers are still averse to making contracts, as prices are now in abeyance. When the new quotations are issued it is expected that a material advance will be shown, even over the recently revised figures.

Purchasers of sheet lead are experiencing difficulty in having their specifications filled promptly. There is a decided shortage in this market, and, in view of the price of pig lead, it would not be surprising to see another jump in sheets.

CANADA'S TRADE WITH FRANCE.

Canada's trade with France is not what it ought to be and might be made. The Dominion government pays a considerable subsidy for a direct line of steamships between Canada and France. The Department of Trade and Commerce maintains a Canadian Commercial Agent at Paris. The British Chamber of Commerce in Paris has established a Canadian branch. The economic, journal France-Canada of Montreal has recently opened an office in Paris.

All these things indicate an awakening of interest in Franco-Canadian trade but Canada does not appear to be reaping any of the fruits as yet. The volume of trade is increasing but according to the latest returns issued Canada's share grows smaller and France's larger.

The total trade with France in 1901 was $7,084,000; Canada buying $5,503,000 and selling $1,581,000. Last year the total trade was $8,712,000; Canada buying $7.201,000 and selling $1,511,000. That means an increase in Canada's purchases of $1,700,000 and a decrease in her sales of $70,000.

France's total importations for consumption in 1904 were about $750,000,000. Her purchases in Canada were a little over a million and a half. One article, canned lobster, composed considerably more than half the total. In the evidences of awakening interest and the wide room for expansion there is hope for a great development in the Franco-Canadian trade especially from this end.

IT CIRCULATES EVERYWHERE.

"I have noticed," said W. H. Evans, of the Canada Paint Company, to a Hardware and Metal man, the other day, "that your paper boasts of circulating everywhere in Canada. Here is something that helps to substantiate that claim," and, from a pile of letters and orders he produced a page from a recent issue of Hardware and Metal, containing the advertisement of the Canada Paint Company, a la Roosevelt. It had been sent in by J. C. Pendry, manager of the British-American Paint Company, Vancouver, B.C., and, in a corner of the page, above Mr. Pendry's initials, was the comment, "Very good, Mr. Evans."

HELPS OUT DELIVERY SERVICE.

A Brooklyn firm last Christmas gave a premium to customers who carried away the parcels of goods purchased. The premium was a specially designed card puzzle, showing a lot of delivery waggons having to make trips over a labyrinth of routes. If the delivery service can be made lighter, it helps considerably, but it isn't good policy to ask customers to carry parcels unless some inducement is offered.

HARDWARE TRADE GOSSIP

Ontario.

Geo. Stephens & Co., hardware merchants, Chatham, have dissolved partnership.

W. R. Hobbs, Toronto, president of the Consolidated Plate Glass Co., is on a business trip to Winnipeg.

Wm. Barker, hardware merchant, of Georgetown, called on the wholesale hardware trade in Toronto this week.

L. Mahen, Penetang, Ont., is starting a hardware store, and was in Toronto selecting his stock on Thursday.

J. C. Chalmers, hardware merchant, St. Marys, Ont., was a visitor in Toronto this week calling on the wholesale trade.

C. S. Rollston, Vancouver, patentee of a useful clothes line pulley, was a caller on Hardware and Metal, in Toronto, on Monday.

Mr. Stavert, Montreal, Canadian representive of genuine Jenkins valves, called on Hardware and Metal in Toronto a few days ago.

A. G. MacLean, Ottawa, manager of the Canadian Turpentine Co. of that city, was married a week ago to Miss Young, of Almonte.

Mr. Parr, father of Parr Bros., hardware merchants, Blackstock, Ont., was in Toronto this week calling on the wholesale hardware trade.

C. C. Ballantyne, ex-president of the Canadian Manufacturers' Association, will be a guest of the Canadian Club at a banquet, to be held in Cornwall, Nov. 29. He will speak on "Canada's Future."

Knyvett Naftel, formerly with N. D. Rougvie, Goderich, and later with J. B. Hawkins, has gone to Drayton, Ont., where he has a position. Mr. Naftel was for some time with the S.W.P. people, at Los Angeles, Cal.

The Warren Sporting Goods dealers, are now doing business at their new premises, 101 King street west, Toronto. They will also carry a stock of shelf hardware, which will be placed as soon as shelving can be procured from Cameron & Campbell, whose factory is rushed with orders.

J. J. Whalen, Vancouver, and H. H. Eager, Winnipeg, traveling representatives of the Sherwin-Williams Co., in British Columbia and Saskatchewan, were callers at the Toronto office of Hardware and Metal, on Monday. They went west on Wednesday with the other western representatives of the S.W.P.

As a result of the vote at Goderich, Saturday, on the by-laws to aid two new industries, the Goderich Wheel Rigs Co. will construct a two-storey factory 60 x 300. This will be a duplicate of the plant of the Lloyd Mfg. Co., of Minneapolis, and will make baby carriages, go-carts and rattan goods. Plant will cost $150,000.

J. B. Hawkins, of the Electro Surgical Instrument Co., Rochester, N.Y., spent Sunday last at his home in Goderich, and at the auction sale of the Blake properties there on Monday, invested $735.00 in a lot on Montreal street, a few yards from the square, a purchase which will no doubt make a little money for J. B.

Last Saturday evening, J. C. Nicholson, manager of the Toronto branch of the Canadian Rubber Co, was presented by the Toronto staff and a few friends with a solid gold watch and locket engraved. Mr. Nicholson is leaving Toronto to take a position as manager of the rubber goods department at the company's head office at Montreal.

Western Canada.

The hardware firm of Lennox & Butt, Winnipeg, will in future be carried on by E. Lennox.

Marshall & Wetlaufer, hardware merchants, Lemberg, Sask., have moved into their new cement block store.

H. T. Kirk, New Westminster, and Hodson & Stearman, Vancouver, are two B.C. hardware firms winning a reputation for their excellent window displays.

Mr. Atkins, of Atkins & Griffin, hardware merchants, Shoel Lake, Man., has purchased the hardware business of Nichols & Renouf, Victoria, and will make extensive improvements in the store building. The Shoel Lake business will continue under the same management.

Quebec.

Victor Leger, hardware dealer, of Vallevfield, paid a business visit to Montreal this week.

D. T. Creswell, general merchant of Martintown, Ont., called on the Montreal wholesalers this week.

Geo. Higginson of Calumet, visited Montreal on Wednesday, to purchase supplies for his saw and grist mill.

George Caverhill, of Caverhill Learmont & Co., Montreal, has returned from a visit in the Eastern States.

O. Pauze, of O. Pauze & Co., hardware dealers and grocers, L'Epiphanie, was in Montreal during the past week.

G. S. James, of James & Reid, hardware dealers, Perth, Ont., called on the Montreal jobbing trade, last Wednesday.

Thos. Dallaire, general merchant, of Ste. Marie, was among the out-of-town hardware buyers noticed in Montreal this week.

E. K. Spinney, wholesale hardware dealer, of Yarmouth, called at the Montreal office of Hardware and Metal, on Wednesday.

Mr. Boxall, of Boxall & Matthie, dealers in stoves and tinware, Lindsay, was a recent visitor at the Montreal supply houses.

The Williams Gauge Company, Pittsburg, whose Canadian headquarters are in Montreal, have opened a branch office at 64 Wellington street west, Toronto.

The C.P.R. have placed an order for half a million Barclay Nut Locks, with the J. A. Young Company of Montreal. This quantity will be sufficient to equip 250 miles of track.

W. Beverly Robinson, metal importer of Montreal, will sail for the Old Country on the 24th inst. While there, he will consult his principals regarding the Canadian business.

H. Austin, Liverpool manager of George Scott & Son, manufacturing chemical engineers, London, was in Montreal this week and last, making his headquarters with the firm's Canadian representative, J. A. De Cew.

J. C. Nicholson, who has been connected with the Canadian Rubber Company in the West for over fifteen years, has been transferred to the Head Office in Montreal, and will now have jurisdiction over the general rubber goods division of the company.

SEASONABLE WINDOW DISPLAYS.

At Christmas time every hardware merchant is puzzled to know what sort of a display to put in his windows that will be attractive to the general public, and at the same time sell goods. There are so many different lines to be brought before the public that the window should be trimmed with different goods every two or three days or the windows rearranged as the change catches the passers eye.

We would suggest that one window be devoted to the display of chafing dishes, trays, tea pot stands, coffee machines, tea and coffee pots, plated spoons, forks, and bread knives. A background should be built and covered with some black material to which attach trays, tea pot stands, plated spoons, and forks, ladles and chafing dishes. Then on the floor of the window spread some light bunting. Don't stretch it tight but leave it wavy. Arrange chafing dishs, coffee machines, etc., artistically on the bunting, putting small ware in between larger articles in order to take the bare effect from the window, when you have finished this go on the side walk and look it over. You will no doubt find a few errors which can be easily rectified.

Next you might tackle a stove window, which is the least attractive of all displays in the hardware line, unless special care is used in the arrangement. First drape the sides and back of window nicely with some colored material. A flat black painted surface for the bottom of the window makes a nice contrast, then fill the background in with dish mops, pot cleaners, stove brushes and flue stops. At the ends arrange kitchen knives, bake boards, flour bins, etc., these articles add life to an otherwise dry exhibit. One steel range, one cook stove, and one heater, with oil stoves and heaters, and many other articles of use about the culinary department of the household might be arranged between the stoves and in the foreground. Place a row of flue stops and dampers next the plate glass and on the range and cook stove place tea kettles, double boilers, stew pans and other cooking utensils.

A Chicago store last Christmas gave employes of more than a year's standing a $5 gold piece.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Linseed Oil—1c. advance.
Benzine—Now 25c. in barrels.
Pig Lead—Another advance of 10 cents.
Jenkins Valves—Now 32½ per cent.
American Steel Sheets—Have gone up.
Black Sheets—Advanced 10c. by some jobbers

TORONTO.

Linseed Oil—Advanced one cent.
Mixed Paints—S.W.P. advanced 5 cents.
Plated Ware—American lines advanced.
Copper and Nickel ware—Now 30 per cent.
Wringers—Advance on Royal Canadian.
Iron Beds—Advanced 5 per cent.
Brass Beds—Will advance.
Galvanized Sheets—Apollo 5c. higher.
American Coil Chain—10c. per cut higher.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Nov. 16, 1906.

Outside of the fact that prices are stiffening all around, there is little to say this week. Business remains very active, and, as is the case in every other branch of the trade, there is a tremendous rush to get goods away before the boats stop running. The lower river boats will be off the route next week.

Jobbers still find the greatest difficulty in shipping orders complete, according to specifications. The scarcity in many lines of manufactured goods has not abated, so that it is often impossible to send all the articles ordered by customers.

AXES. — We quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES. — The usual business is being done in this line. We still quote: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS.—The advance recently made is being well held. Our figures are: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES — We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS.—The snow coming, even though the fall was very light, has given impetus to the demand for this line. We quote: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS. — Discounts, as recently amended, still rule the market. We still quote: Best iron rivets, section, carriage, and wagon box black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—We still quote: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS—Our discounts remain as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.: Felisterhead, iron, 30 per cent.. Felisterhead, brass, 25 per cent.

BOLTS AND NUTS. — Conditions are unchanged. Discounts still remain as follows: Carriage bolts, 3-8 and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—A brisk trade is being carried on. Discounts are C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS.—The scarcity is not so pronounced this week, and sizes are now obtainable which last week were off the market. The price is still held at $2.20 per keg base, f.o.b. Montreal.

CUT NAILS—Prices are unchanged, at $2.20 per keg base, f.o.b. Montreal.

HORSESHOES.—The quotations are: P. B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs extra.

BUILDING PAPER. — Business is quite large, dealers having sent in large orders in anticipation of the Winter demand. No change in price is reported.

CEMENT AND FIREBRICK.—Firebrick is scarce, and those dealers who have stocks on hand, have no difficulty in placing large quantities. We quote: "Lehigh" Portland in wood, $2.54, in cotton sacks, $2.39; in paper sacks, $2.31. Lafarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—Shipments are large, and the heavy demand is keeping stocks very light. The following prices are firm: 5-16 in., $4.30; 3-8 inch $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT.—Prices continue the same as at our last report. We quote: Shot, packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION — Quotations remain: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Nov 16, 1906.

Very few advances are being made this week. The principal one being copper and copperbottom boilers, kettles, teapots, etc. Subject to a 30 per cent. discount instead of 40 per cent. as before.

The advance of 5 per cent on English nickel plated cutlery has not as yet effected the Canadian made lines. The demand has been just as keen, case carvers and table cutlery being particularly so, razors are also having quite a call.

The shipping of Christmas goods still goes merrily on as the remarkably open fall has given the wholesale houses time to catch up with their orders before the close of navigation.

Nails remain firm at $2.10 base but it is predicted that they will far exceed that price before long. The sale of the Ontario Lead and Wire Co.'s wire nail plant to the Ontario Tack Co. is an important move towards eliminating the price cutting which has been the feature of this line for a long time.

Revisions of our discounts on bolts and screws are also made this week.

An advance of 10 cents per cwt. has been made on American coil chain. Owing to the great scarcity of raw material and the large demand at the present time for chain.

Iron beds have been advanced 5 per cent. and it is certain that brass beds will also experience an advance shortly.

AXES AND HANDLES.—Large shipments are still being made to districts where the close of navigation encourages shipments.

CUTLERY AND SILVERWARE.—The demand for case carvers is particularly large as are also razors and penknives.

SPORTING GOODS.—All winter lines such as snow shoes, skates, hockey sticks, etc., have a great demand. Orders for shooting material have fallen off as the season is practically over.

CHAIN—We continue to quote: 1 inch, $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

RIVETS AND BURRS.—Copper rivets remain as quoted last week, 27½ per cent. and copper burrs, 15 per cent.

SCREWS.—Coach screws, curve-point are subject to a 5 per cent. raise.

BOLTS AND NUTS.—Stocks are being rapidly repleted with prices the same as quoted.

TOOLS.—Trade not so brisk as weather is unfavorable for outside work.

SHOVELS.—Demand is brisk, particularly snow shovels, which are selling rapidly.

LANTERNS—Cold blast are still selling at $6.50 per doz., large shipments still the order of the day.

EXTENSION AND STEP LADDERS—Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING — Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS.—Market still very firm, as quoted, $2.10 base with no rebate.

CUT NAILS—We quote: $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—The demand is still very great and large shipments are made every day, particularly to the northern districts.

STABLE FITTINGS—This line is being included in most sorting orders and cow ties are in good demand.

BUILDING PAPER—Trade is brisk and shipments large.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES, WOOL AND FURS.—Wool is slightly lower. Country hides are 1-4 c. better. Lambskins, horse hides and rendered tallow are advanced.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 16, 1906.

As has been customary for a long time, the only changes which we have to report this week, are advances. The only ones which have been made very generally, have been in pig lead and steel sheets. The former metal has again gone up 10 cents per hundred pounds, and even this does not include winter rates. When these come into force,—and that will probably be next week—still higher figures will be seen.

Some dealers have raised their price on black sheets, about ten cents per hundred pounds, in all gauges, but this has not been unanimously followed as yet. Other lines are very steady, with no weakness in sight.

COPPER—Last week's prices are still firm, and we quote: Ingot copper, 24c. to 24½c.; sheet copper, base sizes, 31c.

INGOT TIN—Unchanged conditions prevail. We still give the following price: 46 to 46½c. per lb.

ZINC SPELTER—No new developments have transpired. We continue to quote: $7 to $7.25 per hundred pounds.

ANTIMONY—We continue to quote 27½c. to 28c. per lb.

PIG IRON—Prices are unchanged, but conditions are firmer. We quote as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—We still quote: British and American tubes, 1¼ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6¼c. to 7c.; Jowitt's best, 11c. to 11½c.

GALVANIZED IRON—Market conditions remain firm as ever. Indeed, conditions are such that one large importing house have been advised by their principals, to discontinue selling until they are in receipt of further instructions. We quote: Queen's Head 28 gauge, $4.50 to $4.75; 26 gauge, $4.35; 22 to 24 gauge, $3.80; 16 to 20 gauge, $3.65; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet 28 gauge, $4.35 to $4.60; 26 gauge $4.20 to $4.45; 22 and 24 gauge, $3.65 to $3.90; 16 to 20 gauge, $3.50 to $3.75; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 and 24 gauge, $3.65; 16 to 20 gauge, $3.50; Gorbal's "Best Best," 28 gauge, $4.40 to $4.65; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.35 to $4.60. In less than case case lots 25c. extra.

CANADA PLATES—Prices remain as follows: 52's, $2.80; 60's, $2.85; 75's, $2.95; full polished, $3.75 to $4; galvanized, 52's, $4.35; 60's, $4.60.

TIN PLATES—We continue to quote as follows: Cokes, base size, 1C 14x20 $4.15; charcoal, base size, 1C, 14x20, $4.40.

BLACK SHEETS—Although some dealers have again advanced, the following prices are still obtainable' 24 gauge, $2.30; 20 gauge $2.25; 22 and 24 gauge, $2.30; 20 gauge, $2.25; 17 and 18 gauge, $2.25; 8, 10, 12 and 14 gauge, $2.55.

STEEL SHEETS—An advance was made during the week just past, and American blue steel sheets are now quoted as follows: 10 gauge, $2.60; 12, 18 and 20 gauge, $2.65; 22 and 24 gauge, $2.70; 26 gauge, $2.85; 28 gauge, $3.00 per hundred pounds.

TERNE PLATES—We are still quoting $7.15.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6½c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities; 25c. per 100 lbs. extra.

MERCHANT STEEL—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05;

machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING — Our prices are: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

BAR IRON—Last week's advance, still holds good, with a very high tone prevailing. We still quote: $2.15 base f.o.b. Montreal.

OLD MATERIAL—We quote: Light copper, 16c.; heavy red brass, 15½ to 16c.; yellow brass, 12c.; light brass 8½c.; lead, 4c.; zinc, 4c.; machinery cast scrap, $16.00; wrought scrap, $14 to$15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubber, 8c. to 8¼c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Nov. 16, 1906.

While there are practically no changes to record this week there is a large movement of both ingot and sheet met also, the close of navigation helping some but the chief reason being the low supplies of retailers and users. Jobbers stocks are also at a minimum and there is no possibility of them being repleted before spring so great is the demand in all markets.

Pig lead remains unchanged and pig and bar iron at last week's quotations. Ingot tin is also as before but tin plates, galvanized sheets and zinc spelter are all being held firmer on account of advances in foreign markets. Brass and copper are no easier, stocks being very light. Summerlee pig iron has advanced to $24 and a 5 cent rise in Apollo galvanized sheets concludes the list of changes. Black sheets are being advanced in outside markets but we are not making any change here.

PIG IRON—Buying for spring delivery is brisk. Some English iron is still available for winter delivery. We quote as follows: Radnor at furnace $33; Hamilton and Midland off the market but quoted nominally at $23 for No. 1 at furnace. Londonderry, f.o.b. Toronto, No. 1. $24; Middlesborough, $23; Summerlee, $24.

BAR IRON—We now quote $2.25 base, f.o.b. Toronto, with discount of 2 per cent.

INGOT TIN—Very active but unchanged in price.

TIN PLATES—Quoted firm at same prices but is moving upwards. Advances in Great Britain. Stocks very light.

GALVANIZED SHEETS — Black sheets are being advanced in other markets but are unchanged here. Apollo galvanized sheets are 5c. higher. Canada plates unchanged.

BRASS—It is still difficult to obtain deliveries owing to the brisk demand. We quote: Sheets, 23c. to 24c. per lb.

COPPER—Stocks are light and demand keen. We quote as follows: Ingot copper, $24 per 100 lbs., and sheet copper $30 per 100 lbs.

LEAD—Advances outside are not followed here. The market is firm and active. We quote: $5.25 for imported pig and $5.75 for bar lead.

ZINC SPELTER—English prices are higher and locally prices very firm with buying brisk. We quote: 7½c. per lb. for foreign and 6½c. per lb. for domestic. Sheet zinc has been advanced 25 per cent.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 316 inch, $2.60; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—Trade continues good and prices are stiff at 27c. to 28c.

OLD MATERIAL — Dealers' buying prices show no change this week. We quote: Heavy copper and wire, 17 1-2c. per lb.; light copper 15c. per lb.; heavy red brass, 15c. per lb.; heavy yellow brass, 13 1-2c. per lb.; light brass, 9c. per lb.; tea lead, $3.50, per 100 lbs.; heavy lead, $3.75 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $12; No. 2 wrought, $6; machinery cast scrap, $15; stove plate, $11; malleable and steel, $6; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

London, Eng., Metal Markets

From Metal Market Report, Nov. 15, 1906.

PIG IRON—Cleveland warrants are quoted at 57s. 1 1-2d., and Glasgow standard warrants at 56s. 7d., making prices as compared with last week unchanged.

TIN—Spot tin opened steady at £194 7s. 6d., futures at £196, and after sales of 220 tons of spot and 100 tons of futures closed firm at £194 15s. for spot, £196 5s. for futures making price compared with last week 15s. higher on spot and £1 5s. higher on futures.

COPPER—Spot copper opened quiet at £99 7s. 6d., futures £100 15s. and after sales of 300 tons of spot and 450 tons of futures, closed firm at £99 10s. for spot, and £100 17s. 6d. for futures making price as compared with last week 10s. higher on spot and 17s. 6d. higher on futures.

LEAD—The market closed at £19 7s. 6d., making price as compared with last week unchanged.

SPELTER—The market closed at £27 15s., making price as compared with last week 5s. higher.

United States Metal Markets

From the Iron Age, Nov. 15, 1906.

October was a record breaking month, so far as the production of Pig Iron is concerned. The output of coke and Anthracite Iron for the 31 days was 2,196,808 gross tons, against 2,165,632 tons in March of this year, and 1,970,962 tons in September, these totals being exclusive of Charcoal Pig Iron. The greater part of the increase on the output of October over September was contributed by the Steel companies, who reached the tremendous total of 1,452,200 tons, as contrasted with 1,264,380 tons in September.

The high output is reflected in the estimates of capacity of the furnaces in blast on the first of this month, when they were running at the rate of over 500,000 tons per week, the first time that that mark has ever been passed in the history of the American Iron industry. And yet, with our plants running at the rate of over 26,000,000 tons per year, there is a scarcity of metal all over the country, and foreign iron is reaching our shores in many cargoes every week.

A considerable number of cargoes of foreign pig iron have been purchased abroad for American account, and the market is taking the metal freely. A disposition is developing to buy foreign iron for forward delivery, and iron cannot now be obtained by liners unless it be for delivery next year. The marked difference in this situation now and during the former import movement is that the spread between foreign and domestic iron is much smaller. It was as much as $3 and $4 per ton when last considerable quantities were imported. Taking into account the cost of handling and delivering the foreign pig iron from the vessel's side to the regular routes of transportation there is now little difference in the cost of foreign and domestic pig iron.

Thus far there are no indications that the rise in the price of pig iron has in any way curtailed consumption. One of the largest consuming interests in the foundry trade, the cast iron pipe branch, is having a rush of new business, and inquiries for the coming season are coming up. Machinery manufacturers are exceedingly busy, and along the whole line of rolling mill products there is a congestion of work.

In the Chicago district new orders aggregating 100,000 tons for plates, shapes and steel bars have been placed in the past week. The rail mills have booked considerable tonnage. The car makers have added some large commitments, and some good bridge building orders have been taken. There are specifications out, too, for some important buildings in St. Louis and elsewhere. In the lighter lines, can makers are in the market for considerable quantities of tin plate, and the merchant pipe trade is booming.

During the week wire products were advanced $1 per ton, while hoops were put up from 1.90c. at mill to 2c. at mill. In the Eastern plate trade premiums up to $2 per ton are becoming more general

From the Iron Trade Review, Cleveland, Nov. 15, 1906.

Recent events in the railroad world are attracting much attention among the manufacturers of iron and steel. The advance in wages of the Pennsylvania railroad employes will involve an expenditure of $12,000,000, and the recent increase of dividends on the stock of the company from the basis of 6 to 7 per cent. means that the company must earn $3,000,000 more. Hence, the net earnings must increase $15,000,000, and the fact that this great company is willing to incur this new responsibility shows its confidence in the continuance of prosperity and the probability that heavy purchasing of iron and steel products (of which railroads consume about 50 per cent. of the entire production, will continue. At present, however, there is a little lull in the buying of both bridge material and rails.

Within a week, after the general ore-buying movement was started practically all ore offered for sale was purchased. Including the manufacturers who do their own mining, there are now about 40,000,000 tons of ore under contract, and with the single exception of old range Bessemer, prices are higher than at any time in the history of the trade. In 1900, when prices were higher than at any time up to the present, the shipments were less than half of the tonnage estimated for 1907, and in the great year of prosperity, 1902, shipments were only 27,571,121 tons, It is expected that the production next year will be about equally divided between the steel corporation and other interests.

The car shortage is an increasingly heavy handicap to many industries. Delivery of southern iron is much delayed, and it is estimated that in the Pittsburg district and in the Mahoning and Shenango valleys there is a shortage of 100,000 cars. Delivery of crude steel and finished materials is also much delayed.

N.S. Hardware Trade News

Halifax, N.S., Nov. 14, 1906.

The dispute between the Dominion Iron and Steel Company and the Dominion Coal Company, over the coal contract has caused somewhat of a temporary set back to trade in Cape Breton, and the general impression in Sydney is that unless the big corporations come together and settle their differences, that business will become very depressed. The banking of the furnaces and the closing down of the Tar and Chemical Company's works has already had a bad effect. Outside of this, business is good in other parts of the province, and the price list is very firm. There is good demand for iron pipe, and the jobbers are kept busy supplying the demand. Sheet iron is also selling freely. Pig lead is quoted at $6.25. Sheet lead, three pounds and heavier, is quoted at $6.50 by the roll, and two pounds, $7 per roll. There is a good demand for saws, axes and lanterns. The manufacturers have advanced the price of the latter. Jobbers say that white lead is very firm, and quote Canadian at $7.25 and Brandrams at $8.25. Oils and rope are unchanged. Notwithstanding the lateness of the season, the demand keeps up for builders supplies, and also paints and brushes.

With the approach of the Winter comes the usual heavy demand for stoves, and this season business is very brisk. All the stove dealers of the city are rushed with orders and still they cannot keep up with the demand, for both cooking and heating stoves. Ranges are in great favor and every householder who can afford it, installs a range in preference to any other kind of cooking apparatus. The ranges are not so cheerful as the exposed grate of the ordinary cook stove, but the convenience of hot water at all times, and other facilities offset this. The tinsmiths are also very busy, being obliged to work night and day getting out stock.

The Robb Engineering Company of Amherst, has just shipped to the Standard Explosive Company, Limited, of Montreal, a large steel smoke stack for their gun powder and dynamite works in that city. They also shipped to the John Crawford Company of Argyle, Ontario, a forty horse power saw mill complete. The company's business in Western Canada continues on the increase. They have shipped, this week, to the Calgary Milling Company at Calgary, a 100 horse power boiler, and a 100 horse power Robb Armstrong Engine, for P. Burns & Co., of the same city, and a large condenser for the city of Calgary. This makes a total of 20,000 horse power that they have shipped to Calgary within two years. The same company has also received an order for a 40 horse-power boiler for the Government fog alarm station at Low Point, C.B. The Rhodes Curry Company have just completed a big double truck snowplow for the C.P.R., and received an order for two wing snow plows for the Canadian Northern. Mr. Curry is now on his way to Amherst from Montreal, and it is expected that he is bringing a big order for passenger equipment for the Canadian Northern Railway.

London Hardware Trade News

Twenty-five coremakers and brass molders employed by the Labatt Manufacturing Company, corner of Richmond and Bathurst Streets, went on strike Tuesday morning, November 13, because the company refused to discharge a workman who was objectionable to the other workmen. The company could see no reason for granting the request of the men, but settled the strike by asking the man, against whom the objections were offered, to leave and giving him to understand that he would be under pay until he could find another position. One of the strikers stated that the man who caused the trouble was a breeder of dissension among his fellow employees. No fault was found with the hours or wages of the men and they say that the firm is a good one to work for. The men were out one day.

The Hobbs Hardware Company this week sent out the last shipment of a $10,000 order from an Edmonton firm.

N.B. Hardware Trade News

St. John, N.B., Nov. 11, 1906.

Is the advance in metal quotations to be everlasting? Is an end to increasing prices never to come? These and other similar questions are forcing themselves in upon the minds of persons interested in hardware in these days. For months now, the series of advances—some of them more or less sharp—has been keeping the hardware people in at least a state of uncertainty. Perhaps in some cases a state of anxiety has existed. To-day, there is apparently no sign of a cessation of these upward jumps. Metals are on a remarkably firm plane, and, of course, hardware prices are stiff in natural consequence.

* * *

Builders' hardware continues high in price. The demand, too, continues active. The Fall has been an unusually good one for builders from a weather point of view, and though the open weather is now about at an end, the builders are still hard at work. In the city the amount of building work has not, perhaps, been as great, in proportion, as in some of the smaller cities, and in the towns. Nevertheless, everywhere building operations have been quite active, and as a consequence, the call for builders' hardware, has been steady, and large. This, despite the stiffness in prevailing prices.

* * *

H. R. McLellan, in a newspaper interview, has announced that immense new rolling works may be built here. The company behind the scheme is said to be capitalized at $1,000,000, the stock being held chiefly in Sydney and Upper Canada. The company is that which recently acquired the property and rights of the Mowry Safety Nut Company. Whether or not St. John is chosen, it is said that the works will be established in some town or city of Eastern Canada.

* * *

It is still more or less problematical how great the demand for Winter sporting goods will be here. At time of writing it is not clear whether or not the city is to have an ice rink for the Winter. Without such a rink the demand for skates and hockey goods will fall below the average. But if the rink is provided, the call for the ice sports' goods is certain to be strong.

* * *

All brands of iron have recently taken another step skyward. This has been due to the advances in iron prices. The outlook would seem to be that with the brightening of iron trading next spring, there will be high prices. Pig lead, shot, white lead—all have shared in the general advance. The demand for ammu-

FOR SALE.

TINNER'S TOOLS — Used a short time, encased machine square and circular shears. Hand tools and full set of patterns. Sedn for price list. Do it now. Drawer 29 Parkhill. [46]

nition has been excellent, in spite of higher prices. Apparently the sporting fever is getting a stronger grip in New Brunswick every year. Nails, too, have sought higher marks of late. The most recent advance has been one of 10 cents. Linseed oil and turpentine have not been behind other hardware requisites in looking upward. Turpentine has been steadier than the other, but has, nevertheless, shown the upward tendency. Linseed oil may almost be described as eager to reach a still stronger figure.

ENGLISH OIL MARKETS.

European flaxseed markets continue to be reported inactive and business very limited. The same is reported of linseed oil. The oil price in London is much higher now than it was one year ago or two years ago. Linseed in barrels is quoted now at £20 5s. against £16 15s. in 1905 and £15 in 1904 at the corresponding date. The stock in public warehouses in London at the last of October was 1,174 tons, which is a great reduction from the stocks of the early part of this year. London stocks of linseed oil at the beginning of this year were upwards of 5,000 tons. The most favorable indication at present in oil trade of Europe is the general reduction of stocks, which gives promise that oil buyers there will be able to absorb more new oil this year than last. This also accounts in large measure for the continued high quotations for oil in the London oil market.

Whether American prices of seed and oil are to be maintained depends very largely on the export demand for seed.

LARGE MINERAL PRODUCTION.

Returns made to the Bureau of Mines give the output of the metalliferous mines and works of Ontario for the nine months ending 30th September, 1906, as follows:—

	Quantity.	Value.
Gold, ounces	2,015	$ 34,377
Silver, ounces	2,542,827	1,609,554
Cobalt, tons	138	110,400
Nickel, tons	8,037	2,856,233
Copper, tons	3,900	600,000
Iron ore, tons ...	93,159	117,466
Pig iron, tons	208,094	3,194,200
Steel, tons	123,257	3,059,070
Zinc, tons	300	4,500
Arsenic, tons	691	13,830

These figures show a considerable advance over those for the same period of 1905, and indicate that the production for 1906 will be much the largest of any year in the history of metalliferous mining in Ontario. The silver, cobalt and arsenic given in the above table are all the product of the Cobalt silver field. The nickel entirely and nearly all the copper are from the Sudbury district, and the iron ore is the product of the Helen mines at Michipicoten.

Harvey Graham, Assistant General Manager of the Nova Scotia Steel & Coal Company, is undergoing medical treatment at the General Hospital in Montreal.

MOVED TO ST. JOHN.

Both in the extreme East and the extreme West of the country, the Canadian Rubber Company of Montreal have been expanding. It is not long since we announced the opening of branches at Calgary, Regina and Victoria, to keep pace with the firm's business in the far West. The most recent development is the establishment of another branch office at St. John, N.B. It has been found impossible to cover the Maritime Provinces thoroughly from the Halifax office so the territory has been divided, and New Brunswick and Prince Edward Island will hereafter be looked after by the new office at 40 Dock St., St. John.

In looking around for a suitable man to open this branch, the company selected Paul R. Hanson, who has achieved a great success as manager of their Montreal branch office. Mr. Hanson is by no means a stranger on his new territory, as he has frequently covered portions of the Maritime Provinces in the past. He is one of the younger gen-

PAUL R. HANSON.
Being transferred from Montreal to St. John by The Canadian Rubber Co.

eration of Canadian business men who have come to the fore through sheer pluck and energy In the Eastern provinces, he will have a splendid field to display his abilities as an organizer and director of aggressive sales methods.

The up-town sales office which has been maintained by the Canadian Rubbe (Company in th? Imperial Bank Building, Montreal, will be removed to their executive offices, Parineau Ave. and Craig street, and all sales matters emanating from the territory extending from Kingston, Ont., to Fredericton, N.B., will be handled by a special divisional sales organization at the Company's head office. This new move will place the sales branch for the division mentioned in immediate touch with the large and varied stocks of general rubber goods carried by the company at their immense warehouses.

The change indicated, will go into force immediately, and Mr. Hanson will leave to-morrow for St. John, there to assume his new duties. His business friends are confidently wishing him continued success.

COPPER IN JAPAN.

In view of the present activity of the copper market, the following particulars from the Osaka (Daily News), relating to the production of copper in Japan, will be of interest: The world-wide development of electrical industry has largely increased the demand for copper, with a corresponding rise in price and great activity in copper mining. A decade or two ago the production of copper in Japan was no more than sufficient to supply the home demand, but it has increased considerably of late years, and now Japan supplies copper for consumption abroad. The steady advance of the copper market in London has encouraged the Japanese copper mining industry, with the result of an enormously increased production. The following figures show the production and home consumption of copper in Japan for recent years:—

	Production Tons.	Home Consumption Tons.
1899.....	23,890	3,000
1900.....	28,930	4,000
1901.....	27,000	5,600
1902.....	28,570	8,500
1903.....	32,600	5,900
1904.....	34,600	.....
1905.....	36,600	.....

The figures up to 1903 are taken from the official return of the Department of Agriculture and Commerce, and those for the remaining two years are taken from the statistics prepared by the Kobe office of Mr. Sumitomo, copper merchant of Osaka. Last year's production—36,600 tons—is not more than one-fifteenth of the total production of the world; but in the Orient, Japan is the largest copper producing country. While the production of copper in Japan is regarded as an important factor in the world's supply, doubt is expressed as to how long the production at the present rate can be continued. In Spain a survey is always made of the vein for 50 years working in advance, with the necessary arrangements to ensure production for 50 years. In Japan, operations are continued without method; no trouble is taken to survey the veins with a view to future supplies. This fact is causing doubt in the foreign copper market, as it is felt that no reliability can be placed upon Japanese supplies owing to the neglect of prospecting for new deposits.

The Billings & Spencer Co., of Hartford, Conn., have definitely decided to extend their operations to Canada, and have formed a Canadian company for this purpose, to be known as the "Canadian Billings & Spencer," with a capital of $200,000, Mr. Billings, of Hartford, being its president. The Billings & Spencer Co. are the largest and oldest established company making drop forgings in the United States, and are also manufacturers of all kinds of drop forging machinery. They have secured as general manager of the Canadian company, J. Gill Gardner, at present manager of the steel and forge department of the James Smart Mfg. Co., of Brockville, Ont. The location of the plant has not yet been finally decided.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Nov. 16, 1906.)

Room 511, Union Bank Building, Office of HARDWARE AND METAL, Winnipeg, Man.

Bar iron and Canada plates have been advanced this week, the former 10c. per cwt., and the latter 25c. per box. General business continues exceptionally active.

LANTERNS. — Quotations are as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 base per keg.

PRESSED SPIKES — Prices are quoted as follows since the recent advance: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Discounts are quoted as follows since the recent advance in the price of copper rivets: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ½, $4.10; ¼, $7.20; ⅝, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—Business is particularly active at present in axes and handles. Prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Manila rope is steady at the recent advance. We are still quoting as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Quotations are as follows: Cartridges, Dominion R.F. 50 and 5; Dominion, C.F., 33⅓ C.F., pistol, p.c.; C.F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL.—Bar iron has been advanced 10c. per cwt. Quotations are now as follows:—Bar iron basis, $2.60. Swedish iron basis, $4.85; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—As noted last week, the price has been advanced to $5.85 per cwt.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The recent advance to $7.80 is likely to be followed by another as a result of the condition of the pig lead market.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES.—An advance of 25c. per box is noted last week. Quotations are as follows:—Canada plate, 18 x 21, 18 x 24, $3.40; 20 x 28, $3.65; full polished, $4.15.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.; Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE —We quote prices: White lead, pure, $7; bladder putty in bbls., 2½c.; in kegs, 3¾c.; turpentine, barrel lots, Winnipeg, 96c.; Calgary, $1.03; Lethbridge, $1.03;

We have been fortunate enough to secure the Western Agency for BERRY BROS. celebrated VARNISHES and are carrying a full stock from which all orders will be shipped promptly.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the Western Trade to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

Everything for the Painter

Wire Glass

This is the season of the year when buildings are being completed—Wire Glass will be needed for Skylights, Metal Frames, etc.

Wire Glass is now almost universally used instead of Rough Rolled Plate on account of the ultimate economy. It may crack but the wire mesh keeps it intact and just as serviceable as ever.

Wire Glass is practially indestructible.

Special prices in case lots—write for them. Samples furnished on request. You may have an enquiry any day, better be prepared.

G. F. STEPHENS & CO., Limited

WINNIPEG, CANADA

Edmonton, $1.04. Less than barrel lots 5c. per gallon advance. Linseed oil, raw, Winnipeg, 64c.; Calgary, 71c.; Lethbridge, 71c.; Edmonton, 72c.; boiled oil, 3c. per gal. advance on these prices.

O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

HOLIDAY CONTESTS.

A Schenectady, N.Y., store, held a contest last Christmas in which the prize was a big Christmas dinner. A dinner was offered to every boy who would bring to the store 500 ads. clipped from the local papers. A special prize of $5 in gold was offered to the boy bringing in the greatest number of ads. It was advertised, however, that any deserving poor boy registering his name at the store would be given a dinner ticket whether he secured the requisite number of ads. or not.

STOVES AND TINWARE

METHODS THAT BRING SUCCESS.

Wherever a good stove business is being done the dealer is active, aggressive and pushing the sales in all quarters, writes a stove traveler in an exchange. He keeps his stock in good shape, having all the stoves well blackened, and frequently changes the location of one stove with another so that a person in the habit of often coming into the store notices the change. The same is true of his window display. One week he will show a range connected up to the boiler, perhaps one of the largest in stock, and the next week, by way of comparison, will show his smallest range or wood stove. In like manner he contrasts the different varieties of heating stoves, from the large parlor heater, intended to heat two rooms, to the small air tight for chambers.

Manufacturers' Literature.

Many dealers keep on a small table in front of the store a supply of the literature sent out by the stove manufacturers, so that customers may help themselves. Others pursue a different policy, some wrapping up different circulars with goods they send out, still others distributing them through the town or country roads by boys or sending them through the mails.

Whenever a dealer complains of the evils of the catalogue house competeion ask him what he does with his literature sent out by the stove concerns and you will almost invariably find that this literature, which costs the stove manufacturer many good dollars, is carelessly thrown away or left on some shelf to be forgotten. The retailers are not altogether to blame, as the stove manufacturer has not pointed out the way in his trade newspaper advertising, and manufacturers would increase their profits as well as their sales by giving their different customers pointers and outlines as to how competition from outside sources should be met. Another fault found with the retail stove dealer, is the lack of attention to detail.

Handling Complaints.

When a complaining woman comes in telling about the last batch of biscuits that failed to bake, instead of taking the question up with her reasonably and trying to find the real difficulty, he in a way scoffs at her, telling her that there are anywhere from 200 to 500 stoves of that make in the vicinity and that there is no reason why hers should not work. This is not the right way to go about it, for he is antagonizing his customer unnecessarily

If the difficulty cannot be ascertained by a personal talk with the user of the stove either the stove dealer or a competent man should, at his earliest convenience, go and investigate the surrounding conditions in which the stove works, see that the chimney is thoroughly cleaned out, that the flues underneath the oven are clean, inquire if much wood has been burned and see if the grates are in a proper condition or whether some bolt has fallen off a damper, making it inoperative.

Difficult Cases.

A man acquainted with his business will be able to fix most stoves in a short time, but there are cases, however, when the stove appears to be more or less cranky; it is then that the real test of his ability is made, and it is not much to his credit if he cannot discover the cause and explain it so that his customer understands it. It is better for the dealer to find the trouble and make correction at once if the fault is his than let his competitor get the business because he refuses to make good.

Dealers as a rule do not make the most of their opportunity to sell goods. They should be more enterprising and active in learning the condition of the parlor stoves and cooking stoves in the homes in their vicinity and show how a trade or a purchase will increase the family comfort. They will find it profitable to help the 'maker of the home'' bring the ''lord of creation'' to terms when he is reluctant to spend money in the house, but inclined to spend it outside. A list kept of the stoves sold to people in various parts of the country will be of use in this way, as in a few years you can find whether repairs are needed or a new stove is needed.

The Repair Business.

The repair business in spite of its large profits, also has its drawbacks, for many dealers fail to realize the large amount of money they lose by paying a high price for the castings, keeping them several years waiting for the parties to call for them and then throwing them on the scrap iron heap to be sold at $8 to $10 a ton. If castings are tagged with the name and address of the party ordering them, they can easily be traced and if not wanted can probably be sent back to the manufacturer at not as great a loss as if they were thrown out. Some dealers adopt the commendable practice of requiring a deposit on all castings ordered, but this is a question for the individual dealer to decide upon.

NEW STOVE FOUNDRIES.

The Sutherland Innes Company of Chatham, Ont., have purchased a site and will locate a stove foundry at Rainy River, Ont. They will employ 35 hands and stock and plant will cost $15,000.

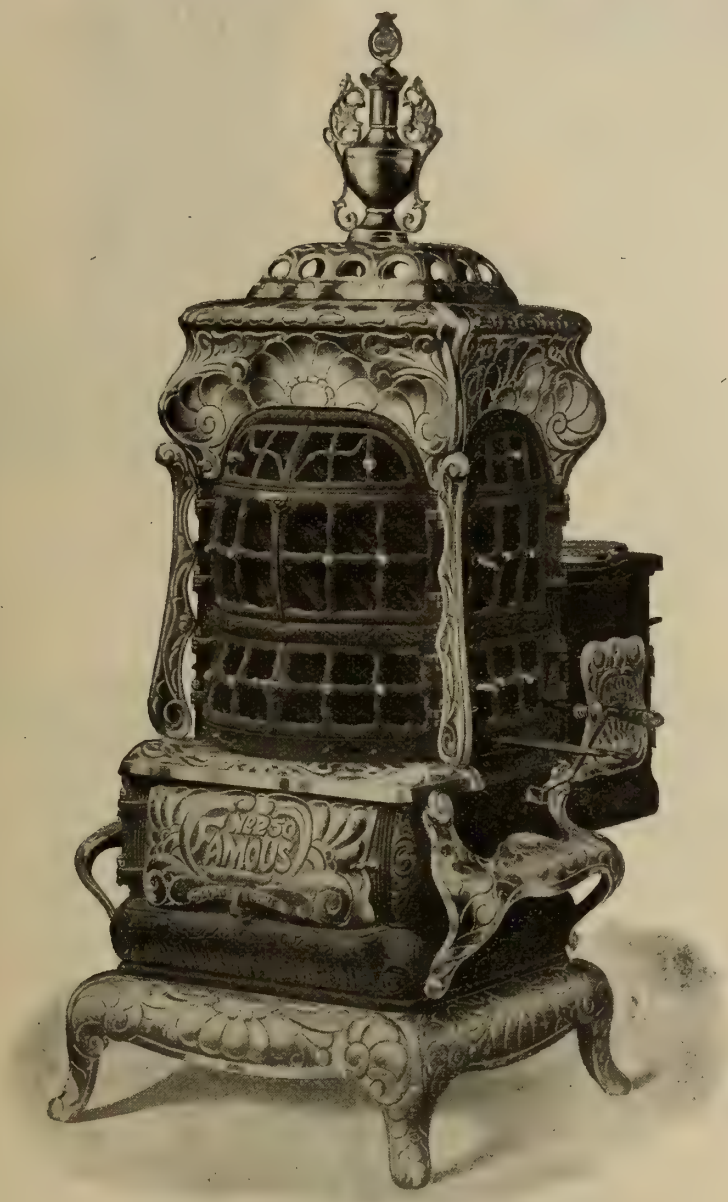
The new buildings for the Supreme Heating Company's stove foundry have been commenced at Welland.

CARE OF STOVE PIPES.

The ruinous rusting of stove pipes is a matter that is often forcibly brought to the attention of users of anthracite coal stoves. Pipes which have been in use for two or three years will sometimes become so eaten by rust that little metallic iron is left and the pipe will crush in the hand. This destruction is more rapid and complete than with the ordinary weather rusting of sheet iron.

The cause is generally attributed to the sulphur in the coal. There is not much doubt that the destruction of the mortar in chimney tops is due to the sulphur acids; but some experiments made by the writer a number of years ago resulted in showing that the sulphur has little to do with this injury to pipes. The true cause is the production of ammonia compounds during combustion. Both the chloride or salammoniac and the sulphate are formed in the pipe and mix with the ashes and soot. It remains harmless during the dry, cold weather, but readily absorbs moisture by contact with damp air as warm weather comes on, when its action begins and continues, so long as the cause remains. The effect of salammoniac to induce rusting in iron is well known. It is also well known that bituminous coal gives off ammonia when distilled, the supply obtained at the gas works being considerable. We would hardly expect anthracite coal for produce an appreciable quantity, but a little slacked lime mixed with some dust taken from flues or pipes a strong smell of ammonia was developed, thus practically demonstrating that this salt is produced in quantity sufficient to cause injury.

The removal of the ammonia salt is a matter involving difficulties. If we start with a new pipe and brush out every particle of dust before the dampness has been absorbed the removal will be complete and no harm will ensue. When rust has once commenced, and particularly in the case of neglected pipes, the crust of rust persistently holds the ammonia salt.



Two ways seem to effect its removal from the pipes: First, by immersing and thoroughly soaking the separated sections for several hours in water—running water, if possible—and, second, by roasting the pipes over a fire to a red heat.

PERCIVAL COMPANY'S CHANGE.

The announcement last week that the Percival Stove & Plow Company, Merrickville, had sold out to the National Manufacturing Company, of Pembroke, was a trifle premature as before the deal was closed T. H. Percival associated with Merrickville and Smith Falls capitalists, arranged to take over the business. The present works at Merrickville will be enlarged and if any move is considered Smiths' Falls will have the first opportunity.

When distributing circulars to houses, have them hung on the door knobs by bits of string. It will pay better than having them blown away on the muddy roads or lawns.

We Can Deliver These Stoves

WITH OVEN—230 Series

To be exact, we can ship baseburners the same day we receive your order.

"Famous" baseburners are made in two styles and five sizes.

The No. 230 series is a heavy, durable stove, with a three flue construction which distinguishes it from nearly all other makes. Is made in three sizes, for parlor and two with oven.

Our No. 113 series is a lighter stove, but well made and excellent value for the money. Is made in two sizes for parlor and one with oven.

You can sell either of these lines and feel satisfied that your customers are getting the best that experience and skill can build.

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

"Enterprise" Fishing Tackle.

After more than a quarter of a century of successful operation the Enterprise Manufacturing Co. of Akron, Ohio, justly lays claim to leadership in the industry of manufacturing fishing tackle in the United States, and faces the future with largely increased facilities and every expectation of continued development. The company was incorporated in 1880, with E. F. Pflueger as the leading spirit. Many of the company's most successful products were the result of his inventive genius and his inventions are protected by numerous patents owned by the company.

On E. F. Pfleuger's death in 1901 his four sons, J. E. Pflueger, G. A. Pflueger, E. A. Pflueger and C. T. Pflueger, succeeded to the management of the company's extensive business and have since conducted it with marked success. The extent of its growth and prosperity may be judged from the fact that in the season of 1906 the Enterprise Manufacturing Co. sold from 100,000,000 to 150,000,000 of fish-hooks of their own manufacture, a good percentage of the company's product being exported to foreign countries.

In order to keep pace with increasing trade, the company has recently made a large addition to its manufacturing plant at Akron, having thereby nearly doubled its producing capacity. The new building, which is on the eve of completion, is a five-storey brick structure, 100 by 50 feet in ground dimensions, and occupies a convenient site. Three hundred to four hundred hands will be employed henceforth, and the shipping facilities of the company will be greatly increased by the addition of factory space and grounds.

The fishing tackle catalogue of the Enterprise Co. for 1907 is an index to the size and importance of its business and is full of interest for all jobbers and dealers in tackle. It is a mammoth affair, containing hundreds of illustrations of the company's products, all the fish-hooks, for example, being pictured in their actual sizes from tiny "Limericks" to big hand-made cod and halibut hooks.

An interesting section of the new catalogue, which bears the distinctive number F 25, is devoted to Pflueger's artifiical flies, the most popular patterns of universal reputation. Suitable for trout and bass, being listed, illustrated, and described. All sorts of spinners and mechanical baits are included in the pages of the catalogue and quotations are given on all sizes. A large section is devoted to reels, floats, etc., and innumerable accessories of the complete fishing outfit are duly listed.

Typographically, catalogue F 25 is all that could be desired. The pages are of large size, enabling the numerous cuts to be properly displayed, and the descriptive reading matter is interesting and to the point. Dealers can secure this fishing tackle catalogue by mentioning this paper.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

Maple Leaf Harvest Tools.

Any hardware merchant who has not yet received a catalogue and price list of Hand Harvest Tools manufactured by the Maple Leaf Harvest Tool Company, Tilsonburg, Ont., should write at once and get one, as it will be invaluable for reference in spring ordering. Nearly 100 illustrations of hay, bailing, straw, barley, bran, chaff, manure, potato and spading forks, manure drags, etc., also hoes for all uses and garden rakes of all descriptions are included in the publication giving an idea of the varied and extensive line manufactured by the Maple Leaf Company. The book contains 18 pages 7x10 well printed and bound, the engravings on the cover being emblematic of the product of the arm, surmounted by a maple leaf and bearing the company's motto "goods of quality."

JAPANESE TRADE.

The Osaka Cement Company, a Japanese concern, has already supplied 400,000 barrels to San Francisco since the earthquake.

Japanese importations of linseed oil from January 1 to September 18 this year amounted to about 1,000,000 pounds and about 1,600,000 pounds of paint were imported during the same period.

Metals imported into Japan during the first 8½ months of 1906 amounted as follows: iron sheets, 1,180 tons; galvanized sheets, 6,753 tons; pig lead, 2,100 tons; sheet lead, 1,200 tons, iron rails, 6,554 tons; shoe nails, 225 tons; steel bars, 30,000 tons; steel sheets, 42,000 tons; galvanized iron wire, 2,400 tons; zinc sheets, 1,100 tons; and tin plates, 27,702 cases.

FOUNDRY AND METAL INDUSTRIES

The Polson's Iron Works, Toronto, are to build a steel workshop to cost $25,000.

The Nelson, B.C., Iron Foundry has made two good three-year contracts with British Columbia Smelter companies, and business is so good that a branch shop will be opened at Greenwood, B.C.

B.C. ZINC RESOURCES.

According to the introduction to the report of the commission recently appointed to investigate the zinc resources of British Columbia, it was not until 1893 that the lode mines of British Columbia really began to be productive The output from this source during the six years immediately prior to that date, amounting to an average value of only $60,000 a year, were derived from selected rich ores found near the existing lines of transportation. In 1893, however, the value of the production of the lode mines of the province rose to $300,000, since which time there has been a steady increase, until in 1901 the output from this class of mining reached a value of $13,683,044, and although 1902 showed a slight decrease owing to the lower market value prevailing, in 1903 and following years the upward tendency again became apparent. The production of zinc ore in 1905 was 11,623 tons most of which went to the United States, though latterly some of the ore has been shipped to Europe, and some treated at the smelter at Frank, Alberta.

The local smelting of the ores of a country is always an important consideration. The smelting of zinc ore in British Columbia is especially important for consideration in view of the remoteness of the province from the markets of the world. In the smelting of zinc ore there are two prime considerations. The quantity of fuel required per ton of ore is greater than in any other of the common metallurgical processes. In the best practice of the world, about 1.75 ton of coal is required per ton of ore, while in inferior practice the proportion is much larger. It is therefore cheaper to take the ore to the coal than to take the coal to the ore. The zinc smelting process requires ore concentrated to a rather high grade. Generally, ore to be smelted in Belgian or Rhenish furnaces should contain upward of 40 per cent. zinc in the raw blend. Inasmuch as such ore will yield approximately one third of its weight in spelter, so long as the ore is taken to coal on the direct line to the final marketing of the spelter, the waste carriage, so to speak, is only on two-thirds of the weight of the ore and it may be actually less than that, inasmuch as the ore is usually rated as a lower class of freight than metal, and a portion of its lead and sulphur contents may be utilized. These considerations are the chief factors in determining the location of a zinc smelting works. There are many others, such as the question of local freights, supply of labor and refractory material, market for sulphuric acid, etc., which need not be entered into. It may be remarked incidentally that the electric smelting of zinc ore is one of the possibilities of the future; in fact, it is being practiced already in Scandinavia; and this substitutes waterpower lor part of the coal required in the process, although it cannot replace the coal required as reduction material.

In view of the American tariff on spelter and the fact that British Columbia must look to Europe and Australia for markets for her ore, there is a possibility of successful smelting on the Pacific coast. Coal exists there. The rail transportation on ore is comparatively short. Deposits of ore exist near the shore, both on the Mainland and on Vancouver Island. Waterpower is available. And spelter can be carried either to Europe or to the Orient by steamships or sailing vessels. If reasonably cheap coal were available, it is likely that a good harbor on the Pacific coast would be the most advantageous point in British Columbia to conduct zinc smelting on a large scale.

The report deals exhaustively with every mine in British Columbia, giving descriptions of the best methods of extracting the zinc, and telling where the richest veins are found. Beyond this, it gives a clear and unbiased report of the industry in its present stage, points out the mistakes that have been made in the Slocan and other camps, and gives reports of the various methods of assaying.

An Iowa store secured a good mailing list of farmers by offering to send a book of practical information to farmers, to ever- one who forwarded their name and address. The books were bought for less than two cents each.

Insure a good paint trade next Spring by putting in the right paint stock now

The goods you carry mean the sales you make. This is especially true in the paint business. You cannot hope to build up a permanent or profitable trade with a poor or even half-way good line. Quality and prestige count in holding your customers.

For this reason, if no other, you should give our proposition careful consideration. It is to your best business advantage to do so.

THE SHERWIN-WILLIAMS
PAINTS AND VARNISHES

are the standard of excellence everywhere. The dealer who handles our line has a peculiar prestige. The stamp of quality is on his business.

We have the strongest line of advertising helps for our agents this year that we have ever prepared. With our co-operation, you can insure a good paint trade next Spring, and at all other seasons of the year, too.

Write us today and find out what we have to offer you.

Paint, Oil and Brush Trades

DRILLING AT MEDICINE HAT.

The Canadian Pacific Railway Company is preparing to drill a deep test well at Medicine Hat, for oil at lower depths than either oil or gas has been found in that part of the country. Nine carloads of drilling machinery have arrived at Medicine Hat consisting of a modern cable rigged drilling outfit and drive pipes of various diameters from 14 inches down, sufficient to reach a depth of 3,500 feet. The drill is a modern one and is capable of fast work and will be the first cable rig to work in this field. The greatest depth reached in this field is 1,010 feet, where a tremendous flow of natural gas was struck. The railway company will case out this flow of natural gas and go if necessary 2,500 feet deeper.

MURESCO'S LARGE SALES.

The new $30,000 paint factory at Toronto Junction commenced by the Francis Frost Company some months ago is nearing completion and will be occupied within the next fortnight by their successors, the Benjamin Moore Company, of New York and Chicago. Machinery will be installed at once and preparations made for increasing the output of "Ark brand" mixed paints, which for the present will also be made in the old factory in Toronto.

In the new factory the manufacture of "Muresco," their remarkable wall decoration preparation, will be undertaken and Mr. Francis, the general manager of the new company, predicts for it a sale of well on towards 1,000,000 pounds during 1907. In the States it has won an enviable reputation and the great increase in its sale in Canada during the past three years is sufficient warrant of its popularity amongst the trade in this country.

USES OF ARSENIC.

The domestic prices for arsenic are based on the fluctuations in the English market, and for the sulphides and chemical compounds on the quotations ruling in Germany. During 1905 the American market showed sales of white arsenic at 2¾ to 4⅜ cents per pound, according to brand according to the Paint, Oil & Drug Review. The best prices were realized in the last quarter of the year, when supplies were curtailed by the scarcity of mispickel and by difficulties experienced in mining abroad. Red arsenic, imported largely from Germany, brought 6⅜ to 7½ cents per pound at New York.

A noteworthy feature of the industry has been the growth in the production of Spain, a country which shipped to the United States in 1905 approximately 1,750 short tons of white arsenic, guaranteed 99.8 per cent. of arsenious oxide. The largest producer of metallic arsenic and arsenious oxide in the world is Germany, by far outclassing Great Britain, which until 1902 held first place among the producing countries. Hopes are entertained that Canada may become an important producer with the development of its new deposits of mispickel in Ontario. As far as the United States, there are signs that the domestic production of arsenic will show marked expansion in the near future.

The greatest demand for arsenic is from manufacturers of paris green, which is an aceto-arsenite of copper, worth 12 cents per pound at New York. It is used as a pigment, and its poisonous character, while restricting its employment for this purpose, makes it an admirable insecticide in agriculture. It has been often suggested that the silver-lead smelters and refiners who produce appreciable quantities of copper sulphate and can recover arsenic in roasting speiss, should undertake the manufacture of paris green.

Arsenic also forms colors in yellow, red and grey, which find a ready sale. In medicine arsenic is used with fevers, rheumatism, some nervous affections, and also as a tonic. A saturated solution of arsenic is recognized as a good wood preserver, and it is also employed as a sheep dip for the purpose of killing parasites which settle in the wool. Weeds are also killed by using arsenate salt. Hides to be dressed for leather are preserved against the infection of insects by a sprinkling of arsenic. As a conveyor or fixer of analine colors in calico printing, white arsenic has unique value. It is also utilized, but to a smaller extent, in the manufacture of certain kinds of glassware and of high grade enamels.

WATERPROOF GLUE.

Water-proof glue is manufactured of gum shellac three parts and India-rubber one part by weight, these constituents being dissolved in separate vessels in ether, free from alcohol, subject to a gentle heat. When thoroughly dissolved, the two solutions are mixed, and kept for some time in a vessel tightly sealed. This glue resists the action of water, both hot and cold, as well as most acids and alkalis. If the glue is thinned by the admixture of ether, and applied as a varnish to leather along the seams where this has been sewn together, it renders the joint or seam water-tight, and almost impossible to separate.

NO WONDER

there has been such an increase in ELASTILITE VARNISH sales. Nothing remarkable about it though when you consider the quality of the varnish at such a reasonable price.

In tins only from ½ pints to 1 gallons. For outside or inside. "Wears on the job, not off it."

The White Lead Is The Thing

You may take it for a certainty that the White Lead used in the manufacture of paints is the index to the quality of the product. No manufacturer would use a good white lead and select other materials that were not in keeping with it. On the other hand no manufacturer who selects an inferior lead is likely to be particular about the other ingredients. Know the white lead, and you know the paint.

Now, the bearing of this principle on

"Anchor" and "English"
LIQUID HOUSE PAINTS

is the fact that when you know that the only white lead used in their manufacture is

Brandram's
B. B. GENUINE

(which has been the world's standard for nearly two centuries) you need no other argument to explain the preference consumers show for these paints.

Paint and Oil Markets

MONTREAL.

Office of Hardware and Metal,
232 McGill Street,
Montreal, November 16, 1906.

No material change has taken place in the condition of trade in paints and oils since our last report. Manufacturers are all working at top speed to fill orders in time to catch the last boats, and, as the end of the year approaches, considerable speculation is going on as to the increase in the output for 1906, over last year's record production.

One of the most active lines just now is putty, and the demand from all parts of Canada is so much greater than usual that in spite of original stocks being far beyond the ordinary in point of size, the leading producers are afraid of running short before the season is over.

Two price changes have to be noted. Linseed oil is advanced 1 cent and benzine is now being quoted at 25 cents in barrels, and 30 cents in smaller quantities.

LINSEED OIL—Another advance has occurred and we are now quoting: Raw, 1 to 4 barrels, 55c; 5 to 9 barrels, 54c; boiled, 1 to 4 barrels, 58c; 5 to 9 barrels, 56c.

TURPENTIRE—Prices are still firm at the following figures: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD — Last week's advance is well maintained. We quote: Best brands Government standards, $6.75 to $7.00 No. 1, $6.40 to $6.65; No. 2, $6.05 to $6.40; No. 3, $5.80 to $6.05, all f.o.b. Montreal.

DRY WHITE ZINC—V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—Orders are large and numerous. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—Conditions are unchanged from those of last week. We are quoting: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

SHELLAC — We are still quoting: Shellac Bleached, in bars or ground 47c. per lb., f.o.b. Eastern Canadian points; Bone Dry, 58c. per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 49½c. per lb. f.o.b. New York.

SHELLAC VARNISH—The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

REFINED PETROLEUM— We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

BENZINE—An advance this week has brought the price up to 25 cents in barrels and 30 cents in smaller quantities.

WINDOW GLASS—We are still quoting the following prices: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100feet, $3.20; second break, break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of Hardware and Metal,
10 Front Street East.
Toronto, November 16, 1906

White lead is at present very firm, but a further advance is talked of owing to the further advances of pig lead. While as yet paint manufacturers have not advanced the price of paints owing to the unsteady condition of the pig lead market, it is generally looked for. Sherwin-Williams having started the movement by an advance of 5c. on list price, which was ¼ gal., $1.45; ½ gal., $1.40; gal., $1.35.

Linseed oil is subject to a further advance of 1c., owing to the condition of the English oil markets, which are at present very firm, when prices are low in England, it pays to ship to Canada.

With high English prices, the Canadian manufacturers can advance the price here in keeping with the higher prices for seed. The demand being so general will no doubt keep prices up.

General business continues lively, the demand for paints, oil, lead, etc., being very large, but will naturally ease away shortly, as the weather conditions will not permit of much more painting.

The advances predicted by us a month ago on white lead and mixed paints have encouraged much buying and the booking of orders for spring delivery, will likely continue heavy if paint manufacturers accept orders on present or advanced quotations.

WHITE LEAD — Ex Toronto, pure white, $6.80; No. 1, $6.42½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $7.00.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6.50; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.25.

DRY WHITE ZINC— In casks, 7 1-2c.; in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 80c. per gallon.

PARIS WHITE—90c. in barrels to $1.25 per 100 lbs.

WHITING—60c. per 100 lbs. in barrels; Gilders' bolted whiting, 90c. in barrels, $1.15 in smaller quantities.

SHELLAC VARNISH—Pure orange in barrels, $2.70; white, $2.82 1-2 per barrel; No. 1 (orange) $2.50.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

BRANDRAM HENDERSON'S GROWTH.

The tremendous growth of the Canadian West is evidenced by a statement regarding the output of the Brandram-Henderson business, whose Montreal factory caters particularly for Western trade. Their sales for the first eight month of this year represent over 87 per cent. of their total output in the whole of 1905, while the increase for the present year, of the Montreal factory, will be fully 20 per cent. more than that of the previous twelve months. When the Company's new lead corroding works at Montreal are completed they will bring pig lead from British Columbia, corrode it and follow all the processes necessary to bring it from the stage in which it leaves the smelter until it is ready to apply to buildings in the form of mixed paints.

LATEST DEAL IN WHITE LEAD.

In keeping with their policy of expansion, the Canada Paint Company, in addition to their factories in Montreal Toronto, Winnipeg and St. Malo, have acquired by purchase the lead and putty mills of the Ontario Lead & Wire Company of Toronto. The latter concern will in future devote their attention to their other specialties.

The Canada Paint Company have also bought all the dry white lead and the articles which enter into the manufacture of putty, from the Ontario Lead & Wire Company and will operate their plant until the stock is exhausted when of course the whole of the machinery will be moved to the works of the Canada Paint Company.

We are informed that this Company have experienced a phenomenal demand for ground white lead, notwithstanding the increase in their liqaid paint turnover.

S.-W.'S GROWTH IN WEST.

Five years ago the Sherwin-Williams Company were represented in Western Canada by Ben D. Ross, now their representative in Winnipeg City. Then J. J. Whalen, of the McLellan-McFeely Company, Vancouver joined thestaff and commenced calling on the trade in B.C. and the Territories. Later on H. H. Eager was appointed to look after part of the territory in Manitoba and Saskatchewan. Now two more travelers are being added and in future the territory will be divided as follows: Ben D. Ross, Winnipeg; A. McIntosh, Manitoba; H. H. Eager, Saskatchewan; F. W. Alexander, Alberta, and J. J. Whalen, British Columbia.

The growth of S. W. business in the West is illustrative of the wonderful development of the country, the increase being made in keen competition with other Canadian-made paints, which have also made great advances. The S. W. supply depot at Winnipeg and are plan- Co., are just opening their large new ning to have their proposed new linseed oil mills and paint factory at Winnipeg in operation for the 1908 trade. A supply depot at Vancouver is another proposition which the development of trade will soon make necessary.

PARIS, ONT.

Is Your Paint Trade Growing?

If not there is something wrong. You can be assured of a large increase in your paint business if you handle

ARK BRAND PAINT

It is the most durable and best looking paint made. Read what it has done for one of our customers, and it will do the same for you. You really cannot afford to be without it.

Toronto Junction, Nov. 2nd, 1906.

Messrs. Francis-Frost Co., Limited, Toronto, Ont,

Gentlemen,—We have handled your "Ark Brand" Paint for three years, and during that time we have had better satisfaction in our paint department than ever before. The increase in our sales this year so far is over 300 per cent. more than our first year. It is a great pleasure to handle it, as there are no kicks, and no come backs except for more. From our experience we are firmly convinced it is the best prepared paint made, and especially adapted for outside painting.

Muresco: We are doing a splendid trade in this wall finish, and cannot now sell any other kind, even at half the price. It is certainly the finest wall finish we ever saw, and we will handle no other wall finish but Muresco in future.

Let us know if there will be any advance in price of above for 1907, as we wish to cover ourselves with a good stock. Youry truly, C. M. CUTTS & CO.

Have You Ordered Muresco?

If not, wait until our traveller calls on you before placing your order. It is the best wall finish made. Anyone can use it without showing laps or brush marks.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

At Sydney, N.S., a technical school has been opened.

A new woollen mill to cost $25,000 is to be erected at Lethbridge.

The York and Sunbun Milling Co. of Gibson N,B., will erect another large saw mill at that place.

The Northwest Threshing Machine Co. of Stillwater, Minn., will build a large warehouse in Brandon.

A $10,000 fire took place at the Montreal works of the Canadian Rubber Company last Saturday.

The National Spring and Wire Co., will locate in St. Catharines, where they have leased a factory.

An Indiana firm is to erect a fifty thousand dollar plant at Guelph, for the manufacture of brick-making machines.

The Meisel Manufacturing Co. will build a plant at Port Arthur for the manufacturing of harvesting machinery.

The Sydney Cement Company have closed down on account of not getting the regular supply of slag from the Steel Company.

Jones Bros., manufacturers of barber-shop and bar fixtures, Toronto, have purchased the plant of the Dundas Refrigerator Co.

The Ross Rifle Co., Quebec, are looking for a location in Ontario for the removal of their plant for manufacturing sporting rifles.

It is expected that a big rolling mill will locate at Sydney, N.S., to manufacture articles used in building and railway construction.

The Columbia River Lumber Company will erect a large mill at Tolden, B.C., which will have a cutting capacity of 150,000 feet a day.

Gaar, Scott & Co., Richmond, Ind., large manufacturers of thrashing machinery, will locate a factory in Western Canada, probably at Winnipeg.

The Canadian Clothespin and Woodenware Manufacturing Co., will erect a new factory in Renfrew, Ont., where they will begin operations early in January.

The Brantford Folding Paper Box Company has been sold to C. R. Somerville of London, who will continue the business in Brantford for the present.

A company has been formed at Petrolia, Ont., for the purpose of handling explosives for drill purposes, and to bore for oil, gas and other minerals of all kinds.

A firm has been incorporated under the name of Western Fire Clay Products, Limited, Winnipeg, with a capital stock of $600,000 for the purpose of manufacturing brick, tile, pipes, and all articles manufactured from clay.

The Commercial Cement Co., Winnipeg, incorporated with a capital stock of $150,000 for the purpose of manufacturing cement and cement products of all kinds.

The Grand Trunk Repair Shops will locate at New Toronto, where they will manufacture all steel switches and diamond crosings used on the whole G.T.R. system.

The Tilson Manufacturing Co., of Port Washington, Wisconsin, have decided to locate their Canadian branch in Guelph, where they will manufacture gasoline engines.

The Rhodes, Curry Co., car builders of Amherst, N.S., claim they were never so busy at at the present time, and the shops have to work night and day to keep up the stock.

Messrs. Hanry & Miller, builders and contractors, Toronto, will open a branch office in Woodstock for the sale of builders supplies and machinery, stone, cement, sewer and field tile.

The Dominion Brush and Mirror (Co.), Toronto Junction, has been incorporated with a share capital of $65,000 for the purpose of buying, selling and manufacturing brushes and mirrors.

At Sydney, N.S., the council have decided to give a bonus of $50,000 to a firm manufacturing railway supplies and Mowry bolts. The plant will cost $400,000 and work will be given to 250 men.

The John Morrow Machine Screw Company, Ingersoll, have purchased the plant of the Standard Bolt & Screw Company, Toronto, valued at $28,000 and will be taken to Ingersoll to supplement the plant there.

Westport, N.S. ratepayers will vote on a by-law granting a bonus of $4,000 to the New Idea Buckle Co., to establish a factory in that village for the manufacture of saddle and harness, hardware and other malleable work.

Copper has been found in Hastings County near Belleville in paying quantities. 150,000 pounds of pure copper has been extracted so far. The Medina Copper Company will take over the property and work will be rushed along.

The Sussex Mfg. Co. have amalgamated with the Taylor & McKenzie Co., of Guelph, Ont., who will move their machinery to Sussex, where they will manufacture furniture, refrigerators, etc., and will be known as the Sussex Manufacturing Co.

Goderich ratepayers have carried two important by-laws. One to loan $50,000 to the Goderich Wheel Rigs Co. to assist in erecting a $100,000 factory for the manufacture of baby carriages, etc.

And the other to assist the Jackson Clothing Co. by supplying electric motive power.

The Shipway Iron Bell and Wire Manufacturing Co., Toronto, are asking the Council at Niagara Falls for a free site, electric energy up to 100 horse-power at $10 a year per horse-power, low rates for water, gas, and fixed taxation for ten years. In consideration of this would move to Niagara Falls, extend their factory and employ 50 to 100 men. The proposed stock of the company is $150,000.

An effort is being made to bridge over the difficulties between the Dominion Coal Company and the Dominion Iron & Steel Company. The former company is closing down four of its collieries, owing to the steel plant's idleness and the approach of the close of navigation of the St. Lawrence route. The Bank of Commerce is heavily interested in the Steel Company and Senator Cox is on the directorate of both companies. Sir William Van Horne has retired as a director of the Coal Company owing to his large interests in the Steel Company.

In referring to New Zealand's new tariff J. S. Larke, Canadian commercial agent in Australia, reports that in the case of bicycles, wagons, perambulators, fancy goods and toys, hardware, lamps, pianos, plateware and pumps, the United States will have to pay 30 per cent., while Canada and Britain will pay 20 per cent. On footwear the United States will have to pay 33 3-4 per cent. and Canada 22 1-2 per cent. In hops the United States will pay 9d, Canada 6d; nails, United States, 3s, Canada, 2s per cent.; furniture, United States 37 1-2 per cent., Canada 25 per cent.; wall paper, United States 22 1-2 per cent., Canada 15 per cent.; wrapping paper, United States 7s 6d, Canada 5s per cent., bicycle parts, gas and oil engines, gum boots, printing paper, rails, sailcloth, canvas, surgical and dental instruments, United States 20 per cent., from Canada and Britain free.

BUILDING NOTES.

A new Y.M.C.A. building is to be erected at Ottawa.

A seven-storey hotel is to be erected at London to cost $130,000.

A new Reference Library is to built in Toronto costing $140,000.

A new fire hall on Rose Ave., Toronto, will be built at the cost of $10,000.

Work has been started on the new Canadian Bank of Commerce building, Carman, Man.

Pither & Leiser of Victoria, B.C., have given a contract for the building of a $50,000 warehouse.

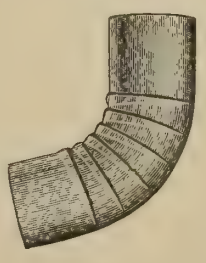
Gowans Kent & Co., Toronto, have secured a permit for the building of a brick warehouse to cost $20,000.

The Dominion Transport Company, Toronto, have been granted a permit to erect a three-storey brick stable.

Between $40,000 and $50,000 will be spent this winter on the construction of a new hotel at Prince Rupert, B.C., the western terminus of the Grand Trunk Pacific.

A block has been purchased in Calgary by Sir John Langman, English capitalist, who will erect a large four-storey building.

A site has been secured for the new Carnegie library to be erected at Woodstock. The sum of $20,000 has been granted for the building.



The Canadian Pacific Railway Co. are to construct a new building on Osborne street, Montreal, at a cost of $38,000. The building will be used as an express office, and will be 176 feet long by 87 feet deep, two storeys high and concrete throughout.

SPORTING GOODS TRADE.

This has been a banner year for the sporting goods dealer, both wholesale and retail. Guns and ammunition were at a premium for some time as the demand was so great that the manufacturers could not fill the orders fast enough, and wholesale houses have had to work nights to catch up with Christmas orders. Some lines of ammunition gave out long before the season was over and could not be repleted. Now that the busiest trade in hunting goods is practically over, the winter lines are thought of and orders for skates, hockey sticks, snow shoes and skis are coming in so rapidly it is evident that the demand will be greater than the output. The favorite lines of hockey skates selling are the Automobile, manufactured by the Canadian Cycle and Motor Co., Toronto Junction; Starr by Starr Manufacturing Co., Dartmouth, N.S., and H. Boker's various lines, while in tube skates the Fisher and Dunne lead. Hockey sticks are having a great season, ash and elm being the favorite sticks again. An American concern have ordered several hundred thousand sticks from a Canadian manufacturer, which may prevent Canadian jobbers from supplying as largely as ordered. A big season is looked for in the snow shoe trade. As owing to last year's lack of snow it is reasonably expected there will be lots this year. Lumbermen and surveyors are buying largely and many new snow shoe clubs are to be organized. Skis, while not as favorably known as web shoes, are fast obtaining a foothold as a Canadian pastime. Every year the sales are far in advance of previous years.

ONTARIO LEAD ENLARGING.

The Ontario Lead & Wire Co., Toronto, have sold their white lead and putty plants and stock to the Canada Paint Co., Montreal, and their wire nail plant and stock to the Ontario Tack Co., Hamilton. By dropping out of these lines the Ontario Lead & Wire Co., will be in a position to enlarge their plumbing supply business, all the space formerly devoted to manufacturing being now available for carrying a more complete stock of enamelware and other supplies.

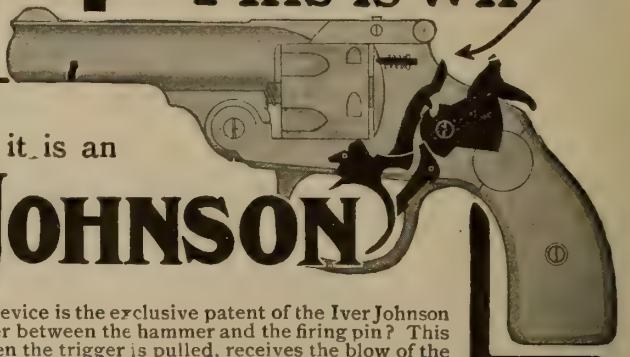
TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1338. Nails.—An Australian company, interested in the manufacture of wire nails, propose duplicating their plant within six months. They are in the market to purchase five or six nail-making machines of the most up-to-date character. Machines making nails from one to five inches are wanted. Prices and full particulars of Canadian nail-making machines are desired upon the basis of f.o.b. New York.

1339. Plaster.—A Melbourne firm of importers of wall plaster, plaster of Paris, etc., would like Canadian producers and exporters of the above lines to forward quotations for fairly large quantities upon the basis of f.o.b. steamer or sailer, New York.

1340. Agent.—A London firm of wholesale and export harness manufacturers, saddlers, ironmongers and horse collar makers, is desirous of appointing agents on a commission basis in all the principal Canadian business centres.



1347. Silver and electro plate.—A Sheffield firm manufacturing all classes of silver and electro plate would be pleased to give quotations, and invites correspondence.

1348. Steel, etc.—A Sheffield firm manufacturing crucible, shear, spring and blister steel, hand-made files, saws, cast-steel hammers and tools, crucible steel castings, desires to further develop their trade with Canada and invites correspondence.

1352. Appliances for hotels, etc.—A Yorkshire firm manufacturing all descriptions of cooking appliances for hotels, hospitals, etc., desires to get in touch with Canadian buyers, and invites correspondence.

Accidental Discharge Impossible—

This is why

True only if it is an

IVER JOHNSON

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.

Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

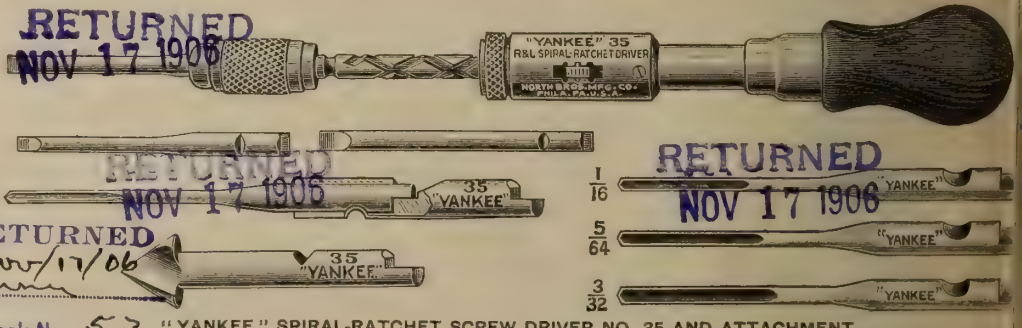
IVER JOHNSON'S ARMS AND CYCLE WORKS, FITCHBURG, MASS.

POTASIMITE—A NEW EXPLOSIVE.

A new explosive, said to rival dynamite, has been perfected in Monterey, Mexico, and is being used by the Mexican Central Railway. A factory for its manufacture in large quantities is being built. Potasimite is pronounced safer, cheaper, and more powerful than dynamite. These explosives based upon nitrogen produce a gas that necessitates abandoning closed works, such as a mine or tunnel, during the explosion, and the laborers can not return to work for a long time thereafter, depending upon the facility for carrying off the gas. Potasimite is said to produce no obnoxious gas, the only precaution being for the workmen to get out of the way of the flying particles of the blasted rock.

SAFETY EXPLOSIVE TESTED.

A remarkable exhibition of a new safety powder was given at San Jose, Cal., recently. For transportation the powder is packed in two separate parts, each part alone being non-explosive.



In the demonstration each part was placed separately upon a sledge and struck with an iron rod, but neither preparation exploded. Then the two parts mixed were treated in the same manner, with a like result. An attempt to explode "sticks" of the separate parts with a cap and fuse was attempeed, but only the caps exploded. Then a stick was filled with the mixture and fired with a cap and fuse, a terrible explosion following. One and one-half pounds of the mixture placed in a 6-ft. hole drilled in a rock weighing from 50 to 75 tons completely shattered the rock, pieces being thrown to a distance of 10 to 15 ft.

NEW YANKEE TOOL.

The North Bros. Mfg. Co., Philadelphia, in keeping with their record of up-to-dateness, are introducing a new Yankee tool, the No. 35 spiral ratchet screw driver with attachments for same as shown in the accompanying illustrations. In construction it is same as the No. 30 and 31, but smaller and for driving small screws only, being intended for electrical workers, cabinet makers, carpenters and mechanics, having a large number of small screws to drive, and where a lighter tool will be much more sensitive and convenient than the standard pattern, or No. 30.

It is small enough to be conveniently carried in the pocket, measuring 7 in. long when closed (without bit), and weighing less than 7 ounces. It drives screws in or out, ratchets in or out, and is arranged to hold rigid when closed or extended. The bits are straight, so they can be insulators, etc., where the flattened blades will not pass through holes.

The great convenience of this new driver in its smaller size and lesser weight, will commend and make it a desirable tool even to those who already have the No. 30. The length of tool with bit in chuck is 9⅛ in. when extended.

"YANKEE" SPIRAL-RATCHET SCREW DRIVER NO. 35 AND ATTACHMENT.

Cut Book No. 57

Plumbing and Steamfitting

WASHINGTON'S SEWAGE DISPOSAL SYSTEM

Ben Winslow, in The Scientific American

The Washington D.C., filtration plant, while of inestimable value in the United States capital s fight against a high death rate, was not the first important movement in the campaign. For fifteen years or more the District Engineers have been at work on the great sewage disposal system, which it is hoped will be completed next year. Plans for the filtration plant were not considered until several years after work had begun on the sewage system, but, being a smaller "job," it was completed in a comparatively short time.

In 1889 Congress, after going over volumes of figures showing that the high death rate in Washington was due in a measure to the lack of proper sewage facilities, authorized President Harrison to "appoint a board of sanitary engineers to report on the existing system of sewage, and to make recommendations for the extension of the system." The report was made the next year, and work on the recommended plan was commenced shortly afterward. As a result, Washington will have one of the best sewage-disposal systems in the world.

The recommendation of the sanitary board was that all the sewage of the entire city be collected at one point, and then forced across the Eastern Branch of the Potamac River to an outfall sewer, which discharges into the Potomac, several miles below the city. The cost of this project will be $5,000,000. The vital part of this great system is the pumping station—the point of collection—where the entire sewage of the city is raised a distance of nearly thirty feet and forced across the river. For the purpose of collecting the sewage two separate and distinct sewer systems are necessary, one at the usual level and one for the low-area district. The business section of the city, on Pennsylvania Avenue between the White House and the Capitol, is in the low-area district, and on several occasions this section has been flooded by water backing up in the sewers. The most notable flood in the history of Washington occurred in June, 1899, when row boats were used to navigate the streets in this section. While later freshets were not so severe, cellars are frequently flooded and much damage results.

The first system of sewers has as its main feature a great trunk sewer, known as the B Street sewer, varying in diameter from seven to eighteen feet and extending a distance of over two miles. This trunk sewer is fed by numerous high-level interceptors and small conduits. The other system, which collects the sewage from the low-area district consists of a large trunk sewer running under Pennsylvania Avenue, which i also fed by numerous interceptors an small conduits.

Ordinarily, the sewage from the B Street trunk sewer will flow into a junction chamber in the north-east corner of the pumping station. Here it will be divided by means of gates, and made to flow around a large sedimentation chamber into a screen chamber. In this chamber all the solids will be removed, and the liquid sewage will flow direct to the immense pumps which lift it into the siphon chamber. Here gigantic centrifugal pumps will force the sewage across the river through a pair of inverted siphons to the outfall sewer, through which it will flow by gravity to the outlet several miles down the river.

During heavy rainstorms, the gates of the sedimentation chamber will be opened, and the sewage will flow direct into this chamber instead of passing around it to the pumps. In this chamber sticks, sand, etc., will be removed before the sewage passes into the screening room and into the pumps. Should the rainfall prove exceptionally heavy, the storm water carried down in the large sewers will be divided by means of gates, which operate automatically, into four storm-water tunnels on the east and west sides of the pumping station. Through these tunnels the water not handled by the pumps will flow by gravity into the Eastern Branch. As a further precaution against flooding of the low-area district, immense storm-water pumps will be installed, and at the slightest indication of a flood, these pumps will be set to work pumping the storm water out into the river.

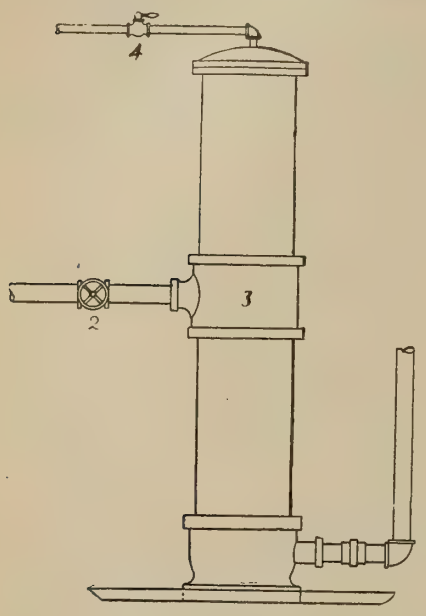
The solids removed from the sewage in the screening chamber will be pressed in hydraulic presses and loaded into a train of large buckets. These buckets, which are operated by electricity, run on overhead tracks, and carry their load through a conveyor tunnel extending around the east and west sides and across the north end of the pumping station, to a crematory.

The floor of the pump room is about twenty-five feet below the bottom of the river. In this room there will be thirteen powerful centrifugal pumps. Eight pumps on the west side, each having a capacity of 65,000,000 gallons a day, will be used for pumping storm water. The ordinary sewage from the high-level trunk sewers will be pumped by three pumps, each having a capacity of 65,000,000 gallons a day, while two pumps, each having a capacity of 20,000,000 gallons a day, will pump the sewage from the low-level system. The system has been designed to adequately handle the sewage of a city of 800,000 persons. All the sluice gates, valves, covers, and interceptor gates in the entire system, some of which weigh several tons and all of which are operated by hydraulic lifts, will be controlled by one man in the engine room, whether they are located in the station or a mile away.

The most interesting feature in the construction of this great system was that of laying the twin siphons arcoss the river. Each of these siphons is five feet in diameter and 1,200 feet long. Most of the work was done under water by divers. The siphons were laid in forty-eight-foot sections, four twelve-foot sections being welded together on the pumping-station dock. Each forty-eight-foot section was fastened securely to the top of a fifty-foot caisson, simply an air-tight wooden box, and the caisson was towed into position and tipped over, so that the section of pipe floated under it. Ports in the caisson were then opened, allowing water to flow in, and gradually the caisson with its load of pipe settled to the bottom, where divers guided the section into place and secured it there. One twelve-foot section weighs 14,000 pounds, and the weight of the four sections handled by the divers is about thirteen tons. The siphons are laid on beds of piles driven in the bottom of the river, which has been dredged to the proper depth. From the siphon chamber the pipes go down with a steep slope to a distance of twenty-six feet below the surface of the water, and then rise an equal distance to the other side, where they connect with the outfall sewer in Maryland.

When this immense sewage-disposal system is put in operation in the spring of 1907, the most important work in the sanitation of Washington will have been completed, and the citizens who have been foremost in the enterprise can bend their efforts to the solution of the next important question—the sanitary housing of the poor of the capital.

COST OF HANDLING IRON PIPE.



The cost per ton for unloading cast-iron pipe is the same for all sizes. The cost of laying per ton, for pipe under 30 in. in diameter, is about 30 per cent. more than for pipe over 30 in. in diameter. As a matter of fact, 18 in. pipe costs twice as much per ton to lay as 48 in. pipe.

STRIKE AT LONDON.

Twenty-five coremakers and brass molders employed by the Labatt Manufacturing Company, London, were on strike one day this week because of the company's refusal to discharge an objectionable workman.

REMOVING AIR FROM WATER.

In a certain public institution water used for various purposes contained much air, and when faucets were opened the mixture was very objectionable, as water spattered on the floors and caused trouble in other ways, writes W. H. Wakeman, in Domestic Engineering. Pumps were used to give pressure required to force water to the upper

floors, and as the supply was inadequate at times, air was drawn in as a natural consequence. The illustration shows a device made to remove this air and it works well. Water and air entering through the pipe 2 passes into the separator 3, which is made of 6-inch galvanized iron pipe and suitable fittings. As air is lighter than water it comes to the top and passes out through 4, which is a 3-8-inch cock kept partially open at all times, and both air and water are discharged into a urinal. A solid body of water passes out through 5, to the lavatories, closets, sinks, etc.

MECHANICAL REFRIGERATING PLANT.

A modern feature in a new Baltimore sixteen-storey office building is the installation of the refrigerating system by the Carbondale Machine Co., of Carbondale, Pa. The plant occupies a room about 20 feet square, in the basement; being of the "Absorption" type operated by low pressure steam. The use of low pressure steam for operating refrigerating machines is comparatively a novelty in itself.

The plant consists of an ammonia absorption machine of the Carbondale type, modified to suit local conditions; with two large cooling tanks for ice water and brine respectively, and three electric-driven triplex power pumps for circulating ice water, brine and ammonia, respectively.

After being thoroughly filtered, the drinking water is delivered into the cooling tank, where it passes over cooling coils and is pumped to drinking fountains on each floor and to faucets located over most of the wash basins in the offices throughout the building. A continuous circulation is maintained by the pump; the unconsumed drinking water being returned to the cooling tank to be recirculated through the building; this constant flow prevents stagnation in the pipes; fresh water passing continually through the filters to supply the place of that consumed. The drinking-water is maintained at a temperature of about 40 degrees Fahr.

In the main kitchen, on the twelfth floor, are located a number of large refrigerators, there being also a number of small refrigerators placed in the private kitchens in the offices of the President, and those of the first and second Vice-Presidents. All these refrigerators contain coils of pipe through which cold calcium chloride brine is continually circulated by the brine pump of the refrigerating plant; this brine being cooled by means of a brine cooler, placed inside of the brine tank, in the basement. Valves on the inlet and outlet of the coils in every box make it possible to regulate the temperature as desired; the latter varies from 35 degrees to 45 degrees, according to the nature of the goods stored in the refrigerators. It has been demonstrated that this system is much more economical than the use of ice, more reliable in maintaining a given degree of temperature, to say nothing of the trouble and inconvenience of handling ice, which is obviated entirely.

In order that the cold produced by the refrigerating plant be not lost through radiation, all the drinking water and brine circulating pipes are thoroughly covered with moulded cork covering made from small particles of cork compressed and cemented together. The loss by radiation through this form of covering is very small.

APPEAL DISMISSED.

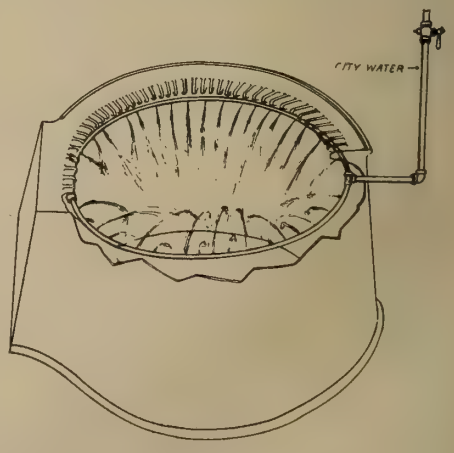
The appeal of the Central Supply Association against the decision fining that body $5000 for conspiracy with the Master Plumbers' Association a year ago, was heard before Judge Garrow on Monday of this week and after argument was dismissed.

As the Association went out of existence nearly a year ago the crown will find it difficult to collect the fine unless each member is indicted individually by a grand jury—proceedings which will cost fully double the amount of the fine.

DEPARTMENTAL STORE COMPETITION.

Toronto's leading departmental store has entered into competition with Toronto Master Plumbers and is selling Canadian made enamelware and brass goods at prices which are in most cases practically the same as those quoted by supply houses to master plumbers.

This presents a new form of competition and another obstacle in the way of again getting the trade in Toronto on a profitable basis. When asked as to how the fixtures sold by them would be installed the name of one of the master plumbers who recently failed was given as their recommendation. Having found it impossible to make a living for himself under the present cut throat price cutting he has taken up with the departmental store instead of joining the ranks of the too-scarce journeyman.



Master plumbers who desire to learn the names of the makers of the enamelware and brass goods can secure the information from their supply houses if this paper is mentioned.

IRON PIPE RUSTING UNDERGROUND.

The cast iron pipes originally used in the Berlin gas system were some years ago replaced by wrought iron pipes, to avoid the serious accidents which had occurred previously, due to breaks. In the new system no precautions were taken against rusting, and at the end of a few years the pipes were entirely eaten through, and upon examination, in some places there were found envelopes composed entirely of rust. Protection by a coating formed of a mixture of tar, sand, lime, powdered clay and pitch was then tried, and very good results were obtained, pipes buried twelve years having recently been found perfectly preserved.

TO PREVENT DUST OF ASHES IN HEATER ROOM.

An ingenious device has been placed in operation by C. B. Thompson, of the American Radiator Company, Buffalo, N.Y., in connection with his own heating plant. It consists of a perforated ring of pipe at the top of the ash pit of a steam or hot water heater and attached to the city water supply. The holes in the pipe being deflected downward in order that no force of cold

Sprinkling Arrangement to Keep Down Dust.

water shall be thrown against the hot grate just above it. Water is turned into this ring during the operation of the shaking of the furnace and the ashes are thus prevented from disseminating dust throughout the heater room.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 16, 1906.

Business in heating supplies is even livelier than last week. The supply houses here are exerting themselves to their utmost to get their goods out on the last boats. But a few days remain for shipping by boat between here and Ontario points, and navigation in the lower river and gulf will be closed inside of a week. This fact makes this week's turnover particularly heavy.

Iron pipe is still very scarce—in fact, it is becoming more so, all the time. Naturally the advance made last week is well maintained, in view of the great demand as well as the extreme shortage. Other lines remain as before, with a feeling that higher prices will soon be declared on lead pipe, owing to the continued advances in the pig lead market.

RANGE BOILERS—Large shipments are being sent out to all parts of the country. We quote: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon. $29.50; 40 gallon, $32 net.

LEAD PIPE—With pig lead still higher, further advances may be expected. We now quote: 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax; f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—There is a brisk demand for these goods. Quotations are as follows: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent.; 3½ in. to 6 in., 72½ per cent.; couplings, ½ in. to 2 in., 55 per cent.

IRON PIPE—The situation is more acute than ever, and last week's advance is very strong. We quote prices and discounts as follows: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches. $22.50; 1 1-2 inches, $27; 2 inches, $36.50; discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 70 per cent., and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—The weather has been unfavorable for outdoor work this week, and the season for this line is now practically over. We still quote as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Prices are stiff, as primary markets are still advancing. We quote: Bar Solder, half-and-half, guaranteed, 25.; No. 2 wiping solder, 22c.

ENAMELWARE—Our prices are: Canadian bath tubs, plate E1, 5 ft, 1st quality, $20.65, special $18.65; plate E11 and E21 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, November 6, 1906.

No price changes have taken place during the week but everything is very firm and business brisk in heating goods, though slackening off a trifle in plumbing supplies.

ANSWER THIS QUESTION:

In your judgement is it essential that every closet connection to soil pipe stack should be provided with a BreaKsyphon?

If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a BreaKsyphon, and give the reasons why it would not be required.

For the best answer received by December 1, we will send a cheque for $5.00 and to every one sending a satisfactory reply for publication we will give a year's subscription to Hardware and Metal. Send in a reply at once and answer the question as fully as possible.

Iron pipe is no easier to procure than during the past couple of months and numerous jobs are being held up from two to four weeks owing to inability to procure pipe. Some have been able to keep up with their work, however, by buying well ahead of their requirements. Radiators are also behind, in some cases as much as two weeks.

Soil pipe is, in spite of recent advances in most iron products, quoted at former low prices. One foundry has discontinued manufacturing owing to the low selling prices and others are working only on old orders. Higher prices seem certain but no change is likely to take place until the New Year.

LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 5½c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—Shortage of stocks is still the feature of the market. One-inch black pipe is now being quoted at $4.62, and one-inch galvanized at $6.27. Full list in current market quotations.

IRON PIPE FITTINGS—Advances on new lists are as follows: Cast iron elbows, tees, crosses, etc., 60 per cent.; cast iron plugs and bushings, 60 per cent.; flangle unions, 60 per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.

GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.

RADIATORS—Some shortages are reported with shipments slow. Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain very firm as follows: Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE—We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25: plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

PLUMBING DISPLAY AT FAIR.

A. P. Elder, Ottawa, Kansas, believes in advertising and at the recent county fair in his town he made a display of plumbing, heating and lighting fixtures. Hot and cold water was connected to all fixtures and natural gas was brought over 500 feet in a special main to supply gas for fuel and light. The booth was very attractively gotten up in the shape of a bath room and kitchen, with lighting fixtures overhead and on the walls.

5 Special Prizes are offered for the best photos of Christmas window displays of hardware goods, the photos to be accompanied by short descriptions of how the displays were constructed, and to be mailed to us not later than Dec. 31st, 1906. In addition to first and second prizes of $6.00 and $4.00, we will give to the senders of the best three other photos a year's subscription to "Hardware and Metal." None of the five prizes are intended to be given for other than window displays of cutlery, silverware, sporting goods or hardware novelties suitable for use as Christmas presents.

IT SAVES LIVES

A Building Necessity.

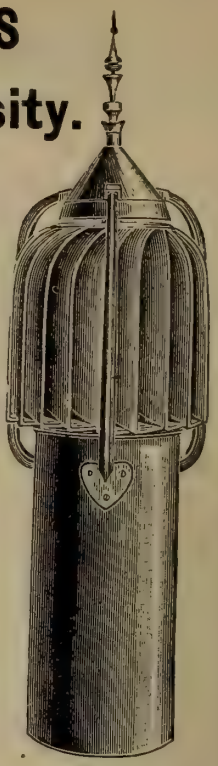
These are the names that have been made synonymous with the

AEOLIAN VENTILATOR

We are the manufacturers of it and control the patents.

We have placed it on some of the finest buildings in the Dominion.

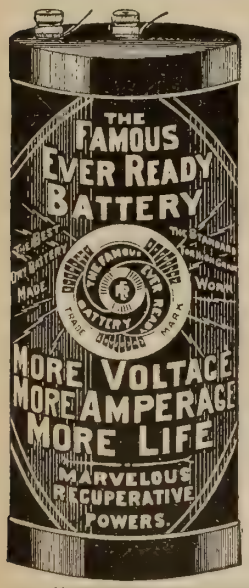
It is a scientific fact that no modern buildings can afford to neglect sanitation.



We are contractors and sanitary experts. Our ventilator is guaranteed and is placed in position to suit the building as to quality and size.

One Testimony:

MONTREAL, June 12th, 1903
Canadian Pacific Railway Company.
Messrs. J. W. HARRIS Co., LIMITED.
7 St. Elizabeth St., Montreal, Que.



Gentlemen,—Answering yours of June 1st, I am not personally familiar with the merits of the "AEOLIAN" Ventilators but our Assistant Engineer, Mr. F. Crossley, reports that the Ventilators of this type manufactured by you and used by this Company at the Place Viger Hotel, Chateau Frontenac, Windsor Street Station and elsewhere, have proved satisfactory. Yours truly,

E. H. MCHENRY, Chief Engineer

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

"BLACK DIAMOND"

NO HONING REQUIRED

THE RAZOR FOR YOUR CHRISTMAS TRADE

RETURNED
DEC/1/01
to Montreal
Cut Book No. 54
Page No. 14
A.A.W.

THERE are many men who still stick to the good old-fashioned razor in spite of the great variety of safety and other patent razors on the market at present.

These men are generally old veterans at the shaving game, you can't tell them much about razors that they don't already know.

They are always ready, however, to buy a new razor, providing it's a good one.

This is where the **BLACK DIAMOND** shows up, Mr. Dealer. It has a ⅝-in. blade, full hollow ground, white handle, gun metal tang, is put up in a white case, in a green box.

While the way the razor is done up, has nothing to do with the quality, the package attracts attention, while the quality of the razor itself will likely make you a sale.

Every blade is warranted, and if for any cause due to defective manufacture, you have a complaint, we will stand behind you in every case and replace the article with a new one.

If you don't sell **BLACK DIAMOND RAZORS**, get a few in for your Christmas Trade, they sell well.

3 "	36 "	55 " " "

CONGO NEVER-LEAK ROOFING

We don't compare Congo Ready Roofing with any other kind—it's too far ahead. We just ask you to let us send you a free sample—that will speak for itself.

Congo Roofing is made of a composition that is absolutely waterproof. It resembles rubber in looks and elasticity. It doesn't crack nor dry out. Needs no repairs, painting nor coating for many years. Acids do not affect it—to heat and cold it is alike impervious.

Write to-day for free Sample.

BUCHANAN-FOSTER COMPANY
DREXEL BUILDING PHILADELPHIA, PA.

Congo Roofing is easy to apply. Skilled labor is not necessary. You don't have to hire an expert to help. If you can drive a nail you can do all the work that is necessary. The directions for laying are simple, and it is hard to make a mistake. Every roll comes complete, with plenty of nails, cement and caps. There is nothing else to pay for. The roofing is all ready to put down. Just rip off the wrapper and lay the Roofing on the building.

People who buy Congo Roofing for a building once, don't buy any more in after years—for that building, because it is *there to stay*, although the roof costs but little. They do buy more for their *other* roofs. Everyone who tries Congo is soon a convert, and he becomes more enthusiastic the longer he waits for the roof to wear out.

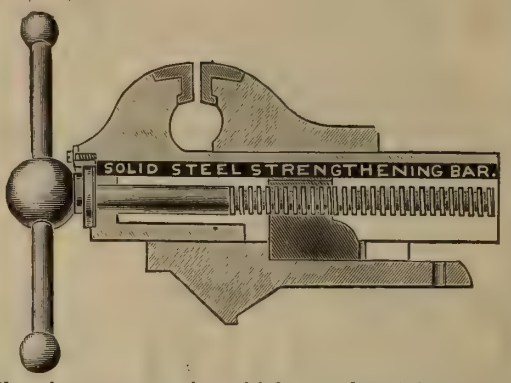
GRAHAM NAILS ARE THE BEST

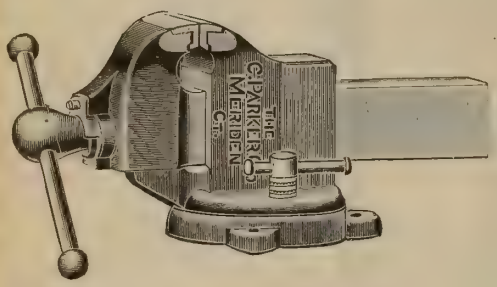
We Ship promptly

Factory: Dufferin Street, Toronto, Ont.

Our Prices are Righ



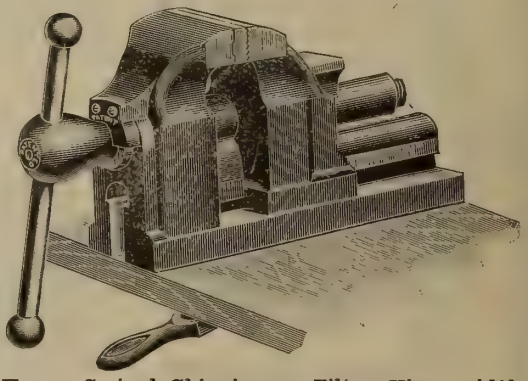
Stationary Machinist Vise, made in 6 sizes with jaws 3¼-in. to 6¼-in.



Semi-Steel has a strength several thousand pounds greater than cast iron.

That is why it is used in Parker Vises.

The Parker Vises are made stronger in the weak part of all vises than any other vises are made.



Showing manner in which Parker Vises are strengthened by a solid steel bar.

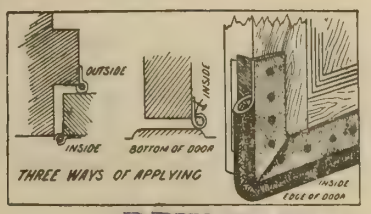
Same as above only made to swivel in any direction.

The sliding or moving jaw is the part most liable to break in any vise.

The Parker Company has provided against that danger by casting in the sliding jaw a solid steel bar strengthener. This improvement makes the jaw practically unbreakable. It is found only in Parker Vises.

Heavy Swivel Chipping or Filing Vise, width of jaws 5 inches.

Parker Vises are made in all approved shapes and sizes for machinists, pipe fitters, wood workers, etc.



We keep a full line of Parker and other makes of vises.

SHINGLES

Our "Safe Lock" shingle has helped many a dealer to make and hold trade. It's construction appeals to anyone as being superior, and when put on a roof they give lasting satisfaction and makeneighbors want them.

SIDINGS

There is nothing else so suitable as our steel sidings to dress up old buildings with and make them warm—They are also useful for a low priced building where attractive appearances are desired.

CEILINGS

When you sell and erect one of our classified designs you can always count on a well pleased customer—These designs do not get out of date same as patterns carrying out no idea. Give a customer a selection and he will invariably turn to our classified ceilings. They cannot get away from their richness.

What's in a Name Without Quality to Back it Up?

"STERLING" PURE PREPARED PAINT is not particularly unlike many other mixed paints in the liquid form, or when first applied.

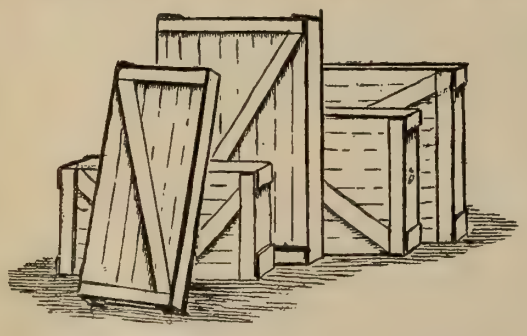
But the difference becomes more and more apparent as the months and years roll by, for "Sterling" Paint will present a smooth, bright, glossy appearance long after other paints have faded, peeled and disappeared. It Lasts.

"Sterling" Paint is always uniform, has more body, covers more surface and is more durable than any other paint Made in Canada.

We are determined that, cost what it may,

"STERLING" PURE PREPARED PAINT

shall always be known as the best paint.



"STERLING" IN NAME. "STERLING" IN QUALITY.

SUCCESS

In this day of keen competition, the Key to Success is QUALITY. Knowing this we have put ourselves in a position to announce another long step forward, placing our four "Maple Leaf" brands of binder twine far in advance of all others.

HOW?

The answer to this question is too lengthy for the space of this Ad. but we are prepared to prove the STATEMENT by the GOODS.

Let us emphasize this, by sending you sample bales for your inspection. A request will bring them freight prepaid

Dealers who sell our brands will find the Twine Agency not only pleasant and profitable, but a help to other departments of their business.

These are the four brands:--

GILT EDGE, 650 ft. per lb., Pure Manila
GOLD LEAF, 600 ft. per lb., Manila.
SILVER LEAF, 550 ft. per lb., Standard Manila.
MAPLE LEAF, 500 ft. per lb., Standard

Persons addressing advertisers will kindly mention having seen this advertisement in Hardware and Metal.

No Horse Nails in the World

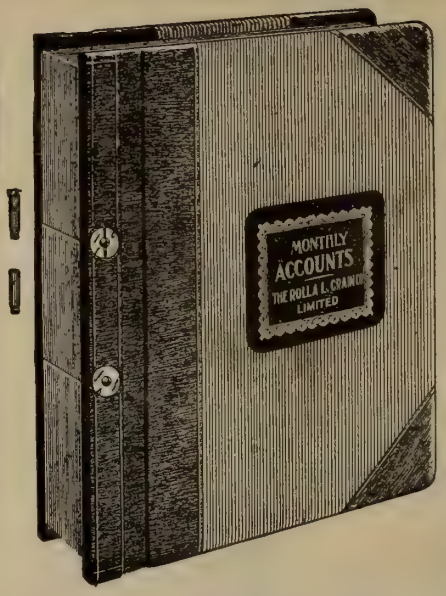
are made of better material than is used for the "C" brand. It is a special quality of Swedish Charcoal Steel Nail Rods, which have the highest tensile strength combined with great toughness. This is demonstrated by the average tests, which shows that test pieces of these rods will stretch over one-third of their length, and require a pulling force equal to 55,000 pounds per square inch before breaking.

No Horse Nails in the World

have ever, or do now excel the "C" brand in any test of quality impartially and scientifically applied. We challenge comparison with the product of any maker.

No Horse Nails in the World

will drive easier, or make better clinches, or hold the shoes on longer. The fine hardened bevel points, penetrate the hardest hoofs easily. You will never bend or buckle a "C" nail in driving, or find split or crooked nails.



No Horse Nails in the World

are better entitled to the preference of the Canadian merchant for reasons of quality and fair price. They may be obtained on order from all the leading Hardware Merchants in Canada. If not obtainable on request, we shall supply you direct. Samples and quotations furnished on application.

CANADA HORSE NAIL CO.

MONTREAL

Established 1865

The Crain Monthly Account System

$17.75

is the price we have always charged for this excellent system for the retail trade.

It cannot be purchased cheaper

that is in the 14 x 11 size. True, the Monthly Account System is being quoted cheaper. We can supply you with a complete outfit for ***$14.75*** in our 8½ x 11 size, but we do not recommend it as it is more expensive in the long run to the merchant, and it is not as easily handled. The sheet being short only accommodates one account, while with the 14 x 11 size you can have the three accounts to the sheet.

When purchasing a Monthly Account outfit consider first the size of the sheet, then the cost of supplies. In the first cost of putting in a system a couple of dollars should not be considered. In an 8½ x 11 size one thousand sheets means one thousand billheads; in the 14 x 11 size, assorted one, two and three accounts to the sheet, you get from two to three thousand billheads. Write us for further information.

We Can Deliver These Stoves

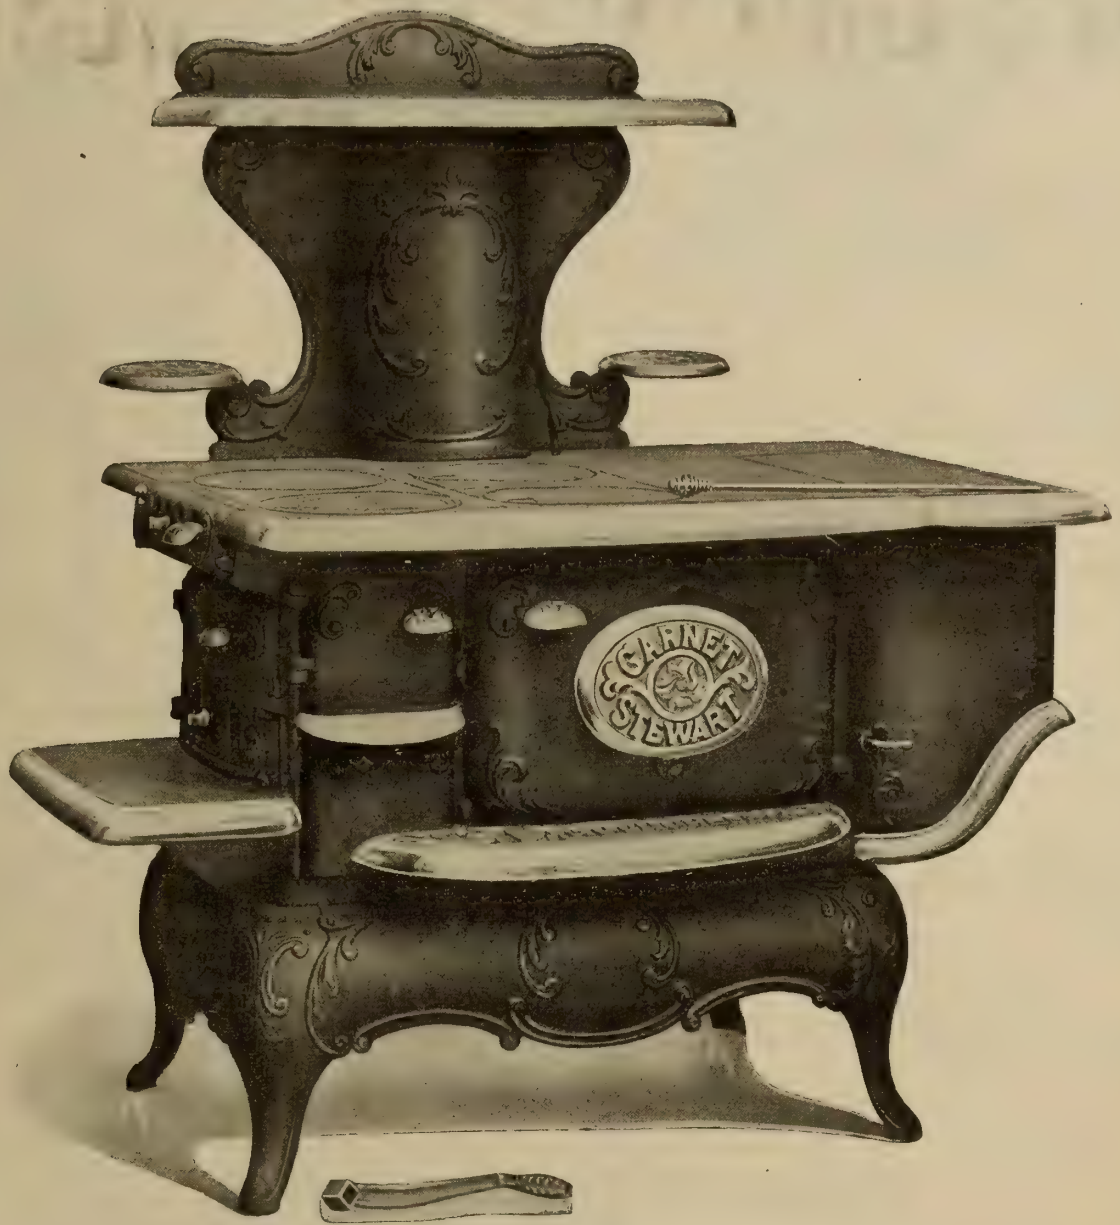
WITH OVEN—230 Series

To be exact, we can ship baseburners the same day we receive your order.

"Famous" baseburners are made in two styles and five sizes.

The No. 230 series is a heavy, durable stove, with a three flue construction which distinguishes it from nearly all other makes. Is made in three sizes, for parlor and two with oven.

Our No. 113 series is a lighter stove, but well made and excellent value for the money. Is made in two sizes for parlor and one with oven.



You can sell either of these lines and feel satisfied that your customers are getting the best that experience and skill can build.

ALUMINUM OIL HEATER

The Heater that Stands for More Sales, for Pleased Customers, for Sure Profits

The real, fundamental, rock-bottom reason for it all is our **GRAND SAFETY BURNER**

the unexcelled, the unrivalled, the **only** safety burner in the world.

Note its Construction

A, Flame Spreader. **B**, Air Space outside of Wick Tube. **C**, Air Space inside of Wick Tube. **D**, Wick. **E**, Outside Casing to Burner. **F**, Air Space between Fount and Outer Casing. **G**, Fount for Oil. **H**, Feed Pipe conducting Oil from Fount to Burner. **I**, Shield resting on top of Fount with Air Space underneath.

It eliminates

1st. That unwholesome odor, because its flame spreader is solid—no perforations to clog up.

2nd. That disagreeable smoking, because of its perfect smokeless device.

3rd. The danger of explosion, because the wick does not enter the oil fount at all. Oil is fed to it through feed pipe (H).

Any prejudice people may have against oil stoves is at once dispelled when you **show them** that you have a heater that eliminates all these troubles. Their decision is made immediately—"I'll take it." You have made a good sale, a satisfied customer, a sure profit.

Send your order to us to-day—or to your jobber.

We have an interesting booklet for you. It's yours for a request.

What is Your Book-Keeper's Time Worth?

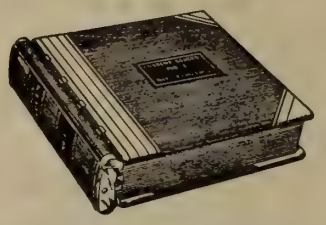
BUSINESS SYSTEMS LIMITED
SYSTEM THE SECRET OF SUCCESS
TORONTO.

Is your ledger arranged on any special system?

Ten minutes wasted six times a day looking for an account means a daily loss of one hour. On a ten hour day, this means a loss of a month a year.

And your book-keeper has more than six accounts a day to look up.

Can you afford it?



* * * * * *

Business Systems ledgers are all built on the loose-leaf principle.

Business Systems make your ledger accounts run alphabetically; if an account runs over the space you gave it, you merely drop in another leaf.

Business Systems loose-leaf ledgers open perfectly flat and give a level writing surface.

Write us to-day for full particulars.

This will not obligate you in any way and will enable us to tell you exactly how Business Systems may be most economically applied to your accounting department.

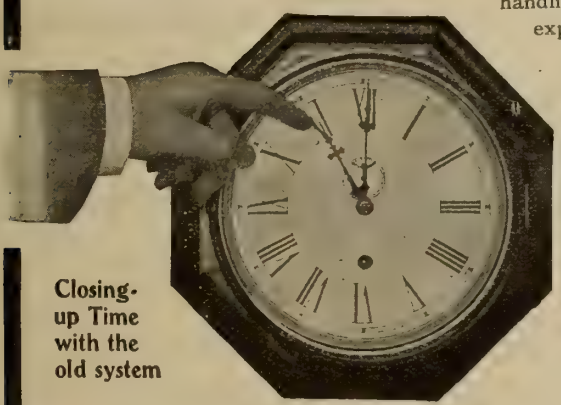
The Office Clock Story



Closing-up Time with The Copeland-Chatterson System

IT'S the office clock that can tell the story—knows just how many tiresome hours are spent at night over the books in a vain endeavor to get them up to date; or can tell of a cheerful staff leaving on the hour with all work completed.

What story will your office clock tell?

A Copeland-Chatterson System will adjust the hands of the office clock; will make closing up time right, and will enable you to say just how your business is progressing or to find quickly the record you require and despatch promptly your customers' accounts.

It doesn't matter whether it's wholesale, manufacturing, retail, financial or a professional business, we have systems for any one of them that will simplify and make methodical the accounting—facilitating the general work of handling business details. Write us to-day—one of our experts is somewhere near you, and he knows the systematizing business down to the ground.

THE BEST LAID OUT STORE

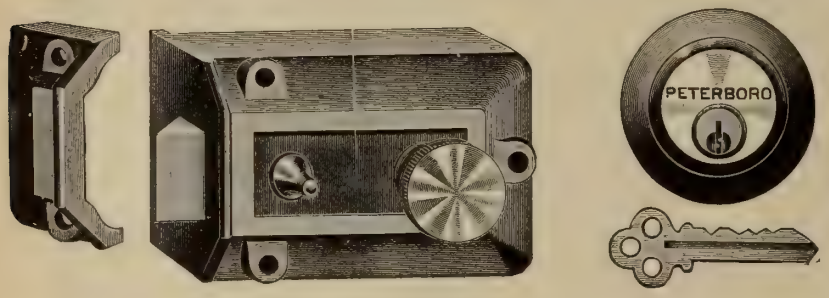
is the one which displays the most goods.

There are few men who can describe just what they want, but if they see it sampled on a shelf box they can point it out. Which is the easier—for a man to point out the article he wants, or for you to untie half a dozen packages to show him what you have in stock?

Your salesmen should be employed in selling goods, not in looking for goods, in untying packages and tying them up again.

Shelf Boxes improve the appearance of your store 100%.

The Bennett Steel Shelf Box is the best box on the market in Canada or the United States.



It has galvanized steel sides and bottom, and thus saves at least 20% shelf room. The steel is not nailed to the wood front, but is locked in by our own patented process.

The Bennett Box is more durable than a wooden box. It has been tested for fifteen years and we have never heard of one man who was dissatisfied.

Note the "lip" on box, this renders it dust proof. Write for catalogue and price list.

WHAT TO DO NEXT MONTH

December naturally calls up in the mind of the hardware dealer many selling methods to adopt, which are peculiar to the season. Window and interior displays are altered to suit the circumstances of Christmas trade, and advertisements are written for the express purpose of enticing gift-buyers. Then, in the last week of the month, comes a lull which is generally employed in preparing for the annual stock-taking —sometimes by clearing sales of notions and other goods that impede stock-taking, and sometimes by a thorough revision of the books, and a strenuous effort to straighten up accounts before the end of the year. By way of putting the cart before the horse, we shall first speak of those matters which come up for consideration during the closing days of the year.

Bookkeeping System.

Who has not been troubled by the details attendant upon keeping books in the old fashioned methods ? It is a difficult matter, and one entailing considerable work to add the various items of all the current accounts and learn how each customer stands. And it is also a more or less onerous task for the retailer to find out definitely how he himself has come out, on the year's business.

An easy way out of this difficulty is to adopt one of the new looseleaf methods which have been shown by actual experience, to lighten work and increase efficiency in the accounting department. Any of the manufacturers of loose-leaf book-keeping systems will be glad to furnish estimates of a method adapted to each dealer's particular requirements and in the end this will prove a most profitable investment. The end of the year is a good time to consider this question. Many hardware men will be taking up the matter when the Christmas rush is over, and to them, it may prove advantageous to review briefly the system in operation in one of the largest of Canadian hardware stores.

Prominent Dealer's System.

In this store the turn-over is very large and there are many clerks employed. Consequently, the plan adopted there would have to be modified for use in smaller stores. By an ingenious method a strict account is kept of the sales of each clerk, and also the profits on those sales. This is a very important point to have in mind when the hardware man is considering the increases or bonuses which he will give the various members of his staff at the beginning of the year.

Moreover, when goods are ordered a note is made of the time the invoice may be reasonably expected. If it does not come to hand at that time a letter is despatched to the manufacturers or jobbers, and a regular follow-up system inaugurated, until both invoice and goods are received. In these days of slow deliveries and manufacturers filled with orders, this system has been of incalculable value in obtaining shipments where haphazard letters of enquiry would no doubt fall down completely. In a similar manner the president of the company is, every morning, presented with a report in which is shown every sale missed during the previous day, and the reason for such. These few remarks will serve to outline the advantages to be derived from an up-to-date accounting system, and as December is the month in which the dealer makes up his mind regarding plans for the following year, they will be timely.

Fancy Goods Are Important.

All fancy goods should be energetically pushed, right from the beginning of the month. These will include cutlery of all kinds, shaving supplies, (while especial attention is being paid this year to safety razors), skates, sleds, wagons, tool chests, dog collars, manicure sets, scissors, pocket flash lamps, fire-place goods, fancy metalware of all kinds, and a multiplicity of articles suitable for gifts.

Although it is, perhaps, too late to make the suggestion for this year, it may prove useful to some of our readers to know the scheme adopted by a large Montreal dealer, in preparing tool chests. Nearly all his stock in this line, is assembled on the premises. Tools which have been imperfectly tempered but are quite good enough for the purpose, are included in the make-up, and some specially cheap goods have also been imported from Germany. The chests themselves are made to order, and this dealer has found the plan to work well. The result has been that tools which were unsalable in the ordinary course of business, have been used to makeup a set of tools far above the average for the use of boys.

Create Christmas Business.

If the hardware dealer, especially in the smaller towns, is not getting a handsome share of the Christmas trade in his locality, he is not living up to his opportunities. The tendency is, nowadays, for the hardware store to carry several specialties which are peculiarly fitted for this business. Dealers who have tried these sidelines without success, will probably learn that they themselves are largely to blame for slow sales.

The secret of Christmas selling is to create a demand. There are few, indeed, who have definite ideas, very far ahead, as to the kind of presents they wish to give. They are looking everywhere for suggestions, and it is for the hardware man to make them, with special reference to his own stock. Keep it in mind, then, that your whole object, in methods of display, advertising and selling should be to help your customers to select their Christmas presents from your stock. And, in accomplishing this, it is reasonable to suppose that a number of the other fellow's customers will also be persuaded.

Encourage Early Buying.

It is well, also, to urge customers to buy early and not wait until the best of the stock has been picked over by others. 'The early bird catches the worm,'' would be a good catch line to use to illustrate this idea in your newspaper advertising. The advantage to the dealer of turning over a goodly share of his stock before the rush of ''the night before Christmas,'' when the delivery problem is a hard one to solve satisfactorily, can be readily seen. Besides, early buying helps to give a line on the best selling lines, and gives dealers a chance to send in repeat orders.

The heavy trade done in Christmas goods this season has run jobbers' stocks down pretty low and the hardware merchant who does not encourage the ''early bird'' trade may have difficulty in having ''rush'' orders filled if they are left until the last week before the holiday. And while no dealer wishes to carry over much holiday stock most realize that it doesn't pay to be ''short'' when last minute customers come in ready to buy the articles they have seen exhibited during the month before Christmas.

To dealers who see the force of encouraging early buying we would suggest the advisability of offering some inducement to customers who spend a dollar or five dollars in Christmas goods before December 10 or 15. Offer some cheap toy or picture book for children on dollar purchases or the Christmas number of some magazine, costing from ten to fifty cents on purchases of from one to five dollars before those dates. The local newsdealer can probably supply some of the articles suggested. The Toronto News Co., Toronto, can give

quotations on the magazines, the "Christmas Globe" can be secured direct from the publishers at a reduced rate, the publisher of the local paper would probably give a club rate if his paper was offered a premium on $10 purchases, while a run over the stock in the merchants own store might suggest some lines which could be used to advantage in the way suggested.

Another suggestion we would make is that merchants offer their clerks the inducement of the present of a subscription to some such helpful magazine as the "Busy Man's Magazine," Toronto, for successful work as a salesman, window dresser or ad. writer during the holiday trade.

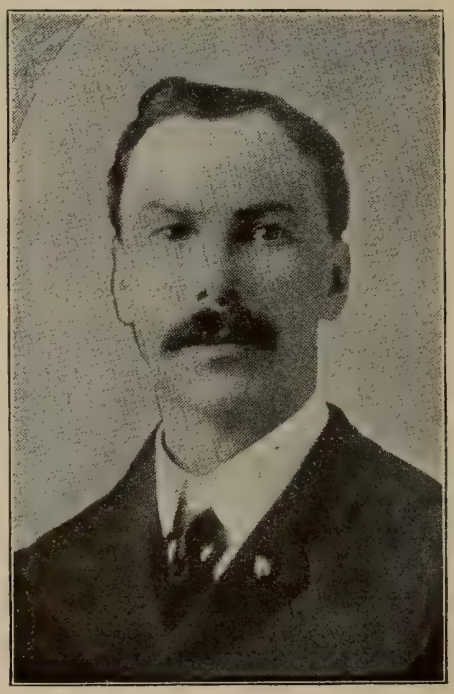
Window Suggestions.

What to do next month will not be such a serious matter if everything is done systematically. For window displays we would suggest that a series of displays be drafted out for use between now and Christmas as nicely arranged window displays are the best advertisement a store can have. At Christmas people take pleasure in spending their money, and they will be going around looking for places to buy their presents. Your window displays will have a great deal to do with influencing them to buy from you. We would, therefore, suggest the following list from which a series of displays can be arranged to suit any merchant's stock.

Right window. Dec. 1st.—Meat choppers, bake board, flour tins, etc. Dec. 8.—Chafing dish, trays, tea pots, etc. Dec. 15.—Skates, hockey sticks, snow shoes, etc. Dec. 22.—Cutlery, safety razors, shears, silverware and case goods.

Left window. Dec. 1st.—Cook stove, oil heater, cooking utensils. Dec. 8.—Carpet sweepers. Dec. 15.—Razors, cutlery and flatware. Dec. 22.—Hockey sticks, skates and toboggans.

Suggestive Advertising.



Following upon the idea that nobody knows until a very late day, just what kind of presents he or she intends to give, it will be advisable to make advertising as suggestive as possible, of the Christmas stock. In this connection, mentioning price is an important consideration in bringing trade your way. Besides advertising in the local paper—and this, too, should assume the Christmas spirit—a very profitable publicity is obtained by sending out neat circulars, giving a comprehensive idea of the goods in stock which might serve as presents. In this circular, a good point might be made of the fact that the local dealer can suit the particular tastes of the reader much better than some large retailer in a distant city. One should not buy articles intended for gifts, without seeing them.

A Model Circular.

About the best thing in this line which the writer has ever seen, was a tasty booklet published by the John E. Basset & Co., of New Haven. On the front cover was a conventional illustration of Santa Claus, the page was liberally besprinkled with imitation snow flakes, and the title: "A Plea for Santa Claus," was further explained by the remark (in smaller type) "some Christmas goods and prices." The pages of the booklet are replete with Christmas suggestions, nearly all the articles mentioned in the earlier part of this article, receiving fair attention. At the bottom of each page were the words "Bassett Has it." This is another idea, roughly sketched, which many Canadian dealers could adopt with profit.

Just Another Word.

There is one more thing to be mentioned. The hardware dealer must be prepared for the "cleaning up" notion that pervades so many households at the festive season. Family reunions, or visitors coming from a distance, make it necessary that everything should be "spick and span." Here is where the dealer may suggest aluminum paints, stains, varnishes, and enamels. There is plenty of demand for them in December.

A. F. GRADY
Mayor of McLeod, Alberta.

ELECTRIC MEAT CHOPPERS.

The good housewife accustomed all her life to using a chopping knife and bowl must have been surprised when she saw for the first time a modern chopping machine operated by a crank, and doubtless she would be still more surprised if she could see a present day electric meat chopper, in which hand labor, so far as the chopping goes, is entirely eliminated. In this machine you just feed the meat into a hopper and turn a switch and the motor does the rest.

PUBLIC SPIRITED HARDWARE MERCHANTS
NO. 3

A. F. Grady, now serving his fourth term as Mayor of Macleod, Alta, is a hardware merchant, known by reputation to most of the Western trade. He has a prosperous hardware business which has been developed by close personal attention, but nevertheless the people of Macleod have found him ready and willing to serve them in municipal office, and he has brought to the administration of the affairs of Macleod the same sound business judgment which has characterized his management of his own successful business.

In his own business, Mr. Grady is a practical man, having graduated from a bench in the tinshop, where his foundation of practical knowledge was obtained. He moved west in the early days when the country was younger, and, like so many others, has prospered with the country.

Early in the history of Southern Alberta, he was active as a member of the Board of Trade and kindred organizations, having for their object the advancement of the district. Since the incorporation of Macleod, he has been almost continuously a member of the Council, and, as mentioned before, he is now serving his fourth term as Mayor, having been elected by acclamation.

The prosperity of every Western town depends for the most part upon its railway facilities, and Mr. Grady has been active in conducting the railway negotiations of the town. In the campaign for the installation of municipal waterworks and electric lighting, he has become a leading factor, and he will have the satisfaction of seeing these systems in operation before his present term of office expires. These systems have cost $95,000, and the money is being expended in the town.

Like so many other Western towns, Macleod is in the fortunate position of being an owner of real estate. One or two towns have very foolishly retarded their own development by holding their property at too high a figure, it has been Mr. Grady's policy to place this property within the reach of workingmen by allowing them to purchase at a reasonable price in monthly payments. This is a farsighted policy, such as might be expected of a business Mayor.

MUNICIPAL STEAM HEATING.

The Peterboro City Council has decided to go in for municipal ownership of steam heating instead of granting a franchise to the Dominion District Steam Heating Company of Toronto. Estimates as to cost, probable number of patrons, etc., will be submitted to the people at the January election.

PREVENTING FROST IN SHOW WINDOWS

Reproduced by Request from Hardware and Metal, March 24, 1906.

During the course of the cold season shopkeepers are confronted with the great inconvenience arising from mist and frost in show windows, whereby the goods on show are rendered practically invisible, and consequently cease to attract customers. In nearly every instance a careful examination of the window will show that the construction of the wood work casing, the position of the window panes or the lack of adequate ventilation is to blame. For the purpose of studying the question show windows may be divided into two classes, viz., those inclosed at the back and such as are open toward the store. The former is the one more afflicted with mist and frost, and this class alone will now be dealt with.

In putting in the window panes, whether the framing be of wood or iron, a row of ventilating holes should be provided below, extending all across the window front. These holes should be broad and set low down, but not covered with protecting covers on the outside, since these covers only catch

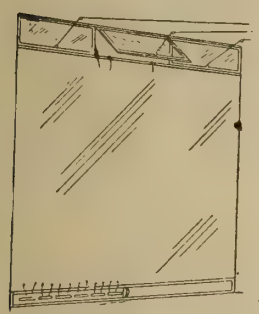


Fig. 1—Correct Method.

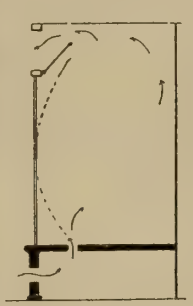

Fig. 2 Incorrect Method.

dust and help to stop the draft. The idea is to cause a wide current of air to enter the window so that the same may spread over the whole front of the window; and this is more easily realized with wide holes than by round ones or vertical slits. To prevent an inrush of dust raised by the street traffic or blown about in the Summer time, a sliding damper may be arranged inside the window so that the holes may be closed when required.

Above the level of the window panes window, should be provided hinged ventilators (Fig. 1), to allow the heated air in the window to escape out into the street. For this purpose a row of holes similar to those underneath the window would be insufficient, owing to the increased volume occupied by the heated air, and on this account the upper opening must be of larger area in order that the circulation of air inside the window may be intensified. This hinged ventilator must be mounted right at the top of the shop front, and open inwards and upwards, since otherwise it would oppose an undesirable resistance to the outflow of air or divert it, and thus lead to a deposit of mist on the upper part of the window. Furthermore, the inlet holes must not be surmounted by a ledge or beading that can deflect the flow of air and allow ice to form; and it is an equally erroneous practice to adopt the plan illustrated in Fig. 2, and extend the flooring of the show casing right up to the window, and bore a number of inlet holes through the flooring. In order to keep the glass free from frost the inflowing cold air must ascend close to the window panes and escape at the top without hindrance (Fig. 3). When this is possible the window will never be dimmed with either mist or frost, since the moisture that would be deposited on the glass is carried away by the ascending current of air the instant the particles of water are formed.

In some cases it happens that although the ventilation is believed to be satisfactory, the glass gets dimmed; but this is due to defective construction of the window frames or of the casing. For instance, if the door leading into the show window from the store does not shut quite tight, or there are any cracks or holes in the wood work, the warm, moisture laden air from the store flows into the cooler window, and a fine dew is deposited on the panes and mirrors. Hence the doors should never be of the sliding type, these admitting air and dust, but should open and shut, and be beaded and fitted into a rabbeted frame to make them air tight.

The window lights should be inclosed in glass cases, to isolate them from the actual show space, because in the case of gas the lights would heat the air more rapidly than the ventilator could carry it away, the results being a deposit of moisture on the relatively cold window pane. To prevent this the light should be isolated by a glass partition (Fig. 3), the compartment thus formed communicating with the store by means of a hinged ventilator or else left quite open at the back. Electric lamps do not give out so much heat as gas and may be installed within the show window when proper ventilaton is provided for the latter. A row of small gas jets extending right across the bottom of the window is of no use. On the one hand, it heats the air to such an extent that the glass will be covered with mist immedately the gas is turned off, and, on the other, likely to crack the glass by unequal contraction.

Mist and frost in badly arranged windows are particularly noticeable early in the morning as soon as the store is opened, the outside of the window having been cooled down by the night air. In such cases the mist or ice takes such a long while to thaw off that the best time for business has passed. Here, however, a remedy can be provided in the shape of a small electric fan mounted at the back of the window, with its vanes parallel to the front glass. Such a fan running at high speed will set up a powerful circulation of air in the window, and the direct current from the fan, impinging on the mist or ice, will soon cause them to disappear, leaving the glass clear and dry, whereupon the fan may be stopped. Of course there

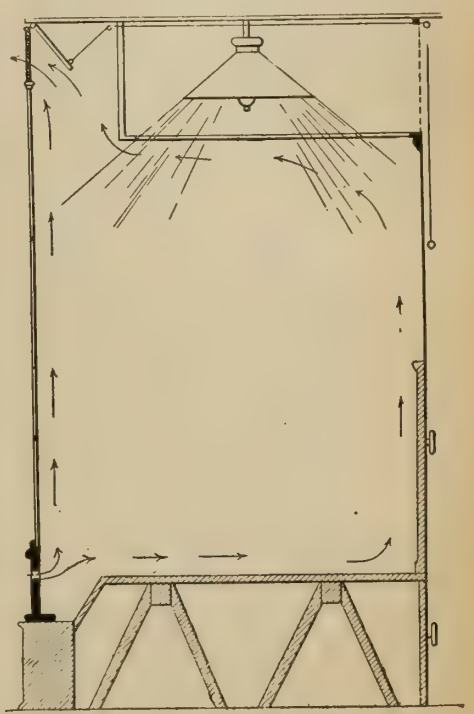

Fig. 3—Shielding Window Space from Heat of Lamp.

must be no obtsacle interposed in the path of the air current between the fan and the store window.

The principles underlying the suitable construction of show windows may be summarized as follows: The window must be thoroughly ventilated, so as to induce a good ciculation of air and bring the temperature of the air inside the window to as near as possible that of the atmosphere of the street. Doors and other openings communicating with the interior of the store should be made air tight. If these requirements are properly fulfilled, all cause of complaint of frost in windows will be obliterated.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

Officers Retail Hardware and Stove Dealers' Association of Western Canada:

President—A. J. Falconer, Deloraine.
First Vice-President—J. B Curran, Brandon.
Second Vice-President—W. M. Gordon, Winnipeg.
Secretary-Treasurer—J. E. McRobie, Winnipeg.
Executive—Alberta, A. E. Clements, Olds; C. F. Comer, Calgary; A. R. Auger, Okotoks.
Manitoba—H. S. Price, Boissevain; A. P. Macdonald, Winnipeg; O. Gilmer. Winnipeg.
Saskatchewan—G. K. Smith, Moose Jaw; S. A. Clark, Saskatoon; J. R. Fox, Weyburn.
Officers Western Board (elected by general merchants and hardwaremen in joint session): President, W. G. McLaren, Souris, Man.; vice-president, G. K. Smith, Moose Jaw, Sask.; H. C. Hamelin, Winnipeg, Man.; sec etary, W. A. Coulson, Winnipeg, Man.; treasurer, J. E. McRobie, Winnipeg, Man.; auditor. J. A. Lindsay, Winnipeg. Man.
Association offices, 53 Scott building, Main street, Winnipeg.

Officers Ontario Retail Hardware and Stove Dealers' Association:

President—A. W. Humphries, Parkhill.
1st Vice-President—W. G. Scott, Mount Forest.
2nd Vice-President—J. R. Hambly, Barrie.
Treasurer—John Caslor, Toronto.
Secretary—Weston Wrigley, 10 Front St. East, Toronto.
Executive Committee—The officers and J. W. Peart, St. Mary's; M. R. Marshall, Dunnville; D. Brocklebank, Arthur; F. W. Jeffery, Midland; E. P. Paulin, Goderich, and Frank Taylor, Carleton Place.
Auditors—J. W. Peacock and C. F. Moorhouse, Toronto.

ENGLISH ASSOCIATION CONVENTION.

This year has been a memorable one for the I.F.A. (Ironmongers Federated Association.) In years to come, when the I.F.A. entirely rules the trade, we shall look on 1906 as the turning point towards our greatness. As 140 ironmongers, the best in the trade, each representing others in their own towns, gathered together from all parts of the United Kingdom for mutual improvement. The agenda was the biggest ever discussed, but the subjects were well worthy of the attention bestowed on them.

Clerks' Examinations.

Examinations of assistants are improving steadily, and next year will see a still larger number of entrance. The last was held at Birmingham, and the subjects selected number 24, which fairly covers the trade, including hot water, plumbing, electricity, agricultural, etc. The examinations are purely voluntary, but all the smart assistants in the trade enter for them, as they get a certificate, signed by the leading men in the trade, and this is useful in obtaining good situations.

Mr. North, solicitor of the I.F.A., urged the advantages of incorporation and replied satisfactorily to all objections, after which the meeting decided unanimously, that "the I.F.A. should become incorporated."

Price Maintenance.

The "In Accord" list (manufacturers in accord with the principles of the I.F.A. as a subject was well thrashed out; many objections were raised, and many able speeches were given, notably J. N. Greenall's (Nottingham), who said the list must be accepted or they would never get another, after which the list was accepted as a first instalment. It isn't a very long list, but many more names will be added before the next addition. Attached to this is the subject of Price Maintenance, as the "In Accord" firms will the more readily be induced to manufacture price maintained goods.

Price maintenance on cartridges is good, but price maintenance on agricultural implements will be even better, and wire netting should come under this heading. The new gross price list now being issued, is probably the first step towards price maintenance.

The objection to municipal trading also seems to come near to price maintenance. Will the "In Accord" firms promise not to supply municipal authorities except through ironmongers? Mortgage debentures is another subject worthy of discussion, as many large firms have lost money through unknown debentures. The I.F.A. visit to parliament is the thin end of the wedge of improvement. The equality of railway rates is also much needed.

The speeches were short and to the point, but it seemed as if every member were throbbing with good wishes, and wished to give his best ideas on how to benefit the trade generally

---

EXECUTIVE MEETING.

Arrangements are practically completed for the holding of a meeting of the Executive of the Ontario Retail Hardware Association, to be held at Toronto on Monday, December 31. A majority of the Executive have agreed to this date, it being an odd day between Sunday and New Year, when holiday fares are available on the railways.

Important matters will come up for action, and arrangements will be made for the Annual Convention, to be held in March next.

MUTUAL INSURANCE

Members of the Ontario Association who have not yet replied to the circular recently sent them regarding mutual insurance, are asked to forward replies promptly to the following questions:

What insurance do you carry on (a) Buildings, $. (b) Stock, $.

What are stock company rates on (a) Buildings, per cent. (b) Stock, per cent.

In the event of our organizing for Mutual Insurance, would you insure to the limit of policy ($3,000)? If not, state what amount you would carry with the Association.

In the event of an arrangement being made on a preferential basis with an existing company, upon the lines outlined at Convention, would you be inclined to place your insurance up to the limit of $10,000 with one company?

Have you any general suggestions to make regarding Fire Insurance?

Address all replies to J. Walton Peart, St. Marys, Ont., Chairman of the Mutual Insurance Committee of the Association, or to the Secretary, 10 Front Street East, Toronto.

Members of the Association will be gratified to learn that a fair percentage of replies have already been sent in, but hardly enough to allow the committee to do any definite work towards preparing a recommendation for action upon at the March Convention.

NEW YORK CONVENTION.

Arrangements are being made for the next Annual Convention of the New York Retail Hardware Dealers' Association to be held at Syracuse, to continue over four days, from February 19, to February 22. The Alhambra Music Hall has been engaged for headquarters, it being proposed to hold in connection with the meeting an exhibition, renting space to all manufacturers and jobbers who desire to make exhibits at that time. The committee who have the exhibition in hand will be announced later. The officers are now arranging the programme. John B. Foley of Syracuse is Secretary.

EXTENDING ASSOCIATION MEMBERSHIP.

Although the hardware merchants are more than busy just now with fall and holiday business, and little word is heard from them regarding Association matters, preparations are being made for active work as soon as the holiday season is over. Several members of the Executive have promised to visit a dozen or more of the dealers in their localities and the membership will have many additions by the date of the March Convention.

BOUGHT OUT OPPOSITION.

During the past few weeks, President A. W. Humphries, Parkhill, has been engaged in taking over the stock of Magladery Bros., Parkhill, one of the three hardware stores in that town. For a long time reports of price cutting have been received from this district, but as a result of the change, it is hoped that this evil will be eliminated, although plenty of opposition will still exist.

Business Management

By HOWARD R. WELLINGTON.

The Ninth in a Series of Articles on a Subject of Interest to Every Retailer.

GETTING AT THE NET PROFIT.

WE have already found from our merchandise account that the gross profit (that is, the profit on the goods sold, not taking into account any expenses) amounts to $4,850 for the period.

In order to show more clearly how the net profits are arrived at, the trading account, as per illustration, includes as well the merchandise account, (already shown separately), and this would be a much simpler method in a small business where only a few accounts are kept, and expenses are not sub-divided into a number of different expense accounts.

We find that the net profits for the period amount to $2,355, which amount is now transferred direct to the proprietor's capital account, which, in addition to the statement of the present condition of the business, will be shown later.

In explanation of the expense account, which amounts in this instance to $2,495, it might be said that a number of sub-divisions for this account could be kept, such as salaries account, rent and taxes account, insurance, light, fuel accounts, and sundry expense account, in order to arrive at the proportion for each expense to be added to the cost price of goods to obtain the selling prices. In a small business, if reasonable care is exercised in distinguishing between expenses and additions to the equipment or store, no difficulty should be experienced in arriving at the correct net profits for a period.

The items of freight and cash discounts should undoubtedly be charged to merchandise account, as these allowances are allowed on, or deducted from, the invoice price of goods.

A great many look upon cash discount as an item to be treated somewhat the same as bank interest, being a rebate for preparing the invoice before the net due date. The method in most favor, however, is to treat this item as an allowance, to be deducted from the actual invoice cost of the goods. It would be interesting and almost invaluable for the retail merchant to have his expense account so divided to enable him to know at the end of a period's business exactly the outlay for, say, salaries, delivery, rent and taxes, insurance, light, etc., in order that he may ascertain the percentage which each one of these items bears to his sales. In this way, if any expense item is out of all proportion to the business done, all his energies may be centred on this particular item, with the object of reducing the amount.

These divisions may easily be obtained by having extra columns in the cash book or marking the various items as soon as posted to the ledger.

Figure 3

A FEW POINTERS.

Clerks who make their employers do half their thinking for them only earn half their money.

It is a good thing for clerks to remember that in window dressing a tasteful display, limited to one line, impresses shoppers with the idea that the store does things in a large way. By continuing this plan, with frequent changes, window gazers soon learn that you carry a large variety in all lines, and consequently feel that they will have no difficulty in finding the paint they want in your store.

WORK FOR ASSOCIATION.

The lack of a strong Master Plumbers' Association in Ontario, is emphasized from time to time, and it is hoped that the prediction made by a prominent Toronto master plumber that Association work had been killed in Toronto for a generation, will not be fulfilled.

The recent outbreak of typhoid fever in New Toronto, is an illustration of one of the dangers of suburban life, and suggests an opportunity for work by an Association. Well water for drinking and waste disposal by the antiquated outhouse system, may be safe enough in farming districts, where there is only one house to every one or two hundred acres, but when these farms are cut up into building lots and houses built on every twenty or thirty foot frontage, the earth cannot be expected to absorb the sewage poison, and both wells and outhouses should be passed up as out-of-date, and as a menace to the health of those who are forced to live in the community as well as to those in the surrounding districts.

The Provincial Board of Health and the Master Plumbers' Association, should co-operate in the work of education, pointing out clearly and firmly the necessity of striking at the cause of the disease epidemics. Good work has been done in the Muskoka summer resorts, and much more can be done in the suburban districts, and rapidly growing towns, if the plumbing fraternity backs up the health officers in their work, and points out the safety, comfort and ultimate cheapness of installing proper sanitary equipment.

Another field for work is in agitating for the establishment of public comfort stations in the large cities. Two stations have been erected in Toronto, and one in Hamilton, but this is only a beginning of what should be done. The hotels and office buildings offer the only place of retreat for men, and the departmental stores and railway stations for women—these being altogether insufficient for the requirements of the large moving population.

While there might be an appearance of self interest in a campaign in favor of more public comfort stations on the part of master plumbers, the work can be done judiciously and the co-operation of the journeymen, labor councils, women's associations, and other organizations enlisted in urging the city councils, boards of health and other public bodies to take action in bringing our Canadian cities up to the standard of the cities in European countries.

While plumbing in America is far in advance of European conveniences, we are far behind in public stations, where anyone, for the payment of a nominal sum or for no charge at all can have the use of lavatories, closets and urinals.

WINNIPEG CIVICS.

Disappointing in the extreme is the failure of the various committees of commercial organizations in Winnipeg, to present to the electors a business men's ticket for the new Board of Control. At an enthusiastic and well attended meeting, held a few weeks ago, it was decided to ask J. H. Ashdown to stand for the Mayoralty, requisitions were circulated and shortly after Mr. Ashdown consented. This was good work, but it is necessary that the Mayor should have the support of a business council and a Board of Control composed of men of more than ordinary intelligence and capacity. To the task of securing suitable candidates for the Board of Control—candidates worthy of the endorsation of the various commercial and professional organizations of the city—the committee bent their energies, but they did not succeed in arriving at any definite tangible results. The men whose candidature was most desired refused to stand and, rather than give four mediocre candidates the endorsation of the business organizations of the city, it was finally decided to make no recommendations for the Board of Control.

It was indeed disappointing that the committee should have failed in this undertaking, for it is as important that Winnipeg should have a good Board of Control, as a good Mayor. There seems now to be little doubt of Mr. Ashdown's election—probably by acclamation—and Winnipeg is therefore assured of a good businesslike head of her civic administration; but it must be disappointing to Mr. Ashdown that he is not to have the support in the Board of Control of at least one or two of the leading business men of the city.

THE METAL SITUATION.

Latest reports from the metal centres this week indicate a continuance of strength amd activity in all branches of the market. Particularly in sheets, great briskness has been evident, and our quotations show many revisions in price.

Ingot tin is stiffening, and some Canadian dealers have marked it up to 47 and even to 48 cents. Others, however, are quoting 46 to 46½ cents, and, for the present, we can only say that, under existing conditions, tin is very cheap at that price. It may be asserted with reasonable confidence, that dealers generally will advance their prices before very long.

Copper is very firm and is maintaining its price well. The same may also be said of antimony. Zinc spelter has advanced 25 cents per hundred pounds, and is held firmly at the new figures.

Pig iron is now being sold only from stock, and, in consequence, metal dealers have advanced their prices from $1 to $2 per ton. Although it is felt that the highest level has now been reached so far as the shortage of iron is concerned, the whole market is so firm that there is no possible chance of a reduction. In the United States, iron cannot be secured before July or August of next year, and owing to the large American consumption, there is still a considerable demand for British pig iron from this side of the Atlantic. Taken in conjunction with the calling off of the Clyde strike, which had curtailed local consumption, this has forced up prices in all English and Scotch irons, from 3 to 5 shillings during the week. All cabled quotations are subject to immediate acceptance, which necessitates selling agents keeping in close touch with their customers' requirements.

This condition also prevails in the tin plate market. Importers who received cables the middle of last week and sent

in orders on that basis at the beginning of this, were unable to secure their acceptance. Jobbers' prices have, accordingly advanced.

Prices on Canada plates have been slightly readjusted this week, quotations showing lower figures than those mentioned in our last report. It must not, however, be inferred from this that the market is weakening; quite the reverse is the case, and the lowering of prices is probably due to the fact that some dealers are realizing on stocks purchased some time ago.

Galvanized sheets have been subject to a general advance. As we go to press, we learn that the sterling price has again gone up, so that present quotations will clearly be maintained for some time.

OBJECT TO TIN PLATE DUTY.

An active campaign is being kept up against the unpopular proposal that a duty of 33 1-3 per cent, be imposed on tin plates to help the mysterious Morrisburg enterprise, known as the Canada Tin Plate and Sheet Steel Company. The Halifax Chronicle, a fortnight ago, published a convincing editorial showing how the proposed duty would injure the dairy and fishing interests of the Maritime Provinces, with no visible compensation to anyone, but the stock manipulators who are working investors for the ready money to float the Morrisburg scheme.

In its editorial the Chronicle enumerated the following list of manufacturers whose business would be adversely affected by the proposed duty: Makers of tin and sheet metal and enameled ware, metal roofing, roofers and allied trades; canners of fruits, vegetables, salmon and lobsters; packers of meats and lard; manufacturers of baking powder, paints, white lead, spices, coffee, condensed milk, chocolate, cocoa, starch, maple and other syrups, cereals, biscuits, tobacco, pails, trunks, oils, blacking, varnishes, polishes, proprietary articles, etc., lanterns, blasting powder, sporting powder, detonators, advertising signs, galvanized ware, dairy utensils, milk cans, kitchen and household utensils.

This was followed by a deputation of prominent farmers appearing at Ottawa and presenting a petition to the Dominion Government bearing over 10,000 signatures of farmers living in all parts of Canada. The leader of the deputation was John W. Hyath of Prince Edward County, Viee-President of the Farmers' Association, he pointed out that the proposed duty would seriously affect the farmer in many respects, as it would increase the price of milk cans and all other tin utensils necessary in dairying. The canning of fruit and vegetables, which is assuming large proportions in Ontario, would also be heavily handicapped by the imposition of the proposed tax. One canning factory alone in the County of Prince Edward, used 3,000,000 cans per year. Similarly, he held the duty would affect all the makers of maple sugar. One maple sugar factory in Prince Edward County alone, used 2,000 buckets annually, while several others ran from 500 to 1,000. Besides, thousands of cans were required as containers for syrup.

While it was not to be expected that Finance Minister Fielding would lay the Government's plans before the deputation in advance of the opening of Parliament, it is reasonably certain that the almost universal protest against the tin plate duty will have its effect, and no such unpopular action taken as to establish such a high duty in the face of the opposition of manufacturers, merchants, farmers and workingmen.

WELL DIRECTED CRITICISM.

Over in the United States the retail hardware trade is hit severely by the competition of catalogue houses which make all kinds of claims for the goods they sell, get cash in advance and then are too far away as a rule to make amends for the deficiencies of the goods when received by the customer. The country newspapers are taking up the matter in defense of their local advertisers and some exceptionally good "knocks" are being administered to the mail order concerns, one of the best we have seen being the following from a recent issue of the News, published at Brighton, Ill.:

"When the catalogue comes from a mail order house, draw an easy chair to the table where the light will shine full upon the page, and put on your glasses that no bargain may escape your eye. What a wonderful book it is, to be sure? Wonderful for what it does not contain as well as what it does. You will miss some things you would be glad to see. Where is their offer to pay cash or exchange goods for your wheat, oats, corn, beans, butter, eggs and hay? How much do they pay for cattle, sheep and hogs, f.o.b. at your depot? How much tax will they pay to support your schools and educate your children—for improving roads and bridges; the support of the poor of the county, for the expense of running the business of the township, county and state? On what page is their offer to contribute money to the church? What line of credit will they extend to you when your crops are poor and money gone—when through illness or misfortune, you are not able to send 'cash with order' for your groceries, clothing, farm tools and crockery? Also stoves and ranges?"

ENGLISH VIEW OF TIN PLATE.

A recent dispatch from England, quotes from a long editorial in the Liverpool Daily Post-Mercury, on Canadian affairs. Special mention is made of the proposal to put a duty of 33 1-3 per cent on tin plates, black sheets, Canada plates and sheet steel.

It is remarkable how many have taken it for granted that the Canada Tin Plate and Sheet Steel Co., had the backing of the Canadian Manufacturers' Association in their request for a duty on sheet metals. As has been pointed out before, however, such is not the case, not only because the duty would raise the cost of production in many already established industries, but also because there are very serious doubts concerning the good faith of the company's promoters.

The editorial in the Post-Mercury, reads in part, as follows: "This is the way," says the editorial, "Canadian manufacturers respond to Mr. Chamberlain's suggestion, that they be content with the industries they have and leave others to this country. Under a protective tariff they are just as likely to do that, as we are to tax our food for the benefit of the Canadian Manufacturers' Association. So long as non-manufacturing Canadians will submit to be taxed for the benefit of the manufacturers, the high tariff system will continue, but no longer."

LABEL YOUR PARCELS.

Our attention has been directed recently to the carelessness of retailers in sending back goods to the jobbers. In many cases parcels come in without any indication whatever about them as to who has sent them. Of course, this is the retailer's loss. How can the jobber give credit, when he does not know to whom to give it? It is not to be expected that he will go to the expense of finding out the party sending back the goods, if he has a better way of spending his time and money.

Therefore, dealers are advised for their own good to label their parcels carefully, being always sure to state by whom they are sent. It is also as well to send a letter at the same time, giving particulars about the forwarding of the parcel and a list of its contents.

HARDWARE TRADE GOSSIP

Ontario.

A. Bevins, hardware merchant, Newmarket, called on the wholesale hardware trade in Toronto last week.

J. McMillan, a Guelph hardware merchant, was in Toronto this week, calling on the wholesale hardware trade.

Geo. McGee, hardware merchant, Fenelon Falls, called on the wholesale hardware trade in Toronto this week.

John Craig, hardware merchant, Sturgeon Falls, Ont., called on the wholesale hardware trade in Toronto this week.

Jack Wallace of Silvester Bros., hardware merchants of Stouffville, has returned from a hunting trip in Northern Ontario.

H. A. Bradley, hardware merchant, Bellewood, Ont., was a visitor in Toronto last week, calling on the wholesale hardware trade.

J. B. Reade, of H. S. Howland Sons & Company, Toronto, was absent from the office several days this week, owing to illness.

R. J. Cluff, of Cluff Bros., Toronto, and Louis Payette, general manager of Warden King & Son, Montreal, have returned from a business trip to New York, Boston, and other American cities.

M. F. Irwin, for the past six years sales manager of the McClary Manufacturing Company, London, was a caller at the Toronto office of Hardware and Metal last Friday, on his way to St. John, his new headquarters.

J. H. Steicht, general manager of the H. R. Ives Company, Montreal, spent a few days in Toronto during the week conferring with O. M. Hodson, their Toronto representative, regarding the extension of their business in Ontario.

Wheatley Bros., Sheffield, England, manufacturers of Wheatsheaf Brand cutlery, have appointed Messrs. Richardson and Sneyd, manufacturers agents, Toronto, their Canadian representatives. Travelers for this agency are now touring Ontario with a splendid line of samples of this excellent brand of cutlery.

Miss Harriet Johnston, the Toronto lady school teacher, who headed the poll and defeated her nearest male competitor by hundreds of votes in the recent election for the Advisory Council of the Ontario Department of Education, is a sister of James Johnston, sales manager of Rice Lewis and Son's retail store, Toronto, and her election was largely due to the organization work and publicity campaign engineered by "Jimmy."

J. H. Worsell & Sons, Goderich, have taken over the T. H. Elliott hardware business at Bayfield, and will conduct it as a branch. John Worsell, the youngest member of the firm, will be the resident manager, and J. H. Worsell, will give the branch his personal attention a couple of days each week. As Worsell & Sons have been doing a good share of the business down that way, especially in the roofing and plumbing line, the move was a very natural one. They have been successful in securing a good part of the work in Goderich this fall, and have put in a large number of "Huron" ranges. Wholesalers would do well to send catalogues, etc., to the new Bayfield branch.

Western Canada.

E. A .Walker, of the firm of E. A. Walker & Son, Grenfell, Sask., died recently from heart failure.

The additions to the warehouse of the J. H. Ashdown Hardware Company in Winnipeg, are now almost completed.

C. D. Waldon, sales manager of the Pease-Waldon Company, Winnipeg, has been confined to his room for the last three weeks.

H. B. Hughes has recently opened an up-to-date hardware store in Lavoy, Alta. Mr. Hughes came west some little time ago from Perth, Ont.

Geo. D. Wood, of Geo. D. Wood & Company, Winnipeg, is still unable to return to his desk. Mr. Wood's health has been far from satisfactory during the last year.

Work is being pushed ahead rapidly on the new warehouse of the Marshall Wells Company, Winnipeg. The company hope to transfer their stock about the first of the year.

William M. Gordon of Watt & Gordon, Winnipeg, is a candidate for School Trustee in Ward six. He is being opposed by E. B. Reynolds, circulation manager of the Manitoba Free Press.

Frank R. Oliver has left Sasktoon to return to Smith's Falls, where he assumes the management of a manufacturing business. Mr. Oliver was very popular in Saskatoon, where his energetic work as President of the Board of Trade, did much to advertise the town. Before leaving he was presented with a gold watch and chain.

Quebec.

L. A. Nobert, hardware dealer, of Louisville, was a visitor in Montreal this week.

C. C. Starr, of the Starr Manufacturing Co., Halifax, visited Montreal on Saturday.

H. Sibley, of L'Annonciation, called on his trade connections in Montreal a few days ago.

L. Gagnon, of Lacadie, was among the outside hardware buyers to visit Montreal this week.

E. Benoit, of St. Cesaire, was noticed in Montreal a few days ago.

H. G. Eadie, manufacturers' agent, Montreal, visited Toronto and Hamilton last week.

H. Alguire, hardware merchant, Masville, Ont., was in Montreal last week making purchases.

Mr. Smith, of Smith, Hemenway, New York, called on the Montreal wholesale trade a few days ago.

P. Phoenix, hardware dealer, of Granby, called on some of the Montreal jobbers a couple of days ago.

J. Watterson, of J. Watterson & Co., importers, Montreal, is visiting Western Ontario points on business.

A. Laberge, general merchant, of St. Michel, was in Montreal to purchase Christmas goods during the week.

Mr. Nadeau, of the Port Daniel Lumber Company, Port Daniel Centre, was purchasing supplies in metropolis recently.

G. K. Simonds, of the Simonds Saw Company's head office, Fitchburg, Mass., visited the firm's Montreal plant last Friday.

A. Albin, general merchant of Glen Robertson, was in Montreal during the week, purchasing for his hardware department.

O. C. Selby, general merchant, of Dunham, was noticed among the out-of-town hardware buyers in Montreal this week.

Gustof Gylling, of McCaskill, Dougall & Co., paint and varnish manufacturers, Montreal, has been appointed Consul for Sweden, in British North America.

W. A. Cameron and W. H. Warminton, of Caverhill, Learmont & Co.'s western traveling staff, are visiting at the firm's Montreal warehouse this week.

Frank Stafford, of Frank Stafford & Co., general merchants, Barry's Bay, Ont., paid a visit to Montreal hardware jobbers this week, stopping off on his return from Quebec.

W. H. Newton, Geo. R. Nimmo, Albert Leblanc and W. D. Hamilton, of the Canada Paint Company's traveling staff, are at Montreal headquarters for a few days this week going over their samples and comparing notes.

PLUMBING TRADE IN B.C.

C. A. Godson, president of the Robertson-Godson Co., Vancouver, is in Toronto on a business trip to New York, Montreal and Toronto, visiting the James Robertson Company's and other plumbing supply houses for the latest information in his line. Mr. Godson reports a flourishing trade in plumbing and heating in British Columbia, the present being the largest in history. Mr. Godson is a past grand master of Vancouver's 100,000 club. "The more people the more plumbing supplies," is his logical way of putting it.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Green Wire Cloth—Now $1.62½c., in 100-ft. rolls.
Shellac—Slightly reduced.
Tin—Much firmer.
Zinc Spelter—Advanced 25 cents per cwt.
Pig Iron—Prices up all around.
Galvanized Iron—A general advance.
Canada Plates—Prices readjusted.
Tin Plates—Quotations higher.
Black Sheets—Higher.
Terne Plates—Now $7.10.
Cold Rolled Shafting—Advances predicted.
Old Material—Some higher prices.

TORONTO.

Caulking Lead—Advanced half cent.
Solder—Up one cent.
Sinks and Lavatories—Scarce—may advance.
Canada Plates—Up 5 to 10 cents.
Black and Galvanized Sheets—General 10c. advance.
Charcoal and Choke Tin Plates — Advanced 25 cents.
Zinc and Spelter—Advanced.
Green Wire Cloth — $1.62½, 100-ft. roll; $1.67½, 50-ft. rolls
Galvanized Iron Ware — Now 40, 10 and 5 per cent. discount.
Carpet Felt—Advanced 25c. cwt.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Nov. 23, 1906.

An exceedingly active trade has been going on this week and all the large jobbing houses are very busy with orders. The trouble with manufacturers in getting deliveries, has by no means abated, and, in some instances the shortage is becoming more and more serious.

In wire nails, the situation is not so tense as it has been at times, during the past few weeks. In nearly all sizes it is now possible to secure reasonably prompt shipments, and, although the market continues firm, the shortage is not very noticeable.

Prices on green wire cloth have just been issued, and show an advance over last year's quotations. Local jobbers have already begun booking orders on this line for delivery next spring. The price now being asked for 50 ft. rolls, is $1.67½ per hundred square feet, while 100 ft. rolls are 5 cents less.

AXES. — We quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES—We are still quoting as follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—Sales continue to be large, with prices as follows: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES — We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Merchants who did not stock too heavily for last year's mild winter, are now calling for shipments, in good quantities. We quote: Back Straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—The firmness in all metals is responsible for the steady way in which quotations on these articles are being held. We continue to give the following discounts: Best iron rivets, section, carriage, and wagon box black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half pound boxes.

HAY WIRE—We still quote: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS—Our discounts remain as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.. Felisterhead, brass, 25 per cent.

BOLTS AND NUTS. — Conditions are unchanged. Discounts still remain as follows: Carriage bolts, 3-8 and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—The customary business is being done. Discounts are: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—Relief from the shortage recently reported, has been secured, but the price continues firm at $2.20 per keg base, f.o.b. Montreal.

CUT NAILS—We still quote: $2.20 per keg base, f.o.b. Montreal.

HORSESHOES.—The quotations are: P. B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Large quantities are being required for construction in all parts of the country. A feature of this season's trade is that, although temporary shanties do not seem to be so numerous, the demand for permanent buildings is very large.

CEMENT AND FIREBRICK—Quotations remain as follows: "Lehigh" Portland in wood, $2.54, in cotton sacks, $2.39; in paper sacks, $2.31. Lafarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—The demand continues good, and prices are firm as follows: 5-16 in., $4.30; 3-8 inch $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT.—Prices continue the same as at our last report. We quote: Shot, packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION — Quotations remain: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

GREEN WIRE CLOTH—The new prices just issued this week, show a considerable advance over the figures which ruled last season. We now quote: In 100 ft. rolls, $1.62½ per hundred square feet, in 50 ft. rolls, $1.67½ per hundred square feet.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Nov 23, 1906.

Very few advances are being quoted this week, the principal one being the large advance of green wire cloth over last season's price, which was $1.45 all round, advancing to $1.67½ for 50 rolls and $1.62½ for 100 feet. The

reason given for the advance is the increased cost of materials such as lead and wire, largely used in manufacturing green wire cloth. There has also been an advance of 25c per cwt. on carpet felt, it being now quoted at $2.75 per cwt.

Smaller discounts are reported on retinned stamped ware. Nails still remain firm at $2.10 base, but prompt deliveries cannot be procured at any price, the wholesale hardware merchants being unable to fill orders, as the manufacturers' are shipping direct to the Western trade, so as to have orders filled before the close of navigation. There will be plenty of nails in a short time.

Orders for skates, etc., are still coming in, as merchants in Northern Ontario, who have stocks left over, are sorting and sending large orders. As predicted, there will be a large demand this season. Most book orders have been shipped, and preparations are being made for telegraph and phone orders during next month, as there will, no doubt, be a large amount of sorting done before Christmas.

Iron beds are firm at the 5 per cent. advance quoted last week, brass beds not having yet advanced.

AXES AND HANDLES.—Still going very brisk, with large orders from Northern Ontario.

CUTLERY AND SILVERWARE. — Cutlery in all forms are still selling well, particularly case goods, as sorting orders have started coming in.

SPORTING GOODS.—Skates, hockey sticks, etc., book orders are mostly shipped, but as in cutlery, sorting orders are coming in large numbers, principally from the North.

CHAIN—We continue to quote : 1 inch, $6.60 ; 5-6 inch, $4.55 ; 3-8 inch, $3.95 ; 7-16 inch, $3.80 ; 1-2 inch, $3.65 ; 9-16 inch, $3.55 ; 5-8 inch, $3.45 ; 3-4 inch, $3.35.

RIVETS AND BURRS.—Copper rivets remain as quoted last week, 27½ per cent. and copper burrs, 15 per cent.

SCREWS.—Coach cone point remain at the 5 per cent. raise as quoted last week.

BOLTS AND NUTS.—Well stocked with prices as before.

TOOLS.—Trade is slack on account of weather conditions.

SHOVELS.—A great demand exists in snow shovels.

LANTERNS—Cold blast are still selling at $6.50 per doz., large shipments still the order of the day.

EXTENSION AND STEP LADDERS —Prices continue as follows : Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote : 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING — Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31 ; gauge 11, $2.37 ; gauge 12, $2.45 per 100 lbs.

WIRE NAILS.—Market still very firm, as quoted, $2.10 base with no rebate .

CUT NAILS—We quote : $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows : P.B. base, $3.65 ; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80 ; No. 1 and smaller, $4.05 ; snow, No. 2 and larger, $4.05 ; No. 1 and smaller, $4.30 ; light steel shoes, No. 2 and larger, $4.15 ; No. 1 and smaller, $4.40 ; featherweight, all sizes, 0 to 4, $5.75 ; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra ; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS.—The demand has not slackened any, and large shipments are made daily to northern districts.

BUILDING PAPER.—Shipments are still being made and orders are still being booked for spring shipments.

CEMENT—We quote : For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30 ; American low-grade, $23 to $25 ; high-grade, $27.50 to $35.

HIDES, WOOL AND FURS.—Wool is steadier with a hardening tendency. Tallow is very scarce here, and consequently high, although offerings are freer in the States. Hides are steady with easier tendency in Europe and the States; unchanged here.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 23, 1906.

On the whole, the metal market again shows decided strength, and several advances in quotations are recorded. With the exception of ingot zinc, these are confined to the sheet metals, in some of which, moreover, dealers have come down slightly, in order to meet competing prices. This is in spite of a rising market at the producing centres, and it is thought that the figures quoted last week will soon be resumed.

Copper remains very firm, and supplies are said to be short. Prices, however, have not advanced, beyond those mentioned in our last report. The same may be said of ingot tin. Some fluctuations have taken place, but the tone of the market remains, so far as consumers are concerned, unaltered. Some of the Montreal metal jobbers are asking as high as 44 cents, but a half cent and even a full cent less than that, can be readily obtained in favorable quantities.

Pig lead has maintained the remarkable price of from $5.40 to $5.50 per hundred pounds. The market seems to have lost none of its vigor, and the general impression here, is that even higher prices may be expected.

Galvanized iron has been advanced about 10 cents all round. As consumption at the present time, is more than keeping pace with production, it may be safely assumed that the new quotations will hold for a considerable period. Black sheets have also gone up.

To meet competition, rather than because the market warrants it, the leading metal merchants have slightly lowered prices on Canada plates (ordinary and full polished), and terne plates.

COPPER.—Steadiness still pervades the market and we continue to quote: Ingot copper 24c. to 24 1-2c.; sheet copper, base sizes, 31c.

INGOT TIN.—Although some dealers are quoting an advance, the generally accepted price is 46c. to 46 1-2c. per lb.

ZINC SPELTER. — The market has stiffened, and prices are advanced 25 cents per cwt. We quote: $7.25 to $7.50 per hundred pounds.

PIG LEAD.—The high market is being maintained, and our price remains, $5.40 to $5.50 per hundred pounds.

ANTIMONY.—There is no change to report, and we are still quoting 27 1-2c. to 28c. per pound.

PIG IRON.—The situation is about the same as last week. Quotations are: Londonderry, $23; Carron, No. 1,

$24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—We still quote: British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL.—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.27 1-2; ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING. — Our prices are: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON. — A general advance was made his week, and we are now quoting prices as follows: Quuen's Head, 28 gauge, $4.60 to $4.85; 26 gauge, $4.45; 22 to 24 gauge, $3.90; 16 to 20 gauge, $3.75; Apollo, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 and 20 gauge, $3.60; Comet, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30 to $4.45; 22 and 24, gauge, $3.75 to $4.00; $16 to 20 gauge, $3.60 to $3.85; Fleur-de-Lis, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 to 20 gauge, $3.60; Gorbals "Best Best," 28 gauge, $4.45; Colborne Crown, 28 gauge, $4.45; 26 gauge, $4.30; 24 gauge, $3.75. In less than case lots, 25c extra.

CANADA PLATES. — A re-adjustment has taken place, and we are now quoting: 52's, $2.70; 60's, $2.75; 75's, $2.85; full polished, $3.85; galvanized 52's, $4.35; 60's, $4.60.

BLACK SHEETS.—Prices have again been slightly advanced. The quotations now are: 28 gauge, $2.60; 26 gauge, $2.25; 22 and 24 gauge, $2.45; 20 gauge, $2.40; 18 and 18 gauge, $2.40; 8, 10, 12 and 14 gauge, $2.60.

TIN PLATES.—Prices have been advancing so rapidly as to seriously inconvenience importing agents, in taking orders. Jobbers' prices have also gone up, and we are now quoting: Cokes, base size, IC. 14 x 20, $4.25 to $4.35; charcoal, base size, I.C., 14 x 20, $4.40 to $4.50.

TERNE PLATES.—Quotations have been modified to $7.10.

STEEL SHEETS.—We still quote: 10 gauge, $2.60; 12, 18 and 20 gauge, $2.65; 22 and 24 gauge, $2.70; 26 gauge, $2.85; 28 gauge ,$3.00 per hundred pounds.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6½c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

BAR IRON.—The price remains $2.15 base, f.o.b. Montreal.

OLD MATERIAL.—Copper and brass scrap are in good demand, with local stocks small. Everything is on a little higher scale this week. The rubber reclaimers, we understand, have been trying to make some arrangement to fix the price of old rubber, but, so far, have not accomplished any movement of that kind. While this was under way, prices were kept down a little, but now that it has ended, the market is strengthening, and it looks like higher prices, as stocks are low. We quote: Light copper, 17c.; heavy red brass, 16c., yellow brass, 12 1-2c.; light brass, 9c.; lead, 4c; zinc, 4c; machinery cas scrap, $16.00; wrought scrap, $15.00; stove plae scrap, $12.00; mixed rags, $1.00 to $1.20 per 100 lbs.; old rubbers, 8 1-2c. to 8 3-4c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Nov. 23, 1906.

The close of navigation finds the metal market almost bare of stock, and with a keen demand for goods at the high prices prevailing. The same old congestion is reported at the Montreal wharves, and buyers, who are figuring on early deliveries, will have to make allowances for the delays incidental to the crush in the docks and the shortage of cars on the railways.

Several advances have been made this week, practically every metal being included, all being very firm and deliveries hard to get owing to the low stocks. The heavy demand indicates, also, that the winter stocks to arrive during the coming month will not be large enough to supply all the demands and shortages will result before the spring.

Winter rates now go into force and pig iron quotations have been advanced in consequence. Black sheets, Canada plates and galvanized sheets, all show advances of from ten to twenty cents, while Raven and Vulture grades of charcoal tin plates and Bessemer steel bright cokes are also subject to higher quotations. All of these lines are in brisk demand, and prices will probably hold firm at the advance.

Stocks of sheet copper are at the vanishing point and all quotations are very firm. Ingot tin is also strong and lead is still quoted at last week's figures, which are much lower than in outside markets. Zinc spelter and sheet zinc have also advanced.

Old material quotations remain as before, but the stiffness in the copper and lead markets indicates higher prices. Users of cast scrap contend that higher prices cannot be looked for on this line as middlemen have large stocks in their yards which have been accumulating for some time, owing to U. S. buyers having large unused stocks.

PIG IRON.—Winter rates, making a $1.00 advance, are now in force, and no more iron is available by way of Montreal. Advances are made, therefore, on the English irons. We quote: Randor at furnace $33; Hamilton and Midland off the market but quoted nominally at $23 for No. 1 at furnace. Londonderry, f.o.b. Toronto, No. 1. $24; Middlesborough, $23.50; Summerlee, $25.

BAR IRON. — We still quote $2.25 base, f.o.b. Toronto, with discount of 2 per cent. There is no sign of prices easing off after New Years, as large orders are being peddled around with mill men so busy that buyers must take what terms as to delivery they can get.

INGOT TIN. — Market is active in small lots, with prices the same.

TIN PLATES.—Advances of 25 cents per box on 14 x 20 base, in bright cokes and raven and vulture grades of charcoal. Demand is keen and all prices firm.

SHEETS AND PLATES. — As predicted, black and galvanized sheets and Canada plates, all show general advances of from ten to twenty cents.

BRASS.—Still difficult to obtain deliveries. We quote: Sheets, 23c. to 24c. per lb.

COPPER.—Stocks of the best copper are very low, and prices could hardly be firmer. We continue to quote Ingot copper, $24 per 100 lbs., and sheet copper $30 per 100 lbs.

LEAD.—The market is firm and prices unchanged. We quote: $5.25 for imported pig and $5.75 for bar lead.

ZINC SPELTER.—Local prices are very firm with buying brisk. We quote: 7 1-2c. per lb. for foreign and 6 1-2c. per lb. for domestic. Sheet zinc is quoted at 8 1-4c. in casks, and 8 1-2c. in part casks.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 316 inch, $2.60; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY.—Outside markets are higher, but we still quote 27c. to 28c.

OLD MATERIAL — Dealers' buying prices show no change this week. We quote: Heavy copper and wire, 17 1-2c. per lb.; light copper 15c. per lb.; heavy red brass, 15c. per lb.; heavy

yellow brass, 13 1-2c. per lb.; light brass, 9c. per lb.; tea lead, $3.50, per 100 lbs.; heavy lead, $3.75 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $12; No. 2 wrought, $6; machinery cast scrap, $15; stove plate, $11; malleable and steel, $6; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

United States Metal Markets

From the Iron Age, Nov. 22, 1906.

There are cross currents in the iron Ore market. The leading sellers of Lake Ores have booked orders for the full output of their standard grades for the season of 1907-1908, and in the case of certain Bessemer grades some premiums over the prices recently established have been asked and paid.

On the other hand, a considerable number of Eastern furnaces and import- and pig iron producing interests of the Central West have declined to buy as far ahead as the early summer of 1908, on the ground that the prices demanded are so high that they cannot take the risk of any serious decline in pig iron, which might develop between the summer of 1907 and beginning of new ore shipments in 1908.

The Eastern pig iron market continues quite active, the sales including a number of good lots of grey forge in central and eastern Pennsylvania and one lot of 10,000 tons of basic pig at $23, delivered.

The markets for domestic and foreign foundry iron are stiffened; both are reaching forward more as to deliveries, and the spot demand remains keen in spite of the very high prices. Scotch and Middlesborough irons are both higher.

There is some inquiry for Southern pig iron for deliveries during the third quarter, but it is not taken seriously by sellers.

Steel continues very scarce and is stiffening in price. Some good orders have been entered for steel rails, including 25,000 tons for the Atlantic Coast Line, 18,000 tons for the Gainesville & Gulf, and 5,000 tons additional for the Texas & Pacific Road. It is noted that an unusual number of roads are adding to their earlier requirements for 1907.

The fact that Chicago fabricators of Structural Material have placed contracts for about 25,000 tons of shapes for delivery during the first half of 1907 at current prices is interpreted as indicating that an advance may be in sight. Generally speaking, however, the structural mills are not crowded with work. During the past week contracts for buildings and bridges were given out in the Chicago district which aggregate 10,000 tons. The constituent companies of the Steel Corporation have placed orders for 14,000 tons of fabricated work for new construction.

The advance of $2 per ton on plates by Eastern mills foreshadows an early advance in the official price. The Eastern mills are facing rising costs, and foresee full employment for their plants well into the spring.

There has been a heavy business in steel bars during the past week, distributers, railroads and manufacturers of shaped bars for reinforced concrete being the purchasers, in some instances in anticipation of the advance of $2 per ton which was decreed on the 15th. Merchant steel values have also been readjusted.

The pipe contract for the line from the Indian Territory oil fields to the Gulf, taken by the National Tube Company, involves upward of 30,000 tons.

From the Iron Trade Review, Cleveland, Nov. 22, 1906.

Following the establishment of pig iron prices on their present high level, a general adjustment of finished material prices in conformity with the advanced cost of crude materials has set in. The past week has seen an advance of $2 per ton in steel bars, the first change by the leading interest for almost two years, although independent interests have obtained premiums for some time. The leading producer of iron bars has again advanced his quotation $2 per ton, thus maintaining the spread between iron and steel bars. A large independent producer has just announced a second advance of $2 per ton on plates, and the leading interest is expected to follow shortly. A sheet advance is also rumored, in spite of the fact that prices were only recently increased. Certain billet producers have added as much as $3 per ton to the price of their output. All these advances are but natural results of the increased production cost, and will doubtless be accepted without hesitancy.

There is considerable buying of pig iron for the third quarter and second half of the year. One valley furnace interest reports sales of 100,000 tons of basic and Bessemer, and practically all foundry producers are selling in a scattered way. With prices at their present level, however, there is considerable hesitancy on the part of consumers to place orders ahead of July 1, and contracting generally is being deferred.

Foreign iron continues to arrive in small lots and is affording some relief to hard pressed consumers. It is selling at from $21.50 to $24.00 per ton, tidewater, and it is estimated that 100,000 tons will be distributed before January. Basic and Bessemer irons are also likely to be imported.

The most troublesome feature of the market, aside from the iron situation, is the acute shortage of transportation facilities. To this cause must be traced most instances of the shutting down of manufacturing plants as not only iron but coal and coke deliveries are being delayed as well.

London, Eng., Metal Markets

From Metal Market Report, Nov. 22, 1906

PIG IRON.—Cleveland warrants are quoted at 59s. 6d. and Glasgow Standard warrants at 59s., making prices as compared with last week, 2s. 4 1-2d. higher on Cleveland warrants, and 2s. 5d. higher on Glasgow Standard warrants.

TIN.—Spot tin opened weak at £196 0s. 0d., futures at £197 5s. 0d., and after sales of 120 tons of spot and 350 tons of futures, closed weak at £195 5s. 0d. for spot, £196 15s. 0d. for futures, making price compared with last week 10s. higher on spot, and 10s. higher on futures.

COPPER.—Spot copper opened easy at £101 0s. 0d., futures £102 2s. 6d., and after sales of 100 tons of spot and 600 tons of futures, closed easy at £100 12s. 6d. for spot, and £102 0s. 0d. for futures, making price as compared with last week £1 2s. 6d. higher on spot, and £1 2s. 6d. higher on futures.

LEAD.—The market closed at £19 1s. 3d., making price as compared with last week, 6s. 3d., lower.

SPELTER. — The market closed at £27 15s. 0d., making price as compared with last week unchanged.

N.B. Hardware Trade News

St. John, N.B., Nov. 19, 1906.

One striking thing that may quite fittingly be noted in a letter dealing with the hardware world of the provinces is the excellent state of affairs as regards collections. Rarely, if ever, in the past few years have collections been so satisfactory as during the past couple of months. Some financiers are reported to have said that the last couple of months have been the best for collections that they have known. Then, too, the hardware man should feel satisfied because of the rush of orders that is now so noticeable. The late fall and early winter trade is now on in earnest. Clerks are kept busy. The sales of seasonable lines of goods are proving heavy. It may be noticed further, in passing, that a St. John maker of metal goods recently declared that could he secure the needed number of skilled workmen, he could easily find a sufficiency of work to keep them busy both night and day. That surely is a good sign, but it is regrettable that the workmen are not available. Here again we have an indication of the need of the development of skilled laborers, the training of young men in the way of trades.

Another Upper Canadian concern has

found it advisable to open a branch in St. John. This is the Canadian Rubber Company of Montreal. The company has secured a stand on Dock Street, and is now ready to handle its New Brunswick business from this city. Mr. J. J. Arnold of Toronto, is in charge of the branch. Mr. E. Roy Penwick, continues as the company's travelling representative. The company already has a branch in Halifax.

All metals are continuing to hold their high level. High water marks are being passed with a wonderful regularity. Ingot tin has reached a record position. Moreover, as regards this article, there are signs of further advances. Tin plates likewise are far higher than usual. The demand for them at this season is high, naturally for the lobster and other canners are making preparations for the next season. Glass is quoted firm. At the same time it is noticeable that the condition of the local glass market is somewhat more satisfactory than that prevailing last year. At the present the stock is a trifle better than the stock of the preceding season. Linseed oil is advancing. White lead and metals generally, are maintaining their firmness of tone.

The recent death of James W. King, under such sad circumstances, is still talked of. Mr. King was well-known as a traveler for the Thorne Company, and his death by suffocation trying to save property in his brother's burning building, was not only tragic, but a source of genuine regret to his scores of friends.

N.S. Hardware Trade News

Halifax, N.S., Nov. 21.

Jobbers report the hardware trade booming in this Province at the present time, and with every prospect for a continuance in the future. Prices in all lines are exceptionally firm. Iron pipe has advanced about ten per cent. on all sizes. The supply of pipe is very short on this market, the makers being slow in their deliveries. This complaint is general among the trade. The first shipment of iron pipe received here this month arrived from Montreal on Saturday. White lead has advanced here, the quotations being as follows:—Brandram Bros. Genuine, $8.25; No. 1 $7.00; No. 2, $6.25; Anchor Pure, $7.00; No. 1, $6.25; No. 2, $5.75. Turpentine has also advanced five cents, and is now quoted at $1.00 per gallon by the cask.

There is a big demand for sheet iron on this market, and heavy sales are reported. Advances received here state that the cost of sheet iron has been advanced, but thus far the jobbers here have not made any increase. It is quoted at $2.40 for ordinary gauges, 21 to 24. All metals are active and the prices are very unsteady. Sheet copper and bar copper are in good demand. The latter is quoted at from 28 to 30 cents. Oils are unchanged. Pure Manila rope is quoted at 15½c and British at 12c. Nails are steady and bar iron is in good demand, also axes and saws. Several of the firms here handle weather strips, rubber and wood and both are selling freely. There is a boom on in gold mining in Nova Scotia at the present time, particularly in Halifax County, and the outlook is better than it has been for some years. Several gold mining properties in this vicinity are now the subject of inquiries by parties outside of the Province, and some big development is looked for. W. L. Temple, who has been in the Yukon for some years, has returned here and is going to Waverley, N.S., he having succeeded in interesting some Western capitalists in property which he owns there, and which will be operated.

J. B. Woodworth, who was formerly connected with gold mining in Nova Scotia, and now engaged in silver mining in Cobalt, Ont., being connected with a large concern there, is visiting Halifax. It is understood that Mr. Woodworth and some Upper Province capitalists contemplate re-opening the old Hardman-Taylor property at Oldham.

There is also a report that a Montreal firm contemplates taking mining properties in the Montague district under control for Canadian and American capitalists and operating it.

L. Lussier, of St. Jean Baptiste, was in Montreal this week.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Nov. 23, 1906.)

Room 511, Union Bank Building, Office of HARDWARE AND METAL, Winnipeg, Man.

Price changes:—Revised prices "Queen's Head" galvanized iron. Common sad irons advanced ¼c per lb.; bar iron advanced 10c per cwt.; wire nails advanced 10c per cwt.; cut nails advanced 10c per cwt.

Iron pipe, revised prices; advance in most sizes.

Galvanized ware, general advance.

A number of changes noted above, some trifling and others of considerable importance, occupy the attention of the trade this week. Hockey sticks, skates and other lines of winter sporting goods are beginning to move very rapidly now that winter has set in.

LANTERNS. — Quotations are as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—An advance of 10c per cwt., which goes into effect this week makes the price now $2.70 per keg.

CUT NAILS—These have also been advanced 10c per cwt., making the price now $2.80 per keg.

PRESSED SPIKES — Prices are quoted as follows since the recent advance: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Discounts are quoted as follows since the recent advance in the price of copper rivets: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ¼, $7.20; ⅜, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—Business is particularly active at present in axes and handles. Prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

GALVANIZED WARE—There has been a general advance in galvanized goods, the discount on pails being now 37½ per cent. and on the other galvanized ware 30 per cent.

CORDAGE—Manila rope is steady at the recent advance. We are still quoting as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Quotations are as follows: Cartridges, Dominion R.F. 50 and 5; Dominion, C.F., 33½ C.F., pistol, p.c.; C.F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Bar iron has been again advanced 10c per cwt. quotations now are:—Bar iron basis, $2.70. Sweedish iron basis, $4.95; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—Quoted a $5.85 per cwt.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

IRON PIPE AND FITTINGS— Revised prices are as follows:—Black pipe, ¼ inch, $2.65; ⅜, $2.80; ½, $3.50; ¾, $4.40; 1, $6.35; 1¼, $8.65; 1½, $10.40; 2, 13.85; 2½, $19.00; 3, $25.00. Galvanized iron pipe, ⅜ inch. $3.75; ½, $4.35; ¾, $5.65; 1, $8.10; 1¼, $11.00; 1½, $13.25; 2, inch, $17.65. Nipples, discounts 70 and 10 per cent.; Unions, couplings, bushings and plugs, 60 per cent.

LEAD PIPE—The price, $7.80, is firmly maintained in view of the advancing lead market.

We have been fortunate enough to secure the Western Agency for **BERRY BROS.** celebrated **VARNISHES** and are carrying a full stock from which all orders will be shipped promptly.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the **Western Trade** to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a West ern stove factory for Western people only.

Wire Glass

This is the season of the year when buildings are being completed—Wire Glass will be needed for Skylights, Metal Frames, etc.

Wire Glass is now almost universally used instead of Rough Rolled Plate on account of the ultimate economy. It may crack but the wire mesh keeps it intact and just as serviceable as ever.

Wire Glass is practially indestructible.

Special prices in case lots—write for them. Samples furnished on request. You may have an enquiry any day, better be prepared.

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

Tortoise Stoves.

The James Smart Manufacturing Company, Brockville, are sending out circulars illustrating Tortoise heating and cooking stoves and Canadian air warmers. Tortoise stoves are very favorably known throughout the country, as the special features are very prominent, it is a low sitting stove, with a separate base in the shape of tray, which has small projections as legs resting on the floor.

The stove is lined with best quality brick lining, has cast iron top and bottom, with planished sheet steel body and large turl door, with mica frame pot hole, with reducing ring cover. Any hardware merchant not receiving one of the circulars should write for one as the stove makes an ideal heater for house or office.

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1355. Saws, etc.—A Yorkshire firm manufacturing all kinds of saws, edge tools, joiners' and mouders' tools, scythes, sheep shears and skates, desires to correspond with Canadian wholesale dealers.

1356. Tools.—A Yorkshire firm manufacturing all kinds of hand and machine tools for engineers, boiler makers, shipbuilders, etc., invite correspondence with Canadian buyers.

1364. Agent.—A Sheffield company, manufacturing cutlery of all descriptions, is open to appoint suitable Canadian resident agent.

1380. Arsenic.—A chemical firm capable of handling large quantities, asks for prices of white powdered arsenic from Canadian producers.

1382. Clothes pins, etc.—A Manchester firm with large connection asks for prices of clothes pins and towel rollers.

1393. Pick handles and yellow pine.—A Yorkshire firm desires to get in direct communication with manufacturers and shippers of pick handles, and also yellow pine, for which they have a large demand. Correspondence and quotations invited.

1396. Bins, cylinders, tanks, etc.—Yorkshire firm asks to be put in direct communication with Canadian buyers of corn bins, dust bins, hot water cylinders, corrugated copper cylinders, gas and oil engine tanks, sanitary pans, mill and stable buckets, cattle troughs, etc., and invites correspondence.

FIRE-PROOF GLASS WINDOWS

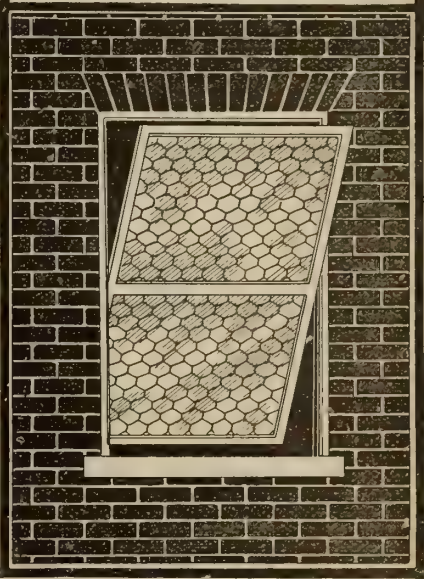
THAT ARE FIRE-PROOF

These windows in a fire-proof building, complete the security, and in any building will thoroughly prevent the spread and advancement of the fiercest flames.

Better than iron shutters (even if they happened to be closed at the needed time); fire-proof glass remains intact, resisting both the intense heat of the fire and the action of water.

Many practical tests have proved it's efficiency.

Used in conjunction with our hollow sheet-metal frames and other fire-proof fittings, it gives the most perfect protection available.



It's adoption lessens insurance rates.

If you want to know more about "fire-proof windows," write us, it's an interesting subject.

Metallic Roofing Co.,

TORONTO, Canada. LIMITED,

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

WHICH TRAIN WAS NEAREST ?

A couple of weeks ago Hardware and Metal offered a year's subscription to the person sending in the thirteenth correct answer to an interesting problem suggested by E. J. Bennett, of the Gurney-Tilden Co., Hamilton, as to which train would be nearest to Oakville, when the trains passed, one leaving Toronto traveling 50 miles an hour and the other leaving Hamilton at the same time, but traveling only 40 miles an hour.

Some interesting answers were received, but as only a dozen correct ones were sent in, the "unlucky thirteenth" was not able to win the prize offered. Replies were sent in from St. John, N.B., in the east, to Calgary in the west, a few of the most interesting being as follows:

"The train leaving Toronto will be nearest Oakville when the trains pass. I arrive at it in this way. The train leaving Toronto and traveling 50 miles an hour, has 21 miles of run to Oakville and will require 21-50 of 60 or 25 minutes, 12 seconds to reach that point, while train leaving Hamilton traveling 40 miles an hour would require 18-40 of 60 or 27 minutes to reach Oakville, consequently, train from Toronto will pass that point and meet the other train west of Oakville."

"Train from Toronto would pass Oakville in 25 1-5 minutes. Train from Hamilton would pass Oakville in 27 minutes. Train from Toronto would then pass Oakville about 2 minutes before train from Hamilton. They would, therefore, meet west of Oakville, and when they pass, the train from Hamilton would be nearer Oakville."

"Toronto train goes 50 miles in 60 minutes, therefore, will go 21 miles in 60-50 x 21 equals 27 minutes. The Toronto train will reach Oakville 1 4-5 minutes ahead of the Hamilton train, and passes the Hamilton train on the Hamilton side of Oakville. Therefore, when the trains have passed, the Hamilton train will be nearest to Oakville."

"The Hamilton train will be nearest Oakville by the length of itself when they pass."

The first reply received was from the office boy of the Montreal Rolling Mills Co., Montreal, who put the correct reply as tersely as it could be put.

"One train will be as near Oakville as the other when they pass."

Has any one got a more interesting problem than Mr. Bennett's?

FOUNDRY AND METAL INDUSTRIES

The London Rolling Mills, London, are rapidly establishing a high reputation among users of all descriptions of bar iron. Writing to the Rolling Mills a few days ago, the Verity Plow Company of Brantford, says: "The stock we received from you we were certainly very much pleased with, as there was just the qualities therein that suit our purposes here."

ACTIVITY AT COLLINGWOOD.

The Northern Steel & Iron Co.'s mills at Collingwood are working successfully after over a month's operations and 125 men are kept busy in the day and night turns making bar, car and track iron on orders for the Canadian General Electric, Canadian Car, Toronto Railway and Grand Trunk Railway Companies. The output will be doubled by the addition of two new furnaces which will be ready about December 1.

The Imperial Steel and Wire Co.'s plant is also in successful operation, the output having been increased 15 per cent. recently with the same equipment. "The shortage in wire billets and in railway cars is both helping to make the wire nail market firmer and with base prices at $2.10 in both New York and Chicago and $1.95 in Pittsburg, it looks as though we will see $2.25 asked for wire nails before many weeks," said Major Currie, president of the Company this week.

WELLAND'S NEW STEEL PLANT.

The Ontario Iron & Steel Company has, under course of erection at Welland, Ontario, a plant for the manufacture of open hearth steel billets, bars, angles and light rails, and for the production of steel castings in size varying from one pound to ten tons. Their site covers sixty acres of ground with a frontage on the Welland Canal and track connections with the Grand Trunk, Wabash, Michigan Central, Canadian Pacific and T. H. & B. Railways. A dock is to be constructed on the canal front, which will enable the company to economically handle their raw material by water. The Canadian Government has at present under construction a turning basin in the canal just below the property of this company, which will enable large steamers,, comin from Lake Erie, to discharge their cargoes and return again to the lake without entering the canal locks—the company's dock being located on the Lake Erie level.

J. A. Herrick, M.E., of New York, has the furnace construction in hand, and W. J. Bradley, M.E., of Troy, has in charge the rolling mill construction. Robert Porter, late of the riverside department of the National Tube Company, is to be works manager, while the foundry plant will be in charge of Daniel J. Blaney. The head office will be in the Traders' Bank building, Toronto, the President of the company being W. W. Near, of the Page Hersey Company, Guelph, and the Secretary, H. Rooke.

The buildings are to be the following dimensions: Open hearth building, 85 x 175 feet; rolling mill building, 119 x 300 feet; foundry building, 150 x 165 feet. The buildings are to be equipped with travelling cranes built by the Niles-Bement-Pond Company, and operated with alternating current motors. Power to run the works is to be furnished by the Ontario Power Company, Niagara Falls, Ontario.

The company controls its own natural gas wells, which will be used for furnishing fuel for the furnaces. The rolling mills will consist of 3 high 12 and 22 inch trains, to be driven by alternating current, 2,200 volt motors. The open hearth department will consist of two 25 ton open hearth furnaces, and the foundry department of one 20 ton open hearth furnace. The 22-inch train will be served by a continuous ingot furnace and the 12-inch mill of two heating furnaces. The object being to make the operation of the mills as nearly continuous as possible.

The company expects to be making steel early in spring, and to have the plant in full operation by the 1st of July, next, but the difficulty experienced by buyers in getting iron and steel may make this impossible.

We would like an opportunity to show you what we can do for you in the paint business, whether you handle a line now or not. Our proposition is so good, it means so much in profit and success to the dealer who takes it up, that we know we can interest you. Our line of paints and varnishes is complete and satisfactory; our advertising helps are strong and produce results; our co-operation coupled with yours builds up a trade that pays dividends year in and year out. And, most important of all, our goods stay sold and make more sales. Let us hear from you today with a request that our representative call and explain our proposition.

A NEW GLAZIER POINT

The above cut illustrates the lucky thought of an Ontario man.

He like most of us, has had the disagreeable experience of attempting to drive a common Glazier Point into a sash with ordinary tools. The tool never fails to slip, with the result that either the glass or the sash is damaged.

With the New Glazier Point you can drive it home with a common nail hammer, without the least danger of damaging the glass or sash. It is obvious that the New Glazier will at once meet with general favor with the public.

Any Manufacturer wishing to secure the sole rights of manufacture for Canada, will please address himself to Manager HARDWARE AND METAL, Toronto,

Paint, Oil and Brush Trades

METHODS OF MAIL ORDER PAINT MANUFACTURERS

Professor Ladd, one of the greatest authorities on the subject of mixed paints in the United States, was responsible more than any other one man for the present form of the North Dakota Paint Law, which requires an analytical label on all paints departing from a model set by the North Dakota legislature. Professor Ladd has analyzed all of the leading brands and in a recent number we published his conclusions as to Seroco paint. The November issue of the National Retail Hardware Bulletin reproduces the result of his investigations as to the product sold by two St. Louis, direct-to-consumer concerns. He finds their products short in both quality and quantity—far from what might be expected by their advertisements. One of these concerns is the O. L. Chase Co., the producers of which specifically state that their mixed paint is white lead, zinc, drier and coloring matter freshly ground, when in reality there is no white lead in the paint whatever.

In their directions for using the O. L. Chase "made to order" paint on page 10 they state: "It contains exactly the right proportions of everything needed—the exact amount of white lead to give opacity and body; the right proportion of zinc white to afford proper oil affinity and the greatest durability; the precise quantity of drier to produce the best results, and the exact amount of the purest linseed oil obtainable, to say nothing of the right quantity of the finest tinting colors." Surely then they would have their customers believe that the product they are selling them would have as its basis white lead.

Paint in Can Short.

There was purchased from this company one gallon of paint, put up in two separate receptacles; one for the pigment, the other containing the oil. In the can containing the pigment there was found 1.71 quarts and of oil 1.70 quarts, or a total of 3.41 quarts. In other words then the gallon was .59 of a quart short, and when the two products were combined there was actually by weight 10 pounds and 13 ounces; whereas a good paint should weigh approximately 16 pounds per gallon. Inasmuch as they charge $1.60 per gallon it seems an exorbitant price for the oil when the selling price of linseed oil is but forty cents a gallon. Thus in the oil itself there is furnished a nice profit of $1.20 to each forty cents expended for oil.

No White Lead at All.

The pigment, as received, was found to be made up, by weight, of 75.6 per cent solids and 24.4 fluid. Or when you add the oil as received the relation of the pigment to the vehicle is as 52.4 to 47.6 per cent. This paint would therefore be unusually thin, in fact as in the pigment, when received, there was already present as much fluid as is found in some paints and of this fluid portion 24 per cent is in the form of benzine and nearly 21 per cent occurs as water.

The analysis shows that the paint does not contain a trace of white lead; it does, however, contain of chalk and barytes 55.26 per cent. and the balance is mainly zinc oxide.

In the judgment of the writer this is one of the most misleading and deceptive paint propositions before the public.

In the following we give complete results of our examination of the sample of paint as purchased directly from the company:

The O. L. Chase Oilo.

	No. 170	No. 171

Small Springs of Every Description.

The White Lead Is The Thing

You may take it for a certainty that the White Lead used in the manufacture of paints is the index to the quality of the product. No manufacturer would use a good white lead and select other materials that were not in keeping with it. On the other hand no manufacturer who selects an inferior lead is likely to be particular about the other ingredients. Know the white lead, and you know the paint.

Now, the bearing of this principle on

"Anchor" and "English"
LIQUID HOUSE PAINTS

is the fact that when you know that the only white lead used in their manufacture is

Brandram's
B. B. GENUINE

(which has been the world's standard for nearly two centuries) you need no other argument to explain the preference consumers show for these paints.

232 McGill Street,
Montreal, November 23, 1906.

During the past week a keen demand has been shown for fancy articles, such as aluminum paints, stains, handy varnishes and tube colors, all which are connected either directly or indirectly with the Christmas trade.

Staples have been steady, with the exception of linseed oil, which seems to be slowly, but steadily, enhancing in value. The prices we are quoting are being shaded by some dealers, but on all sides, quotations are stiffer than last week.

A good all-round business is reported, and, in fact, all the manufacturers seem to be exerting themselves, to fill orders.

LINSEED OIL—Prices have stiffened. Some dealers are quoting lower figures, but the following are generally accepted by the wholesale trade: Raw, 1 to 4 barrels, 55c; 5 to 9 barrels, 54c; boiled, 1 to 4 barrels, 58c; 5 to 9 barrels, 56c.

TURPENTIRE—Prices are still firm at the following figures: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD — Last week's advance is well maintained. We quote: Best brand Government standards, $6.75 to $7.00 No. 1, $6.40 to $6.65; No. 2, $6.05 to $6.40; No. 3, $5.80 to $6.05, all f.o.b. Montreal.

DRY WHITE ZINC—V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—Orders are large and numerous. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—Conditions are unchanged from those of last week. We are quoting: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

SHELLAC—A slight decline has taken place, and we now quote:—Shellac Bleached, in bars or ground, 46c per lb., f.o.b. Eastern Canadian points, Bone Dry, 57c per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 48c per lb. f.o.b. New York.

SHELLAC VARNISH—The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

REFINED PETROLEUM— We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

BENZINE—An advance this week has brought the price up to 25 cents in barrels and 30 cents in smaller quantities.

WINDOW GLASS—The demand is still good. It is thought that window glass will shortly stiffen in value, but, unless the Belgian market becomes much firmer, there will be no change in the nominal price this winter. At present, there is considerable cutting under these prices, for large quantities but this will, it is expected, be eliminated. We quote: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100feet, $3.20; second break, break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

10 Front Street East,
Toronto, November 23, 1906

White lead is still very firm but has not advanced as yet. The mixed paint trade is practically over, but domestic lines such as oil and varnish stain, and varnishes for various uses are selling very briskly, as people are overhauling the interior of their houses for Christmas visitors. Other paint manufacturers have not as yet followed Sherwin-Williams example by advancing their

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

PAINT AND THE WEATHER.

The influence of temperature on the consistency of paint is not always sufficiently appreciated, either in the factory or the painter's shop, says an exchange. On the whole the manufacturer is less liable to deviate from the standard of composition on account of differences in the consistency of his raw materials caused by variations in temperature, than the painter is when the latter thins his paints himself, because the manufacturer works to a definite formula and uses the same relative proposition of the various ingredients winter and summer. The painter, on the other hand, mixes his paints by judgment only, his sole criterion being the ease with which the material can be spread with a brush, and this necessarily implies that the proportion of the various thinners varies according to the temperature and other local conditions. What the manufacturers have to bear in mind, however, is that if they send out in winter a material compounded in a manner suitable for summer use, or vice versa, there is a strong inducement offered to the user to tamper with the material. This fact is well known to makers of enamels and enamel paints, and at least one well known firm of makers of a renowned specialty take the simple precaution of recommending their customers, should they find the enamel somewhat "stout" to stand the can in a pail of warm water before use. Simple advice surely and calculated to save time investigating painters' complaints.

GOOD PAINT THE CHEAPEST.

True economy in paint, or in other words the most economical or cheapest paint the consumer can use is good paint, writes V. W. Hartman. It will necessarily cost more per gallon, just as a good suit of clothes costs more than a cheap suit. But—here's the economy—like a good suit of clothes it outwears the cheaper paint two to one and actually costs less in a given period, say five years. By way of illustration, it is known by everyone who has ever had any buildings painted that it costs just about twice as much to apply paint—put it on the building—as the dealer asks for the paint. Now, how does this work out? If a building requires 12 gallons of paint, costing $20 it will mean an expenditure of $40 to have the $20 worth of paint applied, or $60 for the job complete. Good paint properly applied will last for at least five years, making the cost twelve dollars per year. Now, let us suppose a cheap paint were used, costing, say, $15 instead of $20. It is safe to say that at the end of three years the building will require repainting. What does this mean? Simply this: That its costs $40 to apply the $15 worth of cheap paint, or $55 for a job that wears three years in place of $60 for a job that wears five years, and the cost per year is $18.33 for cheap paint as against $12 per year for the good paint costing but $5 more at the start, yet saving the consumer $6.33 per year, or $31.65 in five years. The cheap paint is the most expensive, after all, isn't it?

Is Your Paint Trade Growing?

If not there is something wrong. You can be assured of a large increase in your paint business if you handle

ARK BRAND PAINT

It is the most durable and best looking paint made. Read what it has done for one of our customers, and it will do the same for you. You really cannot afford to be without it.

Toronto Junction, Nov. 2nd, 1906.

Messrs. Francis-Frost Co., Limited, Toronto, Ont,

Gentlemen,—We have handled your "Ark Brand" Paint for three years, and during that time we have had better satisfaction in our paint department than ever before. The increase in our sales this year so far is over 300 per cent. more than our first year. It is a great pleasure to handle it, as there are no kicks, and no come backs except for more. From our experience we are firmly convinced it is the best prepared paint made, and especially adapted for outside painting.

Muresco: We are doing a splendid trade in this wall finish, and cannot now sell any other kind, even at half the price. It is certainly the finest wall finish we ever saw, and we will handle no other wall finish but Muresco in future.

Let us know if there will be any advance in price of above for 1907, as we wish to cover ourselves with a good stock. Youry truly, C. M. CUTTS & CO.

Have You Ordered Muresco?

If not, wait until our traveller calls on you before placing your order. It is the best wall finish made. Anyone can use it without showing laps or brush marks.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

INDUSTRIAL GOSSIP.

Vancouver will spend $150,000 on new school buildings and sites next year.

The Sharples Separator Company, Toronto, are erecting a $15,000 brick factory.

Asbestos is said to have been discovered in South Africa, equal to the finest Canadian product.

The Dominion Henderson Bearings Company, Welland, have started part of their plant last week.

A Birmingham small arms company are sending a representative to Canada to establish agencies here.

A one storey brick factory is to be erected for the Toronto Plate Glass Company, to cost $16,000.

The Commercial Cement Company, Winnipeg, were incorporated with a capital stock of $150,000.

A contract has been let for the erection of a new building at Walkerville for the Dominion Dash Co.

The Dunlop Rubber Company, Toronto, are erecting a two-storey brick rubber factory, to cost $18,500.

The International Portland Cement Company, Hull, Que., made a record shipment of 300 barrels in one day recently.

The Gibson Manufacturing Co., Port Washington, Wis., has been granted a fixed assessment of $5,000 to locate in Guelph.

Tolden, B.C., is to have one of the largest saw mills in the country with a cutting capacity of 50,000,000 feet in a season.

The Canadian Art Iron Works Company, Welland, Ont., will erect three buildings to cost $15,000, and will employ fifty men.

The Sutherland-Innes Co., Chatham, are to establish a stave plant, not a stove foundry, at Rainy River, Ont., as reported a week ago.

The enormous amount of business done this summer is in evidence on every hand, and the railways and lake shipping report a banner year.

The Canadian Port Huron Company, with offices at Winnipeg, will build a new warehouse in Calgary, to be used as a central distributing point.

The mica works which have been operated in Smith's Falls for the past three or four years, are being removed to Ottawa. The reason given for leaving is that they cannot get enough female laborers.

The Canadian Westinghouse Company have been awarded a contract for apparatus to be used in the new power station on the Voulager Canal on the St. Lawrence River, to supply Montreal with heat, light and power.

A coal famine is reported in the West, owing to the shortage of cars. Winter has set in, but it will likely be some time before the supply is to hand. The coal mines at Medicine Hat have been reopened as a result of the scarcity.

Gravel and Duhamel, Montreal, have been incorporated with a total capital stock of $99,000, with P. Gravel, J. G. Duhamel, J. A. Barrette, V. Laperte, all of Montreal, for the purpose of manufacturing iron goods, hardware, carriager, furniture, saddlery, as well as to develop hydraulic and steam power.

The Lake Superior Corporation, Sault Ste. Marie, Ont., will build an addition of 500 feet to its ore dock as the steel plant dock, which is now 900 feet in length. An additional blast furnace is also being considered by the directors, the furnaces now in operation being unable to supply enough pig iron for the plant.

The Leitch Colleries of Ottawa have been incorporated with a capital stock of $1,000,000, with the following directors: D'Arcy H. McMahon, A. A. Baylir, E. Seybold, J. Tibson, W. C. Perkins, J. T. Tibson and H. H. Williams, all of Ottawa. The company proposes to treat ore, drill, mine, and construct flumes.

A company has been incorporated at Ottawa, as the Crude Oil, Gas and Power Company, with a share capital of $100,000, for the purpose of producing and dealing in gas of all kinds, motive power, heat and light. The head office will be at Windsor, and the directors are W. H. Leith and H. J. Booth of Detroit, and C. L. Meyer, Windsor.

The Rand W. Kerr Company, Montreal, have been incorporated with a capital stock of $90,000, the directors being, Robt. Kerr, E. F. Kerr, J. L. Kerr, all of Montreal, R. A. Kerr, Maisonneuve and W. M. Kerr of Westmount, Que. The company will manufacture and deal in hardware, furniture, sporting goods, refrigerators and heating goods.

The Automobile and Sportsmen Exhibition have been incorporated in Montreal with a total capital stock of $20,000, with R. M. Jaffry, S. Jackson, Laura R. Jaffry, Montreal, and R. McKay and Morley F. Pumaville of Toronto, for the purpose of conducting exhibitions of automobiles, motor boats, etc., and to deal and act as agents for sportsmen's sundries and supplies.

The Ontario Nickel Company has

been incorporated with a capital of $1,000,000, with head office at Worthington, Ont., for the purpose of mining, milling, and developing mines. The Canadians among the applicants for incorporation were, W. S. Tates of Worthington, Ont.; H. H. Dow, W. L. Baker, Midland, Mich.; A. E. Corners, and T. E. Collings, Cleveland, Ohio.

The Dominion Iron and Steel Company, Sydney, N.S., has contracted with the Nova Scotia Coal and Steel Company for the output of their coke ovens until the first of January, by which time their own blast furnaces will have started. This, in addition to the output of the Steel Company's own ovens, will enable them to start the second blast furnace, probably by the end of the week.

The Leach Concrete Company has been incorporated with a share capital of $10,000, with head office in Toronto, for the purpose of carrying on a business as concrete contractors and builders, and to manufacture plain and reenforced concrete, for structural and engineering works, and fire proof buildings. The directors of the company are R. Leach, W. Leach, R. W. Eyre, E. E. Wallace and H. M. Sinclair, all of Toronto.

A company has been incorporated at Ottawa with a share capital of $1,000,000, for the purpose of manufacturing and dealing in furnaces, heaters, hardware, house furnishings, power and hand tools and manufacturers' supplies, also to carry on a business as founders, merchants, plumbers, and fitters, to be known as Butterworth & Company, with head office at Ottawa. The board of directors are, E. B. Butterworth, C. A. Butterworth and A. F. Butterworth, all of Ottawa.

Ottawa, Nov. 16.—Canada's aggregate foreign trade for the four months ending October 31, shows a gain of over $13,250,000, compared with the same period of 1905, the figures being, respectively, $100,814,777 and $87,523,357. The exports of domestic products amounted to $88,818,114, a gain of $6,009,826. The imports for the four months were of the value of $111,871,358, an increase of $18,974,670. Not in all classes of exports did gains take place, as will be seen from the following statement:

	Amount.	Incr.
Mineral products	$11,775,243	*$ 694,563
Fisheries	3,806,029	* 1,558,658
Forest products	19,842,391	4,947,568
Animals and their produce	33,295,865	3,526,527
Agriculture	12,398,440	* 676,568
Manufactures	7,604,388	482,619

*Decrease.

The imports for October amounted to $24,688,244, as against $23,992,056 for the same four weeks of 1905. The exports amounted to $26,880,090, a decrease of $3,212,609, compared with the same month of last year.

BUILDING NOTES.

Vancouver is to have a new Theatre, costing $60,000.

Portage la Prairie, Man., masons, will erect a new hall.

Winnipeg has offered the Edmonton Tent and Mattress Co. liberal terms to establish a branch there.

The Atwell Fleming Printing Company, Toronto, will erect a new brick printing office to cost $20,000.

The Standard Bank of Canada have secured premises and will open an office in Cobalt in a few days.

The new Traders' Bank building at Toronto, enjoys the distinction of being the tallest in the British Empire.

The Farchild Implement Company, will erect a block for offices and show rooms to cost in the neighborhood of $100,000.

A permit has been issued the Canada Cycle and Motor Company, for a $4,000 addition to their factory at Toronto Junction.

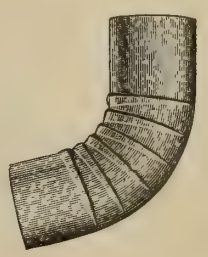
The contract has been issued for the building of the new Terminal Station at Hamilton. The cost will be about $230,000.

The Royal Bank have purchased a building at Winnipeg for $200,000, which will be altered into a modern bank building.

Building permits amounting to $250,000 were issued in Toronto from November 10, to November 17, inclusive. The permits include 55 houses, a warehouse for oil storage, by the Canadian Oil Company, to cost $5,000, a workshop for corrugated iron at the foot of Peter Street, to cost $2,000, and a charging station for the Commercial Acetylene Company, to cost $2,000.

PREPARE FOR A HARD WINTER.

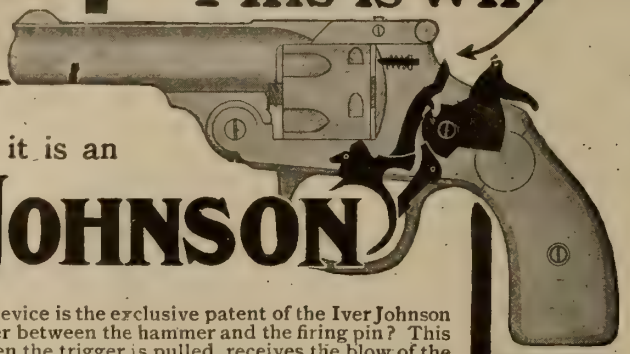
That the coming winter is going to be the hardest one for the past twenty years there is an abundance of signs to show, says an exchange, and among them may be mentioned:



The corn husks are a foot and a half thick, and all the stalks lean to the west.

The geese, ducks and chickens are growing a coat of fur under their feathers, and are rubbing borax on their feet to harden them up.

All the one-eyed owls are leaving the country a month earlier than usual, and the bob-tailed squirrels are laying in sweet potatoes, as well as nuts, for winter provisions.



The farmer who has taken the trouble to investigate has found that all the toad stools on the old logs have wrinkles in them. The last time that this happened we had winter weather that froze the handles of plows.

Rabbits are sitting around with a humped-up look to them, and field mice have wrinkles in their tails. If this means anything it means 20 degrees below zero from November through to May.

Accidental Discharge Impossible—

This is why

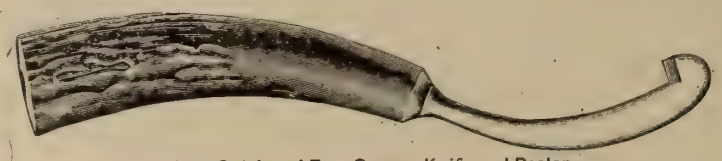
True only if it is an

IVER JOHNSON

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.



Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

IVER JOHNSON'S ARMS AND CYCLE WORKS, FITCHBURG, MASS.

ORANGE KNIFE AND PEELER.

A novelty which should sell in large quantities during the holiday and winter season, is being put on the market by the Erie Specialty Co., Erie, Pa., it being the orange knife and peeler shown herewith. It has dropped forge steel nickel-plated blade and genuine stag handle, the blade being securely fastened in the handle. It is also mounted in white bone. In use the orange peel is slit from point to stem in six or eight sections, when the peeling is easily removed with the back of the blade. With the point of the blade the core, or navel, is easily cut out, and the orange can be split open by inserting the blade at either end without waste of juice. The stag handled knives are mounted one-half dozen on display card, and those with white bone handles are put up one-half dozen in a case, and also in fancy cases. An attractive folder showing illustrations of how the knife is operated can be had on request.

Walkers Quick and Easy Orange Knife and Peeler.

HELPS OUT DELIVERY SERVICE.

A Brooklyn firm last Christmas gave a premium to customers who carried away the parcels of goods purchased. The premium was a specially designed card puzzle, showing a lot of delivery waggons having to make trips over a labyrinth of routes. If the delivery service can be made lighter, it helps considerably, but it isn't good policy to ask customers to carry parcels unless some inducement is offered.

KEEP WINDOWS CLEAN.

A walk through the principal streets of any big city will bring to view a surprising number of stores whose windows are by no means as bright as they should be. Some of them would pass all right at a casual inspection, and others seemed just a little bit dingy at the first glance. In some cases the dealer had arranged an excellent and

NEGLECT MEANS LOSS.

The attractively arranged window display will bring trade, no matter what sort of a town you happen to be doing business in. Show the people that you're up to date in your methods and that you've got the goods in your store. The show windows cannot be neglected nowadays without loss of business and prestige.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading 2c. a word first insertion; 1c. a word each subsequent insertion. Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

Where replies come to our care to be forwarded, five cents must be added to cost to cover postage, etc.

BUSINESS CHANCES

FOR Sale—Stock of Hardware, Stoves and Tinware in the town of Tweed (on the main line of C.P.R. between Peterboro and Perth); place of business splendidly situated in the heart of the town; only one opposition, stock about $4,000; present owner going into the manufacturing business. W. Gordon, Tweed, Ont. [46]

SITUATIONS WANTED

HARDWARE SALESMAN—Position desired by one with wide experience of Canadian trade. References A 1, Box 566, HARDWARE AND METAL, Toronto. [46]

ARTICLES FOR SALE.

CANADIAN PATENT or Provincial rights for folding ironing board, simple in construction and cheap to manufacture, can be fastened to any stand, table or sewing machine. Made in three sizes, can be retailed for one dollar with good profit. Patented October 1906. For terms, etc., address Box 567, HARDWARE AND METAL. [48]

STOVES AND FURNACES.

AN experienced, competent and practical manager for manufacturing or sales department open to consider proposal. Box 569, HARDWARE AND METAL [49]

UNITED STATES manufacturer of hot water specialties and furnaces would like to secure jobber in Heating Supplies who would handle their line in Canada and keep the goods in stock. For full information apply Box 568, HARDWARE AND METAL, TORONTO. [48]

WANTED

by January 1st, 1907,

Glass Salesman

Must be experienced and reliable, state references and qualifications, also amount of salary required. Apply only by letter to

Consolidated Plate Glass Co., Limited

Toronto, Canada. (52)

B. A. GRAUTOFF & CO.

8 Fenchurch Buildings, London, E.C.

Import and Export.

Old established house with highest connections in Great Britain and on the Continent of Europe.

Cable Address, "Grautoff London," Liebers Code.

NEWMAN'S PATENT
INVINCIBLE FLOOR SPRINGS

Combine all the qualities desirable in a Door Closer. They work silently and effectually, and never get out of order. In use in many of the public buildings throughout Great Britain and the Colonies.

MADE SOLELY BY
W. NEWMAN & SONS, Birmingham.

SMALL COST QUICK RETURNS

HARDWARE & METAL "Want Ads."

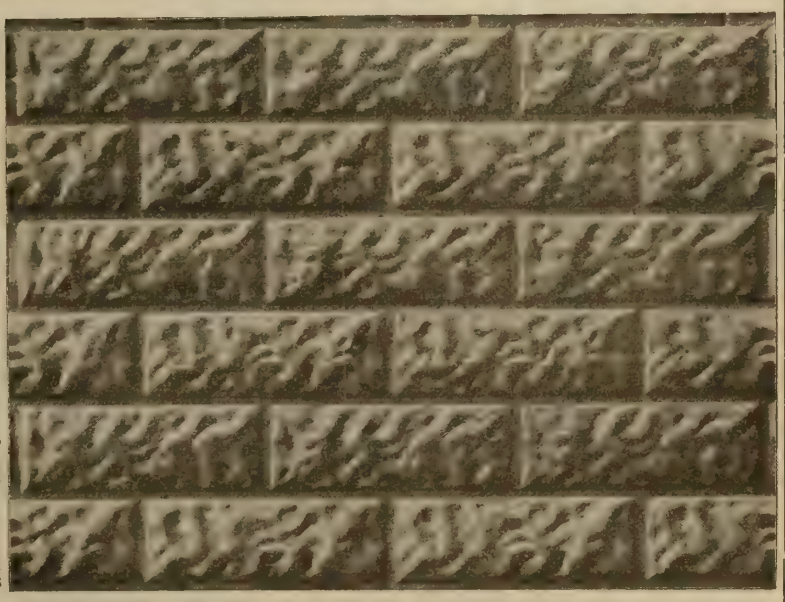
THE
SPECIALLY ROLLED STEEL
used in making
Hamilton Rifles

gives the maximum strength with the minimum weight—the condition par excellence in rifle-making.

HAMILTON RIFLES are made in three models—Nos. 15, 19, 23.

No. 15 sells at $2.00
No. 19 sells at $2.50
No. 23 sells at $3.50

ORDER FROM THE JOBBER



THE HAMILTON RIFLE CO.

Dept. 71 ***Plymouth, Mich.***

HERE'S ANOTHER GOOD ONE!

ROUGH BRICK—

This is a splendid die mortar—lines are clean cut and bold. This pattern is very popular for dwellings or surfaces much cut up by openings. The rough face hides all unevenness, as well as the joints, which fit perfectly and easily. Made in three grades each, galvanized and painted steel. Send us a trial order.

The GALT ART METAL CO., Limited, GALT, ONT.

Western Distributing Agents, **THE McCLARY MFG. CO.,** Winnipeg and Calgary.

Will Hold up a Shelf

That's what a shelf bracket is for. For this purpose there can be NOTHING BETTER NOTHING CHEAPER than the BRADLEY STEEL BRACKET. It is well Japanned, Strong and Light. The saving on freight is a good profit aside from the lower price at which the goods are sold. Order direct or through your jobbers.

ATLAS MFG. CO.,
New Haven, Conn.,

"THE EMLYN" SAW BENCH

Made in 6 sizes. Best value obtainable. Specially designed for export With or without "Emlyn" Patent Guard. Sole maker—

CHARLES D. PHILLIPS,

Cables—
"Machinery," Newport.

Emlyn Engineering Works
NEWPORT, MON., ENGLAND

THE STANDARD IDEAL SANITARY CO., LIMITED

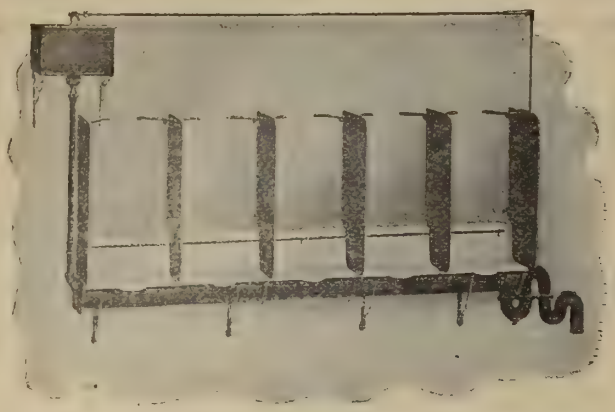


Plate E. 404.—For Public Institutions, Schools, Factories, Asylums, &c.

We manufacture a complete line of

Range-Closets, Range-Urinals, Lavatories and Sanitary Fixtures

Suitable for Public Institutions

The reputation of our goods is unequalled.

Toronto: 50 Colborne Street ***Montreal: 128 Craig Street West***

93-97 West Adelaide Street **TORONTO**

J.M.T. Valves
For Heating work, are the best they have lasted for twenty years without attention—evidence of their efficiency and durability

Thermometers for Hot Water and Steam—We have them with angle or straight stem.

A GOOD STEAM TRAP is a necessary article on all Steam Heating Work—Some traps are good some are inferior—most Traps work for a short time, then require constant attention and repairs and consequently annoyance.
Use a Trap that is reliable efficient and always positive in its action. Ask us about the "HEINTZ." It has fewer parts than any Trap on the market. Is fully guaranteed

Reducing Pressure Valves used on supply pipe from live steam line.

Automatic Air Valves for steam we have four kinds—Prices are the lowest.

Plumbing and Steamfitting

ADVANTAGES OF STEAM HEATING

Interesting article from the catalogue recently issued by the Taylor-Forbes Co., Guelph, copies of which can be secured by any heating firm on request.

The method of warming buildings by steam depends upon the rapid condensation of steam water when admitted into any vessel which is not as hot as itself. At the moment of condensation, the latent heat of the steam is given out to the surrounding space.

A low-pressure gravity apparatus is the most economical and cleanly, and may be constructed to heat a single room or the largest building with a uniformity that cannot be obtained by any other means.

A gravity apparatus is one with an outlet whose circulation is perfect, wasting no water and requiring no mechanical means for returning the water of condensation to the boiler. It has been very properly likened unto circulation of blood in the human system.

This form of apparatus is exclusively used in warming private houses, schools, churches and public buildings with very satisfactory results. Its chief merits are its safety, noiselessness, the ease with which it is managed, the low and uniform temperature of its surfaces, and the positive return of the water of condensation to the boiler under all conditions.

Five Systems in Use.

There are five systems by which a building may be furnished with circulating pipes for a steam apparatus.

A.—With main steam pipes and risers, with accompanying return pipes. When properly constructed and with pipes of sufficient area, this method will work satisfactorily at any pressure, and is the system usually employed in large buildings.

B.—With main steam pipes and risers, with accompanying return main, and with separate return risers for each coil or heater. These several return risers must not connect with each other except below the water line of the boiler. When properly constructed, this method will be perfectly noiseless and the air on the pipes is readily disposed of. This system should always be used in private houses and in buildings where extremely low pressures are employed.

C.—Main steam pipes and risers with corresponding return main but without separate return risers, the steam risers conveying the waters of condensation back through a relief to the main return pipes on floor of basement.

D.—A single pipe system in which there is but one steam pipe from the top of the boiler and thence vertically to the several radiators which it is to supply—single branches taken off for each. The water of condensation returns through these to the steam pipe, and considerable pitch is necessary to insure the water returning against the steam current.

E.—A single pipe for every heater runs direct to the top of the boiler, rising continually toward the heaters, and with sufficient area to allow the steam to rise to the heaters, when the water of condensation is returned through the same pipes to the boiler. This system is identical with that described in D, except that the steam supply pipe being subdivided, there is less difficultv likely to occur from conflict of the currents of steam and water of condensation.

Merits of Low Pressure Systems.

The low pressure gravity apparatus depends for a circulation on the difference of level of water in the return riser and the boiler, without regard to the steam pressure in any part of the distributing pipes, but the maximum pressure of steam carried must never exceed the equivalent of a difference in the level of the water between the water line of the boiler and the lowest point of the distributing main.

To return the water of condensation in the apparatus directly to the boiler under all conditions of pressure, the main pipes must be large enough to maintain the pressure of the boiler to within one pound in every part of the apparatus, and the water line of the boiler should not be less than four feet from the bottom of the horizontal main at its lowest part, though somewhat less difference in level can be used with safety, provided a less difference of pressure is carried between the flow and return mains.

In heating by steam, the size of boiler and quantity of radiation depend upon the construction and location of building. Wooden buildings require more radiation than stone, and stone more than brick. Iron fronts require still more, and glass in windows demand sixteen to twenty times more than the same surface of brick walls.

Indirect Heating.

In indirect heating the efficiency of the radiating surface will increase, and the temperature of the air will decrease, when the quantity of air passing through the radiator increases. Therefore, one square foot of radiator surface, with steam at 212 degrees has been found to heat 100 cubic feet of air per hour from zero to 150 degrees, or 300 cubic feet from zero to 100 degrees in the same time.

One square foot of boiler heating surface will supply from 5½ to 9 square feet of radiating surface (direct). Each horse power of a tubular steam boiler will supply 80 to 100 square feet of cast iron radiation, 240 to 300 feet of inch pipe. Return pipes should never be less than half the diameter of main pipes, long returns require larger sizes. If connections are taken from boiler to heat tanks, the supply pipe should be carefully considered and not made too large.

A fair standard is one square inch of steam, opening from the boiler for every 50 horse power for tank heating. Chimney capacity and sizes of pipe are explained on other pages of the catalogue. The average consumption of soft coal in tubular steam boilers is 1½ pounds per hour, per horse power.

From actual experience of heating engineers, cast iron low pressure steam boilers have proven more satisfactory than steel—because of their peculiar construction they contain economical features necessary to secure the best results with the least cost of fuel—they are made up in several parts, easy to handle, and can be taken through an ordinary door into any building, and they last longer than steel.

Radiator boards should always be used as they cost very little extra, and carpets may be taken up and re-laid without moving the radiator, besides it is easier to keep the floor or board under the heater free from dust than it is to brush the carpet.

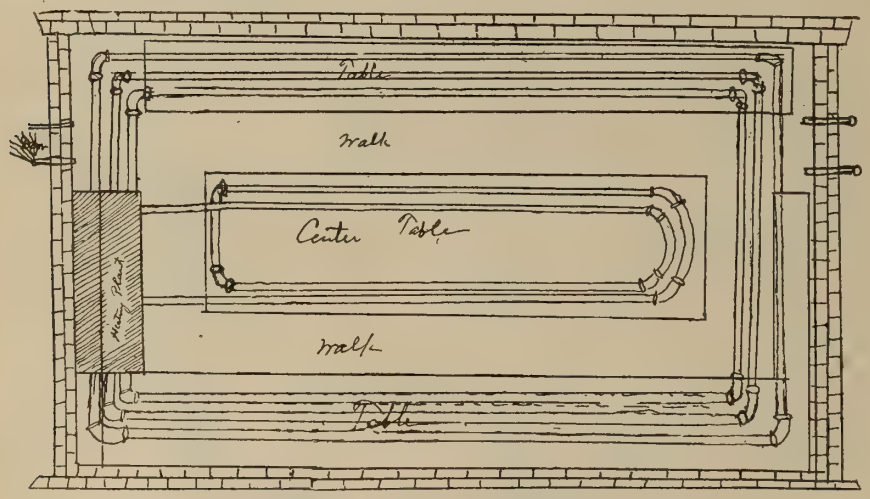
Air for Ventilation.

The quantity of air required for ventilation is from 5 to 16 cubic feet per minute for each person, the larger amount being for hospitals and jails. The number of times air will have to be changed per minute in a given room depends upon its size to the number of occupants. If 400 cubic feet of space is allowed per person, a supply of 30 cubic feet per minute would change the air in this space in about 13 minutes or 4½ times per hour.

The following table shows the number of changes per hour required to supply each person 30 cubic feet per minute:

Space to each person. Cubic feet.	Times air will be changed per hour.
100	18
200	9
300	6
400	4.5
500	3.6
600	3
700	2.6
800	2.25
900	2

CELLAR VENTILATION.



A system of cellar ventilation is described by a correspondent of the Rural New-Yorker as follows: In building the cellar wall, build in on each side a line of 2 or 3-inch drain pipe, emptying into the cellar just above the floor, and into the open air just above the ground level. During the summer these can be left open, and the cool air of early morning will flow in, and the cellar will be cool and pleasant all day. During the winter they can be closed except when it is desirable to ventilate or air the cellar, which can be done better and with less danger of frost by opening these ducts than it can be by opening windows.

GREENHOUSE AND CONSERVATORY HEATING

A. S. Atkinson in the National Builder.

The proper heating of a modern greenhouse or conservatory is a problem involving a number of special features quite different from those which pertain to almost any other type of structure. A uniform and constant temperature is absolutely essential to success, and any plant which fails to furnish this must in the end cause a good deal of loss and anxiety to the owner. The possessor of a modern greenhouse frequently carries commercial stock through the winter valued at hundreds, if not thousands of dollars, and a single day or night in midwinter without proper heat would mean a large if not a total loss. Near Philadelphia there is a single greenhouse holding a collection of tender orchids, the total value of which is estimated at $50,000.

Reliability of any heating plant for a greenhouse is thus one of the most important considerations. In the past the heating plants of greenhouses have too often been chiefly a matter of makeshift, and trouble has been a constant factor in the situation. A good deal of this has been due to the desire on the part of the owner to install a heating plant as cheaply as possible. In some cases second-hand furnaces, steam and hot water pipes have been purchased and assembled on the site by amateurs. Not being a perfect unit, the plant has discouraged many owners from undertaking the work the second time.

Plan of Greenhouse Heating System.

Only the past half dozen years, it may be said, has the greenhouse heating system received the attention it deserves. The growing popularity of the conservatory and commercial greenhouse has demanded more study of the conditions which assure success. The construction and designing of the buildings have reached a stage where comparatively excellent results can be obtained. Architects and builders have determined the best size, shape, situation and kind of material suitable for either the conservatory of the amateur or the greenhouse for commercial purposes.

But the tightest and warmest greenhouse without an appropriate heating plant may prove worthless. It will in the end develop into an expensive and wasteful luxury. Many have gone out of the business through serious trouble in this line.

The proper heating of the greenhouse demands the best services of experts, for in our varying climate conditions are rarely the same in any number of states. Moreover, the nature of the plant collection must be a determining factor. Rare tropical orchids demand a much higher temperature, maintained evenly throughout the winter, than many of our ordinary semihardy plants. The rapid changes in our winter climate likewise requires proper ventilation and automatic control of the heating plant to prevent the temperature in the house from injuring the plants through excessive heat. Nearly as much damage is done to greenhouse plants from too high a temperature as from too low.

A hot water plant properly installed and equipped serves the purpose of greenhouse heating better than any other system. The heat from hot water circulation imparts a mild and congenial warmth to the air, and at the same time it is practically free from impurities. Where coal stoves are used the gas from the burning coal and the impurities from the dust and ashes have a disastrous effect upon the more delicate plants. The excessively dry air of the stove or furnace heat tends to destroy the vitality of the plants, so that, unless constantly watered and sprayed, the air will suck out the moisture from the leaves and stalks very rapidly. Such an atmosphere is much like the hot, dry winds of the West which wither up corn and grass within a few short weeks in summer, so that the crops are reduced one-half or entirely destroyed.

By means of a good hot water plant a greenhouse upward of 300 feet in length can be properly heated in winter by a single boiler located at one end. The plant is furthermore adapted to the heating of two or three small greenhouses placed either in a group or run along in a series. Owing to the different needs of some plants many florists prefer to divide their greenhouses in small groups or units so that different temperatures can be maintained in each.

In designing the heating apparatus for a greenhouse, estimates are figured generally upon a basis of fifty-five to sixty degrees to be maintained in the temperature of the house in zero weather. An average temperature of one hundred and fifty degrees in the pipes are calculated upon to secure this result. Such estimates are modified somewhat by the character of the greenhouse itself, such as shape and dimensions, and whether constructed of brick or wood, single or double boarded, and also the direction in which the greenhouse faces. All of these factors modify the conditions so that the engineer must make his calculations for the size of the boiler required upon exact facts. The nature of the fuel intended for use is another point that must be considered, for where soft coal is to be burned a larger boiler is generally recommended than for hard coal. The proper siding and construction of the greenhouse insures protection from cold outside drafts, so that the heating is much easier arranged.

In small conservatories and amateur greenhouses the ordinary round boiler answers all purposes, and, owing to its cheaper cost, is most popular; but in a large commercial greenhouse sectional steam and water boilers are necessary. A cast iron sectional boiler properly made of the right dimensions gives the best results. They are safer, more durable and more economical for this kind of heating than the wrought iron or steel tubular boilers. If properly designed they can be set independent of brick work and in such a way as to occupy less space. These considerations have made this type of boiler popular for greenhouse heating.

A boiler for greenhouse should be simple in management and capable of maintaining a steady temperature from eight to ten hours without attention. It should also be economical in operation and cost of repairs, and every part easy of access for cleaning. The florist running a commercial greenhouse can not employ an engineer to look after his hot water or steam plant, and he is not generally much of an engineer himself. For this reason the plant must be laid out on simple lines and with as few technicalities as possible. The boiler must be largely automatic in its operation.

The layout and dimensions of the mains and radiating pipes should be so as to distribute the heat economically and uniformly. It is fatal to a greenhouse to have one part overheated and another part underheated. A good deal

of the result will depend upon the size and direction of the mains so as to keep up an active circulation. For large greenhouses the open tank hot water apparatus probably gives the best results. In a properly constructed plant the entire control of the heat should be regulated by the draught damper on the boiler after the pipe coils have once been heated. The fire should be increased or decreased by the draught regulator so that the temperature can be made to suit any weather. By means of the chimney draught the temperature of the greenhouse is increased or decreased automatically.

In the open tank system of hot water heating for greenhouses the dimensions of the boiler are first made to suit the needs of the house, or of such size as necessary to heat the amount of radiating surface estimated essential for a given space. The boiler is connected at the bottom and top with the flow and return mains, and branches are taken from the mains to the coils of radiating pipes. One of these coils, placed along side or under bench or table, is generally sufficient to heat a small "lean-to" greenhouse, but for larger houses two or three are needed. When the houses are connected together in a series a single pipe coil will often answer for each one. The coils, consisting of two or more pipes laid conveniently together, are connected at the highest point to a pipe header and at the lowest point with branches which connect them with the flow and return mains. In the pipe header there should be placed an automatic air valve which will permit the air which accumulates in the pipes to escape.

The expansion tank connected with such a system is located over the boiler above the highest pipe in the system. This tank is connected by a pipe to the return main and also to the water supply. It is equipped with a glass water column and an overflow pipe leading to some outside drainage. The object of this expansion tank is to prevent the waste of water by overflow, and hence to save fuel and hot water. In apparatus of this description water heated say from forty to two hundred and twelve degrees will expand about one-twentieth of its volume, and unless an open expansion tank is provided the waste through overflow will be considerable.

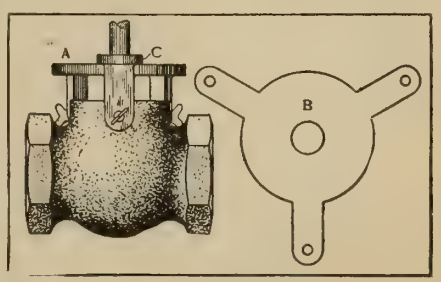
A good effective boiler for greenhouse work should have a coal area of about fifty per cent. larger than that of the grates, which is essential for maintaining a proper temperature during the cold winter nights. Anything short of this amount of space may cause trouble at critical moments. The firebox should be unusually deep to provide ample space for good combustion of the gases, and the fire channels over the fireboxes to the boilers should incline toward the fire so as to direct the heat directly against the boiler surface. The concentration of the fire in a series of currents thus produces more force than if scattered.

The firebox should properly be connected with the smoke pipe so that no smoking or back draft can follow. By means of a wide U-shaped flue extending a considerable distance parallel with the boiler a good part of the escaping heat is utilized in heating the water.

The grates of the furnace should be of ample size and designed to receive and hold a good bed of coals, and when cleaned be simple of operation. The loosening and discharging of clinkers without any great skill is an important consideration. Without properly designed grates the furnace will never give satisfaction, and all the improvements made in other parts of the plant will be nullified.

The application of the principle of hot water circulation to greenhouse heating is due to its adaptability. In installing such a plant it must be remembered that it is gravity which produces the circulation of the water through the system. It is the difference in the weight between ascending and descending columns of water in the perpendicular flow and return pipes. With water at its greatest density at thirty-nine degrees Fahrenheit, the volume increases and the density decreases as the boiler heats it. This means that the heated water becomes lighter. As it becomes heated and lighter in the boiler through expansion it is forced through the boiler outlet and flow pipes to the radiating coils by the colder water descending through the return pipes. The water as it makes its journey imparts its heat to the surrounding atmosphere and grows heavier in weight and density. By the time it reaches the boiler again it is sufficiently cool and heavy to force the lighter water up through the same circulation. To secure the most desirable results with such a system the pipes and mains should be laid out with as few sharp inclines as possible, and the outlet should be of ample size and placed at the highest point of the boiler. This insures free and rapid circulation with the minimum of friction. The economy of operation of such a heating plant depends upon the comparatively free and easy circulation of the hot water through the system, and anything that causes friction means an increase in the coal bills.

BATHROOM EQUIPMENTS.



The Standard Sanitary Manufacturing Company, Pittsburg, Pa., has issued a sixth edition of "Modern Bathrooms," a handsome book of 100 pages, which will be sent to those who contemplate building new homes or re-equipping homes already fitted with old style plumbing fixtures, it being only necessary for the master plumber in any community to supply names of those to whom he would like to have copies of the book sent.

The first 40 pages of the book contain full size half-tone engravings presenting views of handsomely equipped bathrooms of the luxurious homes and the conveniently arranged bathrooms of the less pretentious and simple homes. The remaining pages of the book show nickel plated bathroom equipment, such as soap and sponge holders, bath brush racks, glass shelves, towel baskets, hat and coat hooks and towel racks. Illustrations also give an idea of the character of decoration which can be furnished on enameled iron bathtubs, and include suggestions for bathroom windows and floor treatment. Several fine kitchen equipments are presented, showing the kitchen and pantry sink, slop sink, combination sink and laundry trays, and the basement pictures give a good idea of all that should be provided for the convenience of the laundress. The book closes with views of some fine buildings in which the Standard fixtures have been used.

Accompanying the book is a specially prepared blank to aid plumbers in having Standard literature sent to those who are likely to purchase equipment. Another circular calls attention to the fact that the first edition of the "Principles and Practices of Plumbing" will be received from the company's printers about the middle of December, and suggests the advisability of placing an order so as to be sure to get an early copy.

TO REPAIR LEAKY VALVES.

When the brass seats of globe and angle valves become worn so that they leak badly the device here illustrated will be found useful. Remove the bonnet from the valve and clamp on the iron piece, A, which is made by cutting out a piece of sheet iron or steel as at B, and bending the three legs down and tapping to receive the three thumb screws.

Valve Grinding Jig.

A bushing, C, will be required, and should have a hole just large enough to admit the valve stem. By making a number of bushings of different sizes the device may be used on different sized valves.

To grind a valve, replace the bonnet with the jig as shown and put a little emery dust and oil on the valve seat. Then turn the stem, first in one direction and then in the opposite direction, at the time applying vertical pressure to make the emery take hold. Valves ground in this way are just as good as new and unless very badly worn or cut by the steam can be easily and quickly repaired.

Electrical Advancement

ELECTRICRAL SPARKS.

Electric heaters for curling irons are needed in a modern hotel, to prevent the use of lamps and stoves by guests who must have something of the kind.

Some electrical lamps recently placed on sale by one of the department stores of New York City, giving 16 candles of light, were found to consume 67.68 watts of electrical energy. This is a consumption of 35 per cent. more of energy compared with the Edison lamps. Customers purchasing the department store product would increase their bill to that extent, without in any way adding to the volume of light they receive.

While wiring a house for electric lighting, I had occasion to run a wire between a chamber floor and the ceiling to light the chandeliers in the rooms below, writes Andrew Whiton in Popular Mechanics. The gasfitters had taken up flooring in two places about fifteen feet apart, a greater distance than I could work the wire through. An interested spectator was a big yellow tomcat, "Foxie" by name, and I concluded to impress him into the service, so I tied a chalk line around his body and pointed his nose down into the hole with directions to "scat," and he "scatted," being attracted by the light at the distant opening, where he brought the line out all right. I have since repeated the performance, and it will work every time, provided you can find the helper. If the cat is inclined to waste time under the floor, blow a little tobacco smoke into the opening where he started and he will hasten.

RECIPE FOR SOLDERING PASTE.

Soldering paste, has now come into extensive use in electrical work as a flux for soldering. This has been brought about by the requirements of the electrical trade that in certain forms of soldering no acid shall be used. For soldering copper wires for electrical conductors, solder-paste is almost exclusively used. It has also entered other fields of soldering, particularly in instances where spattering and corrosion are objectionable. Soldering paste which is now used in the electrical trades consists of a mixture of a grease and chloride of zinc. The grease which is commonly used is a petroleum residue, such as vaseline or petrolatum. Such a material is about right in consistency. The proportions which are used are as follows:—Petrolatum, 1 lb.; saturated solution chloride of zinc, 1 oz. (fluid). The use of petrolatum instead of vaseline is recommended. While they are identical in composition, the name "vaseline" is registered as a trademark and commands a higher price on this account. Petrolatum is much cheaper. The chloride of zinc solution is made by dissolving as much zinc in strong muriatic acid as it will take up. An excess of zinc should be present and all the acid neutralized. This will form a thick, oily solution. The petrolatum and chloride of zinc are mixed and thoroughly incorporated by means of a mortar and pestle or by vigorous stirring. The advantage of this soldering paste lies in the fact that it does not spatter and is not corrosive.

ELECTRIC LIGHT BULBS.

The blowing of electric-light bulbs at the present time is done by hand, and the operation is therefore slow; but a piece of machinery to do this work has been recently patented by a mechanical engineer of Toledo, Ohio. One of these machines has been experimentally constructed with four blow irons, and shows a capacity of over seven hundred bulbs per hour, but it is proposed to increase the number of blow irons to six or seven, and this will add to the output correspondingly. The necessary amount of compressed air is furnished automatically. The hot glass is thrown on the blowing irons, and as they revolve, the molds close around them, when the blowing proceeds. After the material has had a chance to cool sufficiently, the mold is opened, and the bulb dropped out into the cooling liquid. The machine is said to reduce the cost of bulb production to one-quarter the present figures. The apparatus is said to be also valuable for blowing lamp shades and similar articles.

HOUSE WITHOUT A CHIMNEY.

Will the Twentieth Century see the passing of that cumbrous destroyer of artistic symmetry in dwelling houses—a chimney? Asks the Architects' and Builders' Journal. Will it become a useless feature in the homes of the future? Stranger things have come to pass, yet we, accustomed to the methods in vogue for centuries, may have given the matter no thought. So used have we become to the employment of coal or wood for heating and cooking that an eventual release from the annoyance of smoke, ashes and dust, has never occurred to us. Yet the problem of doing away with this form of fuel has been solved and a house without a chimney has made its appearance. Electricity has made the departure from the ordinary possible. When H. W. Hillman, a prominent official in the General Electric Company's works at Schenectady, N. Y., commissioned an architect to draw plans for his handsome suburban residence, without chimney or flues, he rather astonished that gentleman until it was explained that electricity, which was to be used exclusively, rendered those adjuncts superfluous. The house was built and it has the unique distinction of being the only residence in America without a chimney. Electricity furnishes the light, supplies heat in ornamental radiators, does the cooking and operates numerous other devices of utility and comfort. It illustrates the advance made in the utilization of this comparatively unknown element. With new inventions which will lessen the cost of generation and appliances to enlarge the scope of its adaptability, electricity is destined to become a commodity of general use as a domestic as well as an industrial agent. Before the present century runs the half of its circle, chimneyless houses may, nay, will be, no novelty. The increasing cost of coal to the consumer will direct attention to a cheaper substitute which will be safe and satisfactory. This electricity will supply. New devices by which the current is controlled has minimized the danger which among the uninformed has been an objection to its use for home purposes. The masses, however, are becoming educated in the management of the safeguards about electric current, and with the exercise of ordinary intelligence it is harmless and less dangerous than coal, gas or the oils so extensively used as fuel at present. In planning buildings in the future, whether pretentious or humble, wiring for electricity will be an essential requirement, just as gas and water piping is to-day. We have scarcely entered upon the age of electricity. Looking backward to the beginning of the second half of the last century, we marvel at the wonders of electrical achievement. Gauged by the development of the past decade, we are but passing through the kindergarten period of electrical experience.

PACIFIC PIPE CO.'S PROGESS.

In Eastern Canada the extent of the trade in wooden pipe in British Columbia is hardly realized, and the enormous business being done in this direction within the short time from the organization gives some idea of the scope for future business. The Pacific Pipe Co., of Vancouver, have just completed the manufacture of 10,000 feet of 18-inch pipe for Fort William, Ont., as well as ten miles of 8-inch pipe for the same municipality. The company are now engaged on an order of 10½ miles of pipe to stand a pressure of from 300 to 500 feet head for the Canadian Pacific Railway in Alberta. This is the biggest pipe contract ever given in Canada. They are also working on an order of 6,500,000 of 24-inch pipe for the White Valley Irrigation & Power Co., at Vernon, B.C., as well as an order of about two miles of 6-inch pipe for Port Arthur. Besides these the firm has just completed installing waterworks systems for Cardston and Claresholm.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 23, 1906

Business in all kinds of steam fittings and heating supplies continues as large as ever. Another mild spell has still further enabled the plumbers and steamfitters to carry on their work, with the result that the supply houses are experiencing a tremendously busy week, this being accentuated by the rush for the last boats.

The situation in iron pipe is becoming worse and worse. Manufacturers are away behind in their orders, and there is an unusually large demand for pipe this season. It is feared that the shortage cannot be overcome, under the circumstances, for a long time to come.

RANGE BOILERS—Conditions remain unchanged, with a brisk demand, and prices steady. We quote: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—No further advances have yet occurred, although pig lead continues very firm. We still quote: 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—Business is active with discounts ruling as follows: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent.; 3½ in. to 6 in., 72½ per cent.; couplings, ½ in. to 2 in., 55 per cent.

IRON PIPE—Instead of being in any measure relieved, the shortage of iron pipe is becoming more pronounced. We quote as follows: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27; 2 inches, $36.50, discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 70 per cent., and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—We still quote as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—No material change has taken place in primary markets this week, although both lead and tin are firmer. Consequently we still quote: Bar Solder, half-and-half, guaranteed, 25.; No. 2 wiping solder, 22c.

ENAMELWARE—We give the following prices: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65 special, $18.65; plate E11 and E21 . 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, November 23, 1906

Heavy business is being done in heating supplies, although the continued shortage in iron pipe is holding back many jobs. Prices on all heating goods are very stiff, with deliveries of radiators and some styles of boilers considerably behind.

Lead lines are all very firm with advances this week of half a cent on caulking lead, which is now quoted at 6 cents, and solder, now 27 cents for half-and-half, an advance of one cent.

Range boiler stands are very short and 18 x 30 inch cast iron sinks are also scarce. Baths are well up in deliveries, but all lavatories and sinks are behind in shipments. Advances on both lavatories and sinks are considered likely to come into force shortly in keeping with the recent advance on enameled baths, caused by the tremendous jump in pig iron during the past year.

LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 6c. per pound. Traps and bends, 50 per cent. discount.

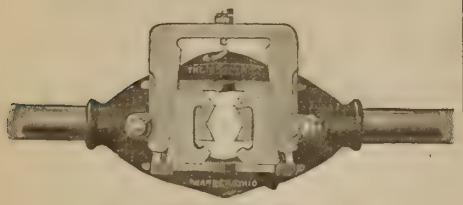
SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—Stocks are still very low. One-inch black pipe is now being quoted at $4.62, and one-inch galvanized at $6.27. Full list in current market quotations.

IRON PIPE FITTINGS — New lists are as follows: Cast iron elbows, tees, crosses, etc., 60 per cent.; cast iron plugs and bushings, 60 per cent.; flangle unions, 60 per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.

GALVANIZED IRON RANGE BOILERS—Boiler stands are scare. We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.

RADIATORS—Some shortages are reported with shipments slow. Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.



SOLDER — Quotations remain very firm as follows: Bar solder, half-and-half, guaranteed, 27c.; wiping, 24c.

ENAMELWARE—Sinks and lavatories are very scarce and advances are predicted. We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25: plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

PROTECTING PIPES FROM FREEZING.

The means generally employed to prevent pipes from freezing, says La Technologie Sanitaire, consists in the use of coatings which protect against cold, and non-conductors of heat, such as straw, cork, and oakum. There are, however, more effective agents, also practicable for use in thawing frozen pipes. The pipes are first covered with a thin layer of straw, sawdust or tanbark. Pieces of unslaked lime as large as the fist are then packed around them, and enveloped in another layer of some non-conducting material, straw, oakum, or cork, and the whole is held firmly together by means of a wrapping of coarse linen. The first layer is for the purpose of protecting the pipes from the action of the fresh lime, which would cause the metal to rust. The lime draws moisture from the air and the materials surrounding it, and is made warm by means of the chemical reaction. The outer covering allows only a small amount of atmospheric air to pass through, so that the lime remains unslaked to keep up the temperature during an entire winter. This method, with slight variations, can be applied to the thawing out of frozen pipes. For this purpose somewhat more lime is to be packed around the pipes, and water poured over it. The heat generated will melt the ice in the pipes. The ground in winter can also be thawed out in this way, when, it is desired to lift paving stones without breaking.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

THE BATTLEFIELD OF BUSINESS

is usually in the office or counting house. The successful business man to-day is not the man who burns the midnight oil toiling over his books It is the man who is putting system into his business and applying it at every turn.

THE CRAIN CONTINUOUS SYSTEMS

are up-to-the-minute for the wholesaler, manufacturer or retail trader. Can you get a statement in an hour's notice, or does some clerk have to stay up all night to dig it out of antiquated records?

Before placing your order for next year's books write us. It will pay you.

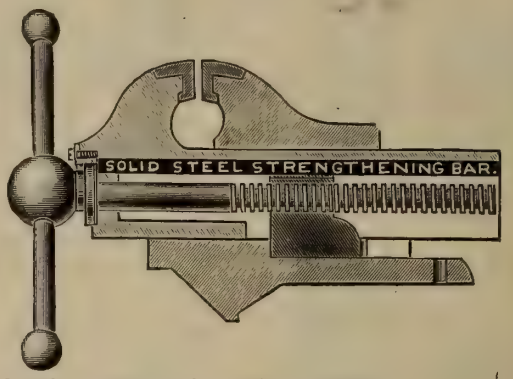
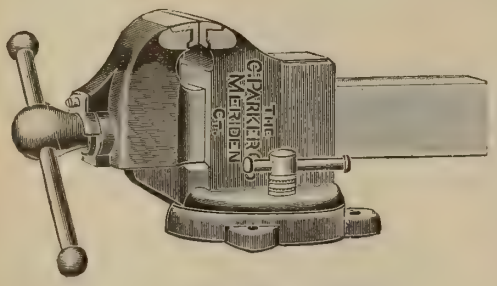
We Ship promptly



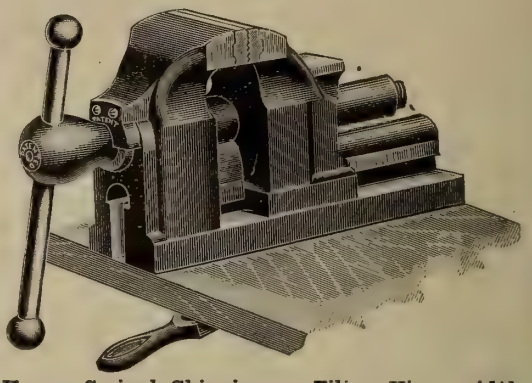
Stationary Machinist Vise, made in 6 sizes with jaws 3¼-in. to 6¼-in.



Semi-Steel has a strength several thousand pounds greater than cast iron.

That is why it is used in Parker Vises.

The Parker Vises are made stronger in the weak part of all vises than any other vises are made.



Showing manner in which Parker Vises are strengthened by a solid steel bar.

Same as above only made to swivel in any direction.

The sliding or moving jaw is the part most liable to break in any vise.

The Parker Company has provided against that danger by casting in the sliding jaw a solid steel bar strengthener. This improvement makes the jaw practically unbreakable. It is found only in Parker Vises.

Heavy Swivel Chipping or Filing Vise, width of jaws 5 inches.

Parker Vises are made in all approved shapes and sizes for machinists, pipe fitters, wood workers, etc.

We keep a full line of Parker and other makes of vises.

GALVANIZING AND TINNING

THE CANADA METAL CO.
TORONTO, ONTARIO.

Persons addressing advertisers will kindly mention having seen this advertisement in Hardware and Metal.

No Horse Nails in the World

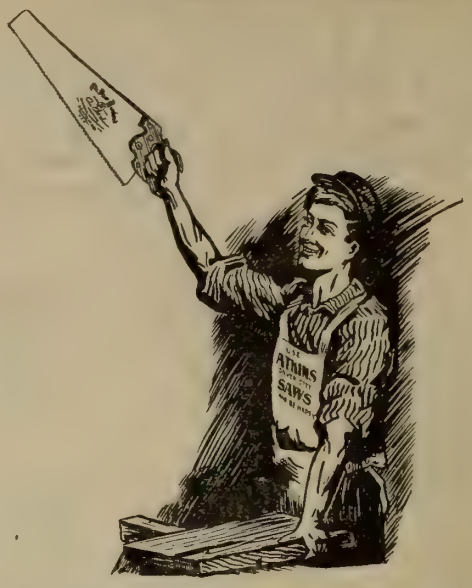
are made of better material than is used for the "C" brand. It is a special quality of Swedish Charcoal Steel Nail Rods, which have the highest tensile strength combined with great toughness. This is demonstrated by the average tests, which shows that test pieces of these rods will stretch over one-third of their length, and require a pulling force equal to 55,000 pounds per square inch before breaking.

No Horse Nails in the World

have ever, or do now excel the "C" brand in any test of quality impartially and scientifically applied. We challenge comparison with the product of any maker.

No Horse Nails in the World

will drive easier, or make better clinches, or hold the shoes on longer. The fine hardened bevel points, penetrate the hardest hoofs easily. You will never bend or buckle a "C" nail in driving, or find split or crooked nails.



No Horse Nails in the World

are better entitled to the preference of the Canadian merchant for reasons of quality and fair price. They may be obtained on order from all the leading Hardware Merchants in Canada. If not obtainable on request, we shall supply you direct. Samples and quotations furnished on application.

We Can Deliver These Stoves

WITH OVEN—230 Series

To be exact, we can ship baseburners the same day we receive your order.

"Famous" baseburners are made in two styles and five sizes.

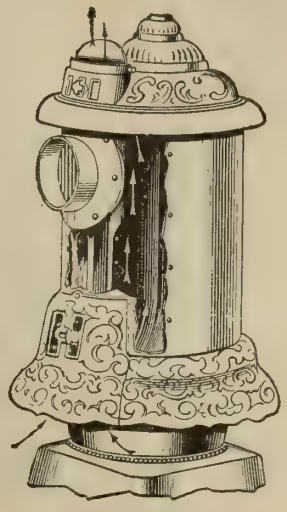
The No. 230 series is a heavy, durable stove, with a three flue construction which distinguishes it from nearly all other makes. Is made in three sizes, for parlor and two with oven.

Our No. 113 series is a lighter stove, but well made and excellent value for the money. Is made in two sizes for parlor and one with oven.

You can sell either of these lines and feel satisfied that your customers are getting the best that experience and skill can build.

The McClary Mfg. Co.

LONDON, TORONTO, MONTREAL, WINNIPEG, VANCOUVER, ST. JOHN, HAMILTON, CALGARY



LARGEST MANUFACTURERS UNDER THE BRITISH FLAG OF STOVES, RANGES, FURNACES, ETC.

The "Good Cheer" Oak

NEW SERIES

Single and Double Heater

SECTIONAL VIEW.

Supplied with Feeder if Required

REAR VIEW.

Made in two sizes —either Single or Double Heater

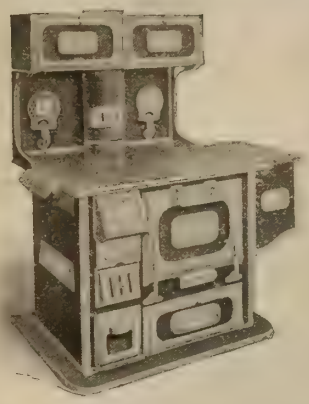
No. 54, 13½ in. Firepot

No. 56, 15½ in. Firepot

This handsome Oak exactly fills the want between the low-priced heater and the more expensive base burner. The double-heater attachment we are able to include at a very small advance over price of a single-heater Oak, and is a feature which will be appreciated. Its construction as illustrated in the Sectional and Rear Views shows what a powerful heating adjunct it is.

Body of Stove is of heavy polished steel, handsomely nickel trimmed. Large feed door with good sized mica lights, making it a very cheerful stove, while screw dampers in both upper and lower doors make it easy to regulate the fire.

A shaking-ring draw centre grate is provided, as also a good sized ash pan.



THE JAMES STEWART MFG. CO. Limited

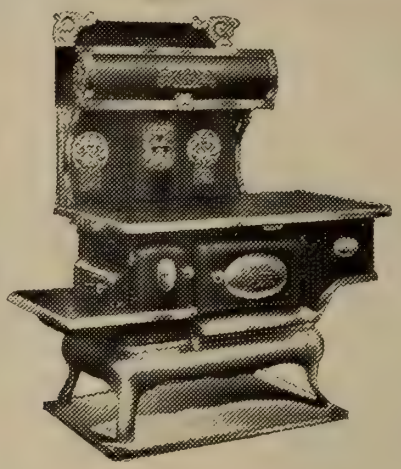
WOODSTOCK, ONT.

SURE AS YOU'RE A FOOT HIGH!

YOU ARE LOSING LOTS OF GOOD MONEY IF YOU HAVEN'T

The Joy Malleable Range

You see, it's this way: "**THE JOY**" has many features that are "head and shoulders" above any orher range made in Canada, without mentioning **Malleable Iron** at all; and when these features, and the fact that the Tops, Doors, Door Frames, Drafts, Hinges, Dampers, Damper Rods, Pouch Feed and many other parts are made of malleable iron—well—there's no comparison—that's all there is about it, and wheu one gets into a community the demand instantly begins. The Peddlers have created the demand for **Malleable Ranges** in your territory.



We have made it possible for you to get this business, by making a **Superior Malleable Range** at a lower price. It's up to you now. Will you grasp the opportunity, or by indifference or lack of energy permit this trade—and **good money**—to go to others?

Increase Your Oil Profits

Oil has long been a source of little profit, if not a loss to all who handle it. This is on account of the losses which eat away the difference between the cost and the selling price.

A Bowser Oil Storage Outfit does increase your oil profits because it stops all losses, such as those resulting from leaks, evaporation, waste, over measurement, etc. It does increase your oil profits because it saves time and labor. It does increase your oil profits because it keeps the store clean and is accurate in measurement, which things please old customers and bring new ones.

Remember too, the Bowser costs you nothing, because it is paid for by the money you are now losing.

If you want to make more money on your oil business, write to-day for catalog V.

The Making of a System

To be able to design a system that will simplify and expedite the handling of business details is one important item, and to have facilities that will manufacture these designed systems with celerity and accuracy, is another no less important.

We have entirely covered both requirements. Our factory, the largest of its kind in the British Empire, is an ideal one—plenty of air, room and light. It is equipped with the most modern, labor-saving machinery, driven by individual motors, every part of the plant being in the hands of skilled artisans, making possible the quick and unerring handling of any work.

One battery of Ruling Machines in our Canadian factory.

One battery of presses in our Canadian factory.

The staff of experts who design our Systems for Business, have been educated in the great school of Practical Experience, and their work for our ten thousand customers is a guarantee that *your* work will be properly executed if entrusted to us.

It doesn't matter whether it is wholesale, manufacturing, retail, financial, or a professional business, we have systems for any one of them that will simplify and make methodical the accounting, facilitating the general work of handling business details. Write us to-day. One of our experts is somewhere near you, and he knows the systematizing business down to the ground.

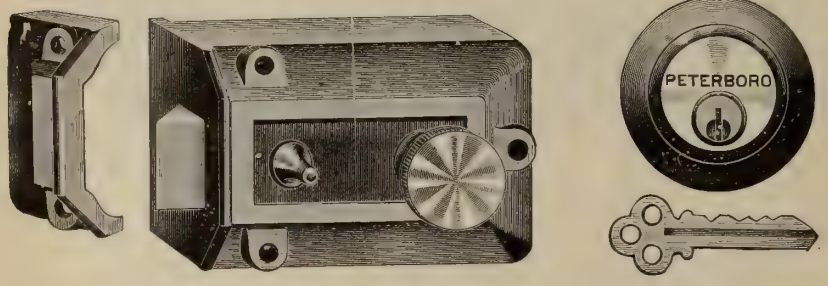
A SHABBY SALESMAN

belittles the merit of his product. He is actually handicapped in explaining the features of his goods—indeed, he can hardly expect to get a hearing from the man who signs the orders.

Just think over the impression made on you by a traveller when he enters your store. If he is neatly dressed, looks pleasant and appears to have confidence in his goods, the chances are he travels for a good firm.

Goods sampled on your Shelf Boxes are

SILENT SALESMEN



if they have a neat and attractive appearance, they will remind customers of many articles they had not thought of buying. Instal a good system of Shelf Boxes and there will be no more waste time looking for goods; no more dissatisfaction of customers who could not be promptly waited on.

The STRONGEST and NEATEST Shelf Box on the market is **The Bennett Steel Hardware Shelf Box.** It has galvanized steel sides and bottom and oak fronts, hard oil finish. Having steel sides and bottom, it saves 20 per cent. shelf room over the old wooden box. Each box has a price card fitted into a depression on side, so that you can mark the cost and selling price of goods.

GOSSIP AND SHOP TALK

"You are turning out a very practical trade newspaper," said one of the most experienced trade journalists in Canada about Hardware and Metal a fortnight ago, and this comment, coming about the same time as a friendly criticism from a subscriber in one of the large cities in Ontario, that we were, in his opinion, devoting too much space to our Plumbing and Steamfitting department, set the editor at work comparing the present paper with the one published a year and two years ago.

The growth of the paper has been a steady one, the number of pages having increased from 56 to 60 in 1904, to from 72 to 80 in 1906. It is time that we are devoting additional space to our plumbing section, but the increased size of the paper and the dropping of the Machinery Department when Canadian Machinery was established two years ago, has given plenty of opportunity for improving the plumbing and other sections without in the least curtailing the space devoted to the purely hardware reading matter.

* * *

The truth is, that the Plumbing Department is read with keen interest by the great majority of the hardware merchants in the smaller towns and cities, in every part of Canada, plumbing and steamfitting being a branch of the hardware business everywhere, except in the large cities. That our Plumbing Section is considered both useful and valuable to hardware merchants is illustrated by the fact that the prize-winning answers received in reply to the question recently asked on hot water heating, were written by hardware merchants, who accept plumbing and heating contracts and look to Hardware and Metal for technical information on these subjects.

Rather than considering the Plumbing and Steamfitting Department one which is receiving too much attention, we are arranging to further strengthen it, and expect shortly to announce the publication of a very interesting series of practical articles on heating and sanitation. The author will be a Canadian, and his articles will alternate with those written by Mr. Quinn and others who are now contributing to these pages.

* * *

The enlargement of the paper during the past couple of years, has enabled us to establish many new departments and improve the paper in many ways, and the space devoted to market reports, has also been increased by about two pages during the past two years, and these pages made more valuable by the addition of the "Markets in Brief" on the first page of the reports, and by the better classification of the Current Market Quotations at the back of the paper.

It may not be considered amiss, to mention here, a nice compliment to Hardware and Metal, passed by a well-known hardwareman a few days ago. This gentleman, who is the sales manager of one of the largest jobbing houses in Canada, dropped in for a chat with our Montreal editor, and, happened to pick up a copy of Hardware and Metal, which lay on the desk. "This paper is certainly improving all the time" said he, as he turned over the pages. The features which struck him as being particularly good were, the listing of market changes every week, and the attention which has been given to window and interior displays. Another thing which has been appreciated, is the monthly article on "What to do the Following Month." Many a hardwareman has received inspirations from these hints, and there are few readers who do not adopt from them, ideas which improve their selling, buying and display methods.

* * *

The publishers of Hardware and Metal, are sufficiently human to enjoy the nice things which are said about it. Scarcely a day goes past but what we receive a kind letter from a subscriber or advertiser in some part of the country. We appreciate these, and, far from making us content to rest on our oars, they spur us on to greater exertions. We are constantly bending our energies to improving the paper, and we are glad to know when a new idea in its make-up is approved by our readers. Friendly criticism is another thing which helps us. It always pleases us to receive a letter in this view, and they do come occasionally. Even our best endeavors sometimes fail—whether the fault lie with the writer or the printer—and we feel grateful to those friends who call our attention to the fact. This is especially true of our Current Market Quotations, where we endeavor to give correct quotations on a multiplicity of articles. We try hard to keep them all absolutely reliable, but, in these days of kaleidoscopic market changes, there must be some that escape us. We invite our readers to keep us posted in these matters, and tell us of our mistakes.

* * *

The keen interest taken in our market reports by jobbers, travelers and retailers, and even by clerks is constantly kept before us by the numerous hints we receive from all of these sources, all helping to make the weekly reports correctly outline the existing situation, and allowing us at times to make forecasts of the probable tendencies of the markets, through which buyers can often make large savings. Recent advances in stoves, white lead, mixed paints, metals, shelf hardware and plumbing materials have been correctly forecasted in our reports.

An incident showing how closely our reports are watched occurred last month. Unavoidable circumstances had temporarily disorganized our mechanical department and several errors slipped past the proofreader uncorrected. An advance on white lead was reported in our "Markets in Brief," "Current Market Quotations," and in the introduction to the Paint Markets, but the figures were left unchanged under the white lead heading. The first mail brought a letter from a large jobber, and early Saturday morning a large paint manufacturer telephoned drawing our attention to the error. "It will be hard for our travelers to sell the retail trade at the advanced prices," said he "as the retailers rely largely on the prices you quote.

Neither of these firms were advertisers at the time, but one has since placed a yearly order and the other will probably do so before New Years. A paper which they and their travelers find so valuable in its market reports, is equally valuable as a medium through which to make trade announcements.

* * *

A word about our advertising pages. During the past year marked improvements have been made in the arrangement and grouping of the advertising matter, the publishers aiming to improve the general appearance of the paper and make the advertising pages even more interesting to the retail buyer than the editorial sections.

The "Buyers' Guide," which we are now preparing to send to every buyer of hardware in Canada, in the spring of 1907, will be a valuable reference book for use in connection with the seasonable announcements made from week to week in the advertising pages. The preliminary proof sheets recently issued have brought in many letters of commendation, as well as some frank criticism and pertinent suggestions. Every advertiser or reader is invited to forward information regarding additional firms or articles used on the Canadian market, and not listed in the recent publication.

* * *

The Gurney-Massey Co., Montreal, one of the largest heating firms in Canada's metropolis, wrote a month ago:

" We think that Hardware and Metal is supplying a long-felt want in the hardware and allied trades, and, since you have added your Plumbing and Heating Department, it has made it more valuable than ever to us. We take great interest in reading your heating problems, and think they cannot fail to be of great benefit to the trade at large."

* * *

Leroy J. Chown, formerly of Belleville, but who with his father recently purchased a hardware business at Edmonton, Alberta, recently wrote:

"We have always taken your paper in the east, and I feel lost here without it. Every hardwareman should be a subscriber."

* * *

W. G. Pow, who is again managing W. R. Hobbs' retail hardware store, at Tillsonburg, but who was on the road for the Hobbs Mfg. Co., London, during the past summer, wrote a few weeks ago:

"Although now a traveler and no longer engaged in window dressing, I still appreciate the usefulness of Hardware and Metal, and as surely as it is an absolute necessity amongst hardwaremen, so is good window dressing an absolute necessity for prosperity, and, in my opinion, the cheapest method of advertising."

AMONGST THE SALESMEN

A TRAVELER'S GOOD SHOOTING.

William Linton, 50 Colborne street, Toronto, who represents the Standard Ideal Sanitary Manufacturing Co., the Star Iron Co., and the J. C. McLaren Belting Co., in Western Ontario, brought back the fine souvenirs shown in the illustration with him on his return from a hunting tour a fortnight ago. Mr. Linton, along with a cousin of the same name from Aurora, and A. Poynton, of the Toronto Water Works, visited the region to the south of Lake Wahnapitae, about 100 miles northwest of North Bay, two of the party going in by wagon over long unused pole roads, while Mr. Linton and one other went up the Wahnapitae River in a canoe having to spend the night in the woods owing to the delay of the wagon party in reaching the rendezvous. Arraving

Wm. Linton, a Western Ontario Traveler and his Hunting Trophies.

in camp about noon no time was lost in going after big game as by 3 o'clock the big bull moose, whose light colored hide can be seen in the photo, was to the credit of the hunters, Mr. Linton taking the meat and body but giving the head to his cousin, W. Linton, of Aurora. The moose was four years old and weighed about 1,000 pounds. Other game falling to the party's marksmanship included the large lynx shown in the photo, several deer and numerous small game. The four bears were trapped, but the large 7-foot one provided some excitement before giving up the fight. The loss of two valuable dogs, handicapped the hunters, but Mr. Linton says he is going back again next year after a larger head, and if it wasn't for the existence of hunting laws would promise to provide all his friends with moose heads or choice cuts of roast venison or moose.

TRAVELER RESTED IN PEACE.

A traveling salesman died suddenly in Pittsburg, Pa., and some of his friends telegraphed the undertaker an order to make a large wreath. Investigation showed that the telegram ordering the wreath read as follows:

"'Rest in peace,' on both sides of the ribbon; if there should be room: 'We shall meet in heaven.'"

The undertaker was out of town, and the new assistant handled the job. It was a startling floral piece which turned up at the funeral. The ribbon was extra wide, and it bore the inscription:

"Rest in peace on both sides, and if there is room we shall meet in heaven."

CLERKS SHOULD STUDY MARKETS

"An intimate knowledge of the ruling prices of the wholesale market is an invaluable aid to the training of every ambitious hardware clerk," writes a clerk in a retail hardware store in Northern Ontario. "Even though he may be filling a subordinate position such knowledge will still be a lasting benefit in that it serves as a guide in the placing of orders with the wholesale house, makes him more valuable to his employer, and enables him to discuss the relative cost of wares as well as the rise and fall of prices with prospective buyers and give them the advice born of close study of the subject. The clerk possesing such knowledge is thus enabled to speak with a confidence that cannot help but impress his listeners and will prove a better salesman than one whose knowledge of the business is limited to the shelves and counters of his employer's store. This is especially true in a country such as Canada, offering such a wide scope for the operations of business men who are not afraid of an up-hill fight."

"There are a few hardware clerks who do not look forward to starting business for themselves. It is when thus thrown upon their own resources (possibly with strong opposition), that an intimate knowledge of the market quotations in his particular line will be of lasting benefit and may often save him from serious losses. He will be able to exercise better judgment in his dealings with the representatives of the wholesale house. Good fellows as a rule but not always too scrupulous in pushing sales. It will not be long after starting in business of his own that the young hardwaremen will thank his stars that he was seized of the idea to keep close tab on the markets and thus fit himself for a scuccessful career as a hardware merchant.

VALUE OF APPEARANCES.

I used to be a clerk in a shoe store, said a hardware traveler the other day. One day the proprietor stepped up to me and said: "If a customer should come in and ask if we sold shoe blacking, you'd say yes, wouldn't you?"

"Yes, sir, of course."

"Well, do you know what I'd say if I were that customer?" he asked.

I said I didn't know.

"I'd ask you," the proprietor replied, "why in the world you don't advertise the fact on your own shoes?"

I "tumbled" immediately, and after that I kept a brilliant polish on my shoes and began to pay much more attention to my personal appearance during business hours, and I soon saw it paid to do so.

TRAVELERS ELECT OFFICERS.

Hardwaremen will see the names of many old friends in the list of names of candidates for office in the Commercial Travelers Association. The annual meeting will be held in St. George's Hall, Toronto, on Dec. 27, when the results of the ballot will be declared. The following were elected by acclamation:

President, Lewis A. Howard; First Vice-President, Geo. West; Second Vice-President, R. Gemmell. Two nominations were made for the treasurership, viz., E. Fielding and John H. Kenney. Brantford Board—Directors, Messrs. J. S. Hamilton, D. J. Waterous. Kingston Board—Directors, Messrs. W. H. Graham, W. S. R. Murch. Winnipeg Board—Vice-President, Mr. Hyman Miller; director W. M. Jackman. Vancouver Board—Directors, Messrs. R. Martin, J. A. McMaster. Brockville Board—Director, M. Moore.

The above boards were elected by acclamation and the following nominations were made:

Directors for Toronto Board—Messrs. J. P. Balfour, William Boone, James G. Cane, W. A. Cockburn, W. M. Fielding, J. M. Fairfield, P. M. Gloff, J. H. Lumbers, W. J. Micks, George W. Moore, Donald Morrison, James McLaughlin, A. C. Rogers, S. M. Sterling, C. J. Tuthill, J. H. Wildfong. Nine to be elected.

Hamilton Board—First Vice-Presi-

dent, John H. Herring, Second Vice-President, Messrs. E. J. Fenwick, and R. M. Stuart, one to be elected; Directors, Messrs. George G. Austin, W. H. Dean, Arthur F. Hatch, E. E. W. Moore, George A. Matheson, George M. McGregor, P. H. Sommerville, J. Stoneman, J. R. Stewart, H. G. Wright, six to be elected.

Guelph Board—Vice-President, C. Auld; Director, Messrs. F. C. Burn, A. Hill, Adam Taylor, one to be elected.

Montreal Board—Vice-President S. O. Shorley; Director, Messrs. D. Adair, Wm. Cauldwell, Wm. Creighton, one to be elected.

Berlin Board—Director, Messrs. Henry Brown, Fred Doering, A. Foster, J. Knauff, W. J. Moody, one to be elected.

N.-W. C. TRAVELERS MEET.

The Northwest Commercial Travelers' Assoication held their annual general

J. E. McROBIE
President, N.W.C. Travellers' Association.

meeting in Winnipeg on the evening of Saturday, Nov. 24th. President, D. J. Dyson, presided and there were present about 40 travelers.

Officers were nominated as follows:

President, J. E. McRobie, acclamation; Vice-President, Geo. Wilson, acclamation; Treasurer, L. C. MacIntyre, acclamation. Vice-President for Calgary, H. W. White, E. Dagg, A. McKillop; Vice-President for Edmonton, F. M. Morgan; Vice-President for Regina, P. Cooper; Vice-President for Victoria, F. A. Richardson; Vice-President for Victoria, C. W. Bishop, M. H. Dobie, one to be elected. Directors for Vancouver, T. J. Stephens, G. W. Adams, F. C. Harris, H. W. Duncan, W. I. Linton, Two to be elected. Director for Victoria, H. Erb, F. J. Hall. One to be elected. Director for New Westminster, Fred. J. Lynch. Director for Kootenay, Geo. Munn. Auditor, T. Harry Webb. Directors for Winnipeg (11 to be eleced), A. S. Lock, F. H. Nesbitt, T. Montgomery, C. Holden, E. L. Thomas, Geo. Barrett, A. E. Wayte, E. Nicholson, H. J. Clare, J. Perry, J. E. Holland, W. W. Bole, F. W. Adams, W. Stitt. Eleven of the above and D. J. Dyson will comprise the board of directors for 1907 for Winnipeg.

The annual meeting will be held on Dec. 15th, when the results of the elections will be announced.

KEEPING SALESMEN WAITING.

A St. Paul traveling man recently stated that a good buyer never keeps a salesman waiting if it is possible not to, and yet it is true that every salesman losses on an average of two and a half hours each day waiting on buyers. The cost of selling goods is figured in making the selling price and buyers have to pay for it, so that if a salesman's time is lost some one has to stand the loss, and although most buyers would be very much surprised to hear that they pay for it, it is nevertheless true. There are over 100,000 salesmen on the road, whose salary and expense average $10 per day, and their lost time is therefore valued at least at $250,000 a day, which enormous sum must be paid by the buyers, although they get absolutely nothing for it.

BE CORDIAL TO CUSTOMERS.

Clerks should always be polite and discreet. An aggregation of clerks who are "flip" with customers and talk about them behind their backs, will soon queer any business. The atmosphere of a store should always be genuinely cordial towards customers.

ACCEPTED NEW POSITION.

D. Gunn, of Manitou, Man., has accepted a position with Wilson and Wilson, hardware merchants, Balgonie, Sask.

CALL ATTENTION TO DISPLAY.

One of the largest of the Chicago retailers recently placed a large card in the newspapers calling attention to his windows. The idea is an excellent one. The card stated that it was to the interest of everyone who was at all interested in good goods at low prices to watch the windows, as there were many goods shown there all the time that were not advertised in the newspapers. Attention was also called to the fact that the store devoted a large amount of care and money to the decoration of its windows, and that they were well worth looking at. This is a good idea to put into practice when it is desired to call particular attention to some article or line of goods which you wish to push, or when there is a special sale on. Make the window, the newspaper advertising and the interior of the store all join forces in booming the special event, whatever it may be.

SUCCESSFUL JOBBERS AND SALESMEN.

No. 31.

F. W. S. Davis, whose portrait appears this week is a man who has run the gamut of hardware and paint experience, beginning as a youth in his native town, Mitchell, Ont., in the employ of J. G. Jones. Mr. Davis believed in getting experience and after serving his time in Mitchell, went to Parkhill where he was employed with H. Bishop. He spent a little time in Arthur and then went with T. J. Morton, of Brantford, for three years. Tillsonburg was the next place, where for three years he worked for what was then the firm of Foster & Hobbs. From Tillsonburg he came to

F. W. S. DAVIS, Toronto.

Representing Sanderson Pearcy & Co. in Western Ontario.

Sanderson, Pearcy & Co., Toronto, with which firm he has spent the last twelve years.

Mr. Davis' retail experience has stood him in good stead on the road, and it, together with his traveling experience, has made him a most successful salesman. When the Sanderson, Pearcy Co. was incorporated some months ago, Mr. Davis was taken into the company so that he has now a further incentive to spur him on in the work he has so long been associated with. Mr. Davis' present ground is the Niagara Peninsular, up to Owen Sound, Wiarton and Southampton lines, and the district east of Port Hope and Tweed.

WANTED to buy a good hardware business about $4,000 stock. Nothing but an A1 business considered. Box 10 HARDWARE AND METAL, Winnipeg. [51]

EFFECTIVE ADVERTISING

WELL WRITTEN—POOR DISPLAY.

A. A. Hunt, of Hunt & Ross, Abernethy, Sask., has sent a five-inch double column ad for criticism by us. This firm shows good judgment in the matter used, in the size of the space paid for, and in the position on the top of column on the corner of a page, a medium sized black border adding strength and attracting attention.

The body matter is an effective talk about pumps. The ad writer did his work well, but he evidently turned it over to the printer without sufficient instructions, as the face of the ad is almost entirely lost by the lack of strength in the heading, "A Little Talk About Pumps." The firm name at the bottom is in good strong type, but it would be strengthened by the addition of an address line above the motto: 'A square deal guaranteed to all who trade here." As it stands, there is nothing to show where the store is located.

The talk on pumps is educative and interesting, and should sell goods. Too few ads of this kind appear—possibly for the reason that most manufacturers do not set a good example by using the trade paper to explain the merits of their goods. Such talks might well supplant many of the ads made up largely of cuts to good advantage, and the retailer learning something practical about the goods, would be better able to "talk quality" over the counter and in his local newspaper advertising.

Hunt & Ross' pump talk is as follows:

"The dealer who selects a first-class article with real merit and pushes it, invariably succeeds, our success in the pump business has proved this to us. In selecting the celebrated Myer's pumps as our selling line we found that they had many special patented features which their competitors and imitators could not provide in their pumps, for instance the Myers people are the originators of the Glass valve seat, one improvement which has gained them a world-wide distinction, unlike the iron valve seat this is absolutely non-consoive and adds many years to the life of a pump, and, without it no pump is perfect.

"The material used in the construction of the Myer's pumps is the very best that can be procured for the purpose, the stand is of the best cast iron and steel, the cylinder of seamless drawn brass or brass-lined iron, and the leathers which are the life of a pump, of selected oak tanned leather. 'Not how cheap but how good' is the motto of the Myers people, and considering the amount of wear a pump is subjected to, is not this motto a good one.

When buying why not get the best?"

HOW ORILLIA MERCHANTS ADVERTISE.

Three prominent hardware merchants of Orillia advertised stoves last week in one of their local papers. This is a timely line to put before the people at this time, as stoves should sell well with a little encouragement at this season, and as the hardware merchants need all possible floor space for their Christmas display.

The first of the three hardware ads. in the Orillia Times, is a striking advertisement made by the Orillia Hardware Company, which starts off with the head line, "Now is your chance," and goes on to say what the chance is, "250 stoves and ranges to choose from," and further explaining:

"These stoves we bought before the advance took place and we will give our customers the advantage of the largest assortment and lowest prices north of Toronto. We take old stoves in exchange. Don't delay in making your choice, etc.

Their different branches, hardware, plumbing, heating, and metal work, are merely referred to above the firms name at the bottom. The only drawback to their ad., which is 7 x 9 inches in size, is that too much room is taken up with two cuts of interior and exterior views of their store. These cuts would have been more effective used with a reading matter write-up on one of the reading pages.

Gilpin Bros., also, have a very effective ad. of 9 x 13 inches with several cuts of stoves arranged very attractively. Starting off with the head line, "Stoves—some very special bargains," continuing to state why sale is being made.

"We are making a clearing sale of stoves to give the needed room for our immense Christmas stock, which will soon be pressing for space. Buy now and save money. Here are some particulars to help you judge the unusual values."

This ad. on the whole is very attractively displayed, good use being made of large space covered by it. Their ad. should bring good results.

Another is that of Messrs. MacNab Bros., which is 5 x 7 inches, with a large cut of about 4 x 5 inches. The cut used was much too large, making the reading matter appear insignificant. "The Happy Though Range Has Every Good Quality" is brought out in large display type followed by the paragraph:

"If every housewife knew how easy cooking is made by the use of the Happy Thought; how much time, trouble, and labor saved, she would use no other. The evenly heated oven, answering instantly to the action of the dampers, makes cooking a delight and not a labor," etc.

While the reading matter is very good it would have been much better had a smaller cut been used and more display given the body matter with some catchy head line such as "Struck with a Happy Thought," followed by the arguments as set forth above.

PUSHING STOVE SALES.

Keep on booming stoves in the advertising columns these busy days, where the returns are so quickly evidenced. In retail advertising the dealer should not have to question the value of this or that advertisement very long. In a town where papers are issued weekly ads. should be changed every issue. Use cuts freely, but not to overcrowd the reading matter, leave the arrangement of the cuts and general matter to the printer, unless you are an experienced ad. writer.

Another good way to advertise is by sending post cards telling when some special sale of seasonable goods will take place. Mention special inducements, calling attention to some article in stock absolutely new and desirable, that will be placed on sale on a certain day, that prior to the date set the complete stock of goods referred to will remain intact for inspection, but that orders will be booked for delivery after the opening sale. This plan should only be worked with something very attractive. If careful in making the selections, good results will be obtained.

One of the strongest plays in advertising is to attract the attention with something that is so cheap that it creates a desire on the part of the shopper to have a look at it. Then the merchant gets in his fine work and turns attention from the cheap article to some higher priced article and makes a much larger profit. This is one reason why every advertisement should have leaders in it. All that you can possibly expect from an advertisement is that it will bring customers to your establishment, that it will bring inquiries as to goods advertised. The rest will depend upon the salesman to display his art.

When there is little doing, the merchant should get out among the trade. This is another way of advertising that costs but little money and brings the best possible results. Also do not forget the word of mouth advertising which will come only from satisfied customers, who have bought goods at right prices.

In towns where a lot of farm trade is handled, the chief desire among farmers is to procure goods at a fair price, quality not appearing to him as strongly as dollars and cents, and quantity, counting in a great many cases, over quality. So in your advertising in local papers, which will no doubt have a good circulation throughout the rural districs, you must always remember to have seasonable goods very prominently mentioned and bring out any special features of the sale.

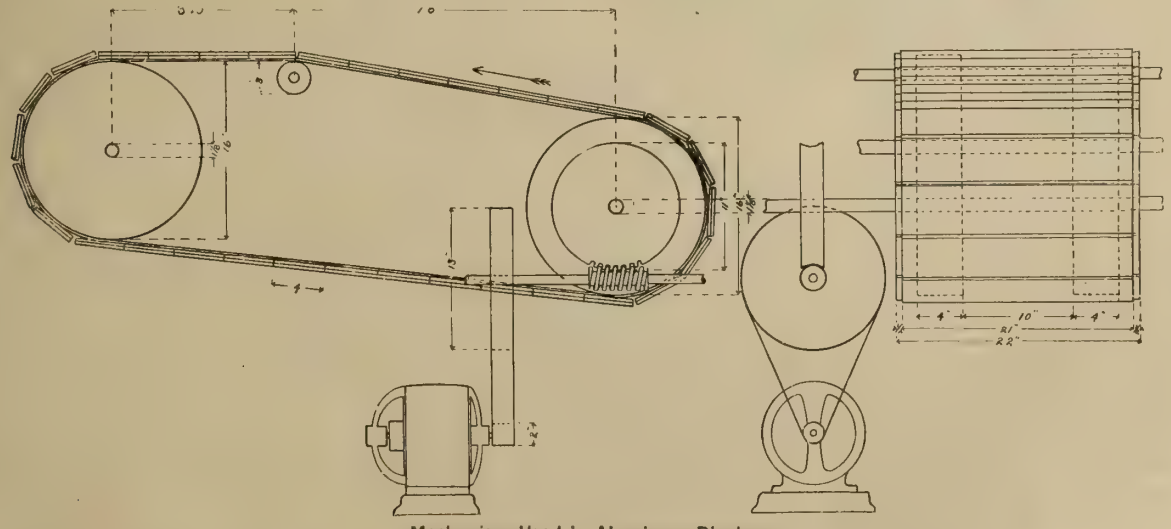
WINDOW AND INTERIOR DISPLAYS

A TRAVELLING WINDOW.

In the field of advertising and display it might seem that up-to-date merchants had exhausted the possibilities in the way of electric light, signs, etc. It remained, however, for an ingenious and enterprising Cleveland merchant to discover a way of multiplying his available window display space by four—a seeming impossibility. This is how he did it.

The window floor was arranged so that it revolved like an endless chain over two drums at either end; the window floor extending back into the store the depth of the window and being separated by a black velvet cloth. The different aluminum articles—some 200 in number—were wired to the moving window floor, and thus produced such a unique and striking effect as to challenge the attention of large numbers of pedestrians. Before this device was installed, but fifty pieces could be shown, and that in the old-time stationary style.

This enterprising merchant has "blased a new trail" in the window display line, which merchants in many other lines of business may find it to their advantage to employ. The device was home-made, simple in design, inexpensive and driven by a small electric motor concealed below the floor.



The accompanying photographs, secured under adverse reflecting conditions, show the general appearance of this novel arrangement. The detailed sketches show accurately the mechanism.

Small Window Space Doubled.

Endless Chain Moving Display.

Mechanism Used in Aluminum Display.

LIGHTING DISPLAY WINDOWS.

How to light the show window to the best advantage is often a difficult problem. In former times, before the incandescent electric lamp came into general use and before the various modern systems of gasoline, kerosene and acetylene lighting had been perfected, the store keeper hung in the centre of his window a big kerosene lamp, and everybody was satisfied. To-day the modern show window is a perfect blaze of light, which shines on the goods displayed and not in the eyes of the window gazer.

One of our exchanges recently published two photographs showing right and wrong methods of lighting windows. In one case the lights affected the eyes and instead of being encouraged to look at the display in the window were forced to look the other way. The second illustration showed shaded lights, the rays of which were cast in a flood upon the articles in the window, the effect on observers being to attract their attention and, as not a light glare was visible, to hold it for an indefinite time.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

Officers Retail Hardware and Stove Dealers' Association of Western Canada:

President—A. J. Falconer, Deloraine.
First Vice-President—J. B Curran, Brandon.
Second Vice-President—W. M. Gordon, Winnipeg.
Secretary-Treasurer—J. E. McRobie, Winnipeg.
Executive—Alberta, A. E Clements, Olds; C. F. Comer, Calgary; A. R. Auger, Okotoks.
Manitoba—H. S. Price, Boissevain; A. P. Macdonald, Winnipeg; O. Gilmer, Winnipeg.
Saskatchewan—G. K. Smith, Moose Jaw; S. A. Clark, Saskatoon; J. R. Fox, Weyburn.
Officers Western Board (elected by general merchants and hardwaremen in joint session): President, W. G. McLaren, Souris, Man.; vice-president, G. K. Smith, Moose Jaw, Sask.; H. C. Hamelin, Winnipeg, Man.; sec etary, W. A. Coulson, Winnipeg, Man.; treasurer, J. E. McRobie, Winnipeg, Man.; auditor, J. A. Lindsay, Winnipeg. Man.
Association offices, 53 Scott building, Main street, Winnipeg.

Officers Ontario Retail Hardware and Stove Dealers' Association:

President—A. W. Humphries, Parkhill.
1st Vice-President—W. G. Scott, Mount Forest.
2nd Vice-President—J. R. Hambly, Barrie.

Secretary—Weston Wrigley, 10 Front St. East, Toronto.
Executive Committee—The officers and J. W. Peart, St. Mary's; M. R. Marshall, Dunnville; D. Brocklebank, Arthur; F. W. Jeffery, Midland; E. P. Paulin, Goderich, and Frank Taylor, Carleton Place.
Auditors—J. W. Peacock and C. F. Moorhouse, Toronto.

GET READY FOR CONVENTIONS.

Are the Association members in Ontario, and in the West, taking advantage, as they should, of the influence which their respective trade organizations can exert in their behalf?

A case in point. Some time ago, a hardware dealer in the far west, a member of the Western Retail Hardware Association, wrote to Mr. McRobie, complaining that a wholesale house in Winnipeg had sold hardware direct to one of his customers. He was willing that the Association should mention his name if it would be of any advantage in dealing with grievances of this kind. But he gave no information in addition to what is given in this paragraph.

Now the Association exists for the purpose of protecting the interests of its members, and the Secretary was anxious to deal with this complaint, make a thorough investigation, and secure justice for the dealer in question. But until he had been supplied with the name of the offending wholesale house. the name of the customer, and, at least, the approximate date of the sale, together with a description of the goods he could not possibly take any action in the matter. Accordingly, he wrote the dealer who made the complaint, and asked him for the necessary particulars. To this letter he has received no answer, and he has been able to take no action in this particular case. Members cannot expect the Secretary to deal with matters of his kind, unless they furnish him with the necessary details.

It is not too early to remind Western Association members of the semi-annual meeting to be held in Winnipeg, next February. In other years the February meeting has been most successful, and with the rapid growth in the influence and membership of the Association, there is every reason to expect that the next meeting will surpass all previous ones in attendance and enthusiasm. Previous meetings have been productive of great benefit to those attending, as dealers have realized as they never were able to realize before, that the interests of hardware merchants are common. They have also discovered what good fellows opposition dealers are, after all, and have come to a better understanding with them. The February and July meetings are also the clearing houses for grievances, for it is at these meetings that trade grievances can be most advantageously discussed.

All Manitoba dealers should be able to attend; dealers in Saskatchewan and Alberta towns, should meet and decide to send one of their number, in order that their town may be represented It is not too early to take this matter up.

FIRE INSURANCE RATES.

Hardware dealers in Ontario who feel that they are paying too much for their fire insurance, should write the Secretary of the Ontario Retail Hardware Association, or J. Walton Peart, St. Marys, Chairman of the Mutual Insurance Committee, giving the rates they are now paying on buildings and stock and expressing their opinion as to whether they would take out a small policy in. the Mutual Fire Insurance Company, composed entirely of retail hardware dealers, whose stocks and buildings would be greatly isolated, and the risk of loss very low. Mr. Peart is making an investigation, and expects to be able to report that lower rates can be procured. But it will help him greatly if Ontario hardware men send him the information asked for.

Here are the questions again:

What insurance do you carry on (a) Buildings, $. (b) Stock, $.

What are stock company rates on (a) Buildings, per cent. (b) Stock, per cent.

In the event of our organizing for Mutual Insurance, would you insure to the limit of policy ($3,000)? If not, state what amount you would carry with the Association.

In the event of an arrangement being made on a preferential basis with an existing company, upon the lines outlined at Convention, would you be inclined to place your insurance up to the limit of $10,000 with one company?

Have you any general suggestions to make regarding Fire Insurance?

SEVENTY-FIVE PER CENT. BELONG.

The membership of the Retail Hardware Association in South Carolina now embraces 75 per cent. of all the dealers in that State. As yet they have no State Mutual Fire Insurance Company, but an institution of this kind is in the course of formation, and, it is hoped to have it in operation inside of a year. In the meantime some of the already established mutuals are writing fire insurance for the members in North and South Carolina, and mutual insurance is growing in popularity, the saving therefrom enabling the dealers to carry their stocks more fully protected against fire.

CHEAP MUTUAL INSURANCE.

Secretary C. A. Peek, Berlin, Wisconsin, writes: The Eleventh Convention of the Wisconsin Retail Hardware Association, will meet February 6, 7 and 8, 1907, at Milwaukee, and hold sessions in the forenoon only of each day. In this way members will have a part of each day to visit their jobbers, see the sights, etc., and we think it will result in an almost total attendance of all members. The exhibit feature in charge of the local Association will be held in the same hall. The Mutual Insurance feature is growing nicely, having written $1,000,000 so far in 1906, or $220,000 more than all we wrote in 1905. with an expense account of less than 13 per cent. Losses paid this year number only 11, and total less than $10,000."

SAVINGS ON MUTUAL INSURANCE

Secretary A. R. Sale, Mason City, Iowa, states that the Iowa Hardware Mutual Insurance Association now has in force $1,400,000 of insurance, the policies averaging $1,500. All profits and savings, except a cash balance to protect policies, are returned to policy holders in cash rebate checks. In 1904, the company saved 20 per cent. on stock company rates. In 1906, the rebate is 35 per cent. Cash rebate paid, $6,127.14. Paid since January 1, 1904, $4,170.11. Total losses in three years, $9,736.30. Cash balance September 1, 1906, $12,293.55.

WESTERN EXECUTIVE MEETING.

It has been decided by President A. J. Falconer, of the Western Retail Hardware Association, to call a meeting of the Executive in Winnipeg during Christmas week. The probable date is December 26 or 27, and notices will be sent to the members of the Executive in good time. Important business will come up for discussion.

RICE LEWIS TO ENLARGE.

Rice, Lewis & Son, Toronto, have purchased a site on Pacific Ave., near the King St. subway, where they will establish a warehouse for storing metals. For a long time it has been known that their present metal warehouse in the rear of their wholesale and retail building has been too small, and at last the looked for change is to be made. The change will allow the firm to re-model and enlarge their present wholesale quarters.

"There is not a word of truth in the daily newspaper reports," said Mr. A. Burdette Lee, president of the company, to Hardware and Metal on Thursday, "with the exception of the statement that we had purchased the property on Pacific Ave."

DISASTROUS FIRE AT TORONTO.

A fire took place Wednesday night in the office of the United Factories, 80 York Street, Toronto, two upper flats being completely gutted, and a stock of brooms, brushes, and woodenware, burned, the loss being estimated at $30,000. No interruption in business is expected, since all orders will be filled from Newmarket and London.

The warehouse of Messrs. Stewart & Wood, to the north of the United Factories building, was damaged to the extent of $2,000, the damage being mostly confined to the stock of paints, oils and glue.

DAMASCUS GUN BARRELS.

United States Consul J. C. McNally writes that the Damascus gun-barrel manufacturers of Liege, have tried from time to time to influence legislation to compel the manufacturers of the imitation brand to mark on their barrel the nature of their design. The consul continues:

The firearm manufacturers, who, in the make-up of their guns use both the genuine and imitation, opposed such legislation, with the result that one must distinguish for himself whether he is purchasing the real or imitation article. I have been asked from time to time by American firearm manufacturers regarding the manufacture of the imitation Damascus barrel, and if the local manufacturers could supply them with a certain number, etc.

When the gun is manufactured in Liege and not having a genuine Damascus barrel attached, it goes to the proof station with a plain barrel. If, after the test, the manufacturer desires to have an imitation barrel, he calls into use some silk paper and takes the design of an original Damascus barrel. By means of a decalcomania transfer it is attached to the plain barrel by the use of certain acids, which are held as a secret. No separate barrels are ever covered with the imitation design, but only when attached to a gun. Double-barreled shotguns are usually the only sort thus decorated. It is quite a difficult matter to distinguish between the real and imitation Damascus barrel, and to make a test it would be necessary to erase the design. If an imitation, no acid in the world will restore it, but if the Damascus is genuine, the application of sulphuric acid will immediately bring out the original design.

The gun manufacturers say that the trade demands both sorts of Damascus, and while it is certain that the importer will know which article he is buying, the retail dealer could easily be imposed upon unless he were an expert in the business. No doubt the ordinary person has been often under the impression that he possessed a genuine Damascus, while the opposite was true.

It is impossible to obtain statistical information as to the number of guns of the imitation Damascus barrel exported from Belgium, for while an accurate account is kept at the proof station of all guns and barrels undergoing the test, the same being compulsory before the gun can be sold, the barrel being designed after the test, no intelligent estimate can be made. One of the dealers, however, informed me that no less than 200,000 annually of these barrels bore the imitation mark. Most of the imitation Damascus barrel guns are sent to the United States and South America. Of the latter section, Brazil is the largest buyer, while Argentina is a close second. The steel imitation Damascus barrel can be bought as cheap as 50c., while the most ordinary of the genuine will command from $1 to $1.25.

FISHING TACKLE FACTORY.

Machinery is now being installed in the new factory of the E. A. Pfleuger Company, Akron, Ohio, and it is expected that the plant will be producing fishing tackle by March 1, 1907. The factory is a brick building, three storeys and basement, 60 x 140 feet, equipped with 100 horse power boilers and engine, also electric lighting plant, making it probably the largest plant in the United States devoted exclusively to the manufacture of fishing tackle. The business will be under the direct management of the President of the company, E. A. Pfleuger, who is well known all over the United States and Canada, through his connection with the fishing tackle trade for the past twenty-five years.

E. A. Pfleuger Co.'s Fishing Tackle Factory.

CHANGE IN DOMINION WIRE.

A change in the management of the Dominion Wire Manufacturing Co., Montreal, has been effected, and the new regime will be ushered in to-day. At a meeting of the Board of Directors held recently, the resignation of W. F. Fairman, as president and general manager, was accepted, and W. H. Farrel was appointed to the vacancy.

Mr. Farrell was formerly superintendent of the American Steel Manufacturing Co.'s Bonora works, in the Pittsburg district. He will have complete control over the Dominion Wire Manufacturing Co.'s affairs.

NEW WINNIPEG AGENCY.

As mentioned in another column, Lennox & Butt, retail hardware dealers of Winnipeg, have dissolved partnership, the business being continued by Mr. Lennox.

W. J. Butt, the retiring member of the firm, is commencing a manufacturer's agency business, his office being located at 90 King Street, Winnipeg. He has secured the agencies for the Stimpson Computing Scale Company, and the Bridgeport Hardware Manufacturing Company. As Mr. Butt has had long experience in the hardware business, both wholesale and retail, he should be able to make things hum in the agency line.

PRIZES FOR XMAS DISPLAYS.

Last year Hardware and Metal awarded prizes for the three best displays made during the Xmas season. This year we will give five prizes, but the displays must be of goods sold in hardware stores and suitable for Christmas presents, such as silverware, razors, cutlery, sporting or house furnishing goods, hardware specialties, etc. The prizes are:—

1st prize. $6 00
2nd prize. 4 00
3rd, 4th and 5th, a year's subscription to Hardware and Metal.

All protographs of displays must be mailed to us not later than December 31, 1906, and they should be accompanied by a short description of how the display was constructed, the display artist's name and, if possible, samples of the Christmas advertisements in the local papers backing up the window display advertising.

In addition to the above we offer a special prize of a handsome fountain pen for the best Xmas advertisement in a local paper pushing the goods shown in the window displays.

COMMERCIAL DISHONESTY.

During the past year there has been quite an epidemic of petty thieving amongst employees of Canadian jobbing houses, clerks in wholesale hardware houses stealing razors, cutlery, tools, and other small articles, and teamsters for plumbing supply firms and stove foundries, appropriating quantities of lead and copper, the articles being disposed of to outsiders for a fraction of their value. In some cases the accused were convicted and sentenced to terms of imprisonment, in others the culprits were let off with a warning, while in at least one case, which came up in a Toronto court last week, a conviction was registered, but instead of a sentence being imposed, forgiveness was expressed, and the employee again given his old position with an opportunity to live down the mistake.

Long hours, low wages, discouraging home conditions and the omnipresent saloon, may account for teamsters going wrong, but there seems to be little excuse for clerks to blast their careers by petty thieving from their employers, particularly at this time, when wages are high and clerks in such demand that they are frequently far more independent than their employers.

Clerks in either wholesale or retail houses should look forward to the time when they will be going into business for themselves, and with this object before them, should so mold their character, that they will become upright business men. Expenses should be limited in accordance with one's income, and warning taken from the unfortunate experiences of those who, on a salary of $8 or $10 per week, indulge in stock gambling, "follow the races," get into debt and commence stealing to cover up their financial shortcomings. Once thieving has commenced it is only a short jump to a prison cell, and then its good-bye to home and friends, as well as to the hope of a successful business career.

The measure of mercy meted out to the unfortunate clerk by the Toronto wholesale house last week, is commendable, and in sharp contrast to an experience related by an American traveler recently. A hardware dealer who ran his business in a very loose manner, accidentally discovered that the old style had been an easy mark for his clerk, and had tempted him to steal. The clerk was promptly discharged, convicted, and sentenced to a term in jail. His term over, he moved to another town in the next county and tried to commence life over again. Before long, however, his former employer discovered his whereabouts, and in revenge for his losses, exposed the clerk's record to every merchant in the town, the clerk being dismissed and finding it impossible to get another job, had to move farther away. The merchant forgot that he was partially to blame by his loose business methods and lack of progressiveness, in not providing a modern cash register. Then he proceeded to kick the clerk when he was down, possibly encouraging the clerk to believe there was little use of trying to live down his mistake.

Merchants and clerks alike can learn lessons from the incidents related. While in some cases clerks may steal and be forgiven, continued thieving is bound to lead behind prison bars, and once down, the forces of fate seem to conspire to keep one there. Much responsibility rests upon merchants who employ help. They must recognize that innumerable temptations surround young men to-day, and it devolves upon business men to adopt every modern device to facilitate the keeping of the books and cash, and remove temptation from those who look after this end of the business as well as to keep records of the sales of stock, so that speculations can be promptly detected. This done, wages should be in keeping with the cost of living, and a fatherly care taken in the class of companions and styles of amusement and recreation selected by the young man.

THE METAL SITUATION.

Ingot tin has strengthened during the week, and jobbers' prices have been forced up about a half cent. Stocks are very light both in Montreal and at the leading markets of the world, so that the outlook for the next couple of months is for high prices and slow deliveries. It is generally believed that the record of a few months ago will again be touched.

Copper is also stronger than for some time past, but no actual increase in price has, as yet, resulted. The figures we are quoting are considered cheap for the quantities usually ordered by smaller dealers, and a revision is expected. Lead keeps as high as ever, and antimony is also strongly held. The recent advance in zinc spelter has been maintained and the market is firm at the same figures as were quoted last week.

It would appear that pig iron consumers will be in a difficult position before the winter is over. The large Montreal importing interests inform us that, although they tried to put in sufficient quantities of iron to permit their selling from stock as usual, during the winter months, the demand has been so great that already their stores are almost wiped out. Orders for carload lots are coming forward all the time, and some consumers are covering for from six to nine months ahead. The market is in such a condition that even the most experienced consumers own themselves at a loss to know what is best to be done. The English and Scotch markets have not shown any material change this week, but, so long as the abnormal American demand for British iron is maintained, it will be difficult to obtain reasonable deliveries of many leading brands. Even the Montreal market depends, to a large extent, upon American conditions. Should the export of British iron to the United States fall off larger quantities will be available for the Montreal dealers, and the situation here will be relieved.

Under the circumstances, it is only natural to expect that more finished products should be going up. Machinery steel, iron finished, has advanced, and it is announced that higher prices for cold rolled shafting will be asked next week.

CANADA'S NEW TARIFF.

It is too early to comment at length on the new tariff which was announced by Finance Minister, Fielding in Parliament on Thursday and went into force on Friday, Nov. 30. As we go to press several matters are still in doubt and comment will, therefore, be reserved until our next issue.

Briefly, the new tariff is arranged in three columns. The British preferential, which was formerly on a flat 33 1-3 per cent. basis, is now readjusted, each item standing by itself. The average preference is probably increased slightly, an effort being made to still further promote trade in metals with Great Britain. The second column is a new intermediate tariff not yet in force with any country, but to be used in case a reciprocity arrangement is made with any foreign country in future. The third section is the general tariff applicable to all foreign countries and colonies not covered by the British preference.

The grouping of the tariff has been entirely changed, the idea being to place articles together or in the same group, according to their nature and composition so as to make interpretation easier. The old tariff had a separate free list, but the adoption of a three-column tariff has rendered it necessary that the articles entitled to free entry should be classified along with the dutiable articles.

The new dumping clause provides that the dumping, or special duty, shall be the difference between the selling price to the importer in Canada of an article of a class or kind made in Canada, and the fair market value of such article as sold for home consumption in the country of export, but not to exceed 15 of such fair market value for home consumption in the country of export.

The hardware trade does not appear to be affected greatly by any of the changes. The iron and steel bounties have been extended for another four years and these industries will continue to develop with this assistance. There will be no tin plate duty as asked for by the Morrisburg promoters. A few changes of interest to the hardware trade include: The duty on windmills is reduced from 25 to 20 per cent. The duty on axes, sycthes, sickles or reaping hooks is reduced from 25 to 22½ per cent, and the duty on spades and shovels is cut down from 35 to 32½ per cent.

The anti-combine clause is left in the same indefinite position as before, it being practically impossible to understand the meaning of the clause. An interpretation of the clause should be given by the Ministers of Finance and Justice in order to allow men engaged in commerce to clearly understand what they can and cannot do. The present law gives certain classes of the community the right to organize associations and is unfair to merchants and manufacturers.

On the whole, the new tariff is an improvement on the old one. The general effect should be to increase importations of metals from Great Britain, and to aid Canada's manufacturing industries. It would of course be impossible to please all sections of the people, but the new tariff should meet with the approval of the great majority of the business and manufacturing interests.

WESTERN POSTAL SERVICE.

Complaints of inadequate and inefficient postal service in Western Canada, are more numerous than ever, and apparently, the Post-office Department does not yet realize the gravity of the situation. These complaints are loudest perhaps from the newer districts, but even in the older towns, along the main line of the C.P.R,. there are constant complaints, and a little investigation or a little actual experience, will show that these complaints are well founded. The Department at Ottawa is so far removed from the scene of the trouble that the officials do not understand the situation, and they fail to realize that special attention is required to ensure an adequate service in the newer Canada that is so rapidly springing up in the country west of the Great Lakes. Western business men say that there will be no permanent relief until another deputy minister is appointed, who will be given a free hand in the opening of new offices in the new towns and in making radical and sweeping changes in the method of handling the mails in some districts. There is no sympathy in the West with a policy which piles up a surplus each year, while the service is becoming more unsatisfatcory every day. The slow workings of a red tape official system compel new towns to wait weeks and months, before new post-offices are opened, and the meagre salaries paid the postmasters are responsible for the fact that the service is miserably inefficient in all parts of the West. Officials cannot be expected to do more than they are paid for.

In an effort to reform the service, some business houses and newspapers are trying a new plan. A letter received the other day from the Camrose Mail, Camrose, Alberta, bore the following inscription:—From the Camrose Mail, Camrose, Alberta, Canada. We are working for better freight service. Telegraph service and Postal Facilities on the C.P.R., will you held us? This letter was mailed November 21, when did it reach you? Tell the Camrose Mail."

We do not agree with the suggestion that the C.P.R. is at all to blame for the poor postal service whatever may be the case in regard to the telegraph and freight service. The C.P.R. trains run with fair regularity in the West, giving a service which, taken as a whole, is much superior to the service in Eastern Canada. When letters are delayed for weeks, as they very often are, the fault lies with the Post-office Department, and not with the C.P.R.

REVIVALS AND EARLY CLOSING.

A Brandon, Man., dealer, in conversation recently with Hardware and Metal said a good word for Crossley and Hunter the well known traveling evangelists.

"I can't say that I am much in love with the revival methods," he said, "but I must say that I noticed one good effect after the Crossley and Hunter meetings held a while ago. Mr. Hunter gave the people some plain talk about the injustice and imposition in making the stores keep open on Saturday night until long after midnight attending to late deliveries of goods that might just as well have been ordered earlier in the day. You know some people order goods at 11 o'clock that might just as easily have been ordered in the morning, and they want delivery that same night. Mr. Hunter's plain talk on this subject had a big effect at first but things are getting as bad as ever again."

"No Brandon isn't any worse in this respect than other towns, but its bad enough. People are thoughtless that's all."

Perhaps if dealers in Brandon and numerous other towns where store keeprs are similarly troubled would ask their local papers to take the matter up there would be a change for the better. A few paragraphs in the local paper should be as effective as an evangelist's address in reminding people of the injustice their thoughtlessness entails.

HARDWARE TRADE GOSSIP

Ontario.

J. M. Winters, King, called on Toronto jobbers last week.

G. B. LePan, hardware merchant, Jarvis, Ont., has assigned to J. Y. Murdoch.

J. W. Allen, Newmarket, has completed an eighteen foot extension to his hardware store.

Neil McArthur, plumber and tinsmith of Sturgeon Falls, suffered loss by fire this week.

Cyrus Birge, President of the Canada Screw Company, Hamilton, visited Toronto on Tuesday.

John Bales, hardware merchant, Oshawa, called on the wholesale hardware trade in Toronto this week.

R. Summerfelt, hardware merchant, Mt. Albert, called on the wholesale hardware trade in Toronto this week.

A. Hamilton, hardware merchant, Warren, Ont., called on the wholesale hardware jobbers of Toronto this week.

J. Scollan, manager of the Toronto Foundry Company, Port Arthur, has been in Toronto this week on a business trip.

C. A. Godson, of the Robertson-Godson Company, Vancouver, left Toronto for the Terminal city on Wednesday night.

Mr. Connor, Jr., of Connor & Sons, hardware merchants, Madoc, called on the wholesale hardware trade of Toronto, this week.

Geo. Ecclestone, hardware merchant, Bracebridge, was a visitor in Toronto this week, calling on the wholesale hardware trade.

H. Parr, of Parr Bros., hardware merchants, Blackstock, was in Toronto last week, calling on the wholesale hardware trade.

Breuer & Harrison, hardware merchants, Parkhill, have opened for business in their new premises, lately occupied by Magladery Bros.

John Brooks, President of the Brooks-Sanford Company, builders hardware, Toronto, was in New York several days this week on a business trip.

Thomas Black, at present employed with Geo. Earlstone, hardware merchant, Bracebridge, will open a hardware store in Orillia, Mr. Black's old home.

T. F. Monypenny, Vice-President of the Imperial Varnish Company, Toronto, is being asked to run as an aldermanic candidate in the coming municipal elections.

Mr. Delaney, representative of the McClary Manufacturing Company, at Calgary, was a visitor in Toronto during the week. He reports stocks of metals in the West as very low.

A. T. Harland, Goderich, late with J. B. Hawkins, has taken some territory for the Pitner Gasoline Lighting system, and starts on the road at once. He will cover Essex and Kent counties.

The hardware store of A. N. Fenn, Parry Sound, was partly destroyed by fire, November 26. Fire was discovered in the basement, but was gotten under control before any serious damage was done.

F. Wagg, general merchant, Mindemoya, who was drowned in the wreck of the tug Jones, on Georgian Bay, last week, was a brother of W. I. Wagg, hardware merchant, Providence Bay, both places being on Manitoulin Island.

E. C. Atkins & Company, saw manufacturers, have moved their Toronto offices and sample rooms from 56 King Street, East, to 77 Adelaide Street, East. C. D. Ten Eyck, the Canadian representative, reports a very large demand for saws, especially the higher grades.

L. R. Greene, the former Toronto hardware clerk, who is now manager of the publicity department of the Sherwin-Williams Company's head office at Cleveland, has fully recovered from the recent illness which prevented him from attending the travelers conference at Montreal.

Quebec.

D. Carrol, of Ormstown, was buying supplies in Montreal a few days ago.

Hugh Russell, metal importer, Montreal, is in England, on a business trip.

The assets of the St. Lawrence hardware company, Montreal, will be sold this week.

J. Charbonneau, general merchant of St. Jovite, paid a visit to Montreal this week.

C. A. Phaneuf, general merchant of St. Cesaire, was noticed in Montreal this week.

E. Crepin, of H. E. Crepin & Frere, general merchants, Chateauguay, visited the metropolis on Wednesday.

Mr. Griffin, representing the J. S. Stevens Arms Co., called on the Montreal wholesale trade this week.

E. Dolph, general manager of the Metal Shingle & Siding Co., Preston, was a visitor in Montreal this week.

Charles Beard, of C. Beard & Co., general merchants, Perce, was in Montreal on a buying trip a few days ago.

Decatin, Bull & Co., manufacturers' agents, Montreal, have removed their warehouse and offices to 23 Jurors St.

Mr. Akin, of Akin & House, general merchants, Beebe Plain, called on some of the Montreal jobbers a few days ago.

C. L. Devitt, of Lewis Bros.' traveling staff, was at the firm's headquarters this week getting pointers on new lines.

J. H. Roper, manufacturers' agent, Montreal, has returned from a very successful business trip in the Maritime Provinces.

Amiot, Lecours & Lariviere, Montreal, are enlarging their premises, which, when completed, will occupy 23,350 feet of ground.

L. Haney and J. L. Johnston, of Caverhill, Learmont & Company's western traveling staff, are spending a short time at the head office in Montreal.

H. N. Watson, of McLennan, McFeely & Co., Vancouver, was in Montreal this week. He was accompanied by Mr. Green of the British Columbia Electric Company, New Westminster.

E. M. Fulton, president of the Consumers Cordage Co., Montreal, died last week in New York. Mr. Fulton formerly lived in Montreal, but has, during the past few years been in New York.

Western Canada.

A new hardware store has been opened in Lamont, Alta, by Thomas Wallas.

J. J. Storey, hardware merchant, of Wawanesa, Man., has sold his business to M. Fraser.

D. McKenzie & Son, Hardware Merchants, Strathmore, have sold out their business.

Heath & Howard have bought the hardware and furniture store of H. Hiscox, Vermilion, Alta.

W. H. Pain, hardware merchant, of Milestone, Sask., has diposedl of his business to the Evans Hardware Company.

J. Skelding of Skelding & Jackson, Neepawa, was in Winnipeg last week, and called at several of the wholesale houses.

C. D. Waldon, of the Pease-Waldon Company, Winnipeg, has returned to his desk after an illness of about three weeks' duration.

McCosh & Pringle, who opened a hardware store about three months ago in Lashburn, Sask., are reported by the commercial travellers as doing a big business.

Messrs. McFarland & Northcotte, newly established hardware merchants, Calgary, have received from Rice Lewis and Son, Toronto, two carloads of goods completing their stock.

T. L. Waldon, Secretary of the Marshall Wells Company ,Winnipeg, is visiting Eastern points, and enjoying a month's vacation. Mr. Waldon is accompanied by his wife and family.

W. J. Butt, of Lennox & Butt, Winnipeg, has sold his interest in the business to his partner, Bert Lennox, who will continue the business under his name. Mr. Butt is opening an office as a manufacturers' agent.

A. J. Falconer, of Deloraine, Man., President of the Retail Hardware Association of Western Canada, was in Winnipeg on Saturday of last week. Mr. Falconer purposes calling a meeting of the Executive of the Association in Winnipeg, during the Christmas week.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Forged Iron—Now $2.40.
Refined Iron—Advanced to $2.55.
Horseshoe Iron—Quoted at $2.55.
Machinery Iron Finish Steel—Up to $2.40.
Ingot Tin—Raised ½c.
Copper Nails—Now quoted at 42½ per cent.
Copper Tacks—New discount 37½ per cent.
Sherwin-Williams Paints — Now $1.40, in gallon cans.
Pig Iron—Summerlee No. 2 selected, $24 50; Summerlee No. 3 soft, $23.50; Londonderry, $24; Middlesborough, $23.50.

TORONTO.

Iron Pipe—Higher prices asked on some sizes.
Refined and Horseshoe Iron—Advanced.
Boiler Plates and Tubes—Prices revised.
Old Materials—General advance.
Copper Nails and Tacks—Advanced.

WINNIPEG.

Sherwin-Williams Paints — Now $1.55, in cans.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Nov. 30, 1906.

Jobbers report that the sale of Christmas goods is picking up very strongly, and a good volume of all seasonable lines is going forward to dealers.

Owing to the repeated advances in ingot copper, we are now called upon to give new discounts on copper nails and tacks. On the former, the present discount is 42 1-2 per cent. while, on tacks, only 37 1-2 per cent. is now given.

AXES. — We quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen. follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS. — Business continues good at the same prices. We quote: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES — We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS — Our prices are: Back Straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS — Business conditions in this line are the same as last week. Following are the discounts: Best iron rivets, section, carriage, and wagon box black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—We still quote: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS—Our discounts remain as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.. Felisterhead, brass, 25 per cent.

BOLTS AND NUTS. — Conditions are unchanged. Discounts still remain as follows: Carriage bolts, 3-8 and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—Manufacturers and jobbers of horse nails are doing a large business. Discounts are as follows: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—Nails are still firm at $2.20 per keg base, f.o.b. Montreal.

CUT NAILS—We still quote: $2.20 per keg base, f.o.b. Montreal.

HORSESHOES.—The quotations are: P. B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs extra.

BUILDING PAPER—With the close of navigation, the demand has eased slightly. Prices are unchanged.

CEMENT AND FIREBRICK—Quotations remain as follows: "Lehigh" Portland in wood, $2.54, in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—Stocks are light, and a good demand is evident. The following prices are firm: 5-16 in., $4.30; 3-8 in. $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT.—We quote as follows: Shot, packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION — Quotations remain: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

GREEN WIRE CLOTH — We quote: In 100 ft. rolls, $1.62½ per hundred square feet, in 50 ft. rolls, $1.67½ per hundred square feet.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Nov. 30, 1906.

Business continues brisk in all branches of Christmas and seasonable goods, such as cutlery, skates, hockey sticks and boys' tool sets. A large demand has been evidenced for horse blankets, and sleigh bells, of which their are still large shipments being made.

A shortage is reported on some lines of hockey skates, as wholesale houses have been unable to procure them fast enough for the demand. In a great many cases orders have been shipped half filled.

The repeated advances in ingot copper have caused the advances on copper nails, and tacks, which are now quoted at 47½ per cent. is now given.

Nails are still very scarce at $2.10 base, as some sizes such as 2½ and 4 inch can hardly be procured at any price. Snow horseshoes are very largely in demand, particularly in Northern Ontario.

AXES AND HANDLES—Still a large demand as with the woods opening up large quantities are required.

CUTLERY AND SILVERWARE—A brisk demand still exists and shipments are still very large.

SPORTING GOODS—All winter lines are still selling very brisk, but short-

ages are reported on some lines of hockey skates.

CHAIN—We continue to quote: 1 inch, $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

RIVETS AND BURRS.—Copper rivets remain as quoted, 27½ per cent. and copper burrs, 15 per cent.

SCREWS—Prices unchanged with many lines very scarce.

BOLTS AND NUTS—Stocks are very low with prices as before.

TOOLS—Trade is slack except in boys' outfits for holiday trade.

SHOVELS.—A great demand exists in snow shovels.

LANTERNS—Cold blast are still selling at $6.50 per doz., large shipments still the order of the day.

EXTENSION AND STEP LADDERS—Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING — Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS.—Market still very firm, as quoted, $2.10 base.

CUT NAILS—We quote: $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—A very large demand continues for these lines and large shipments are the order of the day.

BUILDING PAPER—Not as brisk as formerly but large orders are being booked for spring shipments.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES, WOOL, FURS.—The market is steady. Tallow is slightly lower. From this on the quality of hides will be lower.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 30, 1906

Advances in price are not quite so numerous as they have been in other weeks, recently, but, at any rate, there are no drops, and the whole market is maintaining, in a wonderful manner, the high tone which has so long prevailed.

Another jump in tin is the only important development in unfinished metals. Quotations are a half cent higher, and very firmly held at the new figures.

In view of the continued advances in raw materials, it is not surprising that finished iron and steel goods also keep on the rise. We are this week, reporting an advance in machinery iron, finish steel, from $2.27 1-2 to $2.40. Forged iron, refined iron and horseshoe iron, also, have each advanced 5 cents per hundred pounds.

COPPER.—This metal is even firmer than last week and our prices are very close. We quote ingot copper 24 to 24 1-2c.; sheet copper, base sizes, 31c.

INGOT TIN.—Importers say that tin will be very scarce, and dear for December. Prices this week are up a little, and we are now quoting 46 1-2 to 47c. per lb.

ZINC SPELTER.—We are still quoting according to last week's advance: $7.25 to $7.50 per hundred pounds.

PIG LEAD.—The market is still firm at $5.40 to $5.50 per hundred pounds.

ANTIMONY—Unchanged conditions prevail. We still quote 27 1-2 to 28c. per pound.

PIG IRON.—We still quote as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—We still quote: British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL.—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.40 ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING.—An advance is expected to occur almost immediately. Meanwhile, we are quoting: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON. — Our prices are firmly held. We quote as follows: Queen's Head, 28 gauge, $4.60 to $4.85; 26 gauge, $4.45; 22 to 24 gauge, $3.90; 16 to 20 gauge, $3.75; Apollo, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 and 20 gauge, $3.60; Comet, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30 to $4.45; 22 and 24, gauge, $3.75 to $4.00; $16 to 20 gauge, $3.60 to $3.85; Fleur-de-Lis, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 to 20 gauge, $3.60; Gorbals "Best Best," 28 gauge, $4.45; Colborne Crown, 28 gauge, $4.45; 26 gauge, $4.30; 24 gauge, $3.75. In less than case lots, 25c extra.

CANADA PLATES. — We again quote: 52's, $2.70; 60.'s, $2.75; 75's, $2.85; full polished, $3.85; galvanized 52's, $4.35; 60's, $4.60.

BLACK SHEETS. — The market is strongly maintained. We still quote as follows: 28 gauge, $2.60; 26 gauge, $2.25; 22 and 24 gauge, $2.45; 20 gauge, $2.40; 18 and 18 gauge, $2.40: 8, 10, 12 and 14 gauge, $2.60.

TIN PLATES.—Jobbers quote: Cokes, base size, IC. 14 x 20, $4.25 to $4.35; charcoal, base size, I.C., 14 x 20, $4.40 to $4.50.

TERNE PLATES.—Quotations have been modified to $7.10.

STEEL SHEETS. — We quote: 10 gauge, $2.60; 17, 18 and 20 gauge, $2.40; 22 and 24 gauge, $2.45; 26 gauge, $2.55; 28 gauge, $2.60 per hundred pounds.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6¼c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

BAR IRON.—The price remains $2.15 base, f.o.b. Montreal.

OLD MATERIAL. — We quote; Light copper, 17c.; heavy red brass, 16c., yellow brass, 12 1-2c.; light brass, 9c.; lead, 4c; zinc, 4c; machinery cast scrap, $16.00; wrought scrap, $15.00; stove plate scrap, $12.00; mixed rags, $1.00 to $1.20 per 100 lbs.; old rubbers, 8 1-2c. to 8 3-4c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Nov. 30, 1906.

No advances have been made on the leading metals this week, but without exception they are firm and our quotations are close. Revisions of our quotations on boiler plates and tubes and old material, show sharp advances on several lines.

The scarcity of pig iron shows no signs of relief, and we expect to see some stove foundries close down for extended periods during the winter on account of the lack of iron. While stocks can be secured by rail, via St. John or Portland, during the winter, the large amount of first and second-class freight available, will discourage the ocean boats bringing over much pig iron, which is rated at sixth class. Machinery cast scrap has sold as high as $19.50 and $20, and sales of Summerlee iron have been made for spring delivery at $25, during the past week. Londonderry is sold up for the third quarter of 1907, and Hamilton and Midland are off the market entirely.

Bar iron, bolts and nuts, etc., are still very scarce, and prices firm. Forged and horseshoe iron are being advanced five cents.

Copper and lead hold steady with jobbers selling at very close figures, but experiencing some difficulty in getting the high prices. Indications point even higher, however, and buyers are likely to continue stocking in small quantities only.

Local importers of metals have received word that makers of galvanized iron sheets cannot fill any of the orders for March or April delivery, and very likely will be unable to supply anything before June. Travelers have been instructed not to accept any further orders for delivery earlier than June. Customers booked for delivery in March, April and May, will be asked to substitute other lines or agree to accept deliveries later than specified. This situation which exists with several makers is likely to become universal, and if so will disorganize next season's trade, as customers who have booked for early spring delivery, will be bound to have precedence over those who have booked for delivery in summer months.

Orders for tin plate sent in September and October, for immediate delivery have just been received at Montreal, but are being held up there by the tremendous congestion of freight which has followed the closing of navigation. The situation this year appears to be worse than usual, and no date can be set as to when the tangle at Montreal will be straightened out and deliveries of the tin plate orders made.

Prices of all sheet metals are very firm, and the present outlook is for even stiffer conditions throughout 1907.

PIG IRON.—Hamilton, Midland and Londonderry are off the market, and Radnor is quoted at $33 at furnace. Middlesborough is quoted at $23.50, and Summerlee, at $25, f.o.b., Toronto

BAR IRON.—Owing to the scarcity of billets, bar is still hard to get. We still quote: $2.25, f.o.b., Toronto, with 2 per cent. discount.

INGOT TIN—Outside markets have firmed up considerably We still quote 46 to 46 1-2 cents per pound.

TIN PLATES. — Deliveries are slow and prices firm at recent advances.

SHEETS AND PLATES. — Prices steady, with present stocks light, and little prospect of replenishing them before next June.

BRASS.—Still difficult to obtain deliveries. We quote: Sheets, 23c. to 24c. per lb.

COPPER.—Stocks are very low, and prices very firm. We continue to quote Ingot copper, $24 per 100 lbs., and sheet copper $30 to $31 per 100 lbs.

LEAD—The market continues firm and prices unchanged. We quote: $5.25 for imported pig and $5.75 for bar lead.

ZINC SPELTER.—Local prices are very firm with buying brisk. We quote: 7 1-2c. per lb. for foreign and 6 1-2c. per lb. for domestic. Sheet zinc is quoted at 8 1-4c. in casks, and 8 1-2c. in part casks.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 3-16 inch, $2.55; tubes, per 100 feet, 1 1-2 inch, $8.50; 2, $9.00; 2 1-2, $10.75; 3, $12; 3 1-2, $16; 1, $21, Terms, 2 per cent. off.

ANTIMONY—The market is very active, and stocks scarce. Prices firm at 27c. to 28c.

OLD MATERIAL — Dealers' buying prices show no change this week. We quote: Heavy copper and wire, 18c. per lb.; light copper 15c. per lb.; heavy red brass, 15c. per lb.; heavy yellow brass, 13 1-2c. per lb.; light brass, 9 1-2 per lb; tea lead, $3.70, per 100 lbs.; heavy lead, $3.90 per 100 lbs.; scrap zinc, 4½ per lb.; iron No. 1 wrought, $12.50; No. 2 wrought, $6 to $8; machinery cast scrap, $16 to $20; stove plate, $11 to $16; malleable and steel, $6; old rubbers, 8c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: well as to the hopes of a successful

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

London, Eng., Metal Markets

From Metal Market Report, Nov. 29, 1906.

Cleveland warrants are quoted at 60s. 1½d. and Glasgow standard warrants at 59s. 4d., making prices as compared with last week 7½d. higher on Cleveland warrants and 4d. higher on Glasgow standard warrants.

TIN—Spot tin opened steady at £197 5s., futures at £198 and after sales of 160 tons of spot and 180 tons of futures closed firm at £197 10s. for spot, £198 5s. for futures, making price compared with last week £2 5s. higher on spot and £1 10s. higher on futures.

COPPER—Spot copper opened firm at £101 10s., futures £102 15s., and after sales of 100 tons of spot and 300 tons of futures, closed quiet at £101 10s. for spot, and £102 15s. for futures, making price as compared with last week 17s. 6d. higher on spot and 15s. higher on futures.

LEAD—The market closed at £19 7s. 6d., making price as compared with last week 6s. 3d. higher.

SPELTER—The market closed at £28, making price as compared with last week 5s. higher.

United States Metal Markets

From the Iron Age, Nov. 29, 1906.

The pig iron markets are buoyant, and prices are advancing, both for domestic and foreign irons. Some good sales are still being made for delivery during the first half of 1906, and inquiries are now appearing in increasing volume, and in improving character, for delivery during the second half of the year, in spite of the present high level. The majority of sellers decline to commit themselves so far ahead.

The most interesting transaction during the week has been the purchase by the International Harvester Company of about 20,000 tons of Middlesborough iron for delivery via New Orleans. It is reported that this iron was sold at close to $21, ex-ship, New Orleans, the freight rate to Chicago being $2.09. To what extent this iron will be applied to export work, with drawback of duty, does not appear. A short time since a cargo of Scotch iron was also sold for the Chicago district, via New Orleans.

Foreign iron is coming into tidewater markets steadily, and in the case of Scotch makers' brands, are now difficult to secure for shipment prior to the middle of January.

The scarcity of Bessemer pig is very pronounced, and is most keenly felt in the malleable iron industry, where some large inquiries are at hand. The big steel makers are simply out of the market and try to worry along as best they may. Recently pig iron has been shipped from the Chicago plants of the steel corporation to works in the Valley and Pittsburgh, to help out. This is reversing the movement which took place earlier in the year.

Recent developments in the cast iron pipe industry indicate the position of consumers of pig iron. Their customers are appearing in the markets at a surprisingly early date. Thus the New England water companies, who usually wait for placing their orders until March, are even now making inquiries for next season's requirements. Among the recent sales are 5,000 tons to the Great Northern Railroad, close to 5,000 tons for Norfolk and 3,000 tons for the Brooklyn Union. The Consolidated Gas Company is in the market for 6,000 tons.

The rail mills have taken only minor contracts lately. It is estimated that they have now on their books orders for 1907 delivery aggregating 2,000,000 tons. The quantity of unfilled orders to be carried over from this year will probably not be as large as at one time estimated, since the mills have been doing some very heroic work in the way of production during recent months.

The advance in the price of steel plates of $2 per ton is now practically universal.

Specifications for bars, wire, sheets, tubes and tin plate are rolling in, and the mills are under heavy pressure. Some good additional orders are being booked. One mill took 120 miles of 10 to 12-inch pipe for a new gas line. The Burmah order does not appear to have been definitely placed.

Scrap materials are in a very strong position, some important sales having been effected in the Pittsburgh district up to $20 per ton for melting scrap. Material of this character is being drawn from eastern Pennsylvania to New England and the west, the attitude of eastern steel makers being adverse to the rising prices.

The ore situation is creating some concern, since it is possible that the full quantities required for the winter may not be brought down. The steel corporation has thus far brought down 20,400,000 tons. The programme called for 21,500,000 tons, so that 1,100,000 must still be carried down the lakes before the close of navigation. If weather proves favorable it may be done.

From the Iron Trade Review, Cleveland, Nov. 29, 1906.

While considerable iron is being sold for delivery during the last half of next year, there is apparent a growing feeling of dissatisfaction on the part of producers who are meeting with much embarrassment through the failure of certain furnaces interests to keep up with contracts. This, it is explained, is largely due to the pronounced shortage of both cars and motive power, one southern producer, reported as being 20,000 tons behind on deliveries, having enough iron on its yards to square all accounts, were transportation facilities adequate. On the other hand, considerable spot iron is coming out, and consumers are wondering over retarded shipments of low priced iron. As a result, there has been a general tendency toward caution in placing contracts for northern irons for the second half of the year and for southern iron for the second quarter, and also in the action of the International Harvester Co., in purchasing 3,500 tons of Scotch and English iron for use in the manufacture of machinery for exporting, on which the drawback privilege will be exercised, making the delivered cost several dollars below that of American iron. The same company will make further purchases, and its policy may be followed by other manufacturers who engage in export business.

The readjustment of prices on finished materials in accordance with the higher cost of raw materials continues, the latest advance being on plates, for which leading independant firms are now asking 1.70c. Pittsburgh, or $2 a ton over previous prices, with one mill which can furnish prompt deliveries holding at 1.90c. Pittsburgh. Specifications are heavy on steel bars and sheets are difficult to obtain. Rails and other track materials are selling more readily than for some time past, and increased activity is noted in most other lines.

The cold weather and lake gales of the past week have practically marked the end of the ore shipping season, with a total movement of about 37.000,000 tons, 3,500,000 tons more than last season.

N.S. Hardware Trade News

Halifax, N.S., Nov. 27

The hardware jobbing trade in the province at the present time is very good, and dealers are well satisfied with the outlook. There is a good movement in nearly all lines. The spring supplies ordered by the fishermen have about all been delivered. and the volume of trade this year in this class of goods was far above the average, though the prices were considerably higher than last year. The good prices obtained for the catches of fish this year very materially aided trade. All metals continue firm and in good demand. Prices show no change since last report. Jobbers here have been advised by the manufacturers, that there will be 70 per cent off the 1907 list of brushes of all kinds. Last year it was 66 2-3 off the list. The jobbers here have not yet received the catalogues for 1907.

The lumbermen in Nova Scotia expect to make large cuts this season, and are making every preparation for the same. In some parts of the province the cut it anticipated will run up into the millions. There has been a good demand for saws, axes and general supplies, used by the lumbermen. Notwithstanding the fact that the season is somewhat advanced, there is a lot of building going on in this city at the present time, and as a result, builders' materials are in very good demand. Sales of tarred paper have been quite heavy.

* * *

The Sydney Gold Mining Co., was organized at Glace Bay last week. The board of directors of the new company are all prominent business men of Sydney. The areas of the company are in the vicinity of Country Harbor Narrows in the Stormont gold district. The company owns 36 gold mining areas besides prospecting leases, and already have considerable mining equipment on the ground. The capital stock of the new company is $50,000, in shares of a par value of $5 each. The directors of the company are: Messrs. J. C. Larder, L. A. Henniger, Michael Shanahan, F. S. De Young, F. J. Mahar. The company will operate the areas on an extensive scale, and a new mill and other equipment will be purchased at once.

* * *

The Nova Scotia Brush and Broom Co. has been incorporated with a capital of $50,000, divided into 500 shares of $100 each. The incorporators are George Elliot, of London, Eng., and David Roche, J. Frank Crowe and W. E. Thompson, of Halifax. A site is said to have been selected, and the work of getting into shape for manufacturing will be pressed forward rapidly.

* * *

Work at the Eastern Coal Company's mine at Maccan is progressing most satisfactory. Sinking is going on steadily, and the outlook is promising. Large boilers have been received from Montreal and are now being installed, and in a short time the company will be raising coal for the market.

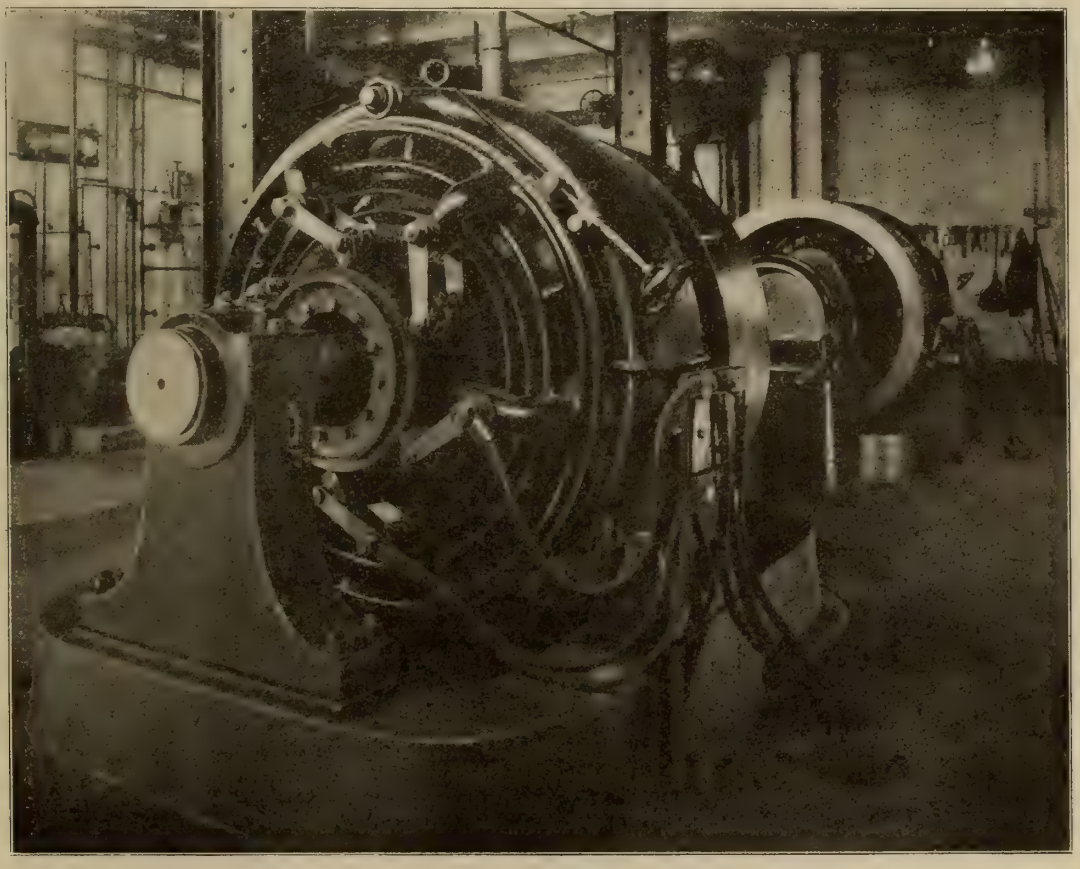
* * *

The resumption of operations at the plant of the Dominion Iron and Steel Company, is welcomed by the business men of Sydney, as trade had been considerably hampered during the period that the mills were closed.

USES OF BISMUTH.

The uses of bismuth are fairly numerous, and recently the German and French Governments adopted this metal in place of lead for the cores of rifle bullets. The alloys of bismuth with lead and tin are well known for their easy fusibility, and their property of expanding on solidification. Their fusibility can be increased by adding cadmium. Usually alloys contain from 20 to 50 per cent. bismuth, 25 to 50 per cent. lead, 4 to 20 per cent. tin, and occasionally a little cadmium. There has been further research work on copper-bismuth alloys to determine their physical characteristics, and to decide what percentage of each metal will make the best eutectic mixture. The structure of copper alloys containing 98 per cent. or more bismuth resembles pure bismuth. Alloys generally are valued by the market conditions of their constituent metals.

Bismuth salts have been in some demand, and their market prices have been lowered by the change in the position of the metal. Bismuth oxide with boric and silicic acids is used for optical glasses, and to a larger extent for making porcelain colors; and boric nitrate is a good cosmetic, and is also utilized in the compounding of medicine. For medicinal purposes bismuth must be absolutely pure.



TURNING WASTE INTO MONEY.

In a discussion of waste utilization it is customary to begin with that shining example of what can be accomplished along these lines—the coal-tar industry. A few years ago the thick, black, viscid liquid which condenses in the pipes during the distillation of gas from coal, was not only waste and useless, but its removal was a positive nuisance and a source of trouble and expense. To-day this tar on further distillation yields a series of products each of which is the basis for a valuable chemical manufacture. Among these products are paraffine, naphtha, benzol, creosote, anthracene, carbolic acid, naphthalene, and pitch. Basic oil of coal tar is the source of the splendid aniline colors, the various hues of which are due to the oxidation of aniline by means of acids or other chemicals. The utilization of some of these products has called into being entirely new industries in the manufacture of dyes, perfumes, medicaments, antiseptics, paving materials, and fuels.

The use of furnace slag, in former years not only usless but expensive to remove as well, is becoming more general for various commercial purposes, and the field for further development is excellent. At present, quantities of this material are made into bricks, paving stones, cements, and used as fertilizer. Slag wool, made by blowing steam through a stream of melted slag, is a splendid heat-insulating material. The heat in the slag as it runs from the furnace has also been used in various ways. A good example of metallurgical waste utilization is found in the production of pure tin, good weldable iron, ammoniac, and Prussian blue, from the waste clippings of white iron. The introduction of the gas engine offers excellent means for employing waste blast furnace gases, though these have previously been made use of in other ways.

Few indeed are the industries which have developed utilization of by-products to such a state of perfection as has the slaughtering industry. It is no exaggeration to say that the animal slaughtered is used from the tip of the horn to the hair at the end of the tail. The quantity and variety of the products from formerly useless portions of the carcasses are almost incredible.

Cut Book No. 58
Page No. 11

Power Equipment at Lewis Bros. Wholesale Warehouse, Montreal.

FINE POWER EQUIPMENT.

Onr illustration, on this page, will give an idea of the power equipment in the splendid wholesale warehouse of Lewis Bros., Montreal. This building, which is admittedly one of the largest and finest, for the purpose, in the country, requires considerable electrical energy to light the entire premises, and also run the passenger and freight elevators.

The plant for supplying this power, was installed by Allis-Chalmers-Bullock, Montreal, and consists of a 75 K.W. direct current generator, and auxiliary apparatus, illustrated herewith. It is situated in the basement, adjoining the boiler room, and visitors are always struck with the complete manner in which this, as well as the rest of the building, has been equipped.

SPADE HANDLES WANTED.

A well known manufacurer informs J. B. Jackson, Canadian trade agent at Leeds, England, that there is a very large market there for Canadian spade handles. The handles must be turned and finished off to requirements in every minute detail: what is required by one firm may not suit another. Eaeh manufacturer's article differs in some point or other from that of his competitors. An everyday 'T-shaped' handle generally averages 32 inches by 1 1-2 inches in diameter and the size of the popular 'D' from 30 inches to 32 inches long by 1 1-2 inches in diameter.

Wood handles are also required for numerous other implements. Sheffield is the best market in the north of England for these goods, followed by Leeds and Hull respectively. Several important inquiries have been made for wheel spokes and trap shafts. The spokes should average 28 inches long and from 2 inches to 3 inches in width. The trap shafts should be bent in the usual way, and should average 9 feet to 12 feet in length, and from 2 1-2 inches x 1 1-2 inches, 2 3-4 inches by 1 3-4 inches and 3 inches x 2 inches in width and thickness.

Business men who cling to ancient methods are apt to be left at the post.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Nov. 30, 1906.)

Room 511, Union Bank Building, Office of HARDWARE AND METAL, Winnipeg, Man.

Values are steady this week, and there are no quotable changes of importance. There is a good movement of all general lines of hardware.

LANTERNS — Quotations are as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—As noted last week the price has been advanced to $2.70 per keg.

CUT NAILS—As was noted last week the price has been advanced to $2.80 per keg.

PRESSED SPIKES — Prices are quoted as follows since the recent advance: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Discounts are quoted as follows since the recent advance in the price of copper rivets: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ¼, $7.20; ⅝, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—Business is particularly active at present in axes and handles. Prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

GALVANIZED WARE—As noted last week there has been a general advance in galvanized ware, the discount on pails being now 37½ per cent and other galvanized lines 30 per cent.

CORDAGE—We quote: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Quotations are as follows: Cartridges, Dominion R.F. 50 and 5; Dominion, C.F., 33½ C.F., pistol, p.c.; C.F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Bar iron is steady at the advance noted last week. Quotations are:—Bar iron basis, $2.70. Sweedish iron basis, $4.95; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—Quoted a $5.85 per cwt.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

IRON PIPE AND FITTINGS— Revised prices are as follows:—Black pipe, ¼ inch, $2.65; ⅜, $2.80; ½, $3.50; ¾, $4.40; 1, $6.35; 1¼, $8.65; 1½, $10.40; 2, 13.85; 2½, $19.00; 3, $25.00. Galvanized iron pipe, ⅜ inch. $3.75; ½, $4.35; ¾, $5.65; 1, $8.10; 1¼, $11.00; 1½, $13.25; 2, inch, $17.65. Nipples, discounts 70 and 10 per cent.; Unions, couplings, bushings and plugs, 60 per cent.

LEAD PIPE—The price, $7.80, is firmly maintained in view of the advancing lead market.

GALVANIZED IRON—Quoted as follows:—Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65, 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.50; 26, $4.65; 28, $5.00.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Quoted as follows: Canada plate, 18 x 21, 18 x 24, $3.40; 20 x 28, $3.65; full polished, $4.15.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

We have been fortunate enough to secure the Western Agency for **BERRY BROS.** celebrated **VARNISHES** and are carrying a full stock from which all orders will be shipped promptly.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the **Western Trade** to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

Fort William, Ontario.

Everything for the Painter

Wire Glass

This is the season of the year when buildings are being completed—Wire Glass will be needed for Skylights, Metal Frames, etc.

Wire Glass is now almost universally used instead of Rough Rolled Plate on account of the ultimate economy. It may crack but the wire mesh keeps it intact and just as serviceable as ever.

Wire Glass is practially indestructible.

Special prices in case lots—write for them. Samples furnished on request. You may have an enquiry any day, better be prepared.

G. F. STEPHENS & CO., Limited

WINNIPEG, CANADA

PETROLEUM AND GASOLINE—A decline in petroleum will be noted in prices below. We quote:—Silver Star in barrels, per gal., 20c.; Sunlight in barrels, per gal., 21c.; per case, $2.30; Eocene in barrels, per gal., 23c.; per case, $2.50; Pennoline in barrels, per gal., 24c.; Crystal Spray, 23c.; Silver Light, 21c. Engine gasoline in barrels, per gal, 28c., f.o.b. Winnipeg, in cases, $2.75.

PAINTS, OILS AND TURPENTINE—Turpentine has advanced. We quote: White lead, pure, $7; bladder putty in barrels, 2½c.; in kegs, 3¾c.; turpentine, barrel lots, Winnipeg, $1.01; Calgary, $1.08; Lethbridge, $1.08; Edmonton, $1.09. Less than barrel lots 5c. per gallon advance. Linseed oil, raw, Winnipeg, 64c.; Calgary, 71c.; Lethbridge, 71c.; Edmonton, 72c.; boiled oil, 3c. per gal. advance on these prices.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

DAVID REID & CO.

Hardware Commission Merchants

Room 22 Stanley Block, - Winnipeg, Man.

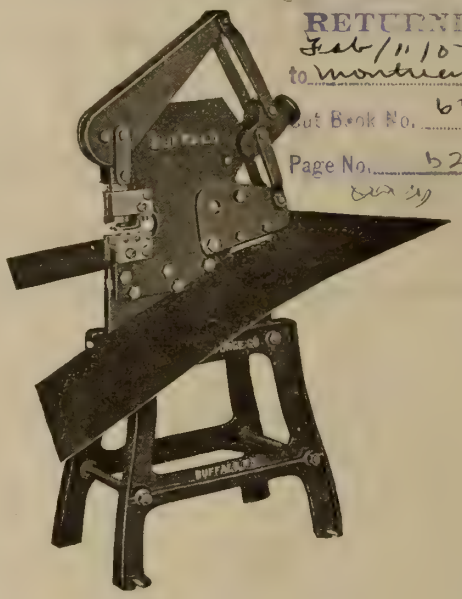
Correspondence is solicited from manufacturers wishing a representative in Winnipeg and the North West.

We have sub-agents throughout Western Canada.

BEST OF REFERENCES

SHEAR, PUNCH AND BAR CUTTER.

During the past three years quite an extensive line of armor plate punches, shears and bar cutters, comprising in all some 32 machines, have been brought out by the Canadian Buffalo Forge Co., Montreal, Que.



The machine illustrated in the act of shearing a plate is a new addition to this line which has just passed through several months of practical use to test the various points of merit claimed for it. One special feature is the provision for shearing any length without binding or crimping by placing an ingenious device between the top and bottom plate to prevent any tendency in this direction.

The machine is built in three sizes, known as Nos. 2½, 3½, and 4½ weighing respectively 150, 320, and 460 pounds. The smallest will punch ¼ inch holes in ¼ inch plates, split plates of No. 12 gauge, cut round iron up to ½ inch in diameter and ¼ x 1 inch flat stock. The intermediate size punches ⅜ x ⅜ inch, splits No. 10 gauge and cuts ⅝ inch round and 5-16 x2 inch flat bars, and the largest punches ½ x ⅜ inch, splits No. 8 gauge and cuts ¾ inch round and ⅜ x 2½ inch flat bars.

The frames are made of armor plate and the other parts consist of drop forgings and crucible steel, with the exception of the stand, which is of cast iron. The bearing surfaces are machined and carefully fitted to eliminate lost motion. The jaws of the shears are of tempered crucible steel, and it is claimed will not give at the ends or spring and will not break under continual use at the rated capacities.

The use of much sheet metal in the company's works led to the development

Shear Punch and Bar Cutter.

of these tools, where lightness, strength and indestructibility were important qualifications. Originally they were offered to the blacksmith trade only, but they have proved to be very convenient for workers in structural iron, and are now presented to the metal working trades in general.

The complete line includes machines for almost every use that may arise in these trades.

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1420. Grindstones. — A Yorkshire manufacturer of grindstones desires to get into direct communication with Canadian engineers, timber merchants and other users of these goods. Inquirants are also manufacturers of pulp stones for grinding wood pulp of all descriptions; inquirants are also open to appoint a good Canadian wholesale firm to handle these goods.

1423. Machine tools, etc.—A Yorkshire firm, manufacturing all kinds of machine tools and lathes, with latest labor-saving devices, would be pleased to correspond with Canadian buyers.

1424. Iron castings.—A Yorkshire firm manufacturing all kinds of high-class iron castings to any weight or size, would be pleased to quote to Canadian buyers.

1425. Machine tools, etc.—A Yorkshire firm, manufacturing all classes of machine tools and lathes, for ordinary and other requirements, also rock drills for prospecting, and water-boring drills and machinery, invites correspondence with Canadian buyers.

Announcement to the Trade

The Fire at our York Street, Toronto, Warehouse, on the 28th inst., will not interfere in any way with our regular business, as we have complete stocks at our Montreal, London and Newmarket Warehouses, and at our Clarence St. Warehouse, Toronto.

Further, our Manufacturing facilities will not be affected, our Toronto Factories being located on Adelaide St.

UNITED FACTORIES, LIMITED

Temporary Office:—Nordheimer Building, TORONTO, Can.

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

1907 Calendars.

Ferdinand Dieckmann, 1180-84 Harrison Ave., Cincinnati, Ohio, manufacturer of conductor elbows and shoes, announces that he is now preparing the trade mailing list, to whom he will send copies of his artistic calendars for next year. Readers of Hardware and Metal who handle this line, should drop Mr. Dieckmann a card giving their business address and asking for a copy.

Browning Automatic Pistols.

A. Macfarlane & Co., Montreal, Canadian agents for Browning automatic pistols, have sent us a small illustrated catalogue of about 5 x 7 inches, with 24 pages and cover, containing an illustrated description of the latest model of the Browning automatic pistol, which is of minature size, adapted for carrying in pocket. As in automatic rifles and shotguns, the pistol of that design will fill a long felt want. An arm possessing so many advantages is sure to become a great favorite, and it is safe to predict that the success of the model 1906 cal. 6.35 (equal to 25 calibre) Baby Browning will not be less than the model 7.65. The catalogue gives full information regarding all parts, loading, cartridge, etc., of the pistol, which in itself is very interesting and goes to show the wonderful mechanism of their arm. Copies of the booklet can be procured from Macfarlane & Co.

Richardson Skates.

A neatly bound and printed booklet of 24 pages, 4 x 8 inches, has been issued by the Richardson Ball Bearing Co., 501 Wells St., Chicago, describing the superior mechanism of these modern roller skates and illustrating the various parts. The book contains some very interesting matter, and is worth sending for by any hardware merchant looking for roller skate trade. Mention this paper.

Register Price List.

The Pease Waldon Co., Winnipeg, are issuing to the trade a handsome booklet giving prices on side wall registers. The booklet contains much valuable information as to the capacity of different sized pipes and registers and will on that account be of constant use to the heating trade. A post card mentioning Hardware and Metal will secure a copy for any member of the trade.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

CALIBRE AND BORE.

In reply to a correspondent, the Scientific American explains the meaning of the word "bore" as applied to shotguns; and more particularly when it is used in conjunction with a numeral as in speaking of a 10-bore, 12-bore, or 16-bore shotgun. At the first reading, anyone who is familiar with modern rifles and heavy ordnance might think that the word "bore" here was used as a unit of length, as when we say that a 50-calibre, 16-inch rifle is a rifle 25 feet, or fifty times the calibre (diameter of the bore), in length. But as a matter of fact, the term "bore," when applied to shotguns, is never used to indicate length, but always refers to the diameter of the bore. There is, by the way, quite an interesting scrap of history attached to the use of the term, which carries us back to an early period in the use of firearms.

In the days of our forefathers, when rifle balls were spherical, and long, cylindrical, conical-headed bullets and rifled barrels were undreamed of, the gunsmith adopted a curious but convenient method of designating the gauge or diameter of the bore. He expressed it by stating how many bullets, of a size that would fit a particular musket, would go to make a pound. Thus, a 10-bore musket would be one of such a bore than ten of its bullets would go to make a pound weight; a 16-bore gun would be one whose bullets would run sixteen to the pound, and so on. Hence we get the anomaly, that the larger denomination musket has the smaller bore. Although the day of the spherical bullet has long passed away, and the only smooth-bore remaining is the shotgun, the old method of designation has been retained.

HOLIDAY CONTESTS.

A Schenectady, N.Y., store, held a contest last Christmas in which the prize was a big Christmas dinner. A dinner was offered to every boy who would bring to the store 500 ads. clipped from the local papers. A special prize of $5 in gold was offered to the boy bringing in the greatest number of ads. It was advertised, however, that any deserving poor boy registering his name at the store would be given a dinner ticket whether he secured the requisite number of ads. or not.

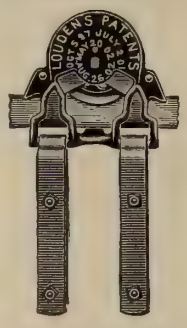
FOUNDRY AND METAL INDUSTRIES

The stock of stoves, and heaters, patterns, tools and foundry supplies, also machinery of the Hardware Specialties Manufacturing Company, Chambly, Canton, Que., were sold at public auction this week.

The Dyment Foundry, Barrie, which was recently destroyed by fire are asking exemption from general taxation and a fixed assessment of $12,000 for school purposes for a stated period, free light and water with proper limitations for the same period, and a loan of $20,000 without interest, to be repaid in twenty equal annual instalments. The Messrs. Dyment undertake to build and equip a foundry and machine shop, double the capacity of the former building, by August 1, 1907; to employ at least 50 men continuously for 300 days each year, and to give the town full security for loan by first mortgage on plant and building.

GROWING IRON.

According to a paragraph in Knowledge, the Franklin Institute has awarded a gold medal for a new process by which iron can be made to "grow." The process is said to consist in several times heating the iron to a certain critical temperature and cooling it between times, whereby the astonishing result is obtained of increasing the iron to nearly half as large again. It is reported that two identical castings were made, and one reserved for comparison, while the other was subjected to this new treatment. One side of each was machined and polished so that examination of the grain and structure might be made, but little difference could be discerned except in point of size, which was very marked. The weight of the swelled casting was identical with that of the one with which it was compared, but in all other respects the metal appeared to be of similar character. After this one is surprised to learn that important practical applications have already been found for the remarkable discovery; indeed, new uses suggest themselves instantly to the mind. The story is so extraordinary, however, that it may be accepted with some hesitation until confirmation is afforded.



MELTING IRON WITH BRASS.

If metallic iron is melted along with copper or brass, it is said that part enters the alloy and becomes chemically combined, and the remainder separates in pellats or nodules of the hardness of steel. These nodules are the source of much trouble in brass, as they injure tools to an alarming extent.

We would like an opportunity to show you what we can do for you in the paint business, whether you handle a line now or not. Our proposition is so good, it means so much in profit and success to the dealer who takes it up, that we know we can interest you. Our line of paints and varnishes is complete and satisfactory; our advertising helps are strong and produce results; our co-operation coupled with yours builds up a trade that pays dividends year in and year out. And, most important of all, our goods stay sold and make more sales. Let us hear from you today with a request that our representative call and explain our proposition.

Paint, Oil and Brush Trades

THE PAINT TRADE IN ENGLAND.

Manufacturers of paint, varnish, and kindred products who desire to do trade in Great Britain and Ireland will doubtless be glad to learn something as to the conditions of sale which prevail in those countries, and to have some information as to which goods of American manufacture are most likely to be acceptable, writes an English correspondent of the New York "Oil, Paint, and Drug Reporter." In the first place it should be thoroughly understood that there is no duty charged on any paints, varnishes, or kindred products in the United Kingdom. They are all entered free, so that the American manufacturer has only to add the cost of freight in shipping his goods from the United States into England to the prime cost, in order to ascertain his chances for doing business.

Comparing the United States with the United Kingdom, the most striking difference arises from the great dissimilarity in the extent of territory. In England it is not difficult to cover the whole ground by means of a half-dozen travelers, with perhaps two or three additional in Scotland, and say one or two in Ireland, so that by means of a dozen good drummers the whole of the ground could be thoroughly covered. The custom, therefore, of selling to painters through the wholesalers or jobbers which so largely prevails in the United States, is not usually carried out in England, but the sales are made direct to the painter, or decorator, at least in most cases. The large varnish and paint houses pride themselves upon selling direct in this manner, and there is but little doubt that the system is, on the whole, a good one, because high quality, with its necessary high prices, can be maintained, while it is often sacrificed when sales are made through jobbers. At the same time, a good deal of business is done through agents among the smaller painters and decorators. The large wallpaper houses usually sell also all grades of paints, varnishes, brushes, and other painters' tools, and carry on a general agency, which is, of course, subservient to the paperhanging business proper.

We now come to a consideration of the goods which are most likely to succeed in Great Britain. Until about two years ago there was not a really first-class ready mixed paint on the English market. A good deal of ready mixed paint is put up in 1-lb. or 2-lb. "lever top" cans, but it has always been of a very inferior quality, and the painter and builder could not be persuaded to use it under any circumstances. Some time since one or two English firms took up the manufacture of a really first-class paint, and pushed it vigorously. One of these firms is to be amalgamated with a well-known American firm. Other houses are proceeding on the same lines, and there is but little doubt in a year or so nearly every firm will have on the market a really good ready mixed paint. There will be a good deal of work to be done in getting such paints taken up by painters, in fact the same difficulties which were encountered in America by the writer some fifteen years ago. Still, the price at which they can be produced, and the saving of time, and hence money, in their production is pretty certain ultimately to lead to their more or less general adoption, at least among a certain class of painters.

And here it will be convenient to break off for a moment to explain a condition of the painting trade which does not prevail so far as we are aware, abroad. In Scotland and the north of England the business of painting and decorating are almost invariably carried on as a distinct business in itself, and quite apart from any other; in brief, it is conducted in just the same way as is the custom in New York, Chicago, and Philadelphia, or any other large American town. In the southwest and Midland counties, however, the conditions are entirely different. It is true that there are few painters, of what one may term a superior class, but as a rule painting is done in connection with plumbing or building, hence in London we have many thousands of tradesmen who call themselves "Builders and Decorators." or "Plumbers and Decorators." The former build and repair any class of building in all its branches; the latter finds a combination of the two businesses an advantage, inasmuch as the plumbing keeps them busy in the winter, while the painting tides them nicely over the summer, when plumbing, gas fitting and heating are not very brisk. Now, among this class, and it is an exceedingly large one, there is ample room for pushing ready prepared paints of all kinds, provided they are of good quality. The high

Small Springs of Every Description.

The White Lead Is The Thing

You may take it for a certainty that the White Lead used in the manufacture of paints is the index to the quality of the product. No manufacturer would use a good white lead and select other materials that were not in keeping with it. On the other hand no manufacturer who selects an inferior lead is likely to be particular about the other ingredients. Know the white lead, and you know the paint.

Now, the bearing of this principle on

"Anchor" and "English"
LIQUID HOUSE PAINTS

is the fact that when you know that the only white lead used in their manufacture is

Brandram's
B. B. GENUINE

(which has been the world's standard for nearly two centuries) you need no other argument to explain the preference consumers show for these paints.

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 30, 1906

Quietness pervades the paint and oil market, as is natural to expect at this season of the year. All lines are firm, however, and from the present appearance of primary markets, there will not be any readjustment tending to lower prices, for a long time to come.

All lead products show an especially strong tone, and it would not be surprising if further advances should materialize shortly.

LINSEED OIL—We continue to quote as follows: Raw, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.; boiled, 1 to 4 barrels, 58c.; 5 to 9 barrels, 57c.

TURPENTINE—We still report a firm market, and following prices: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—The market is constantly adding strength. We quote: Best brand Government standards, $6.75 to $7.00 No. 1, $6.40 to $6.65; No. 2, $6.05 to $6.40; No. 3, $5.80 to $6.05, all f.o.b. Montreal.

DRY WHITE ZINC—V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—Orders are large and numerous. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—High prices in primary markets are responsible for firmer conditions. We still quote however: Genuine red lead in casks, $6.00; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

SHELLAC—Our prices are:—Shellac Bleached, in bars or ground, 46c per lb., f.o.b. Eastern Canadian points, Bone Dry, 57c per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 48c per lb. f.o.b. New York.

SHELLAC VARNISH—The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

BENZINE—Last weeks advance holds good, and we continue to quote 25c. in barrels and 30 cents in smaller quantities.

WINDOW GLASS—We quote: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, November 30, 1906

While paint is practically at a standstill, orders are being taken in large quantities for spring shipments by some firms but others refusing to book orders for shipments later than Dec. 1st, 1906, as the general outlook is that all paint materials will advance on present prices.

All lead products continue strong and a further advance is looked for. Linseed oil remains firm and turpentine remains unchanged with a probable advance to 99c or $1.00 should the demand remain good. The output of turps has been smaller than in former years as labor has been hard to procure and the demand for turpentine much larger.

WHITE LEAD — Ex Toronto, pure white, $6.80; No. 1, $6.42½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $7.00.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6.50; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.25.

DRY WHITE ZINC— In casks, 7 1-2c.; in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

A. RAMSAY & SON COMPANY

Est. 1842 MONTREAL PAINT MAKERS

Just try some ordinary green paint on a panel of wood, see how hard it works,—don't cover; lacks body. Then try on another panel

LUCAS IMPERIAL FRENCH GREEN

notice how easy it spreads, how well it covers,—that's body. Makes the cost less for this reason alone, and stays fresh and brilliant. It preserves the wood, keeps the weather out and the color in. It is the **ONE** Green that is free from arsenic or verdigris.

BEWARE OF IMITATIONS

JOHN LUCAS & CO.

NEW YORK, PHILADELPHIA, CHICAGO

PAINTS AND VARNISHES

Why is the name of the CANADA PAINT CO. LIMITED, a guarantee of the contents of every package which bears it?

BECAUSE they are Primary Makers and not merely color grinders, i.e.,

(a) They operate their own deposits of Canadian minerals, which are among the best in the world.

(b) They manufacture their own colors from the primary chemicals.

BECAUSE as makers of their own pigments and colors they have absolute knowledge of the materials they use and assurance of their quality; besides this, they save the first profit and Customs duty paid by other makers who purchase their pigments.

BECAUSE their manufactures are tested by their own practical experts, who know their business in every detail.

BECAUSE by the most improved machinery and manufacturing in large quantities every economy is exercised, and the purchaser gets the benefit of this.

BECAUSE upwards of a million packages of their goods are used every year with complete satisfaction and their trade steadily increases.

YOU ARE SAFE therefore in purchasing any package of Paint or Varnish which bears the name of

The CANADA PAINT COMPANY

PAINT TRADE IN ENGLAND.

(Continued from page 48.)

class decorator must be looked upon as an impossibility as a customer for mixed paints, but the remainder are very likely purchasers. The writer recently had occasion to compute the number of painters in the United Kingdom; by actual count the number of painters, paperhangers, and house decorators carrying on business within the three kingdoms was found to be 20,700. Adding to this the number of builders, we have in round figures 50,000 firms who are possible customers for paints.

As far as can be gathered, American-made varnishes are not imported into England in very large quantities, excepting in the cheap grades. One American firm imports a fair amount of high grade carriage varnishes, but as a rule English manufacturers hold the ground very closely, and it would be difficult to get the trade away from them, especially as a very long credit is the custom. Good, cheap varnishes sell for cash among builders, and no doubt a considerable trade could be done in them. But there is not much chance for colors or "stainers," as they are usually called, the home-made article being generally of excellent quality and reasonable price. In various specialities, however, the field is practically open. During the last few years there has been a great advance made in the sale of what are known as "washable distempers." These may be described as kalsomine, which, when dry, may be washed down. They are made in various ways with the binder, which is often caseine; they are manufactured in a large variety of colors, ranging from the richest reds and greens to pale tints of various hues. Nearly every paint manufacturer in the country now has a washable distemper on the market, and it is doubtful whether there is room for any more. Indeed, a well-known American firm some time since, sent a special representative over to examine the ground, and he, after close study, decided that it would cost more to get the market than the trade would be worth.

The following are some of the goods which are not made in England at all, or at least, if they are, it is to a very limited extent: Liquid wood fillers, floor paints, machinery paints. Either of these are to succeed if a good article be well pushed. There are a dozen or more good paint-removers on the market; the favorite being those which are supplied in paste form, but which are not alkaline in their nature. The English painter claims that for outside work the liquid paint-removers evaporate too quickly. During the last twelve months there have been several "graphite" paints brought out, and these goods appear to be likely to come into favor. As a final word, I would recommend American manufacturers who seek the English market to act upon the following plan: Unless they are prepared to go to the expense of setting up an office in London, with a staff of travelers, it would be well to arrange with several agents to handle their goods, giving them each an exclusive territory.

DISCOVERER OF MURESCO.

Benjamin Moore, of the large New York and Chicago paint company, which bears his name, was a visitor in Toronto during the past week conferring with Mr. Frost, general manager of the Toronto end of the Benjamin Moore Co.'s business. Mr. Moore is the discoverer of "Muresco" wall decorator, and he is enthusiastic about the way his invention has caught on in Canada. Mr. Frost predicts a sale for it of from 500,000 to 1,000,000 in Canada during 1907.

Store service is the best thing upon which the merchant can build. His competitor can buy the same goods as cheaply as he. Price and quality are matters of buying, and in these days one merchant can buy pretty nearly as well as another. Store service, however, is a matter of individuality. Get in close touch with your employees and you can serve the public in a way that will get business coming your way. Good service is always appreciated.

Please mention HARDWARE AND METAL when writing.

Coat on Coat

You can Alabastine on **ALABASTINE,** but you cannot kalsomine on kalsomine, nor paper on paper—at least, it is a very unhealthy practice to do so, Kalsomine, however named, will rub off and have to be washed off before a second coat can be applied.

ALABASTINE can be recoated many times, each coat an added improvement on the previous one.

ALABASTINE is permanent, sets and hardens on the wall and improves with age.

ALABASTINE **IS THE BEST** selling proposition in the line in Canada. We could fill several pages of this book with testimonials from dealers who sell our goods, and painters who are using them exclusively, from the Atlantic to the Pacific, if we so desired, both of recent date and running back several years; but it is not necessary for us to do so.

A well-assorted stock insures good sales. Remember, present delivery, spring dating. Order direct or through your jobber.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

Anton Bery has accepted a site for his proposed factory at Guelph.

The Frost Wire Fence Company, Hamilton, have surrendered their charter.

A rink is to be built at the Mimico Industrial School, Toronto, costing $2,000.

Work has been started on the new warehouse for McClary Mfg. Co., in St. John, N.B.

Building permits have been issued at Vancouver in the month of November for nearly $1,000,000.

The Stevens Company of Galt, are to erect a new moulding plant in connection with other workshops.

Willian Gray & Company, Carriage manufacturers of Chatham, will build a $100,000 factory in Winnipeg.

The Montreal Bank will erect a branch at North Toronto, having purchased the site for the building.

Fire did damage to the extent of $200 at the Ontario Tack Company's factory in Hamilton a few days ago.

The F. B. Wood Company, Hamilton, will erect a large addition to their factory, making it twice its original size.

The new nine storey building erected for the C. W. Lindsay & Company, of Montreal, was formally opened last week

The Canadian Bank of Commerce at Vancouver, B.C., will erect a new block for bank and office buildings to cost $450,000.

A permit has been issued for the construction of an eight storey brick and stone hotel, costing $100,000, in Toronto.

A brick and pulp mill will start at Prince Albert, Sask., it is expected that $100,000 will be invested by each concern.

A permit has been issued the Gerhard Heintzman Piano Company for the building of an addition to their Toronto factory, to cost $10,000.

The Phillips Manufacturing Company, Toronto, will erect a new two storey factory building containing 132,000 square feet of floor space.

The Hamilton Bridge Company have secured the contract for all the iron work in the new C.P.R. bridge, across the Belly river, Lethbridge, Sask.

The Lufkin Rule Co., of Saginaw, Mich., has secured a site in Windsor, and will build a Canadian factory early next spring. Meanwhile the firm has secured temporary quarters and will begin building operations at once.

A new company has been incorporated with a capital of $1,000,000, to be known as the German Developing Company, with head office in Toronto.

During the heavy wind storm of last week, the addition, which was being built to the moulding shops of Taylor Forbes Foundry, Guelph, was blown down.

The large planing mill of Robertson & Hacketts, at Granville, B.C., was totally destroyed by fire, loss being estimatted at $40,000, partially covered by insurance.

The Dominion Iron & Steel Company's rail mill at Sydney, which has been closed down for several weeks, has resumed operations. There is a sufficient stock of machinery on hand to keep the mill running double-shifted.

The Dislea Devlin Manufacturing Company, of Hanover, Ont., have made an assignment to John Mills. The company have been manufacturers of chairs and also ran a foundry. They were capitalized at $30,000, and have been in business for about eight years.

The Ideal Fence Company are installing machinery in their new plant in Winnipeg. W. L. McGregor, manager of McGregor Banwell Fence Company, Walkerville, is President; W. H. Burnham, manager of the Lamb Wire Fence Company, Adrain, Michigan, Vice-President, and S. A. Stewart, Secretary of the company.

The Ruby Silver Mining and Developing Company has been incorporated with a share capital of $500,000. The head office is to be at Hamilton. The company will do a mining, milling and reduction business. The provisional directors are: S. J. Lloyd and W. J. Hutchinson, of Montreal; J. M. Peregnue, G. R. Lloyd and H. S. Lees, of Hamilton.

A company has been incorporated with head office at Hamilton, with a share capital of $40,000, for the purpose of manufacturing tacks, cut nails, wire and wire nails, hardware, and hardware specialties, to be known as the Consolidated Hardware Manufacturing Company, with Henry Wynn, Frank Forsyth and C. H. Brigger, all of Hamilton, as directors of the company.

The Nova Scotia Steel & Iron Company are preparing to add another blast furnace to their plant at Sydney Mines early next spring, which will enable them to produce about 400 tons

of pig iron per day. At present no ore is being smelted on account of extensive repairs which are being made to the furnaces, and which will not be completed before the latter part of December. The repair work, however, is being rushed, three shifts of bricklayers being kept constantly employed.

A proposition is being considered by the Sydney, N.S., City Council, respecting the establishment there of a rolling mill, capitalized at $1,000,000. The promoters say that 250 hands will be employed. The buildings to be constructed will cover an area of 80,000 square feet. The proposed plant is for the manufacture of bar steel, angle bars, tie plates, pit rails, railway spikes, bolts and other articles used in connection with the building and construction of railways. The cost of construction and building machinery will amount to about $400,000. The furnace and boilers will use over 20,000 tons of coal per month. It will take from seven to nine months to erect the buildings and install the machinery. The buildings will be constructed of steel, with concrete foundations. The company will secure its raw material from the Dominion Iron & Steel Company. They are asking the city for a bonus of $50,000 and exemption from taxation for twenty years. These concessions may be granted.

MAKING CHRISTMAS BUSINESS.

A Western States grocery store held another style of a contest for boys and girls. An "Auto" valued at $15.00 was offered as the boys' prize, and a doll of the same value constituted the girls' prize. The conditions of the contest were advertised as follows:—

1. I am going to give one Contest Check with each purchase made at my store for 10c. or more, from November 25, to December 30, 1905.

2. Any and all members of the family can make as many purchases each day as they desire.

3. Small buyers are equal with large buyers. Thus any distinct 10-cent purchase entitles you to 1 Contest Check, and a $5.00 distinct purchase entitles you to 1 Contest Check.

4. It is your privilege to ask your friends and neighbors for Kline's Contest Checks.

5. All Contest Checks must be handed in in sealed boxes not later than 12 o'clock noon, December 30, 1905.

6. Contest Checks will be counted and prizes awarded by 3 of La Porte's prominent business men, Saturday evening, December 30, at 9 o'clock. The prizes will be awarded to the boy and girl having the largest number of checks.

7. No boy or girl over 15 years of age can take part in this contest, but boys and girls of all ages can help their brother, sister or friends to win the prizes.

8. Be sure and ask for Contest Checks at time of purchase.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

W. A. Mitchell, hardware merchant, Kingston, asks for the address of the makers of Coburn barn and parlor door hangers.

They are made by the Coburn Trolley Track Mfg. Co., Holvoke, Mass.—Editor.

Steel Palm Band Cuters.

The Miller Morse Hardware Co., Winnipeg, desire to locate the manufacturers of steel palm band cutters with strap over back. They are not known in Toronto. Can any reader of Hardware and Metal supply the required information.

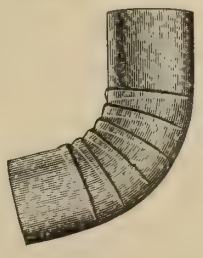
Brandon Mitre Machine.

R. H. Bradfield & Co., hardware merchant, Morrisburg, Ont., write asking the name of manufacturer of Brandon mitre machine.

This machine is manufactured in Ohio, by the Brandon Mitre Machine Co., but can be procured in Toronto for $17.00, from either the Phillips Mfg. Co., or Matthew Bros. both manufacturers of picture mouldings.—Editor.

Ash Sifters.

C. W. Fawcett, hardware merchant, Tiverton, Ont., asks for the address of the makers of "Good Value Ash Sifter," and the "No. 1 Hustler."



The "Hustler" is made by the Hill Dryer Co., 316 Park Place, Worcester, Mass., and the "Good Value" is made by J. T. Wilson, 166 Queen St. W., Toronto.—Editor.

FACILITATING DELIVERIES.

Anything that will save a minute or two of a salesperson's time during the rush that precedes Christmas, is a great help to the store. In November, last year, Wanamaker's Philadelphia store advertised that any customer who would leave her name and address, plainly written, would be sent a book of stickers with her name and address plainly printed thereon. Whenever a purchase was made a sticker was pasted to the sale slip. This saved the customer's time that would have been required to write the name, and the salesman's time who would have had to wait for the name. It also saved a good deal of the time of the delivery department that would otherwise have been lost through faulty addresses.

Graham Fraser, lately with the Nova Scotia Steel Company, is said to be the promoter of the new car wheel foundry at Longue Pointe, Quebec.

A $25,000 addition to the Polson Iron Works on Esplanade Street, Toronto, is being made in the form of a one storey steel and concrete machine shop.

COST OF BEING LONDON'S LORD MAYOR.

Hardware men have been interested in the position of Lord Mayor of London, the historical position to which Dick Whittington rose after walking into the world's metropolis a century or more ago, as a poor boy with no friend but the cat, which was his companian, because of the occupancy of the position during the past year of Sir Walter Vaughan Morgan, the publisher of the Ironmonger, our English contemporary. eaders of Hardware and Metal will, therefore, be interested in a resume of the heavy expenditures which show clearly that no one but a wealthy man can hope to occupy this honorable position.

London allows the Lord Mayor the sun of £10,000 as his salary for the year, in order to enable him to fulfil with dignity the many expensive duties that he will be called upon to perform, but such are the demands of precedent in these times, and so unwilling would any Lord Mayor be to do the thing in a manner inferior to his predecessors, that this £10,000 is not half enough to bear the cost of the office from November 9, to November 9.

It is generally understood that a Lord Mayor is getting off very cheaply indeed, if his year costs him no more than £25,000. Such a year would be one in which there would not be very much glory or distinction. Things would have been quiet in the city. If royalty is there on one or two occasions, and above all, if a foreign monarch pays a visit to the corporation, as has happened so frequently in late years, the Lord Mayor may depend on it that his period of office is going to cost him £30,000.

His expenses begin on the day of his initiation. It is generally reckoned that the show and the banquet cost about £4,000. A Lord Mayor who is anxious to give the public a novelty in the way of these exhibitions—something of a specially gorgeous character—may find the bill for the day run very close to £5,000. This bill is settled by the Lord Mayor and the two Sheriffs between them, the former paying half and the others a quarter.

There are a thousand and one sources of expense to the Lord Mayor. Chief among them are the big banquets that are given by every occupant of the Civic Chair—to the Bishops, to the Judges and Elder Brethren of Trinity House, and so forth. Every Lord Mayor lays himself out to do these really well, and invariably adds some special entertainment to distinguish his own from those of all others.

Then there is the heavy cost of official attendance at functions of one kind and another almost every day of the week, with the generous subscriptions to charitable institution for which each Lord Mayor is obliged to make his year of office conspicuous. Moreover, the growing custom of fraternizing with municipal authorities abroad is adding thousands to the annual expenditure of the Lord Mayor. Then there are many peculiar little custome, of which the public hears nothing, which the Lord Mayor is expected to continue, at varying expense to himself. For example, the wonderful collection plate at the mansion house is being added to are many peculiar little customs, of each Lord Mayor during his term of office to supplement it with a fresh £500 worth of gilt as a gift from himself.

Obviously the Lord Mayor must be a very rich man, and it might seem to be a point of difficulty that in order to become Lord Mayor a long term of apprenticeship to civic duties has to be served by the aspirant to the office, and some years before his turn comes he has to go through the preliminary trial of shrievalty. So that he must usually begin very young, and at that time of life he is not generally at all rich and is in doubt about his prospects. It is the custom, therefore, when a member of the court of common council aspires to the high office, for him to put something by each year of his life which will enable him to accept the office when the time comes. If by that time he has not got enough money he asks for his name to be passed over, often giving ill-health as his excuse: and so he can never be Lord Mayor.

Supposing a man with insufficient means were, in order to satisfy a life-long ambition, tempted to try to scrape through somehow. The city takes care that no such attempt shall be made—partly for its own sake and partly for the sake of all those who may be dependent upon the would-be Lord Mayor or who have business dealings with him. The fact that he has at last become eligible is some evidence of pecuniary capacity, since he must have been alderman for about ten years at an annual cost to himself of £400 or £500, and must also have been Sheriff, which will have cost him from £2,000 to £3,500. But being Lord Mayor is, after all a different matter, and the city demands that the most convincing proof of the candidate's financial standing shall be afforded to it.

Before the time for his election comes a secret sitting of the court of aldermen is held, and at this sitting the alderman who is next in rotation for the chair practically lays bare to his brethren his financial position. He produces proof that he is in possession of means which will warrant him in spending £10,000 over and above his allowance without impoverishing his family. If the brother aldermen are satisfied all is well. Needles to say, the giving of such information is a very serious matter to a city magnate; but the secrets he discloses after he has thus "given bond" are never under any circumstances told outside. It would go ill with any alderman who became a traitor to this absolutely secret court.

Plumbing and Steamfitting

THE PLUMBING OF A COTTAGE

By J. A. F. Cardiff in the National Builder, Chicago

Article XII.

Installation.

This number we show another method of sewage disposal when there are fixtures or drains below the level of the street sewer. In this case the bathroom and kitchen plumbing fixtures discharge into the soil stack indicated, and the sewage is carried to the sewer in the street by gravity. The roof leader is located at the rear of the building and is provided with a running trap a little inside of the foundation wall. During heavy rain storms the water discharged by the leader thoroughly flushes and cleans the house drain.

The waste from the wash traps which are located in the basement laundry is discharged ino a galvanized wrought iron sump. This is necessary because the wash trays are below the street sewer and therefore cannot be directly discharged into the house drain.

The water in the sump is pumped out and discharged into the drainage system by means of an automatic electric pump.

When the water in the sump rises to a certain point the copper float, which is suspended by means of a chain, rises also and turns on the automatic switch marked "A S." The electric current then starts the motor (M) which operates the pump (P). The pump then sucks the water from the sump and discharges it into the house drain on the outside of the leader trap.

The knife switch (K S) is used to turn on and off the electric current for sump pump.

The sump is constructed of one-quarter-inch boiler plate riveted together watertight, with a rebated flange on edges and a wrought iron cover. This cover may be a grating when only clean water empties into sump, but when the soil or waste lines empty into it, the cover should be solid plate made perfectly air and gas tight. All pipe connections to the sump should be flanged.

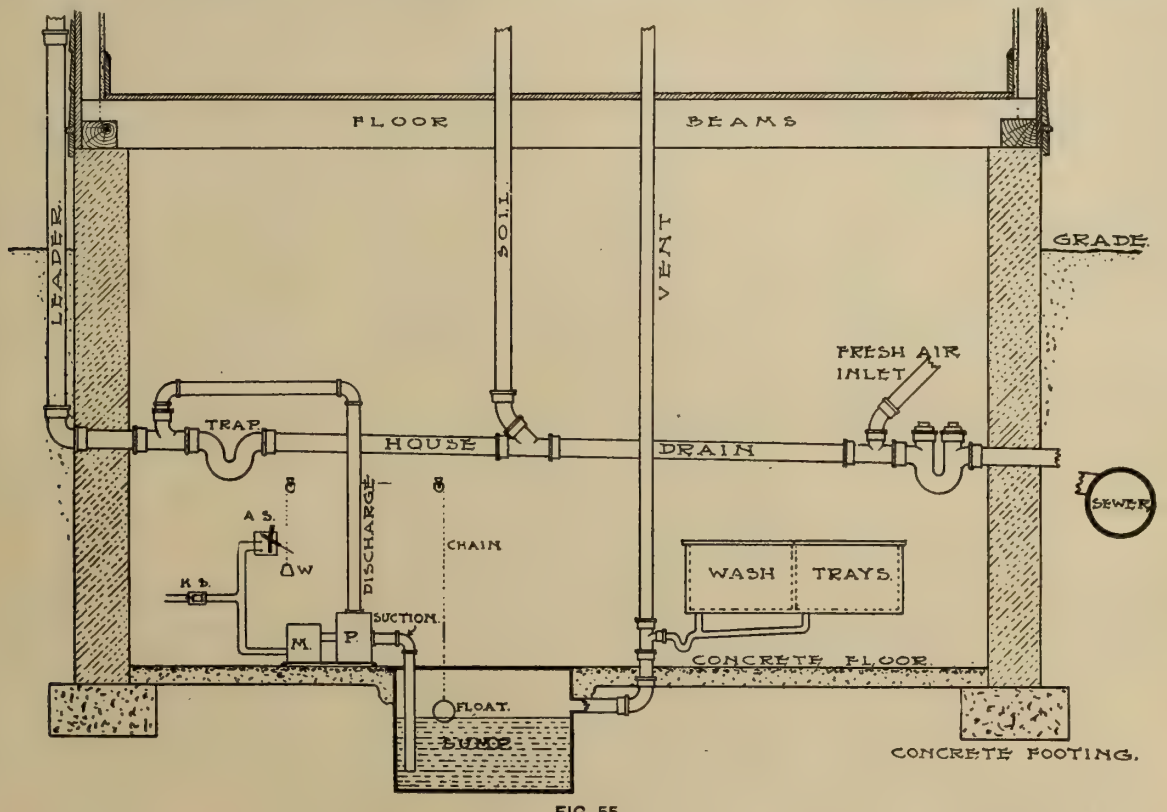

FIG. 55.

HINTS ON GAS PIPING.

To pipe gas to heating and cooking appliances, as well as to gas engines, J. M. Robb, Peoria, Ill., in a booklet entitled "Instructions for Gas Distribution Employees," suggests that the piping be planned in accordance with the following table:

Size, inches	Length, feet.	Capacity per hour in cubic feet.
3/8	20	11
1/2	30	22
3/4	50	60
1	70	127
1 1/4	100	222
1 1/2	150	349
2	200	718
2 1/2	300	1,253
3	450	1,977
4	600	4,059

Use the next size larger when the length in the table where a given capacity must be exceeded. Never run a fuel line smaller than 3/4-inch. Never run a supply pipe to a gas engine less than 1-inch. Always make a run of pipe for a hot plate of 3/4-inch pipe, unless you are sure the hot plate will never be replaced by a gas stove. Always, in determining the size of pipe to be run, follow the table for gas consumption of various apparatus, given under instructions for setting meters. Ask for special instructions when you are running pipe for special fuel apparatus. Never cut holes through walls,

floors, or partitions, any larger than is necessary to take the gas pipe. Upon completion of your work, you must always carefully cement all openings which you have cut in walls to run your pipe.

When your apparatus is all connected up, light all the burners to ascertain positively that an ample supply of gas has been provided. Negligence of this precaution is a crime. Adjust every burner to take the largest possible supply of air without lighting back. When the apparatus is exposed to sharp drafts, too close an adjustment must not be attempted, or complaints from lighting back will surely result. A properly adjusted burner will show a hard green cone in the centre of each jet of flame. Be sure that your piping is tight.

Before leaving the work completed, make absolutely certain that the surrounding wood work is completely protected from danger of scorching or catching fire. When gas stove or heater flues terminate so that the products of combustion will impinge upon wood, a deflector of sheet metal or asbestos must be put up. All water heaters must be provided with a flue pipe to carry off the products of combustion.

When a gas stove oven is connected to a flue, the flue pipes must be fitted with a damper, to prevent a strong draft from drawing an excess of cold air into the oven, or else an opening must be left in the flue pipe to by-pass the oven. The object to be attained is to prevent waste of gas by passing too much cold air through the oven. If the gas stove is fitted with a hood the best flue pipe arrangement is to connect the hood to the chimney and discharge the flue pipe from the oven under the hood.

Explain to the consumer, or the person who is to use the apparatus you are connecting, just how the apparatus is to be handled, showing him how to light it and dwelling especially on the necessity for regulating the amount of gas burned to the quantity of work to be done. Be sure to have the consumer understand that it is best to call a gasfitter at once if he has any trouble whatever in handling his apparatus.

OLD TIME AND UP-TO-DATE PLUMBING APPLIANCES

Paper read by Daniel Shannon, Boston, Mass., at the annual meeting of the National Association of Master Plumbers', Atlantic City, June, 1906.

The old-time plumber of half a century ago was a skillful, resourceful and ingenious mechanic, as in many cases he was manufacturer, jobber and artificer. He often made his lead soil pipe, all his traps and bends, lined his tanks and bath tubs, made hot and cold showers, and above all the material required on his job, excepting some brass ware, the trunk of the pan closet, crockery ware and force pumps. Many samples of the old-timers' handicraft are extant in Boston to-day, and the younger generation of plumbers marvel at the beauty of the workmanship and the durability of the job.

Beauty of Old Time Work.

An apt illustration of the artistic beauty of the "old timers'" work came to the knowledge of the writer many years ago, when a cultured lady, owner of the house, called on a tour of inspection during construction. The plumber was giving his final rubbing up, to his lead pipes preparatory to the carpenter laying the floor, when the lady peeped into the bathroom with an emphatic utterance of surprise. She exclaimed: "Why! I had no idea that plumbing was such beautiful work, it looks just like embroidery." And so it did. The lady had an artistic eye, with the symmetrical alignment of the lead pipes, hot, cold, circulation radius, waste and drip pipes the graceful easy curves and bends, the diagonal combination of the joints, and the edgeless flanges of his separate waste on his handsome handmade closet trap and bend, pipes of azure blue, and joints of silvery whiteness without a blemish, no wonder the "old timer" bowed with feelings of pardonable pride to the cultured lady's shower of compliments.

The writer has now in his possession a lead "D" trap, three feet offset, and bend, that had been installed fifty odd years ago. It is a beautiful specimen of the "old timers" work, and is now in an almost perfect state of perservation, the seaming and wiping (3 starts in trap) and the whole combination is a monument to the skill and dexterity of the "old timer" sixty years ago. This may be properly termed the primary, or developing age of the arts and crafts of the plumbers of the United States.

The up-to-date appliances of our trade are the natural development that would occur in a long series of years to any craft that was nutured in such intellectual channels, and endowed with the keen perceptive faculities of the average master plumber.

Enlargement, expansion, ventilation, beauty of design, and elegance of finish have been the cardinal points of development in the progress of the craft of late years. The inventions of the "old timer" half a century ago are now factory made. Nickel pipes and porcelain fixtures play an important part in enhancing the elegance of the modern plumbing.

The enlargement of the old flushing valves and pipes has been a prime factor in improving modern sanitation.

Handicaps Overcome.

The "old timer" was very much restricted in his water supply, municipal reservoirs, large communities depended on the water shed of the roof, and the manual labor of pumping from wells, and of course in a dry season their supplies were very limited, hence the plumber was forced to reduce the calibre of his pipe to meet the existing conditions, and this explains in a great measure the reason for small valves, and flush pipes found in connection with old-style closets.

In this generation we have tapped great rivers and lakes, built immense reservoirs, and erected massive pumps to furnish a bountiful supply of pure water. The American manufacturer leads the world in the ingenuity magnificence and beauty of modern sanitary appliances. The old dingy, sepulchral, tomb-like bathroom, with its pall of black walnut covering everything in sight, has been supplanted by the beautiful sanitary creations of to-day. The bath, the lavatory, the toilet, the beautiful tiles, the burnished silver manipulators, the beveled mirrors and hanging ferns complete a picture that is indeed a thing of beauty and a joy forever. The whole ensemble emblematic of purity and refinement. In this classic retreat the welcome guest takes his refreshing bath never enjoyed by the gods of Olympus during the reign of Zeus. The great advancement and achievements in sanitary science and applied appliances by the present generation of plumbers are indeed marvelous.

In contradistinction to the drainage methods of the "old timer" we may refer to an up-to-date installation of exposed heavy cast-iron drains, arranged so as to form an attractive feature of the general architecture of the building, which is now successfully performed by skilled plumbers.

In each of the several halls are parallel lines of cast-iron drainage suspended just below the lofty ceilings. Each line carrying a double row of fixtures, those lines are received in turn at the far end of the halls into vertical stacks that are beautifully grouped like cathedral columns supporting a capital.

GODERICH CONDEMNS OUT-HOUSES.

At the meeting of the Goderich Town Council last week, a motion was passed asking the local Board of Health for the removal of all frame closets on properties fronting on principal streets within the fire limits. This ought to suit the plumbers.

A SAW TO SAW STEEL.

A circular metal saw with inserted teeth, that, during a test, made a record of one inch a minute working its way through a 14-inch steel billet, is one of the latest achievements of the saw manufacturers, says the Engineering News. This machine is intended to cut 13-inch billets into convenient lengths for forging into locomotive driving axles; heavy forgings and castings can likewise be handled by the temporary removal of the special appliances fitted to the machine, the weight of which is about 10 tons.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, November 30, 1906.

From now until the opening of navigation in the spring, there will be only a light trade with lower river towns, as the last boat of the season tied up for the winter on Tuesday. For all that, business does not seem to show any falling off, and, for the time of year, a really remarkable volume of sales is going through the Montreal supply houses.

The only feature of interest this week, is the continued and very acute shortage of iron pipe. There is no relief in sight, and prices, accordingly are even stiffer.

RANGE BOILERS—A good business keeps up. We quote: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—Prices remain at the old figures, with primary markets very strong. We still quote: 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—Discounts are unchanged, and we are still quoting: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent.; 3½ in. to 6 in., 72½ per cent.; couplings, ½ in. to 2 in., 55 per cent.

IRON PIPE—There does not seem to be any prospect of relief from the short supply. We quote as follows: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27; 2 inches, $36.50, discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 70 per cent., and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—We still quote as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Both tin and lead continue firm, and our prices on solder remain as follows: Bar solder, half-and-half, guaranteed, 25c.; No. 2 wiping solder, 22c.

ENAMELWARE—We give the following prices: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65 special, $18.65; plate E11 and E21 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, November 30, 1906

Plumbing supplies are still in active demand, and while supply houses report a slight falling off, travelers say that throughout Ontario large orders for enamelware and other supplies are still being placed. Demand for heating goods is particularly brisk, with quotations on both radiators and boilers very stiff. There is considerable talk of further advances on radiation, but we do not look for it before February.

Iron pipe is again on the move with some houses asking sharp advances on 1½ and 2-inch black pipe, the figures being advanced from $7.56 and $10.08 to $8.70 and $11.55 respectively. As the advance has not been general, we are still quoting the old prices. The scarcity does not seem to be relieved much as yet. Soil pipe keeps steady at the open market prices we have been quoting. Thimbles are now quoted at 60c. each, on four-inch size, an advance of ten cents on old quotations.

LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 6c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—Stocks are low with prices advancing. One-inch black pipe is now being quoted at $4.62, and one-inch galvanized at $6.27. Full list in current market quotations.

IRON PIPE FITTINGS — New lists are as follows: Cast iron elbows, tees, crosses, etc., 60 per cent.; cast iron plugs and bushings, 60 per cent.; flangle unions, 60 per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.

GALVANIZED IRON RANGE BOILERS—Boiler stands are scarce. We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.

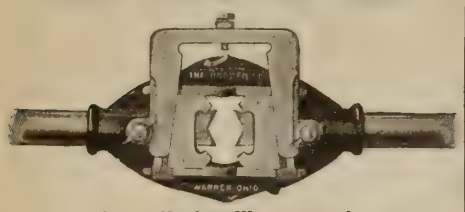
RADIATORS—Prices are very stiff at: Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain firm as follows: Bar solder, half-and-half, guaranteed, 27c.; wiping, 24c.

ENAMELWARE—Sinks and lavatories are scarce and advances are predicted. We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25: plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

NEWS OF THE TRADE.

Forty metal polishers and buffers employed in various brass-finishing establishments, including James Morrison Brass Manufacturing Company, James Robertson Company, and the Toronto Brass Manufacturing Company, Toronto, are on strike demanding an increase in wages from $2.50 a day to $2.75. The larger firms, have refused the request for more pay, but smaller firms have conceded the point.



W. J. Colesworthy, formerly Canadian traveler for the United Brass Manufacturing Companys of Toronto Ohio, is now on the road for the Mann Brass Works, London, he being interested in the new concern along with "Andy" Mann, formerly with the James Robertson and Canada Brass Manufacturing Company's of Toronto and London.

Harry Brown, of Brown & Semple, plumbers and steamfitters, Brockville, was in Toronto buying heating supplies on Monday. His firm has under way the plumbing and heating contracts for the new Times building, Brockville, Mr. Hardy's new residence, Brockville, and on James Wilson's residence at Carleton Place. The last two jobs amount to $1,800 and $900 respectively.

IMPORTANT AGENCY SECURED.

Warden King & Son, Montreal, and their Toronto representatives, Cluff Brothers, have been successful in securing the Canadian agency for the Paul System of steam heating, which is already favorably known, and in the hands of these pushing firms should soon become more universally used.

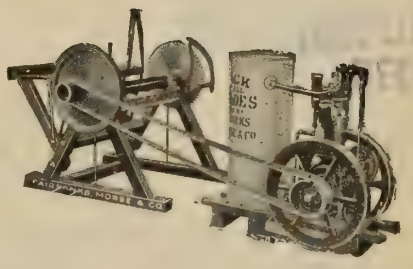
—FOR—



HARDWARE DEALERS

WHO SELL THE FARM TRADE

Every farmer who has a farm of any consequence realizes that same is incomplete without power of some kind.

The horse tread is a thing of the past. Hot Air Engines will do for pumping, but are useless outside of this.

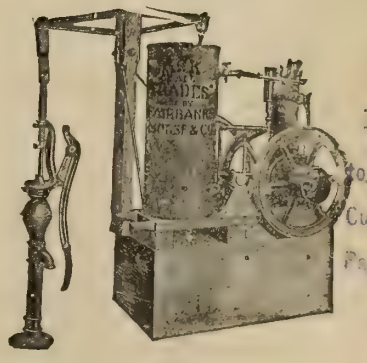
What the farmer wants is a convenient, clean, economical and simple power, to pump his water, saw his wood, operate cream separator, thresh, make electric light, in fact, do any work upon the farm.

FAIRBANKS-MORSE "Jack-of-all-Trades" Gasoline Engine solves the problem.

It is sold complete as shown by the illustrations, with all connections set up, and ready to start.

We are now appointing Agents for 1907, and have an attractive proposition for every Hardware Dealer in Canada who has any connection with farmers.

It is not necessary to carry a stock of these Engines, as we have warehouses all over Canada, we furnish liberal supply of advertising matter, and advertise in local papers to help the dealers.



There is money in this for you, Mr. Hardware Dealer, and all we ask is that you drop us a note, asking us to explain our Agency proposition for 1907.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

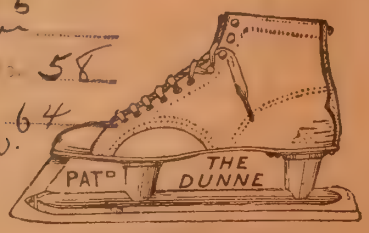
"SOVEREIGN" HOT WATER BOILERS

There's a sweeping guarantee goes with them from the makers.

It's a boiler so balanced in construction, and fitted up with new improvements, that any one can see at a glance it is superior in design.

The "Sovereign" is big for its size. You may calculate on a small "Sovereign" doing as much work as a larger boiler not built on the same lines.

Each boiler section is detached and individual. One section may be blanked at the water post without interfering with the general working of the apparatus.



We are the people who are preaching "Simplifed Heating." Our Sovereign Boiler is making good on the argument.

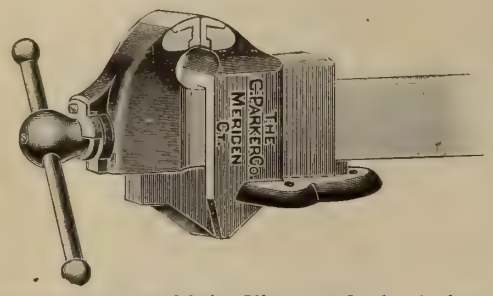
GRAHAM NAILS ARE THE BEST

Factory: Dufferin Street, Toronto, Ont.

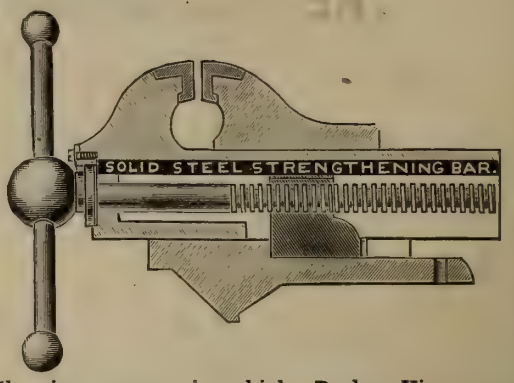
Our Prices are Right

We Ship promptly



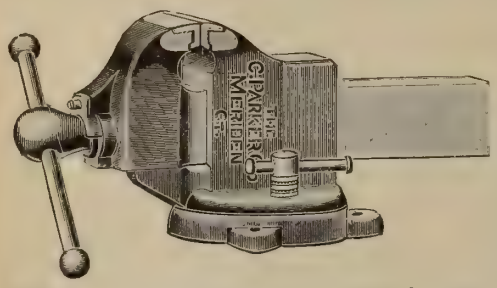
Semi-Steel has a strength several thousand pounds greater than cast iron.

That is why it is used in Parker Vises.

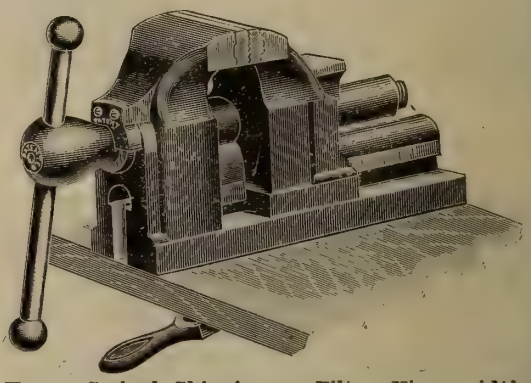


The Parker Vises are made stronger in the weak part of all vises than any other vises are made.

The sliding or moving jaw is the part most liable to break in any vise.



The Parker Company has provided against that danger by casting in the sliding jaw a solid steel bar strengthener. This improvement makes the jaw practically unbreakable. It is found only in Parker Vises.



Stationary Machinist Vise, made in 6 sizes with jaws 3¼-in. to 6¼-in.

Showing manner in which Parker Vises are strengthened by a solid steel bar.

Same as above only made to swivel in any direction.

Heavy Swivel Chipping or Filing Vise, width of jaws 5 inches.

Parker Vises are made in all approved shapes and sizes for machinists, pipe fitters, wood workers, etc.

We keep a full line of Parker and other makes of vises.

That Stuffy Room

is more deadly than disease itself. Bad air is the curse of crowded living. In all public places such as asylums, clubs, big offices, schools and theatres, **PURE AIR CAN BE OBTAINED ONLY BY OUR SYSTEM OF VENTILATION.**

It has stood the tests of scientific experts.

It is in use in the finest buildings in Canada.

Its price is reasonable and its benefits lasting.

Testimony

Montreal, June 7th, 1901.

Messrs. J. W. Harris Co., Limited, Montreal.

Dear Sirs,

I have been using your "Aeolian" Ventilators on several houses in this city with the best results. The tenants of these houses declare that your Ventilators are of great advantage to them. I also installed two (2) 18" on my stable and I can say that your Ventilator cannot be surpassed by any to take out the sweating or bad smell in any room.

F. D. MONK.

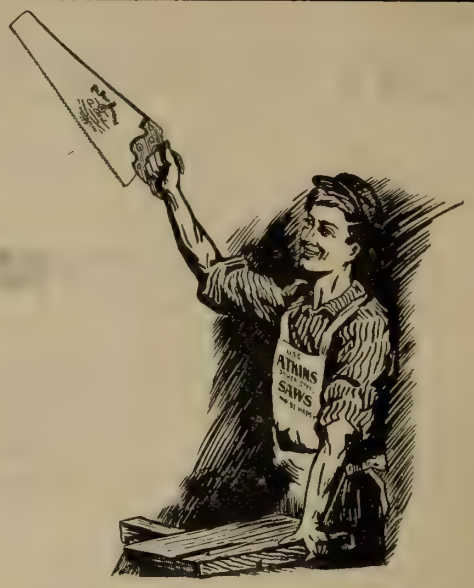
"C" HORSE NAILS

Combine Finest Material, and Most Approved Process of Manufacture.

SWEEDISH CHARCOAL STEEL nail rods, are the raw material for **"C"** brand horse nails. They are made expressly for our purpose, and we import them direct. Our forty years' experience has taught us that this is the **best** material **in the world** for making horse nails.

OUR PROCESS of working up these rods is unique. We heat the rods before forging the nails. In this way **"C"** nails are thoroughly and uniformly hammered and compressed into the proper shape, making it impossible for them to split.

We also have **OUR OWN METHOD** (proven to be the best) for polishing, rolling, pointing and finishing **"C"** horse nails.



Being of **BEST MATERIAL** and **BEST WORKMANSHIP**, it naturally follows—that **"C"** horse nails are the right kind for particular farriers to use.

Cultivate this branch of your trade, by always keeping a full stock of **"C"** brand horse nails. All jobbers sell them.

Peerless Woven Wire Fence

Here is a fence that will sell. Once up no need for repairs. It lasts for years—just what you are looking for. It's horse-high, pig-tight and bull-strong. No stock can get over, under or through it. The most unruly animal can't butt it down and there are no barbs to tear and injure stock. It's

WIND AND WEATHER PROOF

The Peerless lock holds it perfectly rigid and the wires can't slip up, down, nor sidewise. Cold weather won't snap it and hot weather won't make it sag. It's the greatest thing out for farmers, stockmen and all other fence users which makes it a red hot proposition for dealers. It comes in rolls all ready to put up. It's easy to handle. Write for prices.

The Banwell Hoxie Wire Fence Company, Ltd.
Dept. J, Hamilton, Ont.

SUCCESS

In this day of keen competition, the Key to Success is QUALITY.
Knowing this we have put ourselves in a position to announce another long step forward, placing our four "Maple Leaf" brands of binder twine far in advance of all others.

HOW ?

The answer to this question is too lengthy for the space of this Ad. but we are prepared to prove the STATEMENT by the GOODS.
Let us emphasize this, by sending you sample bales for your inspection. A request will bring them, freight prepaid.
Dealers who sell our brands will find the Twine Agency not only pleasant and profitable, but a help to other departments of their business.
These are the four brands:--

GILT EDGE, 650 ft. per lb., Pure Manila
GOLD LEAF, 600 ft. per lb., Manila.
SILVER LEAF, 550 ft. per lb., Standard Manila.
MAPLE LEAF, 500 ft. per lb., Standard

We Can Deliver These Stoves

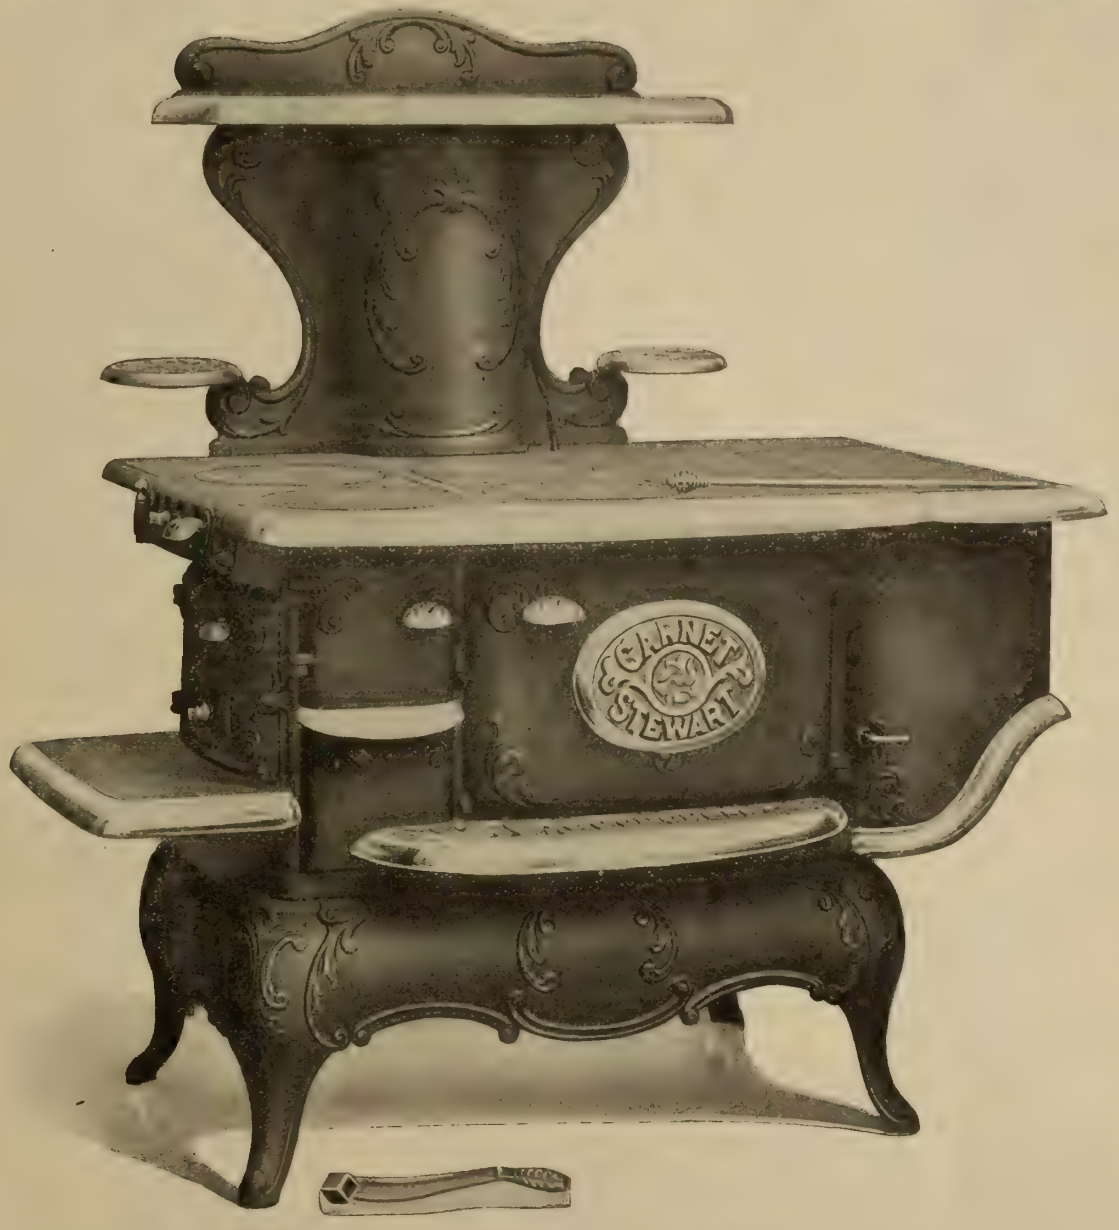
WITH OVEN—230 Series

To be exact, we can ship baseburners the same day we receive your order.

"Famous" baseburners are made in two styles and five sizes.

The No. 230 series is a heavy, durable stove, with a three flue construction which distinguishes it from nearly all other makes. Is made in three sizes, for parlor and two with oven.

Our No. 113 series is a lighter stove, but well made and excellent value for the money. Is made in two sizes for parlor and one with oven.



You can sell either of these lines and feel satisfied that your customers are getting the best that experience and skill can build.

"Good Cheer" Ranges

THE "GARNET"

Plain but not severe. Just enough ornamentation to give it the most artistic appearance of any range in the market. Prospective buyers will not pass by your door if the "**GARNET**" is on view inside. All loose nickel—readily removed when range is to be polished, and such an easy one it is to keep bright and clean. Square oven, 18x18x12. Fine firebox, with all cast linings. Grates, etc., removable without disturbing linings or waterfront. A splendid operator in every way, and, in fact

IT'S JUST RIGHT

The JAMES STEWART MFG. CO.

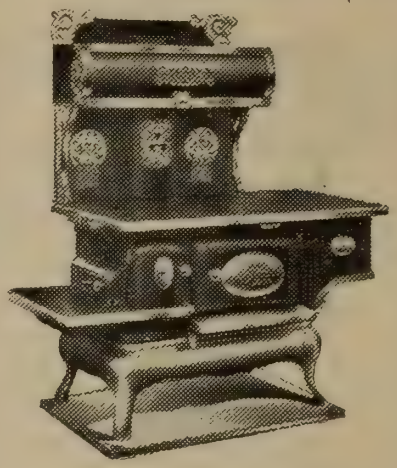
LIMITED

Western Branch:
Foot of James Street, WINNIPEG, MAN.

WOODSTOCK, ONT.

"YOU'VE GOT US SKINNED TO DEATH"

Was the statement made by an American Malleable Range Manufacturer who recently examined "The Joy Malleable Range."



"Your fire box design, shape and proportion, and your Duplex Grates, are certainly ahead of any of our American Ranges and should make The Joy the best Range in America."

How is that for unsolicited prejudiced testimony? Then put that right along side of the record made by a Joy Range, on Monday—the coldest day of the winter—which did the cooking for a family of seven, and heated the kitchen on 25-lbs. of nut coal in 24 hours, and the lady said "it did it well." Shouldn't this kind of evidence convince you, that you are not consulting the best interests of your customers, unless you handle and push the sale of **"THE GREAT JOY MALLEABLE RANGE"?**

OLD AND NEW TARIFFS COMPARED

Speech of Finance Minister Fielding giving the Government's reasons for the changes made—Comments of manufacturers and Jobbers—Table showing all hardware items—The changes in brief.

Mr. Fielding, in his address in Parliment, referred to the fact that this was the second general revision under his regime. The first one was made in 1898. The Government wanted to encourage stability and not to be hasty in making changes. In the past it had resisted many applications for increases, and he did not believe any severe loss had resulted. So prosperous was the country no radical changes were required In changing the form of the schedules it was proposed to put articles under different classes according to their nature and duty. The free list schedule would be abolished, and each item without duty put in its class in the general tariff with the word "free" opposite, while other articles would have the rates of duties also placed opposite. Articles would be arranged in eleven groups, one of which would be "miscellaneous."

Under the old tariff there were practically four tariffs :

1. British Preference.
2. General Tariff.
3. Surtax.
4. French Treaty.

All these features would be retained, and in addition there would be an intermediary tariff. The general tariff would be substantially the tariff of the day, and not much above the present tariff, but there would be higher duties on a few items. The intermediate tariff, the new feature, would not be put into operation at once.

The British Preference.

The British preference would be adhered to. It had made Canada prominent, and the nation had derived an advantage from it, if it was derived from sentiment. British sales to Canada, which had decreased from 43 millions in 1890 to 29½ millions in 1897, when the preference was given, had now increased to 69 million dollars. The dutiable goods had increased from 20 to 52 millions.

The lower duties on British goods had put so much money into the pockets of the Canadian consumers, the saving to them since the preference was established, being estimated at $28,000,000. In addition, the low British prices had largely governed foreign sales in Canada.

The British preference schedule, while adhering to the general principle of one-third off, would have the duty applied to each specific article, and in some cases this would vary from 33 1-3 per cent. In some cases the preference would be less ; in some higher; but on the whole it would be more favorable to Britain.

Special account was being taken of British metals, and the preference on these would be increased, and would enable Britain to better meet severe competition.

In future articles qualifying for the preference would require to have had 25 per cent. of their value put into them in the shape of British labor. This would prevent foreign countries sending goods here through Britain without work of much cost being done on them here.

The Intermediate Tariff.

The intermediate tariff would grant rates of duties somewhat below those of the general tariff, and on articles averaging a 30 per cent. duty the reduction should amount to 10 per cent., but still leave a material advantage to countries enjoying the British preference. The object of this tariff was to afford Canada an instrument wherewith she could conduct negotiations with any country willing to give her more favorable conditions.

The Drawback Clause.

The object of the clause referring to drawbacks was to prevent the abuse of the free admission of articles granted for a particular purpose—chiefly manufacturing. As to a few of these about which there could be no difficulty, there would be no change, but other articles would have to pay the regular duty, and when it was proved that the particular purpose had been served, a rebate of 95 per cent. of the duty, in the shape of a drawback, would be made

Anti-Combine and Dumping Clauses.

The anti-combine clause adopted ten years ago would be retained. It had been a good thing in smashing the paper combine, which was followed by a reduction of 15 per cent. in duty, and though not often utilized, it had a wholesome effect. The clause provided or the abolition of duties where trusts charging extortionate prices were proved before a judicial committee to exist.

The dumping clause had also served a useful purpose. It would be so amended as to apply to articles on the free, as well as on the dutiable list. The special duty, which, except under certain conditions, has been equal to the difference between the fair market price of the article and the selling price, is, in the case of free goods, limited to 15 per cent.

German Surtax Stands.

The German surtax, would stand exactly as it was. Germany would be liable to the general tariff, plus a surtax of one-third. While there was no likelihood of early negotiations with Germany for a reduction from the general tariff, there was a lively hope of a better understanding as to the surtax. The imposition of the surtax was partly the result of a misunderstanding on the part of Germany.

Iron and Steel Bounties.

In discussing the new tariff and bounties on metals, Mr. Fielding said:

In 1897, we regarded it as important, that the cost of iron and steel to the consumer in Canada should not be too high, because iron and steel at moderate cost are the foundation of an immense variety of industrial enterprises. Therefore, we cut down the customs on iron and steel, and we arranged a system as follows:—On iron from native ore $3 per ton; upon foreign ore, $2 per ton; upon steel, $3 per ton. These bounties were fixed on a sliding scale, and gradually diminished. Last year they were fifty-five per cent. of the original amount. This year, since the 1st of July, they stand at thirty-five per cent. of the original amount. They will expire on the 1st of July next, under existing legislation. As we have six months to run yet, that means an extension period of three years and a half, four years from the 1st of January, but one-half year is provided under the existing law.

We adopt to some extent a sliding scale. On pig iron manufactured from foreign ore for the calendar year 1907, $1.10 per ton; and for 1908, $1.10; for 1909, 70c.; for 1910, 40c. On steel ingots, we propose, in 1907, $1.65; in 1908, $1.65; in 1909, $1.65; in 1910, 60 cents. Iron bars are treated in the same way as steel ingots, but as they are not made in any considerable quantity, they are not of any practical importance.

To-day the bounty on iron from Canadian ore is 35 per cent. of $3, that is equal to $1.05 per ton. The bounty on iron from foreign ore is 35 per cent. of $3, which is 70 cents per ton. The difference to-day is 35 cents per ton. This difference is not sufficient to encourage native industry. Those interested have represented that if we could have kept that difference of $1 there would be some inducement, some larger prospect of the development of native ores. We are impressed with this argument, because while we wish to encourage the iron industry generally, we particularly want to encourage iron made from native ore in order to encourage the development of the ores of Canada. We propose, therefore, that the rates of bounty during these four years periods should be as follows:

For the year 1907 the bounty on iron from native ore will be $2.10, and on foreign ore, $1.10. For the next year we keep the figures the same, $2.10 for native ore, and $1.10 for foreign ore. For the third year the bounty on iron from native ore will be $1.70, whereas on iron from foreign ore it is reduced

(Continued on page 31.)

OLD AND NEW TARIFFS COMPARED

The following table includes practically every article in which the hardware and kindred trades are interested. In the four columns are given the British preferential the intermediate, the new general and the old tariffs, the latter being given for the purpose of comparison. The German surtax of 33 1-3 per cent. is the only part of the tariff not included. In a study of the table it will be an easy matter to figure out the effect of the changes, remembering, of course, that the British preferential duty was formerly an even 33 1-3 per cent. whereas now each item stands by itself. For a more complete analysis, such as few will find necessary, it will be necessary to have a copy of the old tariff for reference as the classifications are entirely changed and the table is arranged on the basis of the present tariff.

Group 1—Agricultural Products.

	British Pref.	Intermediate	General	Former Tariff
Flax seed	F	F	F	F
Garden, field and other seeds for agricultural or other purposes, n.o.p., sunflower, canary, hemp and millet seed, when in packages weighing over one pound each	5	10	10	10
The same in packages weighing one pound each, or less, p.c.	15	22½	25	25

Group 5—Pulp, Paper and Books.

Hemp paper, made on four cylinder machines and calendered to between .006 and .008-inch thickness, adapted for the manufacture of shot shells, primers, adapted for the manufacture of shot shells and cartridges, and felt board sized and hydraulic pressed and covered with paper or uncovered, adapted for the manufacture of gun wads	F	F	F	F
Strawboard, millboard and cardboard, tarred paper, felt board, sandpaper, glass or flint paper and emery paper or emery cloth, p.c.	15	22½	25	25
Paper hanging or wallpapers, borders or bordering, and window blinds of paper of all kinds, p.c.	22½	32½	35	35

Group 6—Chemicals, Drugs, Oils and Paints.

Glue, liquid, powdered, or sheet, mucilage, gelatine, casein, adhesive paste and isinglass, p.c.	17½	25	27½	25
Lamp black, carbon black, ivory black and bone black	F	F	F	F
Ultramarine blue, dry or in pulp; whiting or whitening; Paris white and gilders' whiting; blanc fixei, satin white	F	F	F	F
Litharge	F	F	F	F
Dry red lead, orange mineral and zinc, white, p.c.	F	5	5	5
Dry white lead, p.c.	20	27½	30	30
White lead ground in oil, p.c.	25	32½	35	35
Ochres, ochrey earths, siennas and umbers, p.c.	10	12½	15	20
Oxides, fireproofs, rough stuff, fillers, laundry blueing and colors, dry, n.o.p., p.c.	15	20	22½	25
Liquid fillers, anti-corrosives and anti-fouling paints, and ground and liquid paints, n.o.p., p.c.	15½	25	27½	25
Paints and colors, ground in spirits, and all spirit varnishes and lacquers, per gallon	$1.00	$1.00	$1.00	$1.12½
Varnishes, lacquers, japans, japan driers, liquid driers and oil finish, n.o.p., per gallon	15c	15c	15c	20c
And per cent.	15	20	22½	20
Paris green, dry, p.c.	5	7½	10	10
Gold liquid paint, p.c.	15	22½	25	25
Putty, of all kinds, p.c.	12½	17½	20	20
Linseed or flaxseed oil, raw or boiled, per 100 lbs.	80c	$1.10	$1.20	25p.c.
Turpentine, raw or crude	F	F	F	F
Turpentine, spirits of	5	5	5	5
Illuminating oils, composed wholly or in part of the products of petroleum, coal, shale, or lignite, costing more than 30c. per gal., p.c.	15	17½	20	20
Lubricating oils, composed wholly or in part of petroleum, costing less than 25c per gallon, per gallon	1½c	2¼c	2½c	2½c
Crude petroleum, gas oils, other than naptha, benzine and gasoline, lighter than .8235, but not less than .775 specific gravity, at 60 degrees temperature, per gallon	1c	1¼c	1½c	1¼c
Oils, coal and kerosene, distilled, purified, or refined, petroleum, and products of petroleum, n.o.p., per gallon	1½c	2¼c	2½c	2½c
Gasoline or naphtha, under .775 specific gravity at 60 degrees temperature	F	F	F	F
Lubricating oils, n.o.p., and axle grease, per cent.	12½	17½	20	20

Group 7—Earths, Earthenware and Stoneware.

Fire brick, p.c.	5	7½	10	F
Building brick, paving brick, and manufactures of clay or cement, n.o.p., p.c.	12½	20	22½	20
Drain tiles, not glazed, p.c.	15	17½	20	20
Drain pipes, sewer pipes and earthenware fittings therefor, chimney linings or vents, chimney tops and inverted blocks, glazed or unglazed, earthenware tiles, n.o.p., p.c.	25	32½	35	35
Tiles or blocks of earthenware or of stone prepared for mosaic flooring, p.c.	20	27½	30	35
Closets, urinals, basins, lavatories, baths, bath tubs, sinks and laundry tubs of earthenware, stone, cement, or clay, or of other material, n.o.p., p.c.	20	30	35	30
Cement, Portland and hydraulic or water lime, in barrels, bags, or casks, the weight of the package to be included in the weight for duty, per 100 pounds	8c	11	12½	12½
Bags in which cement or lime mentioned in the next preceding item is imported, p.c.	15	20	20	20
Plaster of paris, or gypsum, calcined, and prepared wall plaster, the weight of the package to be included in the weight for duty, per 100 lbs.	8c	11c	12½c	12½c
Plaster of paris or gypsum, ground, not calcined, p.c.	10	12½	15	15
Clays, including china clay, fire clay and pipe clay not further manufactured than ground; ganister and sand; gravels; earths, crude only	F	F	F	F
Pumice, calcarous tufa, pumice stone and lava, not further manufactured than ground	F	F	F	F
Crucibles, clay or plumbago	F	F	F	F
Grindstones, not mounted, and not less than 36 inches in diameter, p.c.	10	12½	15	15
Grindstones, mounted or not, n.o.p. p.c.	17½	22½	25	25
Asbestos in any form other than crude, and all manufactures thereof, p.c.	15	22½	25	25
Plumbago, not ground or otherwise manufactured, p.c.	5	7½	10	10
Plumbago, ground, and manufactures of, n.o.p., and foundry facings of all kinds, p.c.	15	22½	25	25
Common and colorless window glass p.c.	7½	12½	15	15
Glass, in sheets and bent plate glass, n.o.p., p.c.	17½	22½	25	20
Plate glass, not beveled, in sheets or panes not exceeding seven square feet each, n.o.p., p.c.	7½	10	10	10
Plate glass, not beveled, in sheets or panes, exceeding seven square feet each and not exceeding twenty-five square feet each, n.o.p., p.c.	15	25	27½	25
Plate glass, n.o.p., p.c.	22½	30	35	35
Stained or ornamental glass windows, per cent.	20	27½	30	30

	British Pref.	Intermediate	General	Former Tariff
Glass demijohns or carboys, bottles, decanters, flasks, phials, glass jars and glass balls, lamp chimneys, glass shades or globes, cut, pressed or molded crystal or glass tableware, decorated or not, blown glass tableware, and manufactures of glass, n.o.p., p.c.	20	30	32½	30

Group 8—Metals and Manufactures Thereof.

Antimony, or regulus of, not ground, pulverized or otherwise manufactured...	F	F	F	F
Bismuth, metallic, in its natural state	F	F	F	F
Cinnabar, quicksilver, radium	F	F	F	
Tea lead	F	F	F	F
Lead, old, scrap, pig and block, p.c.	10	15	15	15
Lead, in bars and in sheets, p.c.	15	22½	25	25
Lead, manufactures of, n.o.p., p.c.	20	27½	30	35
Babbitt metal and type metal, in blocks, bars, plates, and sheets, p.c....	10	15	15	10
Phosphor tin and phosphor bronze in blocks, bars, plates, sheets and wire, per cent.	5	7½	10	10
Tin in blocks, pigs, bars, plates, or sheets, tin strip waste, and tin foil...	F	F	F	F
Japanned ware, tinware, and all manufactures of tin, n.o.p., p.c.	15	22½	25	25
Zinc dust, zinc spelter and zinc in blocks, pigs, bars, rods, sheets and plates, and seamless drawn tubing of zinc	F	F	F	F
Zinc, manufactures of, n.o.p., p.c.	15	22½	25	25
Brass and copper, old and scrap, or in blocks, ingots, or pigs, copper and bronze in bars and rods, in coil, or otherwise, not less than six feet in length, unmanufactured, copper in strips, sheets or plates, not polished, planished, or coated, brass or copper tubing, in lengths of not less than six feet, and not polished, bent, or otherwise manufactured	F	F	F	F
Brass, in bars and rods, in coil or otherwise, not less than six feet in length, and brass in strips, sheets, or plates, not polished, planished, or coated, p.c.	5	7½	10	F
Brass wire, plain, p.c.	7½	10	12½	10
Copper wire, plain, tinned, or plated, per cent.	7½	10	12½	10
Brass and copper nails, tacks, rivets and burrs or washers; bells and gongs, n.o.p., and manufactures of brass, or copper, n.o.p., p.c.	20	27½	30	30
Aluminum ingots, blocks, bars, rods, strips, sheets or plates; aluminum tubing in lengths not less than six feet, not polished, bent or otherwise manufactured	F	F	F	F
Manufactures of aluminum, n.o.p., p.c.	15	22½	25	25
Britannia metal, nickel silver, Nevada and German silver, manufactures of, not plated, n.o.p., p.c.	17½	27½	30	25
Gold, silver, and aluminum leaf; Dutch or Schlag metal leaf; brocade and bronze powder	15	25	27½	25
Articles consisting wholly or in part of sterling or other silverware, nickel-plated ware, gilt or electro-plated ware, n.o.p., manufactures of gold and silver, n.o.p., p.c.	22½	30	35	30
Platinum wire and platinum in bars, strips, sheets or plates	F	F	F	F
Clocks, watches, time recorders, watch glasses, clock and watch keys, clock cases and clock movements, p.c.	20	27½	30	25
Chronometers and compasses for ships...	F	F	F	F
Blast furnace slag	F	F	F	F
Scrap iron and scrap steel, old and fit only to be remanufactured, being part of or recovered from any vessel wrecked in waters subject to the jurisdiction of Canada	F	F	F	F
Iron or steel scrap, wrought, being waste or refuse, including punchings, cuttings or clippings or iron or steel plates or sheets having been in actual use; crop ends of tie plate bars, or of blooms, or of rails, the same not having been in actual use, per ton	70c	90c	$1.00	$1.00
But nothing shall be deemed scrap iron or scrap steel except waste or refuse iron or steel fit only to be remanufactured in rolling mills or furnaces, provided that articles of iron or steel, damaged in transit, if broken up under Customs supervision and rendered unsaleable except as scrap, may be entered for duty as scrap.				
Iron in pigs, iron kentledge, and cast scrap iron, farro-silicon, ferro-manganese, and spiegeleisen, per ton	$1.50	$2.25	$2.50	$2.50
Iron or steel billets, weighing not less than sixty pounds per lineal yard; ingots, cogged ingots, blooms, slabs, puddled bars, and loops or other forms, n.o.p., less finished than iron or steel bars, but more advanced than pig iron, except castings, per ton	$1.75	$2.50	$2.75	$2.75
Rolled iron or steel angles, tees, beams, channels, girders and other rolled shapes or sections, not punched, drilled, or further manufactured than rolled, per ton	$4.25	$6.00	$7.00	$7.00
Bar iron or steel, rolled, whether in coils, rods, bars or bundles, comprising rounds, ovals, and squares and flats; steel billets, n.o.p., and rolled iron or steel hoop, band, scroll, or strip, twelve inches or less in width, number thirteen gauge and thicker, n.o.p., per ton	$4.25	$6.00	$7.00	$7.00
Rolled iron or steel beams, channels and angle-bars, weighing not less than forty pounds per lineal yard, and universal mill or rolled edge plates of steel, over twelve inches wide, for use in the manufacture of bridges, when imported by manufacturers of bridges, p.c.	5	10	10	10
Rolled iron or steel plates, not less than thirty inches in width, and not less than one quarter of an inch in thickness, when imported by manufacturers of boilers for use in the manufacture of boilers, p.c.	5	10	10	10
Rolled iron or steel plates, not less than forty-eight inches in width and exceeding one-half inch in thickness, n.o.p., p.c.	5	10	10	10
Rolled iron or steel sheets or plates, sheared or unsheared, and skelp iron or steel, sheared or rolled in grooves, n.o.p., per ton	$4.25	$6.00	$7.00	$7.00
Skelp iron or steel, sheared or rolled in grooves, when imported by manufacturers, or wrought iron or steel pipe for use only in the manufacture of wrought iron or steel pipe in their own factories, p.c.	5	5	5	5
Rolled iron or steel sheets, number thirteen gauge and thinner, n.o.p., Canada plates, Russia iron, flat galvanized iron or steel sheets; terne plate and rolled sheets of iron or steel, coated with zinc, spelter or other metal, of all widths or thicknesses, n.o.p., and rolled iron or steel hoop, band, scroll, or strip, number fourteen gauge and thinner, galvanized or coated with other metal or not, n.o.p., p.c.	F	5	5	F
Chrome steel, p.c.	10	12½	15	15
Rolled iron or steel, bars, bands, hoops, scroll or strip, sheet or plate, of any size, thickness, or with galvanized or coated with any material or not, and cast steel when of greater value than three and a half cents per pound, n.o.p., p.c.	F	5	5	5
Swedish rolled iron and Swedish rolled steel nail rods, under half an inch in diameter, for the manufacture of horse-shoe nails, p.c.	10	12½	15	15

	British Pref.	Intermediate	General	Former Tariff
Iron and steel railway bars or rails of any form, punched or not, n.o.p., for railways, which term for the purposes of this item shall include all kinds of railways and tramways, even although they are used for private purposes only, and even although they are not used or intended to be used in connection with the business of common carrying of goods or passengers, per ton	$4.50	$6.00	$7.00	30p.c.
Iron or steel railway bars or rails, which have been in use in the tracks or railways in Canada and which have been exported from Canada and returned thereto after having been re-rolled, and weighing not less than fifty-six pounds per lineal yard when re-rolled, and which are to be used by the railway company importing them on their own tracks under regulations prescribed by the Minister of Customs, p.c.	25	25	25	25
Provided that the value for duty of such re-rolled rails shall be the cost of re-rolling the same. Provided also that whenever the Governor-in-Council is satisfied that a mill adapted and equipped for re-rolling such rails in substantial quantities has been established in Canada, the Governor-in-Council may by order-in-council to be published in the Canada Gazette abolish the duty specified in this item, and thereupon all such rails when imported shall be subject to such duty as otherwise provided in the Customs tariff.				
Railway fish and plates and tie plates, per ton	$5.00	$7.00	$8.00	$8.00
Switches, frogs, crossings, and intersections for railways, p.c.	20	30	32½	30
Iron or steel bridges or parts thereof, iron or steel structural work, columns, shapes or sections, drilled, punched or in any further state of manufacture than as rolled or cast, n.o.p., p.c.	22½	30	35	35
Springs, axles, axle bars, n.o.p., and axle blanks, and parts thereof, of iron or steel, for railway, tramway, or other vehicles, p.c.	22½	30	35	35
Forgings of iron or steel of whatever shape or size, or in whatever stage of manufacture, n.o.p., and steel shafting, turned, compressed, or polished, and hammered, drawn, or cold rolled iron or steel bars or shapes, n.o.p., p.c.	20	27½	30	30
Cast iron pipe of every description, per ton	$6.00	$7.00	$8.00	$8.00
Wrought or seamless iron or steel tubes for boilers, n.o.p., under regulations prescribed by the Minister of Customs, flues and corrugated tubes for marine boilers, p.c.	F	5	5	5
Seamless steel tubing valued at not less than 3½c per lb., rolled or drawn square tubing of iron or steel adapted for use in the manufacture of agricultural implements, p.c.	F	5	5	5
Tubes of rolled iron or steel, not joined or welded, not more than one half inch in diameter, n.o.p., p.c.	5	7½	10	10
Wrought or seamless iron or steel tubing, plain or galvanized, threaded and coupled or not, over 4 inches in diameter, n.o.p., p.c.	10	12½	15	15
Wrought or seamless iron or steel tubing, plain or galvanized, threaded and coupled or not, 4 inches or less in diameter, n.o.p., p.c.	20	30	35	35
Iron or steel pipe or tubing, plain or galvanized, riveted, corrugated, or otherwise specially manufactured, in closing lock joint pipe, n.o.p., p.c.	20	27½	30	30
Wire-bound wooden pipe, p.c.	15	22½	25	25

	British Pref.	Intermediate	General	Former Tariff
Iron or steel fittings, for iron or steel pipe, of every description, p.c.	20	27½	30	30
Wire, crucible, cast steel, valued at not less than 6c per lb., p.c.	F	5	5	5
Galvanized iron or steel wire, Nos. 9, 12 and 13 gauge, p.c.	F	5	5	5
Buckthorn strip fencing, woven wire fencing, and wire fencing of iron or steel, n.o.p., not to include woven wire or netting made from wire smaller than No. 14 gauge, nor to include fencing of wire larger than No. 9 gauge, p.c.	10	12½	15	F
Wire of all metals and kinds, n.o.p., per cent.	15	17½	20	20
Wire, single or several, covered with cotton, linen, silk, rubber or other material, including cable so covered, n.o.p., p.c.	20	27½	30	30
Wire rope, stranded or twisted wire, clothes lines, picture, or other twisted wire, and wire cable, n.o.p., p.c.	17½	22½	25	25
Wire cloth or woven wire and wire netting of iron or steel, p.c.	20	27½	30	25
Coil chain, coil chain links, and chain shackles, of iron or steel, five-sixteenths of an inch in diameter and over, p.c.	5	5	5	5
Iron or steel nuts, washers, rivets, and bolts, with or without threads, nut bolt and hinge blanks, and T and strap hinges of all kinds, n.o.p., per 100 lbs.	75c	75c	75c	75c
And per cent.	10	20	25	25
Screws, commonly called "wood screws," or iron or steel, brass or other metal, including lag or coach screws, plated or not, and machine or other screws, n.o.p., p.c.	22½	30	35	35
Iron or steel cut nails and spikes (ordinary builder's), and railroad spikes, per 100 lbs.	30c	45c	50c	50c
Composition nails and spikes, and sheathing nails, p.c.	10	12½	15	15
Wire nails of all kinds, n.o.p., per 100 lbs.	40c	55c	60c	60c
Nails, brads, spikes and tacks of all kinds, n.o.p., p.c.	20	30	35	30
Wire cloth, or woven wire of brass or copper, p.c.	17½	22½	25	25
Needles, of any material or kind, and pins manufactured from wire of any metal, n.o.p., p.c.	20	27½	30	30
Buckles of iron, steel, brass or copper of all kinds, n.o.p. (not being jewelry), per cent.	20	27½	30	30
Bird, squirrel and rat cages, or wire and metal parts thereof, p.c.	22½	30	35	35
Trawls, trawling spoons, fly-hooks, sinkers, swivels, sportsmen's fishing bait and fishing hooks, n.o.p., p.c.	22½	30	35	30
Skates of all kinds, roller or other, and parts thereof, p.c.	22½	32½	35	35
Guns, rifles, including air guns and air rifles, not being toys, muskets, cannons, pistols, revolvers, or other fire-arms, cartridge cases, cartridges, primers, percussion caps, wads, or other ammunition, n.o.p., bayonets, swords, fencing foils and masks, gun or pistol covers or cases, game bags, loading tools, and cartridge belts, of any material, p.c.	20	27½	30	30
Knife blades or blanks, and table forks, of iron or steel, in the rough, not handled, filed, ground, or otherwise manufactured, p.c.	5	7½	10	F
Knives and forks, and all other cutlery, of steel plated or not, n.o.p., p.c.	20	27½	30	30
Agate, granite or enameled iron or steel ware, p.c.	22½	32½	35	35
Iron or steel hollow ware, plain black, tinned or coated, n.o.p., and nickel and aluminum kitchen or household hollow ware, n.o.p., p.c.	20	27½	30	30
Lamp springs, p.c.	7½	10	10	10

Lamps, side lights and head lights, lanterns, chandeliers, gas, coal oil, or other lighting fixtures, including electric light fixtures, or metal parts thereof, lava or other tips, burners, collars, galleries, shades, and shade holders, p.c.	20	27½	30	20
Gas meters and finished parts thereof, per cent.	22½	30	35	35
Fire engines and fire extinguishing machines, including sprinklers for fire protection, p.c.	22½	30	35	35
Sewing machines and parts thereof, p.c.	20	27½	30	30
Mowing machines, harvesters, self-binders or without binders, binder attachments, reapers, p.c.	12½	17½	17½	20
Cultivators, plows, harrows, horse rakes, seed drills, manure spreaders, weeders, and windmills, p.c.	12½	17½	20	20
Threshing machine outfit, when consisting of traction or portable engine and separator, p.c.	15	17½	20	25
Hay loaders, potato diggers, horse powers, separators, n.o.p.; wind stackers, fodder or feed cutters, grain crushers, fanning mills, hay tedders, farm, road, or field rollers, post-hole diggers, snaths, and other agricultural implements, n.o.p., p.c.	15	22½	25	25
Axes, scythes, n.o.p.; sickles or reaping hooks, hay or straw knives, digging knives, hoes, rakes, and pronged forks, p.c.	15	20	22½	25
Shovels and spades, iron or steel, n.o.p.; shovel and spade blanks, and iron or steel cut to shape for the same, and lawn mowers, p.c.	20	30	32½	35
Stoves of all kinds, for coal, wood, oil, spirits, or gas, p.c.	15	22½	25	25
Belt pulleys of all kinds for power transmission, p.c.	15	25	27½	25
Telephone and telegraph instruments, electric and galvanic batteries, electric motors, dynamos, generators, sockets, insulators of all kinds, electric apparatus, n.o.p.; boilers, n.o.p.; and all machinery composed wholly or in part of iron or steel, n.o.p.; and integral parts of all machinery specified in this item, p.c.	15	25	27½	25
Manufactures, articles or wares of iron or steel, or of which iron and steel, or either, are the component materials of chief value, n.o.p., p.c.	20	27½	30	30
Anchors for vessels	F	F	F	F
Ingot molds, glass molds of metal, p.c.	5	7½	10	F
Iron sand or globules or iron shot and dry putty, adapted for polishing glass or granite, or for sawing stone	F	F	F	F
Steel bowls for cream separators and cream separators	F	F	F	F
Sundry articles of metal, as follows, when for use exclusively in mining or metallurgical operations, viz.: diamond drills, not including the motive power, coal-cutting machines, except percussion coal cutters, coal heading machines, coal augers, rotary coal drills, core drills, miners' safety lamps and parts thereof; also accessories for cleaning, filling and testing such lamps, electric or magnetic machines for separating or concentration iron ores, blast furnaces for the smelting of copper and nickels, converting apparatus for metallurgical processes in iron or copper; copper plates, plated or not, machinery for extraction of precious metals by the chlorination or cyanide processes; amalgam safes, automatic ore samplers, automatic feeders, retorts, mercury pumps, prometers, bullion furnaces, amalgam cleaners, blast furnace blowing engines, wrought iron tubing, butt or lap welded, threaded or coupled or not, over four inches in diameter, and integral parts of all machinery mentioned in this item	F	F	F	F
Machinery of a class or kind not made in Canada, for the manufacture of twine, cordage, or linen, or for the preparation of flax fibre	F	F	F	F
Well-drilling machinery and apparatus for boring and drilling for water	F	F	F	F
Iron or steel masts, or parts thereof, and iron or steel beams, angles, sheets, plates, knees, and cable chain, for wooden, iron, steel, composite ships and vessels, and iron, steel, or brass manufactures which at the time of their importation are of a class or kind not manufactured in Canada, when imported for use in the construction or equipment of ships or vessels under regulations prescribed by the Minister of Customs	F	F	F	F
Rolled round wire rods in the coil of iron or steel, not over three-eighths of an inch in diameter, when imported by wire manufacturers for use in making wire in the coil in their own factories	F	F	F	F
Materials under which enter into construction and form part of cream separators, when imported by manufacturers of cream separators to be used in their own factories for the manufacture of cream separators	F	F	F	F
Rolled steel for saws and for straw cutters, not tempered or ground, nor further manufactured than cut to shapes, without indented edges	F	F	F	F
Crucible sheet steel, eleven to sixteen gauge, 2½ to 18 inches wide, for the manufacture of mower and reaper knives, when imported by the manufacturers thereof for use exclusively in the manufacture of such articles in their own factories	F	F	F	F
Steel strip and flat steel wire, when imported into Canada by manufacturers of buckhorn and plain strip fencing for use exclusively in the manufacture of such articles in their own factories; and barbed fencing wire of iron or steel	F	F	F	F
Steel wire, Bessemer soft drawn spring of Nos. 10, 12, and 13 gauge, respectively, and home steel spring wire of Nos. 11 and 12 gauge, respectively, when imported by manufacturers of wire mattresses, to be used exclusively in the manufacture of such articles in their own factories	F	F	F	F
Cups, brass, being rough blanks for the manufacture of paper shells or cartridges, when imported by manufacturers of brass and paper shells and cartridges, for use exclusively in the manufacture of such articles in their own factories	F	F	F	F
Brass caps adapted for use in the manufacture of electric batteries	F	F	F	F
Iron tubing, lacquered or brass covered, not over two inches in diameter, and brass trimmings when imported by manufacturers of iron or brass bedsteads, for use exclusively in the manufacture of such articles in their own factories	F	F	F	F
Platinum crucibles	F	F	F	F
Platinum retorts, pans, condensers, tubing and pipe, and preparations of platinum, when imported by manufacturers of sulphuric acid, for use exclusively in the manufacture or concentration of sulphuric acid in their own factories	F	F	F	F

used in covering or holding goods imported therewith, and the labor and charges for packing such goods, subject to regulations prescribed by the Minister of Customs ;				
All goods not enumerated in this act as subject to any other rate of duty nor declared free of duty by this act, and not being goods the importation whereof is by this act or any other act prohibited, p.c.	15	17½	20	

Schedule B—Goods Subject to Drawback for Home Consumption.

	Drawback
Oil fuel and other articles, not machinery—when entering into the cost of binder twine manufactured in Canada	95 p.c.
Rolled iron, rolled steel and pig iron—when used in the manufacture of mowing machines, reapers, harvesters, binders, and attachments for binders	95 p.c.
Hemp bleaching compound—when used in the manufacture of rope	95 p.c.
Steel under one-half inch in diameter or under one-half inch square—when used in the manufacture of locks and knobs	95 p.c.
Steel cut to shape—when used in the manufacture of spoons	95 p.c.
Flat spring steel, steel billets and steel axle bars—when used in the manufacture of springs and axles for vehicles other than railway or tramway vehicles	95 p.c.
Spiral spring steel—when used in the manufacture of railway spiral springs	95 p.c.
Steel—when used in the manufacture of cutlery, files, augers, auger bits, hammers, axes, hatchets, scythes, reaping hooks, hoes, hay or straw knives, agricultural forks, hand rakes, skates, stove trimmings, bicycle chain and windmills	95 p.c.

PROHIBITED GOODS.

Goods manufactured or produced wholly or in part by prison labor, or which have been made within or in connection with any prison, jail or penitentiary, also goods similar in character to those produced in such institutions, when sold or offered for sale by any person, firm or corporation having a contract for the manufacture of such articles in such institutions, or by any agent of such person, firm or corporation, or when such goods were originally purchased from or transferred by any such contractor.

Metallic trading checks.

Any goods (a) which, if sold would be forfeited under the provisions of part of the Criminal Code ; or (b) manufactured in any foreign state or country which bear any name or trade mark which is or purports to be the name or trade mark of any manufacturer, dealer or trader in the United Kingdom or in Canada, unless such name or trade mark is accompanied by a definite indication of the foreign state or country in which the goods were made or produced. Provided, that for the purposes of this item, if there is on any goods a name which is identical with or a colorable imitation of the name of a place in the United Kingdom or in Canada, such name, unless it is accompanied by the name of the state or country in which it is situate, shall, unless the Minister decides that the attaching of such name is not calculated to deceive (of which matter the Minister shall be the sole judge), be treated as if it was the name of a place in the United Kingdom or in Canada.

Iron and Steel Bounties.

Mr. Fielding's resolution on iron and steel bounties is as follows:

Resolved : (1) That it is expedient to repeal chapter 8 of the statutes of 1899 and chapter 60 of the statutes of 1903, from and after the 1st January, 1907.

(2) That it is expedient to provide that the Governor in Council may authorize the payment from the consolidated revenue fund of the following bounties on the under-mentioned articles manufactured in Canada for consumption therein, viz :

(a) In respect of pig iron manufactured from ore, on the proportion from Canadian ore produced during the calendar years — 1907, $2.10 per ton ; 1908, $2.10 per ton ; 1909, $1.70 per ton ; 1910, 90c per ton.

(b) In respect of pig iron manufactured from ore on the proportion from foreign ores produced during the calendar years — 1907, $1.10 per ton ; 1908, $1.10 per ton ; 1909, 70c per ton ; 1910, 10c per ton.

(c) On puddled iron bars manufactured from pig iron made in Canada, during the calendar years—1907, $1.65 per ton ; 1908, $1.65 per ton ; 1909, $1.05 per ton ; 1910, 60c per ton.

(d) In respect of rolled round wire rods not over three-eighths of an inch in diameter, manufactured in Canada from steel produced in Canada from ingredients of which not less than fifty per cent. of the weight thereof consists of pig iron made in Canada, when sold to wire manufacturers for use in making wire in their own factories in Canada, on such wire rods made after the 31st December, 1906, $6 per ton.

(e) In respect of steel ingots manufactured from ingredients of which not less than 50 per cent. of the weight thereof consists of pig iron made in Canada, on such ingots made during the calendar years—1907, $1.65 per ton ; 1908, $1.65 per ton ; 1909, $1.05 per ton ; 1910, 60c per ton. Provided that bounty shall not be paid on steel ingots from which steel blooms and billets for exportation from Canada are manufactured.

(3) That it is expedient to provide that the Governor in Council may make regulations to carry out the intentions of these resolutions.

(4) That it is expedient to provide that the Minister of Trade and Commerce shall be charged with the administration of the foregoing provisions.

OLD AND NEW TARIFFS COMPARED

(Continued from page 27.)

to 70 cents. Then for the fourth year we reduce the bounty on the native ore to 90 cents, and the bounty of the foreign ore to 40 cents, keeping up the difference of 50 cents between the two.

We propose that these bounties shall not apply to articles exported. There are rumors that the great steel trust of the United States may come into Canada to do business in the ordinary way, well and good, but if it comes here to make up iron and steel for export it might add largely to our burden. We think it is well to have it understood that we are giving these bounties for the encouragement of iron and steel for consumption in Canada, and if any parties undertake to export these articles they shall not be entitled to the bounty upon it.

Then there are bounties at present on angles, plates and iron rods. With respect to angles and plates there is a bounty of $3 and a duty of ten per cent. We have decided to abolish the bounty and allow these articles to fall as a rule into a third class at $7 per ton, subject to the preferential reduction. The bounty is at present $3 and the duty ten per cent.; we strike out the bounty and put them in with the usual tariff instead of the bounty in this case.

The result of the change is to give about the same degree of protection but to get rid of the bounties. Articles are now made in Canada to a considerable extent. We would be glad to do the same thing if we could find it convenient in relation to the bounty on iron rods. The difficulty there, however, is that iron rods are not iron articles. They are used by the manufacturers of other lines of goods, and if we impose a considerable duty on iron rods we will have to change the duties on the articles which are made from iron rods, and we do not wish at present to disturb that class of duties, so we continue the bounties we have at present. The other bounties are for fixed periods. The bounty on iron rods was not for any fixed period, and it is like a tariff item which may be changed from time to time.

Benefits of Bounty System.

This bounty question is one of widespread interest, and in some quarters strong objections have been taken to bounties, criticisms of a varied character. Some object to bounties because they are a protection, others because they think bounties are something which impose tremendous burdens upon the country for which the country receives no advantage. I think those who condemn bounties generally, do not stop to consider what would happen if we did not adopt this system. If we did not adopt the bounty system then unquestionably we should be obliged largely to increase the duties on iron, or to allow industries of a considerable character probably to close up, and we do not think that is desirable. Those who think that these bounties can be dispensed with have not perhaps given the matter as careful consideration as they might. These bounties have not been fruitless of good. They have accomplished a great deal in the develop-

ment of the interests of the country. They have built up great establishments, and have given employment to thousands of men.

Then there is another view which is perhaps lost sight of. If you turn to the customs returns of ports, connected with the iron industry at Sault Ste. Marie, Midland, New Glasgow, Sydney and North Sydney, take all the various points where the Customs Department comes in touch with these iron industries, you will discover that during the period of these iron bounties there has been an enormous development of trade at these ports, the greater part of which is directly due to the development of these industries, and if you make a comparison between the customs revenues of those ports a few years ago, and the customs revenues as they have been under the influence of this bounty system, you will find that the increased collection of revenue at these ports is fully equal to every dollar that the Government ever paid by way of bounties, and so any impressions that may exist in the minds of any that the bounties are not in any way returning anything to the country is certainly a mistake.

British Preference on Metals.

The rates on lead manufactures, including lead pipe, lead shot and lead bullets, have been reduced about 5 per cent. and the preferential rate on lead in bars and sheets has also been reduced from 16 2-3 to 15 per cent.

In item 384 of the new tariff, an effort is made to divert trade to Great Britain, and at the same time to cheapen the cost to the consumer. This item reads:—Rolled iron or steel sheets, number fourteen gauge and thinner, n.o.p., Canada plates; Russia iron; flat galvanized iron or steel sheets; terne plate and rolled sheets of iron or steel, coated with zinc, spelter or other metal, of all widths or thicknesses, n.o.p., and rolled iron or steel hoop, hand scroll or strip, No. 14 gauge, and thinner, galvanized, or coated with other metal, or not, n.o.p. The articles are made free from Great Britain and dutiable from other countries. Tin plate is free under all tariffs, in the interests of manufacturers and consumers. The item has been enlarged by increasing the gauge of iron and steel sheets from seventeen to fourteen gauge, and the gauge of hoop, band, scroll and strip from eighteen to fourteen gauge.

The preferential rate on japanned ware, tinware and all manufacturers of tin, whether "hollowware" or not, also on manufactures of zinc and manufactures of aluminum is reduced from 16 2-3 per cent. to 15 per cent, while the general tariff rate of 25 per cent is continued.

Brass and copper wire, Britannia metal, nickel, silver, Nevada and German silver, etc., are all increased, but it will be observed that the ratio of preference to Great Britain is greater than it was before.

Boiler tubes were formerly dutiable at five per cent. general and 3 1-3 per cent. preference. They are now made free from Great Britain.

Galvanized iron or steel wire, 9, 12 and 13 gauge, formerly on free list is now made a dutiable at five per cent. under the general and intermediate tariffs and free from Great Britain. This is an item of very considerable importance, as over a million dollars' worth was imported last year, mostly from the United States.

On axes, scythes, scykles, or reaping hooks, hay or straw knives, hedging knives, hoes, rakes and pronged forks the old duty was 25 per cent, and we propose a reduction to 22½ per cent. The old general tariff of 20 per cent is continued on the following agricultural implements: Hay-loaders, potato diggers, horse-powers, separators, n.o.p.; windstackers, fodder or feed cutters, grain-crushers, fanning mills, hay tedders, farm, road or field rollers, post hole diggers and snaths. Shovels and spades, iron or steel, lawn mowers, are being reduced from 35 to 32½ per cent.

Well-drilling machinery for boring and drilling for water is made free, whether made in Canada or not. It was formerly free, but the free admission was confined to such machinery as was not made in Canada. We think that boring for water is a matter of such importance and so we make the machinery free altogether.

A number of articles of iron and steel specified in old tariff are not named in new tariff. They fall under this general item, "manufactures of iron or steel, n.o.p." The principal exceptions are iron and steel castings, in the rough, formerly dutiable at 25 per cent, now 30 per cent.

SOME TARIFF CHANGES IN BRIEF.

Glue.—Increased from 25 to 27 1-2 per cent.

Paint Oxides.—Reduced from 25 to 22 1-2 per cent.

Liquid Paints and Fillers.—Increased from 25 to 27 1-2 per cent.

Paints and Colors Ground in Spirits—Reduced from $1.12 1-2 to $1.00 per gallon.

Varnishes.—Were 20 cents per gallon and 20 per cent., now 15 cents and 22 1-2 per cent.

Linseed Oil.—Was 25 per cent., now $1.20 per 100 lbs.

Gasoline.—Reduced from 2 1-2 per cent., to free.

Fire Brick.—Now 10 per cent.

Building Brick.—Increased from 20 to 22 1-2 per cent.

Closets, Urinals, Baths, Sinks, etc.—Increased from 30 to 35 per cent.

Plate Glass.—7 to 25 square feet—Increased from 25 to 27 1-2 per cent.

Manufactures of glass, lamp shades, etc.—Increased from 30 to 32 1-2 per cent.

Manufactures of lead, shot, bullets, lead pipe, etc.—Reduced from 35 to 30 per cent.

Babbit Metal.—Increased from 10 to 15 per cent.

Brass Rods and Sheets.—Increased from free to 10 per cent.

Brass Wire.—Increased from 10 to 12 1-2 per cent.

Copper Wire.—Reduced from 15 to 12 1-2 per cent.

German Silver and Brittania Metal—Increased from 25 to 30 per cent.

Gold Leaf, Bronze Powder, Etc.—Increased from 25 to 27 1-2 per cent.

Nickelplated and Silverware—Increased from 30 to 35 per cent.

Clocks, etc.—Increased from 25 to 30 per cent.

Railway Switches.—Increased from 30 to 32 1-2 per cent.

Fence Wire, 9, 12 and 13 gauge.—Increased from free to 5 per cent.

Fishing Hooks, etc.—Increased from 30 to 35 per cent.

Harvesting Machinery. — Reduced from 20 to 17 1-2 per cent.

Threshing Machinery.—Reduced from 25 to 20 per cent.

Shovels, Spades, Lawn Mowers, etc.—Reduced from 35 to 32 1-2 per cent.

Axes, Scythes, Sickles, Hay Knives, Hoes, Rakes, Forks, etc.—Reduced from 25 to 22 1-2 per cent.

Wood Belt Pulleys.—Increased from 25 to 27 1-2 per cent. Iron.—Reduced from 30 to 27 1-2 per cent.

Shovel Handles. — Increased from free to 15 per cent.

Slack Coal.—Reduced from 15c. to 14c. per ton.

Rubber Belting.—Increased from 25 to 27 1-2 per cent.

Glycerine for Explosives.—Reduced from 10 per cent., to free.

Tool Steel, Rolled Iron or Steel, Canada Plates, Galvanized Iron and Sheets, Terne Plates etc.—Reduced from 5 per cent. to free, from Great Britain.

Preference ranging from 25 to 100 per cent. on metals and other articles from Great Britain.

Rough Iron Castings.—Increased from 25 to 30 per cent.

Boiler Plates.—Was 10 per cent., but is now $7.00 per ton, to merchants.

Iron Pipe, from 2 to 4 inches.—Increased from 15 to 35 per cent.

Coil Chain, 5-16 and larger.—British preference withdrawn.

OPINIONS ON THE NEW TARIFF.

Not Much Change.

H. W. Dorken of Dorken Bros. & Co., hardware importers, Montreal, when seen by a Hardware and Metal representative, remarked that, in his opinion, the Government had carried out a good policy in refusing to make any very radical changes in the tariff. So far as he had studied the tariff, although a few articles showed a higher duty, and some others a lower than before, conditions were practically the same. In most cases, the change did not amount to more than about 2½ per cent., which would not hurt anybody. "I was not pleased" said Mr. Dorken, "to see the German surtax retained, after its three years trial. Ours is almost entirely a German business, and our goods will still be subject to the additional duty, which, we had expected, would be removed. On the whole, however, the Government has done well, and has made an effort to adopt a tariff with as few clauses as possible, which will benefit the masses and not the few."

No Complaint to Make.

S. Brewer, secretary of the Thos. Robertson & Co., dealers in steamfitters' supplies and metals, said: "Taking it all in all, the tariff is very satisfactory. Of course, there are a few items which might be adjusted, but we realize that it would be impossible to frame a tariff which would suit everybody, and we ourselves have no serious complaints to make.

No Room for Improvement.

Gordon C. Seybold, vice-president of the Seybold & Sons Company, expressed himself as follows: "I haven't as yet, studied the new schedule very closely, but my impression is that, so far as the hardware trade is concerned, there is no room for improvement. I am of the opinion that the woolen business should have been better protected, but that, of course, is not in the hardware line, and will not interest your readers."

Paint Manufacturers' Object.

A. Ramsay, of the A. Ramsay & Son Co., did not care to express himself at any length, but said briefly: "The new provision for duties on linseed oil, seems to give a fairly good preference to England. The new tariff will not be satisfactory to paint manufacturers, as manufactured goods are not sufficiently protected to cover cost of raw material."

Brandram-Henderson thought that the Canadian linseed oil industry would be better protected under the proposed specific duty than when the old ad valorem duty was in force. Under the old conditions, the Canadian mills had to shut down, whenever prices in England went down very low. As Brandram-Henderson will have their own lead corroding plant in Montreal, by next Spring, they are not so hard hit by the failure to raise duties on paints, as are other firms.

Wise Action on Tin Plate.

W. E. Ramsay, manager of the Pedlar People's Montreal branch, said: "In framing this tariff, the Government have gone into the matter pretty thoroughly, and have done what they thought in the best interests of all, showing undue favors to none. Of course, there are errors and omissions in the original draft, which, if brought before the Minister in a clear comprehensive and unselfish manner, will be remedied. The Commission did well to listen to the appeals and petitions of the farmers, business men and manufacturers, against the imposition of a 33 1-3 per cent. duty on tinned, galvanized and black sheets. It would be most unwise to furnish employment for even 400 men, and tax seven millions to do so.

Fire Brick Duty a Mistake.

Mr. King, manager of F. Hyde & Co., dealers in cement and firebricks, was asked what effect the duty on fire brick would have. He answered that it would be a serious matter to the large iron and steel manufacturers, who yearly use several millions' of firebricks. "I think this duty is a mistake, and I do not understand why the Government have done it. It may have been because some dealers have been bringing in pressed brick from the United States, and entering it as fire brick, but, if so, these dealers will be punished at the expense of the manufacturers."

Mr. Howland Criticises Tariff.

"I am opposed to the new tariff for several reasons," said Peleg Howland, pres. of the Toronto Board of Trade, and head of the H. S. Howland & Sons Co., wholesale hardware firm. "I am not a believer in more than one tariff nor do I approve of the bonus system or the anti-dumping clause.:'

"The refusal of the Government to protect the tin-plate industry by a duty, should have been accompanied by a refusal to continue to bonus the iron and steel industries. The inconsistency of their position is shown by their bonusing the pig iron industry, and then granting a drawback of 95 per cent on pig iron imported by the farm implement manufacturers, thus cutting out the market for the furnaces. Why, too, make fish of one set of manufacturers and flesh of another? If any rebates are to be given, why not give to all? Why should wire manufacturers and foundrymen be treated differently to implement manufacturers? As a matter of fact the application of the new tariff practically puts wire manufacturers in the hands of the Canadian monoply and higher prices are certain to result.

"I cannot conceive that the makers of the tariff realize the working out of the anti-dumping clause, as a higher duty would bring more revenue, and greatly lessen the temptation to beat the customs. The extra charge made by the anti-dumping clause is only paid once or twice, after which it will be retained by the foreign importer or given by him to his customer as commissions, etc. How can honest importers continue to pay the advance, when dishonest men arrange for commissions or other special inducements from manufacturers, with no possibility of discovery. The anti-dumping clause is merely a method of deceiving the public, and its more stringent application by giving the Finance Minister power to disontinue the 5 per cent leeway means a concealed increase of protection to Canadian manufacturers without increase of revenue.

"The new tariff will have the effect of increasing the prices on many such lines, as shaving brushes, lead pencils, etc., as well as the changes which are generally known.

Affects Enamelware Makers.

A. D. Kennelly, manager of the McClary Manufacturing Co., Toronto, said one effect of the new tariff would be to force enamelware manufacturers to purchase all their raw material in Great Britain. In the past they have been buying polished steel sheets in United States, but the new tariff would divert trade to the Old Country. This would have a tendency to mix matters considerably as it will take considerable time to procure exact qualities for enameling and stamping steel from new producers. Much experimenting would probably have to be done as some plates would to all appearances be satisfactory but after one or two burnings would blister when the third coat of enamel was applied. Mr. Kennelly considered that the Government has done the only thing possible in refusing to establish a duty on tin plate, and his house as the largest importers of metals in Canada were perfectly satisfied to encourage in building up the trade in metals from Great Britain. He looked for some slight changes in prices owing to the new duty on black sheets and galvanized iron from the United States.

Cheap Metals in Sight.

George T. Pepall, of M. & L. Samuel, Benjamin & Co., Toronto, considered that the general effect of the new tariff would be to benefit British industries, and that outside of iron and steel bars and tank plates metals would be very cheap in Canada in the future. He thought it was peculiar that the Government should single out brass rods, etc., as a dutiable article while copper was left free, especially as there is at present no working industry in Canada to be benefitted by the change.

Severe Blow to Merchants.

Ferg. McDonald, manager of the metal department of Rice Lewis & Son, Toronto, points out that the new tariff is decidedly unfair to metal merchants especially in the item of boiler plate which was formerly dutiable at 10 per cent. on 30 inch wide and over while now it is $7.00 per ton when bought by merchants, while boiler merchants can get it at the same old rate. The tendency of this change will be to take the business entirely out of the hands of the metal merchants as boiler manufacturers will buy their tubes and other supplies from the same source as they secure their boiler plates from, and as small boiler makers and repair men cannot import in large quantities and will be unable to buy from merchants to advantage under the new conditions they must go out of business and all the trade will fall into the hands of large boiler manufacturers. The same thing applies to the bridge making industry owing to the changes in duty on beams, angles, channels, etc. These articles are universally used building material and as they are not made in Canada it is peculiar that a duty should be imposed on them to the detriment of the building trade.

Little Change in Glass.

W. R. Hobbs of the Consolidated Plate Glass Co., Toronto, considers that the new tariff will have little effect in the glass trade so far as the demand from the hardware and builders is concerned. Common sheet glass and smaller sizes of plate are left unchanged and the only new addition is that British manufacturers secure a slight additional advantage on some lines of plates.

Package Charges on Glassware.

C. J. Spencer, of the Rochester Lamp Co., Toronto, in reply to a request for information said that the increased duty on lamp chimneys, globes, etc., would not be sufficient to make any change in prices at this time. The new package regulations, however, would affect the glass trade as the new charge on packages which on large shipments would amount to a considerable sum and would have to be reckoned with in figuring costs in future.

Silver Men Satisfied.

E. G. Gooderham of the Toronto Silver Plate Co., Toronto, does not expect the new tariff to result in any price change in silverware. While the industry is given slightly increased protection this is counteracted by a larger duty on such raw material as German silver and glass for mounting. The steadily increasing cost of raw material is likely to force another advance in price at an early date. Both English and American manufacturers have made two or more advances while Canadian manufacturers have not changed the price since the beginning of 1906 in spite of the marked advance in the cost of raw material during this year.

Enamelware Advanced.

H. S. Harwood, Toronto manager of the James Robertson Co., said he was looking for an immediate advance in both the Canadian and American enamelware and earthenware as the result of the additional 5 per cent. added to the duty on closets, urinals, baths, sinks, and other plumbing goods. The reduction in lead pipe, shot, bullets was not warranted in his opinion as present prices are very close to the cost of raw material and manufacture. The lead manufacturers are to take the matter up with the Goverement and endeavor to have the old duty retained. The changes in paints would not affect the trade to any extent, the increase on liquid paint being caused by higher prices ruling on white lead and the change in linseed oil left matters about as before.

Increased Cost of Brass Goods.

Chas. Morrison of the James Morrison Brass Manufacturing Co., Toronto, says that his company have not had time yet to consider the changes made in the new tariff but that the addition of the 10 per cent. duty on brass rods, tubes and sheets would increase their cost of manufacture to the extent of the duty as all rods and tubes used by them are over six feet in length. The advance on sheets will probably force an increase in prices although this will be difficult on account of the recent advances caused by the extraordinary high price of copper now ruling. Mr. Morrison stated that if the change would result in inducing the Brass Rolling Mills at New Toronto to re-open no objection could be made to the new duty, as the new industry would certainly be entitled to a measure of protection. At present, however, the advance would apply to imported goods only as no brass rods or sheets are produced in Canada.

Brass Mills to Re-open.

The Canadian Brass Rolling Mills will re-open their works at New Toronto in January said a representative of the company to Hardware & Metal on Wednesday. "We assured the Government that if we were given protection we would re-open the mills and we have already prepared the foundation for a large addition to the plant and have considerable new machinery on the grounds. We will be producing rods and sheets early in the New Year in accordance with our promise to the Government.

Turpentine Unchanged.

E. Fielding, secretary of the Linseed Oil Association, Toronto, and a large importer of linseed oil and turpentine, passed a large consignment of turpentine through the Toronto Custom House on Thursday, November 29, and as turpentine was reported on the free list in the new tariff, he applied for a rebate on the consignment, finding out however, that the new tariff remains at five per cent as before. "The confusion probably arose," said Mr. Fielding, "owing to the fact that the new tariff includes raw and crude turpentine which is listed free. There is no raw or crude turpentine coming into this country to be refined, and it looks as though some importer of fake turpentine composed partially of benzine, is influencing the government to insert this item. I have drawn the matter to their attention, and it should be made right before the tariff is finally adopted. As to linseed oil, there is none coming into this country from the United States, and at present high prices in England, there is no difference between importing at old duty of 80c per hundred pounds or the new duty of 25 per cent. If prices in England decline owing to large importations from India and the Argentine Republic, the duty will be decidedly in favor of the importer."

Paint Men Dissatisfied.

C. C. Ballantyne of the Sherwin-Williams Company, Montreal, said: "Paint manufacturers are not satisfied with the new tariff as applied to their products. When it was proposed, a year and a half ago, to increase the duty on white lead, the paint manufacturers informed the Government that they would offer no objection to assisting a new industry to establish itself, so long as it was understood that the Government would make a corresponding increase in the duty on mixed paints so that we should have as good protection as we had when the duty on white lead was 5, and on the finished article 25 per cent. When we presented our suggestions to the Minister, we asked that the tariff should be raised from 25 to 35 per cent. on mixed paints which would have the same effect as when the duty was 5 per cent. on lead, and 25 per cent. on mixed paints.

The paint industry was perfectly satisfied with things as they were before the duty on white lead was imposed. The old duty on white lead was 5 per cent, and on lead ground in oil, 25 per cent. Now, the duty on the raw material is 20 per cent., and on ground white lead, 25 per cent., a difference of only 5 per cent.

I think a good many people will regret that the difference between the maximum and intermediate tariff is not greater. It is only 2½ per cent., which is but a flea bite. It is not enough to make U.S. industries fell that they will have to come here to establish branches, if they want to do business.

Tin Plate Agents Pleased.

Arthur J. Owen, Canadian manager of Franklin Saunders & Co., manufacturers of tin plate, etc., expressed himself as follows: "I have nothing to say against the new tariff. Had the proposed duty been placed on tin plate, it would have worked most adversely against tin can manufacturers and other users of tin plates, black sheets, etc. It is a matter of congratulation both for manufacturers and dealers interested in importing such materials from the Old Country that not only was no heavy duty imposed, but such duty as has existed was taken off so as to encourage British industries.

The Package Problem.

Alexander Gibb, metal and hardware importer, Montreal, said: "I am very well satisfied, so far as I understand the new tariff. Regarding packages, the tariff is not plain. Galvanized iron coming from Great Britain, is on the free list. Will there be a duty on the cases? Some people seem to think there will be, and this is about the only thing that is worrying the hardware trade. English hardware dealers are always in the habit of charging for cases, which are free from most United States manufacturers. Thus, if a duty is imposed on the cases, as has been done in certain cases in the past, there will be a discrimination against Great Britain, which I do not think Mr. Fielding intended.

Drawbacks Condemned.

The interests of Drummond, McCall & Co., are two-fold, as they are interested not only in companies producing pig iron, but are also large importers of iron, from the Old Country. Their opinions are expressed as follows: "The furnace companies object to the 95 per cent. rebate to manufacturers of agricultural machinery, etc. This will simply mean, that all such concerns as Frost & Wood, International Harvester Co. and Massey-Harris, will discontinue purchasing Canadian pig iron, because they can, by using imported iron and on submitting proof that it was used in this way, have practically the whole duty refunded. It means no protection at all. These firms are very large consumers of pig iron, and, in consequence, a large percentage of the country's trade, will pass into foreign hands. If this rebate were assured to the farmer, there would not be the same objection.

The pig iron duty should have been retained at the old level, in view of the large importations coming in. It is difficult to maintain a high grade of Canadian pig iron, against the low grades that come in, in large quantities, from the other side. Certain points in connection with the new schedule, are vague and uncertain, but, as soon as they are settled, it should be fairly satisfactory to everyone.

NEW ADVERTISERS.

A. E. Brigent.
Ontario Steel Ware Co.
Banwell Hoxie Wire Fence Co.

THE TARIFF.

The old rule that first impressions are always best does not hold good with the new Canadian tariff as the more time that is taken to digest its provisions, the more hidden changes come to the surface.

Many of the changes made are not only mystifying, but they are annoying without purpose, the gain for instance in the new regulation regarding packages—that packages on goods paying ad valorem rates are dutiable at 20 per cent where they are charged for separately on invoices—will be trivial to the Government in comparison to the trouble and extra expense it will cause importers particularly of light goods such as glass chimneys and globes.

Another change which will cause endless trouble is the change in the regulation providing that any article imported shall be subjected to the highest duty charged on any of its parts. That was plain and easily understood, but the new reading that duty will be charged on most important item contained in the article will lead to much controversy and varying decisions by different appraisers.

The contradictions in the new tariff are also many, the chief one being in first reducing the duty on mowers and binders from 20 to 17½ per cent., then giving in return a 95 per cent. rebate on all duties paid on iron and steel imported for goods manufactured for home consumption, after granting a continued bonus to the iron and steel industry. The reduction in duty pleases the farmers, while the rebate squares the implement manufacturers, but it also nullifies the advantage of the bonus to develop a home iron industry.

Without discussing the merits of the bonus system, other than to point out that its continuation for 3½ years will mean upwards of $10,000,000 to the existing iron and steel companies, this being a rather high price to pay to industries which are already fairly well established, we must look with disfavor on the introduction of the drawback system as applied to manufactures for home cousumption as it grants favors to one industry not enjoyed by others. Why discriminate against wire manufacturers and foundrymen in favor of implement manufacturers?

The complete change in the classification of items makes the new tariff a brain-racker. An attempt has been made to group all items of a similar nature together but the effort has not been entirely successful as many items are entirely out of their groupings, earthenware items being in amongst metals and bronze powder, gold paint, etc., being nearly a hundred items away from other paints. Many suggestions for simplifying the tariff were made before the Tariff Commission but few have evidently been adopted.

Taken as a whole the hardware trade is not affected greatly by the tariff changes. The paint manufacturers, however, have lost no time in bringing before the Government their case in favor of higher protection on mixed paints. Montreal hardware jobbers have arranged to ask for the abrogation of the vexatious package charges. The iron and steel interests are asking that the implement makers' 95 per cent. rebate on pig iron be cut off. Rolling mill men are protesting against the new duty on steel billets, and for the old conditions on rolled and bar iron, sheet steel, etc. Toronto hardware jobbers are asking the meaning of the strengthening of the anti-dumping clause by placing the power of cancelling the 5 per cent. leeway in the Finance Minster's hands, and metal merchants are protesting that the new tariff will force them out of the boiler plate and structural iron business.

Owing to inability to grasp the effect of the changes many prominent men in the trade have declined to discuss the tariff this week, but the interviews we are publishing, together with the summary of the changes made, the comparison of the old and new schedules, and Mr. Fielding's speech, so far as it refers to items of interest to the hardware trade, will give readers a fair opportunity of grasping the main points of the customs regulations which, subject to minor changes, are likely to be in force for the next five or ten years.

WINNIPEG WHOLESALERS' ASSOCIATION.

An organized effort has been made to revive the long quiescent Winnipeg Wholesalers' Association, and at a meeting held last week in the offices of Newton & Davidson, Winnipeg, officers were elected and preparations made for active work along certain lines. Officers were elected as follows: President, Jas. H. Ashdown; Vice-President, E. D. Martin; Secretary, A. B. Kent; Executive Committee, A. L. Johnston, E. F. Hutchings, Alexander Macdonald, William Georgeson, J. E. Williams, Daniel E. Sprague, Geo. F. Galt, and H. M. Belcher.

It was decided to start a campaign to better the conditions of freight transportation from the shipper's point of view. In fact the main object of the association is to secure the best possible conditions of transportation, the adjustment of difficulties and the correction of irregularities and inconsistencies. In short the Association will work for an improved railway service.

A report presented by the executive recommending the employment of an experienced freight and transportation official to look after the interests of the association was unanimously adopted and the committee was empowered to proceed with the securing of a competent man to fill the position.

The matter of the transportation is but one of the departments with which the association will interest itself and it is the intention to take up other branches and deal with tariffs, classifications, freight rates, demurrage and other matters upon which they will confer with the railway commission. It was also decided to open up an office and establish a credit clearing bureau.

The ability to give the people the goods asked for will make more satisfied customers than a dozen clerks who can nine times in ten sell something "just as good."

Has your store an individuality, or is it simply like a thousand others, without distinctive features in arrangements, methods or stock? Make your store different and the people will remember it.

HARDWARE TRADE GOSSIP

Quebec.

David Courville, hardware merchant, of Maxville, visited Montreal one day this week.

Mr. Bussiere, of Chateauguay, was a caller at the Montreal hardware warehouses this week.

D. K. McLeod, general merchant, of Dunvegan, Ont., visited Montreal on business this week.

Arch. Macfarlane, manufacturers' agent, Montreal, was in Toronto this week on a business trip.

J. Loughrin, hardware dealer of Mattawa, paid a short business visit to Montreal a few days ago.

L. A. Nobert, hardware merchant, of Louiseville, called on his wholesale friends in Montreal this week.

Mr. Sangster, of Sangster & McCuaig, Bainsville, was in Montreal recently buying goods for their general store.

Mr. Moulden, representing Taylor, Forbes & Co., Guelph, visited the Montreal wholesale dealers this week.

R. E. Thorne, of the Canadian Bronze Powder Works, Montreal, is spending a few days in Toronto and other Ontario points.

J. W. Leger, general merchant, of Vaudreuil, was noticed among the out-of-town buyers in Montreal, during the present week.

Wm. McVicar, general merchant, of Rivington, spent a day in Montreal this week, leaving orders with some of the hardware jobbers.

Arthur J. Owen, Canadian manager for Franklin, Saunders & Co., tin plate manufacturers, sails from Portland today on the "Canada," to spend a few weeks in the Old Country conferring with the principals of his firm.

W. H. Wiggs, of the Mechanics Supply Co., Quebec, called at the Montreal office of Hardware and Metal on his way to Chicago, where he is going as a representative of the Industrial Committee of Quebec City, to attend the convention being held in the "Windy City" this week. Delegates are present from the Industrial Committees of the most important cities in United States and Canada, and it is expected that Mr. Wiggs will glean some valuable information while away.

Western Canada.

J. H. Lyons & Co., hardware merchants, Humbolt, Sask., has sold their business to the O. G. King Co., of that place.

Norris Bros., Innisfill, Alta., are building a new hardware store, their old premises being too small for their growing business.

A new wholesale hardware store will be incorporated, and known as the Hanbury Hardware Company, with headquarters at Brandon, Man.

The Ideal Fence Company building in the "C. P. R. town," Winnipeg, is now completed, and the machinery will be installed shortly. The company will manufacture woven wire fences, gates, etc.

Ontario.

W. R. Brock, hardware merchant, Lynden, called on Toronto jobbers last week.

D. F. Walsh, hardware merchant, Orono, called on the jobbers in Toronto last week.

P. Chapelle, hardware merchant, Brown Hill, called on Toronto jobbers last week.

S. Bonathan, hardware merchant, Newcastle, was a visitor in Toronto early this week.

F. A. Hoar, hardware merchant, Bame, called on Toronto wholesale trade last week.

The Metal Shingle and Siding Company, have opened Toronto offices at 132 Victoria Street, under the charge of Quackenbush Bros.

W. H. Richardson, hardware merchant, Essex, called on the wholesale hardware trade in Toronto last week.

John Bailes, hardware merchant, Oshawa, was a visitor in Toronto last week calling on the wholesale trade.

C. Brinel, hardware merchant, Markham, was a visitor in Toronto last week calling on the wholesale hardware trade.

The Hobbs Manufacturing Company, London, have opened a branch office at 468 King Street West, Toronto, under the management of J. C. Towers. Samples and stock of glass will be carried.

Rice Lewis & Son, Toronto, exhibited a timely window this week when the snow was on the ground and the opening of the rinks at hand. The window was made up of snowshoes, skates, hockey sticks and other winter lines.

N. S. Braden, sales manager of the Canadian Westinghouse Company, Hamilton, was married on November 29th, receiving a silver tea service from the Westinghouse staff at Montreal, and a case of silver from the Pittsburg Westinghouse.

Fred. W. Otton, hardware merchant, Bame, is in Toronto attending a Masonic convention and incidentally calling on Hardware and Metal. Fred reports business very brisk this being the general verdict of all Northern Ontario hardware men.

Gordon R. Colville, employed with Moor & Browne, hardware merchants, Sault Ste. Marie, Ont., who has been at his home in Barrie sick for about two weeks, called on the wholesale jobbers last Saturday, before returning to resume his duties.

A. P. Turner, President of the Canadian Copper Company, Sudbury, is to be married on Dec. 10th, in Cleveland, Ohio. Some thirty of the head men in the company's employ, chartered a dining car and entertained Mr. Turner at a banquet on the train, escorting him as far as North Bay.

At the general meeting of the Western Ontario Commercial Travelers' Association at London, nearly the entire staff of officers and directors was re-elected, most of the changes being unavoidable The full staff is as follows: President, C. W. Nicholls, London; vice-president, J. T. Green, London; R. E. Davis, John Lennox, Hamilton; treasurer, W. L. Underwood, London.

The MacLellan Construction Company, of New York, which has been incorporated with a capital of $750,000. The directors include John D. MacLennan, of New York city, who is a Canadian, who was closely associated with Mr. Conmee, M.P., in C.P.R. construction work. Latterly he has been engaged in railway construction work in the Southern States and also in connection with the new water filtration plant at Washington, D.C.

METAL SITUATION.

Interest, this week, has centered largely in the tariff, and, instead of discussions of price changes, metal men have been talking over the effects which the new schedule will have, in diverting trade to Old Country producers. General satisfaction is expressed with the encouragement which will be given to British metal producers.

Although the great tendency of the market continues upward, there is really only one advance to note in the week's price list. This is in sheet copper, which has gone up 1 cent, to correspond with the strength shown by ingot tin, of recent weeks.

Tin plate remains exceedingly strong, and higher prices are quoted in South Wales, than have been recorded for many years. Whether the strong tone in tin plates, Canada plates and black sheets, is justified by orders received from consuming interests all over the world, or whether, on the other hand, a large speculative element has forced things up, it is, at this distance, difficult to say. The various European interests, however, seem to be strongly of the opinion that present figures will be maintained for some months to come.

One South Wales firm is fully booked up to June—an unprecedented event in English tin plate market. Still others profess to be booked until the end of February and March, and, from present appearances, the boom will be continued.

The pig iron situation is about the same as last week. There is no slackening of the demand and, all the time, prices are quietly moving up. Other lines in the metal list, are unchanged, and continue steady.

BUSINESS LAWYERS.

The Birmingham Small Arms Company, Birmingham, England, is making a new departure with regard to the direction of legal matters arising in the course of business. A special legal department has been established for the purpose of dealing efficiently and promptly with all questions of this kind, directing and supplying information to the various professional advisers of the company, and relieving department heads of matters in which legal difficulties are likely to arise.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Gate Hooks and Eyes—Shortage in some sizes.
Sheet Copper—Base size now 32 cents.

TORONTO.

Iron Pipe—Sharp advances made.
Enamelware—Advances looked for daily.
Boiler Plates—Slight advances.
Old Material—Higher prices generally.
Coal—Quoted higher, with some scarcity.
Sheet Brass—Advanced 10 per cent.
Wire Nails—Advanced 10c. cwt.
Cut Nails—Advanced 10c. cwt.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Dec. 7, 1906.

Hardware jobbers are astonishingly busy this week. Even though many travelers are now in for the annual conference with their firms, orders keep arriving very briskly. An attempt was made this week in some cases, to begin the work of stock-taking, and men were taken from the shipping departments to perform the task. It was soon found, however, that orders were too heavy to be handled without their assistance, and they had to be put back at the packing again. The work of stock-taking will have to be postponed until the present rush is over. This condition is probably accounted for, by the lateness of the season.

Some idea of the manner in which sales have exceeded the anticipation of even shrewd buyers, may be obtained from the experience of a leading wholesale firm here. This company had ordered from England, certain manufactured articles in which Canadian makers were behind in their deliveries. They thought their stock sufficient to last until February at least, but they find this week, that it is badly depleted, with almost every second size short.

The shortage in bolts continues as acutely as ever, and certain sizes of gate hooks and eyes are also very scarce.

AXES. — We quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen. follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—The normal business is being done, at the following prices: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES — We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Sales are picking up again, with the advent of seasonable weather. We quote: Back Straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS — Our discounts remain as follows: Best iron rivets, section, carriage, and wagon box black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—We still quote: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS—Business is good. We quote: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.. Felisterhead, brass, 25 per cent.

BOLTS AND NUTS—The scarcity which has existed for some time is still felt as much as ever. The following discounts continue to rule the trade: Carriage bolts, 3-8 and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—A lively demand is evident. Discounts are as follows: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—Although nails are not so scarce as they were a few weeks ago, we are still quoting $2.20 per keg base f.o.b. Montreal.

CUT NAILS—We still quote: $2.20 per keg base, f.o.b. Montreal.

HORSESHOES—Retailers are ordering in large quantities. We quote as follows: P.B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Conditions remain unchanged.

CEMENT AND FIREBRICK—We are still quoting the following prices: "Lehigh" Portland in wood, $2.54, in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—The market maintains a brisk tone. Prices remain as follows: 5-16 inch, $4.30; 3-8 inch, $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT—Our prices remain as follows: Shot packed in 25-lb. bags, ordinary dro, AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—Business is as usual at this season. We are quoting: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

GREEN WIRE CLOTH—Orders are now bieng booked for spring delivery. Our prices are: In 100 ft. rolls, $1.62½ per hundred square feet, in 50 fet. rolls, $1.67½ per hundred square feet.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Dec. 7, 1906.

Hardware jobbers continue very busy, Christmas goods still selling briskly, a great demand being made for skates, snowshoes, etc. Dealers anticipate a very brisk business in this line, and are sending large orders to the wholesale houses, which can hardly be attended to as the shortage in skates is becoming more apparent each day. Some houses are completely sold out

already with no possible means of repleting their stock.

In a great number of cutlery lines goods have been sold out several times, but jobbers have already managed to fill orders, as goods are daily received.

Wire nails have experienced another raise and are now quoted at $2.20 base. The demand still continues large, as merchants are repleting their stocks so as not to be caught short again. Personal visits by hardware merchants to wholesale houses are rare at present as all orders are either telephoned or telegraphed rush.

AXES AND HANDLES—Demand is still very brisk and is likely to continue so for some time.

CUTLERY AND SILVERWARE—Telegraph and telephone orders are being received for large quantities.

SPORTING GOODS—All winter lines are still selling briskly, skates being particularly active, although very hard to procure.

CHAIN—We continue to quote: 1 inch, $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

RIVETS AND BURRS.—Copper rivets remain as quoted, 27½ per cent. and copper burrs, 15 per cent.

SCREWS—Prices remain unchanged with many lines very scarce.

BOLTS AND NUTS—The scarcity of these articles is felt very keenly by the trade.

TOOLS—Boys' tool boxes are selling very briskly for Christmas trade, departmental stores buying large quantities of this line.

SHOVELS—A great demand is being made for snow shovels.

LANTERNS—Cold blast are still selling at $6.50 per doz., with large shipments being made daily.

EXTENSION AND STEP LADDERS—Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING — Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS—We are now quoting at advanced price of $2.20 base.

CUT NAILS—We quote $2.30 base f.o.b. Montreal, Toronto 20c higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—A very large demand continues for these lines and large shipments are the order of the day.

BUILDING PAPER—Not as brisk as formerly but large orders are being booked for spring shipments.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES, WOOL AND FURS.—Chicago is easier for extreme lights and buffs, but heavy weight cows and steers, and the packers' market, are very firm. Tallow is somewhat easier and pulled wool is firm.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 7, 1906

Not for many weeks has the metal market been so quiet, so far as price changes are concerned. The only alteration in jobbers' quotations, this week, has been in sheet copper, which has gone up from 31 to 32 cents for base sizes.

The tone of the whole market is still decidedly upward, and is justified by conditions at the producing centres. British sheet metals have advanced to such an extent, even during the past few days, as to neutralize, for the moment, the preference given by the new tariff. In almost every line, this tendency is noticed, and from present appearances, there will be still further advances in jobbers' quotations, to keep pace with primary markets.

COPPER—The only important change in the metal market, this week is in sheet copper. We are now quoting: Ingot copper, 24 to 24½c; sheet copper, base sizes, 32c.

INGOT TIN—Last week's advance is being stiffly held. We quote: 46½ to 47c per lb.

ZINC SPELTER—Conditions indicate a very firm market, but prices are unchanged. We continue to quote: $7.25 to $7.50 per hundred pounds.

PIG LEAD—Prices are still being maintained at $5.40 to $5.50 per hundred pounds.

ANTIMONY—Our price remains 27½ to 28c per pound.

PIG IRON.—We still quote as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—We still quote: British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6¼c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL.—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.40 ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING—The expected new prices have not yet been issued, as we go to press. We still quote: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON—British makers are again raising their quotations, and the following prices show great strength in consequence: Queen's Head, 28 gauge, $4.60 to $4.85; 26 gauge, $4.45; 22 to 24 gauge, $3.90; 16 to 20 gauge, $3.75; Apollo, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 and 20 gauge, $3.60; Comet, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30 to $4.45; 22 and 24, gauge, $3.75 to $4.00; $16 to 20 gauge, $3.60 to $3.85; Fleur-de-Lis, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 to 20

gauge, $3.60; Gorbals "Best Best," 28 gauge, $4.45; Colborne Crown, 28 gauge, $4.45; 26 gauge, $4.30; 24 gauge, $3.75. In less than case lots, 25c extra.

CANADA PLATES—Firmness characterizes the week's market. We are still quoting: 52's, $2.70; 60's, $2.75; 75's, $2.85; full polished, $3.85; galvanized 52's, $4.35; 60's, $4.60.

BLACK SHEETS—An upward tendency is shown, but we are still quoting as follows:: 28 gauge, $2.60; 26 gauge, $2.25; 22 and 24 gauge, $2.45; 20 gauge, $2.40; 18 and 18 gauge, $2.40; 8, 10, 12 and 14 gauge, $2.60.

TIN PLATES—Prices remain as follows: Cokes base size, I.C. 14 x 20, $4.25 to $4.35; charcoal, base size, I.C., 14 x 20, 4.40 to $4.50.

TERNE PLATES—We are still quoting $7.10.

STEEL SHEETS. — We quote: 10 gauge, $2.60; 17, 18 and 20 gauge, $2.40; 22 and 24 gauge, $2.45; 26 gauge, $2.55; 28 gauge, $2.60 per hundred pounds.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6½c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

BAR IRON.—The price remains $2.15 base, f.o.b. Montreal.

OLD MATERIAL. — We quote; Light copper, 17c.; heavy red brass, 16c., yellow brass, 12 1-2c.; light brass, 9c.; lead, 4c; zinc, 4c; machinery cast scrap, $16.00; wrought scrap, $15.00; stove plate scrap, $12.00; mixed rags, $1.00 to $1.20 per 100 lbs.; old rubbers, 8 1-2c. to 8 3-4c.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, December 7, 1906

Firmness rules in the Toronto market all prices being stiff and the chief difficulty being the inability of jobbers to fill orders. Large quantities of metals imported early in November are still lying in Montreal with the railways taking their time to handle it.

The new tariff is the talk of the trade although it is not fully digested yet. One result is the ten per cent. advance being made on sheet brass while another is the sharp advance in iron pipe. The new regulations, if not changed, will practically prevent metal merchants from handling boiler plates and tubes in future.

PIG IRON.—Hamilton, Midland and Londonderry are off the market, and Radnor is quoted at $33 at furnace. Middlesborough is quoted at $24.00, and Summerlee, at $25, f.o.b., Toronto

BAR IRON.—Bar is still hard to get and we still quote: $2.25, f.o.b., Toronto with 2 per cent. discount.

INGOT TIN—Small lots are selling but no big business is being done Prices are unchanged at 46 to 46½ cents per pound.

TIN PLATES—The market is active and prices firm at recent advances.

SHEETS AND PLATES—Active buying is reported with prices steady. Stocks are light, and there is little prospect of replenishing them before next June.

BRASS.—Owing to tariff changes, prices have advanced about 10 per cent. and we now quote 26 to 27½ cents per pound for sheets.

COPPER.– Stocks are very low, and prices unchanged. We continue to quote Ingot copper, $24 per 100 lbs., and sheet copper $30 to $31 per 100 lbs.

LEAD—Market is active and prices very firm. We quote: $5.25 for imported pig and $5.75 for bar lead.

ZINC SPELTER—Stocks are light with market firm and active. We quote very firm with buying brisk. We quote: 7 1-2c. per lb. for foreign and 6 1-2c. per lb. for domestic. Sheet zinc is quoted at 8 1-4c. in casks, and 8 1-2c. in part casks.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. to ½ in., $2.50; ⅝ in., $2.35 heads, per 100 lbs., $2.75; tank plates, 3-16 in., $2.65; tubes, per 100 feet, 1½ in., $8.50; 2, $9; 2 1-2, $10.75; 3, $12; 3 1-2, $16; 1, $21, Terms, 2 per cent. off.

ANTIMONY—Market is active, and stocks scarce. Prices firm at 27c. to 28c.

OLD MATERIAL — Dealers' buying prices show no change this week. We quote: Heavy copper and wire, 18½c., per lb.; light copper 16c. per lb.; heavy red brass, 15c. per lb.; heavy yellow brass, 14c. per lb.; light brass, 9 1-2 per lb; tea lead, $3.70, per 100 lbs.; heavy lead, $3.90 per 100 lbs., scrap zinc, 4½ per lb.; iron No. 1 wrought, $14.00; No. 2 wrought, $6 to $8; machinery cast scrap, $16.50 to $18; stove plate, $12 to $16; malleable and steel, $6; old rubbers, 8½ c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—The following prices are quoted on coal, although some kinds cannot be procured at any price, slack being particularly short.

Standard Hocking soft coal f.o.b. at mines, lump $1.75, ¾ inch, $1.65, run of mine, $1.40, nut, $1.25; N. & S. $1.10; P. & S., 85c.

Youghiogheny soft coal in cars, bonded at bridges; lump, $2.90; ¾ inch, $2.70; mine run, $2.60; slack, $2.25.

United States Metal Markets

From the Iron Age, Dec. 6, 1906.

The markets are firm quite active, and a number of further advances have been recorded. These include $2 per ton on the whole line of wire products, making the basis 2c.. Pittsburg, $3 per ton on Angle Bars, $2 per ton on Merchant Pipe and from $1 to $2 on cast iron pipe. The leading Eastern plate manufacturers have again made an advance of $2 per ton, bringing the price up to the basis of 1.80c., Pittsburg. The Western mills have not yet followed suit, however.

The pig iron markets in England have been growing excited and an advance has been scored to 80½ to 81 shillings for Scotch and 63 shillings for No. 3 Middlesborough. Further sales of foreign foundry iron in this market have been made, and one inquiry has been received for 10,000 tons of foundry and malleable iron from an agricultural implement interest, which however, will apply the greater part of the tonnage to export work. In the Chicago district a car wheel interest has purchased 15,000 tons of malleable iron for the second half of 1907, on the basis of $22.50, Chicago. In the East some further sales of basic pig aggregating 7,000 to 8,000 tons have been made for delivery up to the second quarter. In the Birmingham district two furnaces have been banked in order to accumulate raw material and work off iron in the yards, which lack of cars has made it impossible to ship.

The scarcity of pig iron is more pronounced than ever and threatens to cause the closing down of important mills.

The Merchant Pipe mills are figuring on a large business. There are now coming up three additional oil lines from the Indian Territory fields to the Gulf, each of which will call for upward of 400 miles of pipe.

There has been a heavy movement in steel melting scrap. Three Eastern steel works have bought together about 30,000 tons at $19.50 and better, while a Sharon plant has purchased from 12,000 to 15,000 tons at $20.

From the Iron Trade Review, Cleveland, Dec. 5, 1906.

The advance of finished materials, in keeping with the higher cost of raw materials, continues. In the past week both cast iron and steel pipe prices have increased from $1 to $2 per ton; a similar advance has been made on wire products and higher prices for sheets are predicted. Pig iron remains on about the same level as for several weeks and the situation is little changed except that transportation difficulties are growing more acute, particularly in the south. Large producers in this district are badly behind on deliveries, and consuming interests are suffering severly. The result of present high prices is beginning to manifest itself in certain sections in diminished buying. As an instance the cast iron pipe industry may be cited, it being already apparent that considerable work which had been or postponed. This tendency is especially marked in the case of municipal work. Consumers of iron who are forced to lead a hand to mouth existence; in many cases with iron contracts unfilled for many weeks back, are complaining, and the constant offering of spot iron continues to be a source of irritation to them. Litle relief is promised through the importation of British iron.

In finished lines there is no indication that the volume of business is not keeping up with the average of the past few months. The Steel Corporation at the close of November had on its books

more than eight million tons of unfilled orders and independent mills were in much the same condition. The principal producer of structural materials found November an apparently light month, and the demand for heavy rails is not particularly strong. Steel bars, bar iron, light rail plates, sheets and wire products, however, are extremely active and in most of these lines large tonnage will be carried over into the new year.

Up to December 1 the movement of ore from the upper lake ports aggregated about 36,750,000 tons. December shipments will probably increase this figure by about 500,000 tons, making a gain over 1905 of 3,750,000 tons. It is not expected that furnace interests will suffer during the winter.

London, 'Eng., Metal Markets

From Metal Market Report, Dec 6, 1906.

Cleveland warrants are quoted at 63s. 1½d. and Glasgow Standard warrants, at 62s. 4d., making price as compared with last week, 3s. higher on both Cleveland warrants, and Glasgow Standard warrants.

TIN—Spot tin opened easy at £197, futures at £197, and after sales of 300 tons of spot and 450 tons of futures, closed easy at £196 5s. for spot, £196 5s. for futures making price compared with last week, £1 5s. lower on spot and £2 lower on futures.

COPPER—Spot copper opened strong at £103 10s., futures £104 10s., and after sales of 250 tons of spot and 1,000 tons of futures, closed quiet at £103 for spot, and £104 for futures, making price as compared with last week £1 10s. higher on spot and £1 5s. higher on futures.

LEAD—The market closed at £19 10s. making price as compared with last week 7s. lower.

SPELTER—The market closed at £28, making price as compared with last week unchanged.

N.S. Hardware Trade News

Halifax, N.S., Dec. 4.

The hardware jobbers of Halifax are unable to say as yet what effect the tariff changes will have on their business. They anticipate, however, that the new schedule will be helpful to metals. Prices throughout the list are very firm. The only special change is a slight advance in the price of iron pipe. The jobbers are now engaged in a general assorting of stock for the fall and winter trade. Business on the whole keeps up to a good level, and collections from all quarters are very good.

Some of the large jobbers are now busily engaged in filling orders for the Magdelen Islands. These Halifax firms do a large business with the Islands, and the orders call for a general class of goods, though percentage of fishing supplies is large. Navigation will soon cease and the firms are rushing the orders so as to catch the last steamer. There is a sailing vessel now loaded here with the supplies and ready to sail, but she may not reach the Islands in time. The transfer of the Torbrook iron ore areas to the Messrs. Drummonds, who control the Londonderry Iron Works, compl?tes one of the biggest mining deals that has taken place in Nova Scotia for some years. The property passed into the hands of the new owners last week, and the price paid is variously estimated at from $300,000 to $500,000. The deposits cover about seven square miles, and have been developed by boring pits and drifts until over three million tons of the best Hematite ore in sight and ready for the smelter. Over 30,000 tons have been mined and smelted during the past year, and the excellent quality of the pig iron for foundry purposes produced at Londonderry during the past twelve months a test to the value of this ore. The company will continue to operate under the name of the Annapolis Iron Company.

Fire at Amherst yesterday (Monday) destroyed the offices and drafting department of the Robb Engineering Company, one of the largest manufacturing concerns in the Maritime Provinces. The loss is $25,000.

The loss is principally in the pattern shops, where many new and valuable patterns were kept. Fortunately most of the blue paints were in the vaults not damaged. The machinery in the machine shop is not much damaged.

The company already have a gang of men clearing away the debris, and the machine shop will be going again in ashort time, while temporary offices will be fitted up until the spring. The company expect to have no difficulty in filling orders, and none of the men were thrown out of employment.

HOLIDAY TRADE IN TINWARE.

"If you have a line of tinware, graniteware, woodenware or small hardware in stock that you want to close out, suggests the Hardware Trade, fill a large show window full of everything that can be sold at 10 cents, costing from 40 cents to $1.00 a dozen placing a large muslin sign on outside, 'Your Xmas Gift for 10 Cents—Walk In.' Place cards in window reading as follows: 'Your Choice For 10 Cents.' 'Reduced for Christmas to 10 Cents.' 'Now Is Your Chance to Buy a Xmas Gift for 10 Cents.' 'See Our Line of Xmas Goods on Inside.' This will help bring the people in the store. Arrange the store on the same line as far as possible. On seasonable goods in 10, 25, 35 and 50 cent counters or departments, put cards with prices marked in plain figures as for example: 'All Goods on This Counter 25 Cents.' 'Your Choice for 50 Cents.' This will save time and give your customers the benefit of knowing the price of all the goods you have on display, and through them reach other customers. Try it and you will be surprised to see how many of the little things you have had in the store for months will be closed out, making room for a new stock and better selling goods.

"Now take your special line of holiday goods, such as silverware, carvers, scissors, razors, fancy household articles suitable for holiday presents, and place them on top of the show cases and most attractive places, making an effort to sell those goods that afford a better profit than a cheaper line used to advertise and bring people into the store. Other lines can be followed up in the same way."

A HARD CRACK.

The head of a well-known commercial house in Canada told an interesting story the other day about his early experience in business, when capital was very scarce with him. In his efforts to get business he had allowed a certain retailer to get into his books, to the amount of $1,500. Upon finding one day that the outlook for payment was very bad, he told a fellow business man, who was also a creditor of the retailer, what his fears were. Instead, however, of keeping this information to himself, in order to ingratiate himself with the retailer, repeated to the latter what he had been told.

A few days afterwards the head of the firm who had unbosomed himself to his confrere, was surprised to receive a writ for $10,000 damages for libel. After failing to get the Court to order the plaintiff to guarantee costs he, at the instigation of his own lawyer, settled for $500.

To make matters worse, shortly afterwards the retailer failed and his estate was then in such a deplorable condition that he did not pay one cent on the dollar, the creditor in question losing his $1,500 as well as the $500 costs.

This was hard luck, but the moral is, "Be very careful to whom you express your fears in regard to customers."

When a man 'gins tuh cote trubble he mos' in gen'rl ends by marryin' hit.

Department of Railways and Canals, Canada

WELLAND CANAL

PORT COLBORNE ELEVATOR.

NOTICE TO ELECTRIC POWER COMPANIES.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Electrical Energy," will be received at this office until 16 o'clock on Monday, the 17th December, 1906, for the supply of Electrical Energy required to operate the Government Grain Elevator at Port Colborne Ontario.

Specifications, forms of tender and full information can be obtained on and after this date at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa.

Any tender not necessarily accepted.

By order,

L. K. JONES,
Secretary.

Department of Railways and Canals.
Ottawa, 4th December, 1906.

Newspapers inserting this advertisement withou authority from the Department will not be paid for it.(49t

REFUSE THE BONUS HUNTER.

The bonusing of wildcat industries has loaded a good many Ontario municipalities with debt. This anxiety of towns and villages to get factories is played upon, and wily promoters pursue the game of pitting municipality against municipality. A recent glaring example was the hawking about of a proposition to start a sugar factory in Western Ontario. A statement submitted in court indicated that the company had a good deal more vigor and assurance than money. Bonus hunting has proved in many cases a very profitable amusement. With favorable terms and municipal backing in some form a concern gets going. It keeps going till the term of its bonus expires then asks another. If the people seem to hesitate, visits are paid to other places and it is judiciously noised abroad that this and that municipality are likely to get the industry. Of course, the folk in the home town wake up and pass over their money. There are very many instances most of them differing in detail where municipalities have practically furnished the funds to operate industries. It's time the bonusing system was stopped. It is bad for business in general and bad for the municipalities. Municipal councils will do well to give no heed to the appeals of crafty bonus hunters.

PERTINENT PARAGRAPHS.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Dec. 7, 1906.)

Room 511, Union Bank Building, Office of HARDWARE AND METAL, Winnipeg, Man.

Wholesalers say that the recent tariff changes will have very little effect on prices the principal effect being to divert trade in some lines from American to British goods. This is notablly the case in respect to galvanized sheets. During the early part of last week importers were busy rushing in their shipments before the announcement of the new tariff.

LANTERNS. — Quotations are as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS.—Quoted since the recent advance at $2.70 per keg.

CUT NAILS.—Quoted at $2.80 per keg.

PRESSED SPIKES — Prices are quoted as follows since the recent advance: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Discounts are quoted as follows since the recent advance in the price of copper rivets: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ¼, $7.20; ⅝, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES.—Quotations are: Bench axes, 40; broad axes, 25 p.c. dis. off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

GALVANIZED WARE—Discount on pails is now 37½ per cent. and on other galvanized lines 30 per cent.

CORDAGE—We quote: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Quotations are as follows: Cartridges, Dominion R.F. 50 and 5; Dominion, C.F., 33½ C.F., pistol, p.c.; C.F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL.—Quotations are: Bar iron basis, $2.70. Swedish iron basis, $4.95; sleigh shoe steel, $2.75; spring steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—Quoted a $5.85 per cwt.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

IRON PIPE AND FITTINGS— Revised prices are as follows:—Black pipe, ¼ inch, $2.65; ⅜, $2.80; ½, $3.50; ¾, $4.40; 1, $6.35; 1¼, $8.65; 1½, $10.40; 2, 13.85; 2½, $19.00; 3, $25.00. Galvanized iron pipe, ⅜ inch. $3.75; ½, $4.35; ¾, $5.65; 1, $8.10; 1¼, $11.00; 1½, $13.25; 2, inch, $17.65. Nipples, discounts 70 and 10 per cent.; Unions, couplings, bushings and plugs, 60 per cent.

LEAD PIPE—The price, $7.80, is firmly maintained in view of the advancing lead market.

GALVANIZED IRON—Quoted as follows:—Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65, 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.50; 26, $4.65; 28, $5.00.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Quoted as follows: Canada plate, 18 x 21, 18 x 24, $3.40; 20 x 28, $3.65; full polished, $4.15.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM & GASOLINE—As noted last week there has been a decline in petroleum. We quote:— Silver Star in

Stores System $15.50

No. 1—Current Binder, Heavy Canvas Binding and Index. No. 2—Day Book Binder, heavy canvas binding, for filing duplicate accounts. No. 3—1000 Duplicate Monthly Statement Blanks, size 9 x 11, your name or the title of your firm being printed with the address. No. 4—150 Ledger Leaves, 125 for customers accounts and 25 for general accounts. No. 5—12 Recapitulation Blanks, for monthly total of sales. No. 6—14 Sheets of Carbon Paper. 1 Box of Manifold Pens.

OUR reputation for making practical labor saving systems to handle business accounting has covered this continent, and is gradually working through Europe. A particular specialty is our system for taking care of bookkeeping in a retail business.

We have just put this special one, known as our "Stores System," on the market. Though low in price, it is a very complete and an ingenious outfit. It is not merely a monthly account system, but includes also the Ledger feature and recapitulation system of sales. It is on the unit plan—the only successful method by which books can be kept—one account to the page. The photograph herewith, and the explanation below it, will give you an idea of just exactly what you will get for $15.50.

This system will enormously reduce the work of handling your bookkeeping and facilitate your general business. It will pay for itself in clerical service value in no time.

Employing our Stores System means that each customer's account is made out daily, items being entered from the Counter Check Books or Counter Blotters. These entries are made in duplicate by one writing, through the use of carbon paper. The ledger sheet faces this account, and at the end of the month it is totalled and amount posted to the ledger leaf. The account is then detached at the perforated line and posted to the customer. The duplicate sheet is removed to the Day Book Binder and becomes a detailed record, to explain the ledger entry.

Send for this outfit to-day — $15.50 F. O. B. Factory, Brampton, Ontario.

BANK OF MONTREAL REPORT

Eighty-ninth Annual Meeting of Share holders—Satisfactory year's work—Canadian Trade Conditions Reviewed by President.

The eighty-ninth annual general meeting of the Shareholders of the Bank of Montreal was held in the Board Room of the institution, at Montreal, on Monday.

There were present: Hon. Sir George Drummond, K.C.M.G., President; Mr. E. S. Clouston, Vice-President and General Manager; Sir William C. Macdonald, Hon. Robert Mackay, Messrs. James Ross, A. T. Paterson, R. B. Angus, Michael Burke, F. S. Lyman, K.C.; Angus, W. Hooper, James Tasker, B. A. Boas, George Durnford, Henry Dobell, J. S. Keoch, M. S. Foley, John Beattie, R. G. Starke, H. Cameron, W. Blackader, James Kirby, K.C.; James Croil, Lieut.-Col. Prevost, H. Paton, W. Stanway, A. G. Ross, W. D. Gillean, Rev. G. H. Parker, (Compton); M. O'Shaughnessy, John Turnbull, J. Scott.

On the motion of Mr. R. B. Angus, Sir George Drummond, President, was unanimously voted to the chair, and on the motion of Mr. W. Stanway, seconded by Mr. James Tasker, it was resolved: "That the following be appointed to act as scrutineers: Messrs. F. S. Lyman, K.C., and Angus W. Hooper; and that Mr. James Aird be secretary of the meeting."

THE GENERAL STATEMENT.

The General Statement on 31st October, 1906, is as follows:

Liabilities.

Capital Stock		$ 14,400,000.00
Rest	$ 11,000,000.00	
Balance of Profits carried forward	159,831.84	
	$ 11,159,831.84	
Unclaimed Dividends	2,228.01

		$168,001,173.12

Bank of Montreal.
Montreal, 31st October, 1906.

E. S. CLOUSTON,
General Manager.

The Directors' Report.

The report of the Directors to the Shareholders at their eighty-ninth annual general meeting, was then read by Mr. E. S. Clouston, vice-president, as follows:

The Directors have pleasure in presenting the Report, showing the result of the Bank's business for the year ended 31st October, 1906

Balance of Profit and Loss Account, 31st October, 1905		$ 801,855.41
Profits for the year ending 31st October, 1906, after deducting charges of management, and making full provision for all bad and doubtful debts		1,797,976.43
		$2,599,831.84
Dividend 2½ per cent. paid 1st March, 1906.	$ 360,000.00	
Dividend 2½ per cent. paid 1st June, 1906.	360,000.00	
Dividend 2½ per cent. paid 1st September, 1906	360,000.00	
Dividend 2½ per cent. payable 1st December, 1906	360,000.00	
	$1,440,000.00	
Amount credited to Rest Account	1,000,000.00	
		2,440,000.00
Balance of Profit and Loss carried forward		$ 159,831.84

The sub-agencies at Fort Rouge (Winnipeg) and Ste. Anne de Bellevue, mentioned in our last report as about to be established, were opened shortly afterwards. Since the last annual meeting branches have also been opened in the city of Mexico and at Saskatoon, and sub-agencies at Fenelon Falls; St. Henri, Montreal; Upper town, Quebec; and Bank street, Ottawa.

The Ontario Bank having intimated that is was in difficulties and would have to suspend, this bank, on 13th October, last, assumed all its liabilities, under a guarantee of other banks against loss, and it is now being liquidated.

In view of the change in the number of directors made by resolution of the shareholders at the last annual meeting, and in order to bring the by-laws of the bank into accord with the Bank Act, as at present, it has been thought well by the directors to have the existing by-laws consolidated and amended to date. This has been done, and they are now placed before you for confirmation.

All the offices of the bank, including the Head Office, have been inspected during the past year.

G. A. DRUMMOND,
President.

THE VICE-PRESIDENT.

The vice-president then spoke as follows:

As the president will deal with the business of the country generally, I will only refer to the statement of the affairs of the bank presented to you. You will notice that the chief features are increases of about $11,000,000 in deposits bearing interest, and about $13,000,000 in our current loans. These changes took place principally during the last month of our fiscal year, and are the result of our undertaking the liquidation of the liabilities of the Ontario Bank. The profits show an increase of $160,000, due partly to the good rates ruling in London and New York, where we are compelled to carry a considerable portion of our reserve funds. The other changes are of minor importance, and do not call for any special comment.

When in October the deplorable condition of the Ontario Bank was submitted for the consideration of a number of bankers, it was thought best, in the interests of all concerned, that the bank should be liquidated, and, with the view of allaying any excitement which would probably be detrimental to the interests of the commercial community generally, it was decided that this bank should undertake to assume all the liabilities of the Ontario Bank, under a guarantee from other banks in the event of the assets being insufficient to discharge them. The bank is also a party to the guarantee, and we have agreed in addition to pay $150,000 for the goodwill of the business . We do not anticipate that there will be any claim under the guarantee. The liquidation is proceeding quietly, without any public excitement or disorganization of the business of the country, with a minimum of cost to the shareholders of the Ontario Bank, and without the loss of a dollar to either noteholders or depositors. The record of Canadian banks in this respect is excellent. During the last quarter of a century, by failures of banks, which could be organized under our present banking laws, the loss to depositors has been under $750,000. The noteholders, of course, have lost nothing. I speak only of banks that could be organized under our present acts. Other banks during that period failed, involving loss to both depositors and noteholders, but they were acting under old charters and under conditions which do not now exist—in one case there was no double liability. Out of the 12 banks that have suspended since 1880, five only could obtain charters under our present system.

With respect to the general business of the country, I can only repeat my remarks of last year, that we are still in the full flood tide of prosperity. Railway earnings continue large, immigration is satisfactory, and the farming community share with manufacturers and merchants the general well-being; but in its wake it is feared will follow over-expansion, inflated values and increasing speculations, particularly in real estate and mining stocks, leaving wreckage behind when the tide ebbs.

There is still time to set one's house in order and keep it there, but the tardy should remember that the prolongation of the day of grace may add to the severity of the day of reckoning.

THE PRESIDENT'S REMARKS.

The president, in moving the adoption of the directors' report, said:

In accordance with a practice of many years' standing in this bank, I attempt a brief review of the general trade of the country.

Beyond question the general condition is one of great prosperity.

In all or nearly all branches of trade, manufacture and commerce, considerable advances in the volume of trade have taken place, as compared with the preceding year.

The port of Montreal is now, it is satisfactory to note, much more widely recognized as the eastern port of the Dominion, and its efficiency the concern not of the province of Quebec specially, but of the whole Dominion. It is therefore not entirely satisfactory to note that the business of the year now ending shows little, if any, advance over the previous year.

The improvements of the port proceed but slowly, and much remains to be done in the harbor, the channel, and the gulf, to make it possible to claim Montreal a model port

The present extreme rates of marine insurance are a great disadvantage. Upon the whole the shipping business shows a fair season's business, due in part to a greatly increased importation of goods and increased passenger trade, and the shipowners appear to be fairly well satisfied.

In this connection, it is in the highest degree satisfactory to note the improved volume of passenger business, due largely to the appearance on the route of four new steamers of the Allans and Canadian Pacific Railway Company. These boats, if only the pioneers, do much to remove the reproach which forced Canadian travel to New York and Boston, and prevented almost entirely general travel from reaching Canada, in effect placing Canada and Canadian interests in the background. We have the shortest sea route from Europe, and are only beginning to secure a reasonable share of a business which may include not Canada alone, but a large portion of the Western United States.

Taken in detail, I may say the various important departments of trade and commerce have done well.

The hardware trade reports "a larger business during the past year than at any former period in the trade's history."

The new application of iron and steel in building structures added to the demand for other standard purposes have caused a famine in these materials and unexpected delays in many enterprises.

The dry goods trade is reported as never better, and one feature to which I may refer later on, is the much better and more expensive goods now in demand.

In wooollens the report is that while still under a cloud from the operation of the preferential tariff it is better than last year, prices of all classes having advanced.

In cotton, advances in prices and an active demand are reported. Here again buyers are said to be taking goods costing seven to eight cents a yard, when not long ago four to five cents sufficed.

Boots and Shoes.—The demand has been good. Prices it is said have not advanced in proportion to the advance in the raw material, though now from 5 to 20 per cent. above last year.

In leather a large business has been done in the home trade, at an advance of one to two cents per pound. Raw hides having advanced all round about 25 per cent.

Wool has brought very high prices during the year.

Some idea of the value to the farming community of the cheese and butter trade may be found from the following figures.

Cheese. -- The cheese exported to Great Britain during the present season was of the value of $22,401,132.

Butter.—Of butter, $4,433,891, and including what remains to be sent over, we reach a total of over 33 millions of dollars. To these must be added the home consumption, which is every year growing in volume and importance.

The great feature of the hour is, however, the development of the North Western provinces — Manitoba, Saskatchewan and Alberta—in which the capacity to produce excellent qualities of all kinds of cereals seems to be assured beyond question.

Of wheat alone the present crop is estimated at 85 million bushels, the quality undoubted; the area under cultivation is greater than last year, but the yield per acre is about 19 bushels, as against 23 last year.

If the other grains such as oats, barley and flaxseed, are taken into account, and cattle exported to the value of eight millions of dollars, we are assured that the farmers have shared in the general prosperity .

The number of acres of Canadian Pacific lands sold from January 1st to October 31st, 1906, is 1,080,000, as against 653,000 acres in the corresponding period of 1905.

The number of immigrants entering Canada through Canadian Pacific gatewas from January 1st to November 7th, 1906, is 132,000, as against 96,000 in the corresponding period of last year.

The best evidence of the extraordinary activity of trade is to be found in the railway traffic, which is trying to the utmost the resources of the roads; new rolling stock is being put into

service as quickly as acquired, and the demand is still unappeased.

In addition, we have three great trunk lines engaged in active construction.—The Grand Trunk to reach the Pacific, the Canadian Northern and the Canadian Pacific in great stretches of extension the pace being only limited by the supply of labor.

The current complaint is of the increased cost of living, and it is an interesting question how far this is due to any increased cost of what are called the necessities of life, or to an advance in the style of living and the increased use of luxuries. Doubtless both enter into the case, but this is too large a subject for adequate treatment on this occasion.

In this matter some evidence may be adduced from the fact that the dry goods and other trades report the more costly class of goods now being sold.

There is abroad in the world at large a prevalent idea that capital and corportions of all kinds are antagonistic to the general welfare. Now it would be an interesting question how much of our present prosperity is founded on substantial realizations of our own, and how much is due to an increased confidence in our future on the part of outside capitalists.

The absurdity of regarding capital with suspicion is evidenced by the fact that the vast additions to our railways and other enterprises essential to the opening up of our country would be impossible without the aid of outside capital.

It would be contrary to all experience to hope for an unbroken continuance of the present condition of prosperity—periods of reaction and of suspended enterprise may be expected, but we may be assured that the surest means of postponing their coming and dealing with the bad times when they come, is the exercise of prudenec and caution to prosperous times like the present.

I beg to move: "That the report of the directors, now read, be adopted and printed for distribution among the shareholders." If any shareholder has any questions to ask, we shall be pleased to answer them.

The motion for the adoption of the report was seconded by the vice-president, after which Rev. G. H. Parker asked several questions in regard to dividends, and also as to the bank's premises, which were replied to by the president and the vice-president.

Mr. B. A. Boas spoke on the dividend question, and advocated the possibility of higher dividends in the future.

The report was then unanimously adopted.

Confirm Amended By-laws.

It was moved by the president: "Resovled that the consolidated amended by-laws of the shareholders of the Bank of Montreal, laid before the shareholders and read, be and the same are hereby confirmed, adopted and passed by this meeting of shareholders, and that the same be sealed with the Corporate Seal of the Bank, countersigned by the president thereof."

This was seconded by the vice-president, who remarked: I think it is hardly necessary to read the by-laws through; they are before the shareholders, and the changes are small and few. In paragraph III. the number of directors is increased from nine to ten. Paragraph VI. governs the election of an honorary president, which is a new position. No. X. had to be changed in order to enable us to carry out the quarterly dividends and the closing of the bank's books. As to No. XI., under the old by-laws, if we appoint any local director, he had to be qualified to the extent of twenty shares. We have though it was hardly necessary to ask a local director for any qualification. No. XIII. has been stricken out, as it is provided for by a footnote.

The motion was then adopted, after which Mr. B. A. Boas moved:

"That the thanks of the meeting be presented to the president and direc-

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

WELLAND CANAL

Tenders for Supplies for the year 1907

SEALED TENDERS for Supplies, addressed to the Superintending Engineer, Welland Canal, St. Catharines, will be received until 16 o'clock on Monday, the 31st of December, 1906, for the supply and delivery of various articles of Timber, Hardware, Castings, Fuel, Paints, Oils, etc., for use on the Welland Canal and its branches for the year 1907.

Specifications, forms of tender and other information may be obtained at the Superintending Engineer's Office, St. Catharines, on and after Tuesday, the 11th December, 1906.

The lowest or any tender not necessarily accepted.

By Order,

L. K. JONES,

Secretary.

Department of Railways and Canals,
Ottawa, 4th December, 1906.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

tors for their attention to the interests of the bank."

This was seconded by Mr. Henry Dobell, and was concurred in unanimously.

Mr. A. T. Paterson moved:

"That the thanks of the meeting be given to the general manager, the assistant general manager, the inspector, the managers, and other officers of the Bank for their services during the past year."

In making the motion, Mr. Paterson said that the importance of the staff to the Bank was a point which must be patent to everybody. The success of the Bank depended in the first place, upon the chief officers, but the subordinate staff had a hand in carrying out their several offices. The extension of a bank's business necessarily carried with it an augmentation of the staff. When he first joined the Board of the Bank of Montreal the staff was under 300; now it was, he believed, somewhat over 1,000.

Sir William Macdonald seconded the motion, which was unanimously adopted.

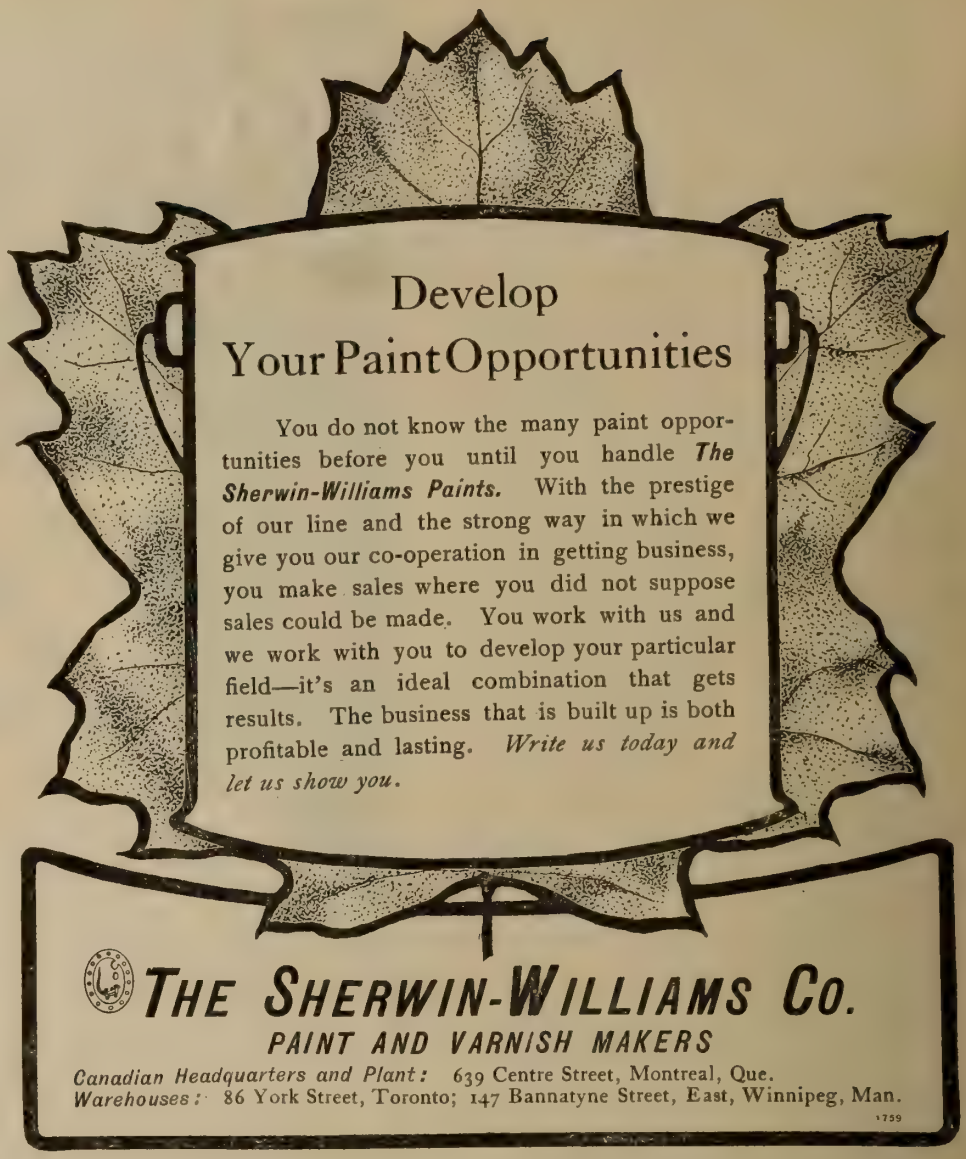
The vice-president thanked the shareholders, on behalf of himself and staff, for their kind expression of appreciation.

Mr. H. Paton moved, seconded by Mr. John Turnbull:

"That the ballot now open for the election of directors be kept open until 2 o'clock, unless fifteen minutes elapse without a vote being cast, when it shall be closed, and until that time and for that purpose only this meeting be continued."

This was unanimously concurred in.

THE DIRECTORS.



The ballot resulted in the election of the following directors:

R. B. ANGUS,
E. S. CLOUSTON,
THE HON. SIR. GEORGE A. DRUMMOND, K.C.M.G.,
E. B. GREENSHIELDS,
HON. ROBERT MACKAY,
SIR WM. C. MACDONALD,
A. T. PATERSON,
ROBERT G. REID,
JAMES ROSS,
THE RIGHT HON. LORD STRATHCONA AND MOUNT ROYAL, G.C.M.G.

IRRITATING DELAY.

This is the season when everybody from the largest manufacturers to the smallest retailers should be so busy that they are working overtime, and in many instances this is actually the case, but there is one great drawback to prevent trade running along the usual channels smoothly and harmoniously. This thorn in the side, is the congestion of traffic on the railways. From one end of the Dominion to the other there is a shortage of cars and engines, and the freight sheds of the railway and transportation companies are filled to overflowing. The effect of this congestion is only now beginning to be felt by the retailer. Christmas and the holiday trade is coming on, and it behooves the grocer to have a complete stock of all those lines which are so necessary at this time of year. Orders for holiday goods have been placed for a very long time, but grocers in all parts of the country are daily anticipating the receipt of an advice card from the local freight office informing them of the arrival of the long-looked for goods, which are so slow in coming. During the past couple of weeks there has been a slight improvement in some circles, but on the whole transportation conditions are very bad. The wholesaler is not to blame for non-arrival of the goods so anxiously awaited by the retail merchant, he is just as badly off or more so, because many other customers of his are in the same position as the first grocer. One of the largest jobbers in Montreal has filled a number of contracts at a straight loss. Goods had been ordered by the retailer and the jobber, having waited a reasonable length of time for the receipt of the foodstuffs by him, found it necessary to buy from spot stocks of other firms at enhanced prices, in order to satisfy his customer.

If a man is too lazy to work he sets himself up as a philosopher dispenser.

SETTLING OF THE WEST.

Much has been said and written about the foreign invasion of Western Canada. People of all lands are seeking to make for themselves new and happier homes in the Canadian West, but a survey of the homesteading returns give the assurance that the prairies and the coast province will be not very different from the rest of Canada.

During August, for instance, there were 3,388 homesteaders located, and of these only about 10 per cent—to be exact, 373—were alien of tongue and origin.

From Eastern Canada came 687, and it will be reassuring to the Maritime provinces to know that 590 of them were from Ontario. There were 259 natives of the West and 940 Americans.

During the first eight months of this year, 110,527 immigrants arrived in Canada, against 85,722, during the same period a year ago. Of these, 92,579 were of British origin. There were 71,000 English, 17,000 Scotch and 3,000 Irish.

Paint, Oil and Brush Trades

THE TURPENTINE INDUSTRY.

A southern trade paper states that if present conditions are permitted to continue, the extinction of the long leaf pine will be complete within the next 40 or 50 years. The United States Government is fully alive to the situation, but it is difficult to see in what way they can remedy it further than by giving advice to the owners. It is customary to lease tracts of timber for short terms of years to turpentine operators. The lessee naturally endeavors to obtain the largest quantity of products he can during his term of lease. As there is practically no supervision, he bleeds the trees to such an extent as to damage them. The timber speculator and the turpentine operators appear to be in control and are indifferent as to whether the country is depleted or not of the long leaf pine.

The following description of the method employed in the distillation of turpentine is taken from one of the publications of the United States Department of Agriculture.

"The process of distillation requires experience and care in order to prevent loss in spirits of turpentine, to obtain the largest quantities of resin of higher grades, and to guard against overheating. After heating the still somewhat beyond the melting point of crude turpentine, a minute stream of tepid water from the top of the condensing tub is conducted into the still and allowed to run until the end of the process; this end is indicated by a peculiar noise of the boiling contents of the still and the diminished quantity of volatile oil in the distillate.

"On reaching this point the heating of the still and the influx of water have to be carefully regulated. After all the spirits of turpentine has distilled over, the fire is removed, and the contents of the still are drawn off by a tap at the bottom. This residuum, the molten resin, is first allowed to run through a wire cloth, and is immediately strained again through coarse cotton cloth, or cotton batting made for the purpose, into a large trough, from which it is ladled into barrels. The legal standard weight of the commercial package is 280 lbs. gross, no tare being allowed. The finest grades of resin are largely used in the manufacture of paper, for sizing, of soaps, and of fine varnishes; the medium qualities are mostly consumed in the manufacture of yellow soap, sealing wax in pharmacy, and for minor purposes; and the lower and lowest qualities are used for pitch in ship and boat building, brewers' pitch, and for the distillation of resin oil, which largely enters into the manufacture of lubricating agents."

ADDITION TO PAINT TRADE.

W. H. Gerke, at Montreal, the Canadian manager of the Martin-Senour Co., is rejoicing in the arrival of a big, bouncing, baby boy. As is well known, no one born outside the protecting folds of "Old Glory" can aspire to the White House at Washington. As an American, Mr. Gerke's only regret is that his young son cannot therefore be the president of the United States. However, if the youngster continues to grow in popularity, a special Act of Congress might be passed suspending the Munro doctrine in this case, or, better still, he may grow to be a right loyal Canadian and become the Premier of Canada.

We notice that the baby carriage or perambulator, in which the young son and heir takes his daily airing, bears in the axle the Canadian Manufacturers' Association mystic legend "Made in Canada."

"Hardware and Metal" congratulates Mr. Gerke.

SUES WHITE LEAD COMPANY.

Joseph Boule, who was employed by the Carter White Lead Company in January and February last, has entered suit for $5,000 damages against his former employers. He alleges that owing to the failure of the company to provide the necessary protection he suffered from chemical poisoning which brought on various complications and greatly undermined his general health.

DON'TS FOR BRUSH USERS.

The Marshall Wells Hardware Co., in their new brush catalogue, give the following items of advice to buyers and users of brushes:

Don't put a bristle brush in lime or any compound containing lime.

Don't put a cement set varnish brush in shellac or any alcohol combination.

Don't put a glue set brush in water.

Don't put a duster in water.

Don't use a paint brush as a duster.

Don't use a paint brush for varnish, though any varnish brush may be used in paint .

Don't keep brushes when not in use in a hot dry place, as shrinkage of the block will cause the bristles to loosen and come out.

Don't think that a new brush is defective because a few bristles work out. All new brushes contain short, loose bristles which should be shaken out as much as possible before the brush is used. The best brush made will shed a few bristles in the first day's work.

Paint and Oil Markets

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 7, 1906

Many paint travelers are off the road, and sales will not be pushed until after the holiday season. There are no important price changes this week, the disposition being, to await, not only a more settled condition in primary markets, but also the permanent adoption of the new tariff. The original draft shows some anomalies which the paint manufacturers hope will be remedied before the tariff is definitely settled.

LINSEED OIL—Linseed is very firm just now, and prices are as follows: Raw, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.; boiled, 1 to 4 barrels, 58c.; 5 to 9 barrels, 57c.

TURPENTINE—Higher prices are expected, but for the present, we are still quoting: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—All lead products are firm. We quote: Best brand Government standards, $6.75 to $7.00 No. 1, $6.40 to $6.65; No. 2, $6.05 to $6.40; No. 3, $5.80 to $6.05, all f.o.b. Montreal.

DRY WHITE ZINC—V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY — A heavy demand is shown. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—The following quotations are firm: Genuine red lead in casks, $6.00; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

SHELLAC—Our prices are:—Shellac Bleached, in bars or ground, 46c per lb., f.o.b. Eastern Canadian points, Bone Dry, 57c per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 48c per lb. f.o.b. New York.

SHELLAC VARNISH—The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

BENZINE—We still quote 25 cents in barrels, and 30 cents in smaller quantities.

WINDOW GLASS—Our prices are: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, December 7, 1906

Paint sales are practically over until after the holiday season, as some paint manufacturers decline to book orders for Spring shipments, as the general outlook is that paint materials will be advanced on present prices.

Lead is still firm at $6.80 although some firms are not booking orders for a few days, awaiting the 1907 price list.

Turpentine remains as quoted last week with demand very large. Domestic lines such as aluminum, paint, floor wax, varnish, etc., are still selling briskly.

Quite a number of paint houses are taking stock, during the present lull in the paint business.

WHITE LEAD — Ex Toronto, pure white, $6.80; No. 1, $6.42½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $7.00.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6.50; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.25.

DRY WHITE ZINC— In casks, 7 1-2c.; in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 80c. per gallon.

CRUDE PETROLEUM — We quote Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

ADVERTISING MIXED PAINTS.

Something of a controversy has arisen of late as to whether it is desirable to enter into a co-operative plan of mixed paint advertising with a view to influencing the public, the individual buyer, says the Paint Oil and Drug Review. Several of the larger paint manufacturers are now carrying on a campaign of that kind in the more popular magazines. It is difficult to determine what results, if any, they are reaping from their big expenditure in advertising mixed paints in general, without any direct reference to their particular brands. But of course the mixed paint trade as a whole cannot but be benefitted by a resort to wholesale publicity at the expense of a few.

The question as to whether co-operative advertising of mixed paints is for the individual manufacturer to decide. No doubt it pays someone, if judiciously done, but whether it pays the one who foots the bills is a question that we will not attempt to answer. Advertising of some kind, however, is desirable from the mixed paint standpoint, and the more the merrier. No interest in the paint trade needs the benefit of direct advertising more than the mixed paint interest. It thrives on wise publicity. In competition with "lead and oil" it must be pushed. What the results of a magazine propaganda may be when applied direct to the exploitation of a special brand of mixed paints has been sufficiently demonstrated by the experience of manufacturers of floor paints, varnish stains, etc., who have appealed to the general public with liberal announcements and have been compelled to enlarge their factories time and again to take care of the resulting orders. This experience will be repeated in the future by other manufacturers of equal enterprise and liberality.

After all, the mixed paint business is largely "proprietary." Taken as a whole it labors heavily under the odium thrown upon it by a few manufacturers who pay so little attention to the quality of their goods that they are a discredit to the trade. But the persistent makers and advertisers of really good paints win out in the long run by building up a substantial reputation. It is the same in any business or profession—merit wins. To condemn all lawyers or doctors because of a few shysters or quacks would be no more reasonable than to declare all mixed paint inferior because of a few dope preparations. The paint manufacturer who makes the right kind of paint and represents it to the public in the right manner will build up a large and increasing business on the merits of his goods.

FIRST WALL PAPER IN AMERICA.

Again the question of the earliest period in which wall paper was manufactured in the United States has been revived. We have endeavored from time to time to give some definite information on this point and we would again state for the benefit of all interested in this detail of the trade, and inquiring correspondents in particular, that as near as can be ascertained the first wall paper made in this country was manufactured by one Charles Hargrave in Philadelphia. This was about 1745, and a little later Peter Fleeson began the manufacture of wall-paper and papier-mache moldings in the same city, at the corner of Chestnut and Fourth Streets. Previous to this time all the wall-paper used was brought from across the water, and, in fact, for a great many years afterwards most of the better class of wall-coverings of this description were imported.

As a matter of fact, wall-paper was used very little in the Colonies. Till about sixty years ago, those who could not afford to import papers painted their walls either in one color or stenciled in a simple pattern, or paneled in imitation of French papers. These attempts at decoration ranged, with the taste and skill of the artist, from fruit and floral designs and patterns copied from India prints and imported china, to more elaborate reproductions of landscapes and "waterscapes."

There is no question but what Philadelphia was the first city in America in which wall-paper was manufactured. It is impossible to get any trace as to what inspired the undertaking, but rumor has it that two Frenchmen who located in that city about that time were responsible for the beginning of the industry in this country. The details of the business of these beginnings of the manufacture of wall-paper are very vague, and there was comparatively little paper made here before the advent of wall-paper printing machines in 1843.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

The Torbrook iron mines, Halifax, N.S., have been sold for $250,000.

Ratepayers of Elmira, Ont., carried a by-law to expend $25,000 for waterworks.

The Gurney Tilden Co., of Hamilton, Ont., will erect a big warehouse at Edmonton.

Building permits issued in Winnipeg for the month of November total about $400,000.

A new fire station is to be built in Winnipeg for the protection of C.P.R. shop's district.

The Atikokan Iron Company's blast furnace plant at Port Arthur will be ready in about six weeks time.

The contract for the new fire hall on Adelaide St., Toronto, was awarded last week for the sum of $59,535.

Discoveries of tin deposits have been found on an island within 100 miles of Vancouver, by a German prospector.

The Canadian Ethinite Company of Niagara Falls, Ont., have commenced the construction of their factory building.

The Philip Carey Manufacturing Company of Cincinnatti have been granted the special privileges in Hamilton, and will establish a factory there.

An English Cordage Company are making arrangements for the erection of a large warehouse in Brandon, Man., to be used as a distributing centre in the West.

The Lethbridge coal strike is at last over, the company granting the requests of the men. Work was started immediately as there is a great scarcity of coal in the West.

Tenders are being asked for the various works required in the erection and completion of a grand stand also of a horticultural building on the Exhibition Grounds, Toronto.

W. McLea Walbank, Raymond S. Kelsch, H. B. Bayne, J. A. Milne, and J. W. Pilcher have been incorporated as the Canadian Electrical Exhibition Company with a capital stock of $20,000.

The Customs receipts of the Dominion for November amount to $4,574,105, represent an increase of $703,633. In the four months that have now elapsed of the current financial year the increase in Customs collections represents $2.960,079.

A disastrous fire occurred in Preston on Dec. 4, by which the car barns and rolling stock of the Galt, Preston & Hespeler and Preston and Berlin Electric Railways were totally destroyed, loss being estimated at about $75,000.

The Commercial Cement Company has been incorporated in Winnipeg with a capital of $150,000. The mills will be located on Boyne River where a good supply of suitable rock has been secured. Machinery has been ordered which will equip a mill with a capacity of 1,000 barrels per day.

A company is formed at Brockville for the purpose of manufacturing tools of all kinds. Also galvanizing and plating metals under the name of Canadian Billings & Spencer, with a share capital of $200,000. J. T. Gardner, J. H. Botsford and W. S. Buell of Brockville are directors of the company.

The General Metal Foundry and Machinery Company has been incorporated with a share capital of $199,000 with head office at Montreal. Directors of the company will be M. E. Lymburner, St. Agathe, Que., L. M. Lymburner, H. N. Lymburner, J. E. Mathews and J. B. Mathieu of Montreal and A. St. George of St. Paul, Que.

The W. J. Kemp Company have been incorporated with a share capital of $300,000, with head office at Stratford, for the purpose of manufacturing and dealing in agricultural and other implements and machinery. Provisional directors of the company are: W. J. Kemp, Stratford, N. J. Kemp and J. S. Lewis of Newark Valley, N.Y.

The Dominion Asbestos Company has been incorporated with a total capital stock of $500,000 for the purpose of developing mines, also to carry on business as electricians with head office at Montreal. Directors of the company will be H. H. Robertson, Boston, Mass., R. T. Hopper, F. H. Markey, W. W. Skinner and R. G. Grant, Montreal.

The Percival Plow and Stove Company have been incorporated with a share capital of $200,000 for the purpose of manufacturing agricultural implements, stoves, and furnaces, with head office at Merrickville, Ont. Provisional directors of the company are: John B. Waddell, T. F. McKimm of Smith's Falls, Eli Stickney, R. C. Percival of Merrickville and W. R. Morris, Peterborough.

The Premier Asbestos Company have been incorporated at Ottawa with a total capital stock of $50,000 for the purpose of prospecting for all sorts of minerals, particularly asbestos, also to carry on other operations pertaining to mining. Directors of the company will be E. Languedoi, W. J. Henderson, A. C. Calder, C. T. Jette and J. Jenkins, with head office at Montreal.

In connection with the big rubber deal lately put through it being understood that the Canadian Consolidated Rubber Company has a capital of $5,000,000 and a bond issue of $2,600,000. This is a holding company and will control the Canadian Rubber Company of Montreal, the Granby Rubber Company of Granby, Que., and the Maple Leaf Rubber Company of Port Dalhousie, Ont. The main objects in bringing about the present deal was to centralize the management, as well as to effect economies in manufacturing and in distribution of the finished products.

Building permits issued in Toronto up to Dec. 1, represent buildings aggregating in value $12,000,000. This does not include about half a million dollars' worth of Government, civic, and school work which has been going on during the year. The total for the entire year of 1905 was $10,300,000. For November, 1906, the figures were $1,100,000; for November, 1905, $788,771.

A new hospital will be erected in New Westminster, B.C., at the cost of $50,000.

Prospects are bright for the establishment at Peterborough of a factory for the manufacture of "Radiant" gas machines, to be used for lighting and cooking purposes. A Toronto man, has perfected a machine for manufacturing gas for lighting and cooking purposes, that has apparently many points of merit over the gas generators now in use. A strong company has been formed to place the new invention on the market, and there seems no reason why the new concern should not have a bright future.

The following appropriations for Public Buildings were announced by the Dominion Government last week: Alexandria—Public building, $3.000. Belleville—Armory, $30,000. Brantford—Improvements, $4,000. Chatham—Armory, $19,000; Dominion Postoffice, renewals, repairs, etc., $16,000. Galt—Alterations to Postoffice, $2,500. Guelph—Armory, $50,000. Hamilton—Drill hall, $100,000; postoffice, $10,000. Kingston—Military buildings, $18,000. London—Military buildings, $3,000; new stores buildings, $12,000; postoffice, $7,000. North Bay—Public buildings, $25,000. Oshawa—Public buildings, $2,000. Owen Sound—Public buildings, $3,000. Peterborough—Armory, $30,000. St. Catharines—Public building, $4,000. St. Mary's—Public buildings, $20,000. St. Thomas—Drill hall, $3,000. Sandwich—Public buildings, $1,000. Simcoe—Public buildings, $10,000. Stratford—Armory, $5,000. Toronto—Custom House, $15,000; Dominion buildings, $5,000; drill hall, $150,000; military buildings, $3,000; barracks, $50,-00; postoffice, $150,000; posta. station "F", $37,000. Wingham—$1,000. Woodstock—Armory, $1,000.

AN OLD, OLD STORY.

A farmer was telling his wife one day,
"I need a new plow but I don't want to pay
Such a big price as they ask me uptown,
Even if I can buy with all the cash down.
Of course, I am sure that the plow is all right,
But the profits they make are clean out o' sight,
For plows don't cost much—just iron and wood,
An' a cheap one'll do me, I believe it's as good."
He read "ads" in the papers and big magazines
Of cheap pianos and sewing machines,
And of one plow guaranteed for twenty-five years.
Said he to his wife, "Now, that plow appears
To be jest what I want 'nd I guess I'll try
To scrape up some money and send off and buy
And learn the agents that sell in this town
That in selling to me they must cut the price down."
He sent off his money. The plow came all right.
It was nickeled, painted and polished up bright,
With a big guarantee about eight inches square,
That guaranteed everything except wear and tear.
He felt quite elated. He had saved half the price,
And had a new plow that was uncommonly nice.
He hitched up his team and drove out on the farm,
And started to plow—and the day being warm,
Drove slowly around—then "clucked" to his team,
Which gave a quick start and—snap! went the beam.
The traces fell down and the team ran away,
There was plenty doin' the rest of that day.
He got things together along toward night,
And when he got through he sat down to write.
He explained all the trouble and suggested just how
With a few minor changes they could make a good plow.
They replied by a letter that said they thought
His "team was too strong," and he ought to have bought
"A much stronger plow" — the one they'd recommend
Was a different style; they'd be delighted to send
"For cash with the order," or, if he wished, "C.O.D."
But they "would have to decline to send a beam free."
Then he took that poor plow and chopped it up fine,
And swore by the Prophet that he would decline
To buy anything more that he couldn't see,
Just because it was cheap and had a big guarantee
And he said to his wife: "I aint got so much cash—
B'gosh! but I know more, and I won't be so rash.
And now when I buy a tool or machine
I won't look at a paper or a big magazine,
But go right to my dealer and I won't have to say,
I've been swindled by sharpers, as I have to-day."

It's easy to get satisfaction by going to law—if you are a lawyer.

Our idea of a hopeless liar is a person who says he never makes any mistakes.

Accidental Discharge Impossible—

This is why

True only if it is an

IVER JOHNSON

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.

Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

IVER JOHNSON'S ARMS AND CYCLE WORKS, FITCHBURG, MASS.

WINDOW ORNAMENTATION.

The following recipes by B. A. Champeau, will come in handy for the man who is looking for some new advertising material. Writing on the show windows is oftentimes more fetching than using the ordinary show cards, and it is a good deal cheaper, when you know how pencils for this purpose, with which you may write on the glass as easily as with an ordinary lead pencil on paper, are very easily made. Here are recipes for several colors, the wax and tallow to be melted and the coloring matter added:

Black.

Lampblack	10	parts
Wax	40	"
Tallow	10	"

White.

Krems white	40	parts
Wax	20	"
Tallow	10	"

Light Blue.

Light prussian blue	15	parts
Wax	20	"
Tallow	10	"

Dark Blue.

Prussian blue	15	parts
Wax	15	"
Tallow	10	"

Red.

Vinnabar	20	parts
Wax	20	"
Tallow	20	"

Yellow.

Chrome yellow	10	parts
Wax	20	"
Tallow	20	"

After preparing the above mixtures, allow them to dry and cool until they are of a consistence that may be pressed, by use of moulds, or even a bread pin and board, into convenient-sized strips or pencils.

Liquid Slating for Blackboards.

You can make your own blackboard, as follows: Into a suitable vessel pour 150 parts of rain water. When it boils add 10 parts of borax, and as soon as this has dissolved, add 40 parts of orange shellac. When this dissolves, pour in, while stirring, 25 parts of finely pulverized pumice stone. Let all boil together a few minutes, and then add 10 parts of lampblack, previously stirred up with enough of the boiling liquid to moisten it thoroughly but not wet it. Stir this long enough to insure its even distribution. Strain the liquid off through a fine sieve, and it is ready to use. It attaches itself to almost any surface, wood, metal, pasteboard, or even an ordinary wall. Apply with a soft flat brush. Two coats will answer, but three are better. This is a splendid substitute for slate, and, indeed, is superior to all but the very best slates. Use an ordinary crayon or slate pencil for writing on it.

CHARLES H. FOX

Vancouver, B.C.

MANUFACTURERS' AGENT

Selling to the Hardware Jobbers Only.

Correspondence Solicited.

ALEXANDER GIBB

Manufacturers' Agent and Metal Broker,
13 St. John Street, Montreal

Representing Canadian, British and American Manufacturers. Correspondence invited from firms wishing to be represented.

H. W. MITCHELL

WINNIPEG, MAN.

Correspondence is solicited from manufacturers wishing a representative in Winnipeg.

Travellers call regularly on the wholesale and retail trade in Western Canada.

Highest references and financial responsibility.

Scott, Bathgate & Co.

BROKERS AND COMMISSION MERCHANTS

Cor. Notre Dame St. East and Victoria St., WINNIPEG, Canada

Storage and Warehousing a Specialty.

First-class facilities in a thoroughly modern brick warehouse centrally located on the railway track.

Every Day

you have call for something new in Blacksmiths' and Carriage-making Supplies. Why not stock our goods? They include a rare variety of money-makers That's what other merchants are doing. Let us tell you the secret of our prices. Send for catalogue to-day.

Look at our list of Agencies. It will pay you to get acquainted.

AGENCIES:

Ontario Asphalt Block Co., Ltd., Walkerville, Ont.
The Standard Paint and Varnish Works, Limited, Windsor, Ont.
The Frank Miller Co., New York, N.Y.
Windsor Turned Goods Co., Ltd., Windsor, Ont.
The Conboy Carriage Co., Ltd., Toronto, Ont.
The Dowsley Spring & Axle Co., Chatham, Ont.
The Neverslip Manufacturing Co., New Brunswick, N.J
Michael Hunter & Son, Ltd., Sheffield, Eng.
English Standard Varnish Company.
Bonney Vise & Tool Works, Inc., Philadelphia, Pa.

ONE CENT

Is it worth one cent to know well not only the paints and brushes you are selling but also those your competitor is selling? A Post Card sent to our advertisers will bring you full information about their goods.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading 2c. a word first insertion; 1c. a word each subsequent insertion.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

Where replies come to our care to be forwarded, five cents must be added to cost to cover postage, etc.

BUSINESS CHANCES.

HARDWARE and Tinware business for sale in a thriving town in Western Ontario, stock about $9,000. Box 570, HARDWARE AND METAL, Toronto. [48]

HARDWARE BUSINESS WANTED.

WANTED to buy a good hardware business about $4,000 stock. Nothing but an A1 business considered. Box 10 HARDWARE AND METAL, Winnipeg. [51]

ARTICLES FOR SALE.

CANADIAN PATENT or Provincial rights for folding ironing board, simple in construction and cheap to manufacture, can be fastened to any stand, table or sewing machine. Made in three sizes, can be retailed for one dollar with good profit. Patented October 1906. For terms, etc., address Box 567, HARDWARE AND METAL. [48]

MISCELLANEOUS

WANTED—Quotations on ore sacks for immediate shipment, by hardware firm. Address Box 28, Cobalt. [49]

SITUATION WANTED.

WANTED situation, experienced hardware salesman, formerly with J. Henderson, late of Collingwood. J. Secor, Thornbury. [49]

SITUATIONS VACANT.

HARDWARE traveller wanted to travel in Nova Scotia for an Eastern Canada wholesale house. Must be a man with experience and one who can hustle. References will be required. Apply stating salary to Hardware Traveller, care of HARDWARE AND METAL, Montreal. [48]

WANTED—Experienced and practical stoveman to take charge of stove department for wholesale house doing an agency business. Box 572, HARDWARE AND METAL, Toronto. [49]

COMPETENT man familiar with electric fixture work. One with general business experience and original ideas in designing work. Answer with full particulars to box 571 HARDWARE AND METAL, Toronto. [48]

STOVES AND FURNACES.

AN experienced, competent and practical manager for manufacturing or sales department open to consider proposal. Box 569, HARDWARE AND METAL [49]

WANTED

by January 1st, 1907,

Glass Salesman

Must be experienced and reliable, state references and qualifications, also amount of salary required. Apply only by letter to

Consolidated Plate Glass Co., Limited

Toronto, Canada. (52)

Are you interested in any of the lines that are advertised?

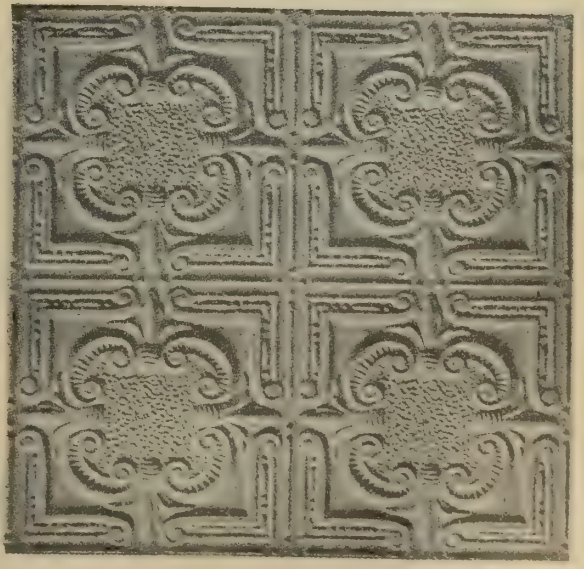
A Post Card will bring you price list and full information.

Don't forget to mention Hardware and Metal.

GALVANIZING

The kind of work we turn out has gained for us the reputation of doing the best galvanizing in the country.

Our facilities enable us to do it.



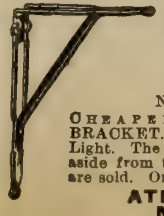
In the quickest possible time as cheaply as it can be done, as well as it can be done.

When you have any work of this kind, write us and we will gladly quote you prices.

The Montreal Rolling Mills Co.

BETTER USE THE BEST

Our "CLASSIK" ceilings cost no more than ordinary kinds, but they have the great advantage of beautiful and harmonious designs, ranging from comparatively plain patterns (such as shown in accompanying cut) to the most elaborate and decorative ornamentation.



Added to this, we have made the matter of PERFECT FITTING JOINTS a strong point. That's why our ceilings look so well when finished.

We ship promptly. Try us and see.

The GALT ART METAL CO., Limited, GALT, ONT.

Western Distributing Agents, **THE McCLARY MFG. CO.**, Winnipeg and Calgary.

Will Hold up a Shelf

That's what a shelf bracket is for.

For this purpose there can be NOTHING BETTER, NOTHING CHEAPER than the BRADLEY STEEL BRACKET. It is well Japanned, Strong and Light. The saving on freight is a good profit aside from the lower price at which the goods are sold. Order direct or through your jobbers.

ATLAS MFG. CO.,
New Haven, Conn.,

"THE EMLYN" SAW BENCH

Made in 6 sizes. Best value obtainable. Specially designed for export With or without "Emlyn" Patent Guard. Sole maker—

CHARLES D. PHILLIPS,

Cables—
"Machinery," Newport.

Emlyn Engineering Works
NEWPORT, MON., ENGLAND

THE STANDARD IDEAL SANITARY CO., LIMITED

Plumbing and Steamfitting

HEATING BOILER CAPACITY

Boiler capacity is a subject upon which a great deal has been written and hard and fast rules (empirical at times) to ascertain it have been given, but the question as he sees it, writes A. T. Hoyt, in Domestic Engineering. The rules generally laid down for boiler capacity are figured from several conditions, such as grate area, fire surface, floor area, chimney area, etc. From these combinations a boiler is said to have a certain power designated generally as horse-power, and in mechanical operations requiring power, a 40 h.p. boiler is supposed to operate at a given pressure of steam one 40 h.p. engine easily. This condition is easily and quite accurately reached from rules given.

But there is another condition that is supposed to be just as accurately reached from rules and figures, and that is the heating power or capacity when used in the heating of buildings or greenhouses. It is from the rules and conditions given above that the heating capacity of the boiler is rated from the horse-power. In the rating there are two types of boilers given, the horizontal return flue boiler and the fire-box, or locomotive type. The horizontal tubular is figured at about 15 square feet and the locomotive type at about 12 square feet of fire surface for one horse-power, and these figures are probably correct.

Method of Rating Heating Power.

The heating power or the heating capacity of the boiler is rated from the fire surface or the horse-power, each horse-power of 12 or 15 square feet, heating by low pressure steam or by hot water a certain number of square feet of radiation, which varies from 20 to 100 square feet for water, and from 100 to 200 for steam, and this amount of radiation is supposed to heat a certain amount of cubic feet of space, or a certain number of square feet of glass surface. With all these conditions fulfilled the boiler capacity, or what the boiler will really heat, is still subject to other conditions. In mechanics there are two conditions or propositions—"power and resistance." The boiler has a given power from its fire surface, grate surface, chimney area, etc., and that is the amount of steam in cubic feet it will generate and circulate in a given time, say per hour, or the amount of water in cubic feet, and also in temperature, that it will circulate in a given time, say per hour. This will be the power of the boiler or the boiler capacity, and it can be increased some by strong firing, but that increases expense above normal conditions.

Now as to the resistance, and that is to be found in the radiation and is subject to several conditions, viz., "friction" (though a very weak factor, is still resistance), "loss of heat" (taken up or given off in the radiation), "condensation" (loss of steam in the rediation) these three conditions exist in all heating plants and are sources of resistance, and the limit of the boiler power or boiler capacity is reached as soon as the resistance becomes as great as the power. As soon as the steam condenses its heating power is lost and the boiler power is the radiation limit of the steam-circulation, and in water-circulation, when the water in circulation reduces to about 100 degrees Fahr., the boiler power or boiler capacity has reached its limit the resistance in either case being as great or greater than the power of the boiler, and the boiler power can be increased only by driving the boiler, and this is quite expensive, as the results are generally less than the cost. There are several conditions existing that tend to weaken the boiler power, or boiler capacity, that are not generally known, and there are not very many heating plants, either water or steam, with all conditions favorable to the full development of the boiler power. These conditions are to be found in the installation, and a plant is frequently put in such a manner as to block the boiler at every point (like a set brake does a wagon.) The rules governing installation are largely theoretical and practically result in checking the boiler.

Fire Radiation and Resistance.

Pipe radiation has internal cubic area out of proportion to its external circumference in square feet, and this external surface is the heating power while the internal cubic area is the resistance. A 1-inch pipe has the maximum radiating power, and is the basis of most of the cast iron radiators, with the minimum resistance about one pound of water to one square foot of external surface. The cast iron radiation where used favors all makes of boilers, as its resistance is less to its square foot of heating surface than is the case in any other form of radiation, and that of itself makes house-heating the easiest class of heating. A 2-inch pipe has about twice the resistance of a 1-inch pipe in same square feet of radiation. A 3-inch pipe has about six times the resistance of 1-inch and a 4-inch pipe has about eight times the resistance of 1-inch pipe to the square foot of radiation. The capacity of a boiler or boiler power will depend, therefore, largely upon the character of radiation, the maximum power in using cast radiators or 1-inch piping and the minimum power in using 2-inch, 3-inch or 4-inch piping as radiation.

No boiler can heat as much radiation in 4-inch piping as it will heat in cast iron radiators, or in 1-inch piping, and especially is this true in greenhouse heating when the sun interferes with a steady internal heat. It is economy, therefore, to figure the load (radiation) that the boiler can best carry, its power in either water or steam, and this requires a practical heating knowledge, as theory or what others do is not practical heating.

Again, resistance in piping is subject to the pipe directional, having the maximum resistance in a down-hill directional, or, in other words, up-hill directional in piping or radiation gives the least resistance, and down-hill piping or down-hill radiation gives the greatest resistance to the power of the boiler.

Steam and Hot Air Heating.

In steam-heating the steam can be run either up or down-hill and the directional of the piping or the radiation has much to do with the easy flow of the steam through it. Steam has to be pushed or forced down hill in piping or radiation and also has a lot of water to push ahead of it, and this water also helps to condense the steam, and by the time it reaches the boiler again has become cold, and the boiler has to heat it again while in an up-hill piping or radiation the steam will naturally travel up the pipe from gravity and the condensation is lessened and returns under the steam also from gravity and enters the boiler hot. In hot-air furnace heating the pipes from the furnace to the registers are not given a down-hill directional, and in steam-heating it is done largely through ignorance, and in following in the path of what others do, as there is no good mechanical law for it.

In water-heating there is no up or down hill as to the direction of the water flow, any more than there would be in a big tank filled with water, and the terms up-hill or down-hill flow apply to the pipe directional. The idea that cold water will slide to the boiler in down-hill piping exists only in the imagination or in theory. In water heating the pipe directional or the radiation should be up hill from the boiler and should be run as much up hill as is possible, as this directional reduces resistance and water is like steam in

its flow when heated. It has to be forced in down-hill piping, but has a natural flow in up-hill piping; and although there is no up hill or down hill as far as the water in the radiation is concerned, there is decidedly an up hill and a down hill to the pipe directional, and this fact mitigates against the boiler when a hown-hill directional of installation is installed.

There are certain conditions under which the installation has to be of such a nature as to mitigate against the boiler, especially in greenhouse heating; conditions where a boiler in a pit would be dangerous or an impossibility; and in steam-heating this condition would require trapping the condensation back into the boiler. This can be done, but only at extra expense and by curtailing the effectiveness of the boiler. Water-heating can be done under the same conditions (high-boiler), but with same results—expense and loss of boiler power. There is still another condition affecting boiler capacity or power, especially in water-heating, but it comes in under boiler construction and may be treated in another article.

AUTOMATIC DEVICE FOR TURNING OFF THE GAS.

While the public has been pretty well educated to the dangers of "blowing out the gas," accidents from this cause are still of not infrequent occurrence. Now, however, it is seldom that the gas is deliberately blown out, but the flame is often extinguished accidentally by a strong draft, or the gas may be temporarily cut off for the purpose of repairing the mains, and then turned on again without due warning to sleeping inmates. In order to obviate such dangers, Iver C. Peterson, Brooklyn, N.Y., has invented a controlling device for gas burners, which operates to shut off the flow of gas when the gas flame is extinguished. The device comprises a standard secured to the gas bracket, and supporting a bell-shaped thermostat directly over the burner. The standard also carries a spring arm, to which a bell-crank lever is pivoted. One arm of the lever is very short, and is connected by a hooked wire to the lower edge of the thermostat. The other arm is very long, and extends downward to the gas bracket. In addition to the usual valve, the fixture is provided with an auxiliary valve of the poppet type. The stem of this valve rests on a hinged plate, and the latter carries an arm which engages the longer arm of the bell-crank lever. Normally, the plate is tilted downward, permitting the valve to remain closed. When lighting the gas, the main valve is first opened, and then the hinged plate is raised to open the auxiliary valve. The plate is held up for a moment or two, or until the thermostat is expanded by the heat sufficiently to draw down the shorter bell-crank arm and swing back the longer arm, thereby holding the plate in its upper position. Now, should the gas flame be extinguished, the thermostat would contract, permittibg the bell-crank lever to return to its normal position and allowing the plate to drop, whereupon the poppet valve would close, cutting off the flow of gas.

AN EMERGENCY FLANGE REPAIR.

We were refitting an old plant with a new steam line from boilers to engines and the work was progressing nicely, when we found a flange that was cracked and had to break it off. This was rather unfortunate, as we were trying to get the main header in position to cut in, so the plant could start up on time the next morning. As it was on Sunday everything in town was closed up, and as there were no machine tools at the plant large enough to serve, should we need them, we seemed to be in the middle of a pretty bad fix, writes L. L. Arnold in The Practical Engineer.

In searching over our list we found we had one 16-inch flange to spare, but when we tried it on the pipe it was found to be too small and would not screw on more than two threads. It was getting along in the afternoon and time was becoming more and more limited, when at last we decided to put it on hot. We were afraid it would crack, but it was the only chance. We had been working on the flange for some time and had coaxed it to screw on three threads fairly easy, so locating the bolt-holes in their proper position, we marked the flange and pipe so we could have a guide when needed for placing the flange on the pipe.

The piece of pipe was located in an inclined position, with the thread end at a convenient height for working, and held from turning by two pairs of chain tongs. A piece of 3-4-inch pipe was then capped and drilled with 1-8-inch perforations on the outside and just small enough to slip easily inside of the pipe. An ell was screwed on the end of this pipe and a 3-4-inch run made from 1-inch inside the top end of the pipe to a hose connection at the bottom end. An old piece of thin sheet iron found in the plant scrap pile was used to make a disc that just fitted the inside of the pipe at the top end. This was to prevent the water from spattering out on the hot flange.

A portable forge was used to heat the flange to an even, dull red all over, and when this heat was reached the water was turned on at the hose connection to keep the pipe cool. The flange was handled with iron rods through the bolt holes and was screwed back to its proper position without trouble. Care was taken in cooling not to hurry matters too much, and the job turned out all right.

LIGHT WEIGHT BOILERS A MISTAKE.

Many of the heating boilers now on the market and just appearing, are not heavy enough, writes a correspondent in the Metal Worker, who spent many years as a dealer and salesman of heating appliances and as manufacturer of cast iron boilers, but is now out of the business and can, therefore, speak from an unbiased standpoint.

It has not been many years since heating boiler castings were made very heavy; in fact, much heavier than was really necessary for strength. The extra metal was put in for various reasons. Perhaps the greatest of these was that with the old methods of molding and core making there was too much loss in casting thin sections or plates, but with improved machinery, accurately fitted flasks, correctly made cores, properly vented, carefully placed and anchored, the losses in casting are reduced to a minimum, even though the castings be entirely too thin for practical service. From the number of egg shell heating boilers now on the market and those for which the patterns are under way or finished it would seem to the writer that a large corps of engineers must be working overtime planning to reduce the quantity of iron used in heating boiler construction, regardless of true requirements coupled with the necessary factor of safety.

The writer's object is to sound a note of warning to those boiler manufacturing companies who have already exceeded the limit or are contemplating it, that the day is coming when substantial quality and merit will place the egg shell boiler business "on the blink" with many purchasers, as it already has with others.

Four years ago the writer rented a house and found one of the egg shell boilers, with egg shell doors or rather pieces of doors. When ordering new doors he told the manufacturer that he wanted good, heavy doors and was willing to pay a good price for same, but after much parleying was told: "We have no patterns for heavy castings. Of course you understand that our boiler is built for competition."

Since his experience with this boiler he has examined a number of boilers of other makes of late design and find that some of them are even worse than it was, because in addition to extremely thin castings some of them show that they were designed by either careless or incompetent engineers.

As a general thing consumers are not posted in matters pertaining to boiler construction. Therefore the dealer, for his own future welfare as well as that of his customer, should take it upon himself to recommend only such boilers as are known to him to be safe beyond question and which have first-class trimmings, including doors that will not crack into pieces when closed.

J. H. Neelands, plumber, Barrie, was a visitor in Toronto during the week on Masonic business.

* * *

R. G. Sturgeon, Peterboro, one of the best posted plumbers in Eastern Ontario spent a few days in Toronto during the past week.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 7, 1906.

Trade in plumbing supplies is still buoyant this week. There is very little apperance of a let-up in orders, in spite of the season.

Iron pipe is just as scarce as ever. In fact, in some sizes, it is even more so. There has been no enhancement of prices on this account, but, in the meantime, quotations are being very firmly held at the same figures as last week.

RANGE BOILERS—A satisfactory trade is being done. Our prices now are: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—There has been no change in the price of pig lead, and pipe is also quoted at the old discount of 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c per hundred lbs extra; f.o.b. Hamilton, 10c per hundred lbs. extra.

IRON PIPE FITTINGS—Conditions are stationary We give the following prices: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent., 3½ inch to 2 inch, 55 per cent.

IRON PIPE—Supply men are still troubled about getting sufficient quantities of many sizes and the shortage seems likely to continue. Our prices are: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50: 1 1-4 inches $22.50; 1 1-2 inches, $27; 2 inches, $36.50, discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 70 per cent.; and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—We still quote as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Nothing new has transpired. We still quote: Bar solder, half-and-half, guaranteed, 25c; No. 2 wiping solder, 22c.

ENAMELWARE—We give the following prices: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65 special, $18.65; plate E11 and E21 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60. special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, December 7, 1906

Iron pipe is the feature of the market with its remarkable scarcity and the sharp advances being made on all sizes. This week we are quoting new prices on all sizes up to 2½ inches and this is to be followed at once by a 20 per cent. advance on the sizes from 2½ to 4 inches owing to the jump in the duty in the new tariff from 15 to 35 per cent. Hardly a foot of the most used sizes of black and galvanized pipe can be procured in Toronto, although occasional shipments are received by the different jobbers. Every line is scarce and plumbers are using second hand pipe or different sizes than those specified on many jobs in order to keep working and finish contracts.

The jump in enamelware and earthenware from 30 to 35 per cent. has not made any change as yet but American lines must advance in keeping with the duty and an announcement is expected daily that Canadian manufacturers are following the increase.

The stiff price of lead has prevented any change in lead pipe although the duty has been reduced from 35 to 30 per cent.

Business keeps up well, considering the season, heating goods, of course, having the largest run.

LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 6c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—Stocks are low with prices advancing. One-inch black pipe is now being quoted at $4.80 and one-inch galvanized at $6.43. Full list in current market quotations.

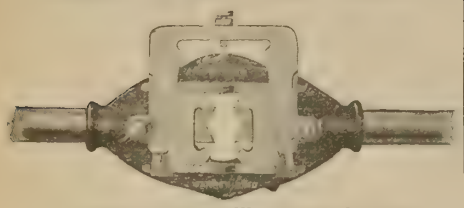
IRON PIPE FITTINGS — New lists are as follows: Cast iron elbows, tees, crosses, etc., 60 per cent.; cast iron plugs and bushings, 60 per cent.; flangle unions, 60 per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.

GALVANIZED IRON RANGE BOILERS—Boiler stands are scarce. We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.

RADIATORS—Prices are very stiff at: Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain firm as follows: Bar solder, half-and-half, guaranteed, 27c.; wiping, 23c.

ENAMELWARE—A general 5 per cent advance on American and Canadian lines is looked for owing to tariff changes. We quote as follows: predicted. We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25: plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.



A new metal called monel, which is expected to cause something of a revolution in the industrial world, is being produced at the works of the Canadian Copper Company at Sudbury, Ontario. It is cheaper than nickel, and it is claimed that it possesses all the qualities of the former. Monel is a compound of copper, nickel, iron and one or two other minerals which are found in the district, and its importance lies in the fact that it is much less costly than nickel, is less liable to rust, and will serve all the purposes for which nickel is at present utilized. The company has now got beyond the experimental stage in the production of this new metal. It costs very much less to produce it than nickel, as the costly refining process is dispensed with.

If you would become popular with people all you have to do is to let them impose on you.

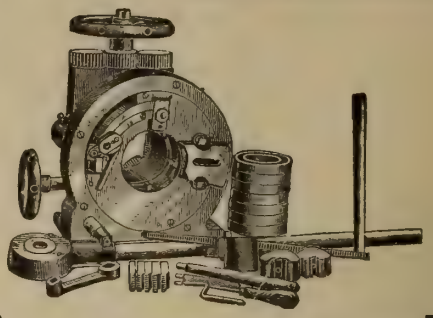
It used to be a popular fallacy that sense came with age and wisdom with experience.

It doesn't cost half as much to live as it does to make a favorable impression on the neighbors.

THE NEW
"SOLID-ADJUSTABLE" HAND STOCK AND DIES

At prices that will warrant your inquiries.

I. E. SHANTZ & CO.
BERLIN, - ONTARIO
Selling Agents for Canada



Time and Trouble Saved

by using Armstrong's Ratchet Attachment for threading pipes in cramped positions. Fits all Genuine Armstrong Stocks—is moderate in cost, compact, strong and thoroughly reliable—an invaluable tool for pipe-fitters. Write for catalog and prices.

THE ARMSTRONG MFG. CO.
292 Knowlton St.,
Bridgeport. Conn.

A Certain Sense of Satisfaction

goes with every MERRELL PORTABLE HAND MACHINE, PIPE THREADING and CUTTING MACHINE. We build them that way.

For doing ALL kinds of threading—under ALL conditions—labor trouble and faulty material included—where speed, durability and ease of control count for something, our word to you is to investigate the MERRELL.

Whether it be stationary or portable—hand or power driven—30 DAYS FREE TRIAL must prove conclusively that your choice should be the MERRELL.

This Portable Hand Machine has encased gears, MERRELL standard quick opening and closing die-head, and the latest improved Cutting-off Knife.

Let us tell you more about this machine—The Chasers, Vise and the large range of work covered.

Sole Agents for Canada Limited
MONTREAL, TORONTO, WINNIPEG, VANCOUVER

WHEN I SELL TO A DEALER

I sort of look after that dealer. I know he has entrusted his confidence to me, and I don't want him to regret he did so.

My looking after him means supplying the Heating Goods he asked for and in the time he mentioned.

I'LL DO THAT FOR YOU

ORLANDO VICKERY

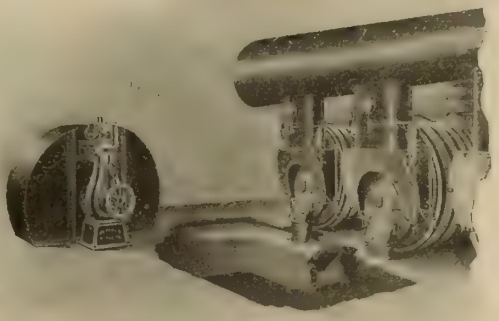
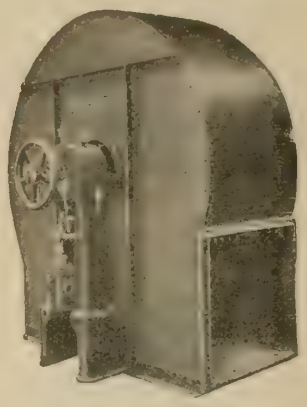
Mechanical Draft



An application of fans for securing the highest efficiency of fuel and the greatest steaming capacity of boilers—Fiske.

THERE is nothing new or irrational about Mechanical Draft—It dates back from the first use of bellows, and is best appreciated in the latest and largest power plants.



Buffalo Electric "B" Volume Exhauster

MECHANICAL DRAFT means a positive control over your boilers. No dependence on weather conditions. No fixed limit to boiler capacity. Quick response to demands for steam.

A typical Buffalo Induced Draft Plant.

Left Hand Bottom Horizontal Discharge Fan with Cylinder below shaft engine.

MECHANICAL DRAFT means no tall, expensive chimneys. Perfect combustion of low-grade fuels. Realizes, in connection with fuel economizers, the highest possible boiler efficiency.

MECHANICAL DRAFT has long ceased to be an experiment, but is well defined and accepted engineering practice. The best results are only possible when installations are designed and executed by specialists in this service. Bring your draft problems to us.

Mueller Water Pressure Regulators

High pressure at faucets is conducive to unnecessary or high water rents, as more water is delivered than is wanted. With this regulator the pressure is reduced at faucets, waste is diminished and water rents correspondingly lessened.

CURRENT MARKET QUOTATIONS.

Dec. 7, 1906.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

Facts YOUR Customers Know About "SOVEREIGN" HOT WATER BOILERS

The economic devices which appealed so strongly to **you practical men** are **now** universally recognized.

The "Sovereign" **Sifting Grate** has "caught on." Come to think of it **that** was inevitable. In shaking the fire of the ordinary boiler, or stirring it up to remove clinkers, a little good fire is wasted every day—not much, of course, but still a few pounds daily. Your customers figured this out long ago—by the week, month and year. They concluded that a good many dollars were going to the ash heap. They read "Sovereign" ads. They had its economic devices explained by enthusiastic users. Now the demand is for "**Sovereign**" **Hot Water Boilers** all the time. Can you meet that demand?

Did you ever think what our constant advertising means to you?

How Many Slow Debts Have You?

How many of these debts are due to the debtor or to your own carelessness? If you insist upon prompt collections you usually get them, but it is important that you properly approach the delinquent debtor when forcing a settlement.

THE MONTHLY ACCOUNT SYSTEM

has proved the most efficient means of approaching debtors. Make it known to your customers that you have adopted the new system—the monthly account system of rendering accounts—and you will be surprised at the returns. Short accounts make best friends. Do your part to foster the friendship and goodwill of your customers by letting them know monthly how they stand on your books. Leave your accounts to a convenient time for making them up, when they have piled up into a big amount, and you have distrust. They may not tell you so, but they wonder how it ever amounted up to such an amount.

We mean in the wonderful growth of the Disston plant---it's proof of the quality of the goods turned out by the firm.

Poor tools may sell for a while, but the 65 years that the Disston products have been on the market mean that the public have recognized their value, and, having once found a good thing, have sense enough to remember the name---DISSTON.

DISSTON'S FILES, although perhaps not so well known as Disston's Saws, are nevertheless the same quality as everything else turned out by the Disston Works---the best; and it's none too good for you, Mr. Dealer.

These files won't cost you any more than the poor sort. Why not get the best possible value for your money?

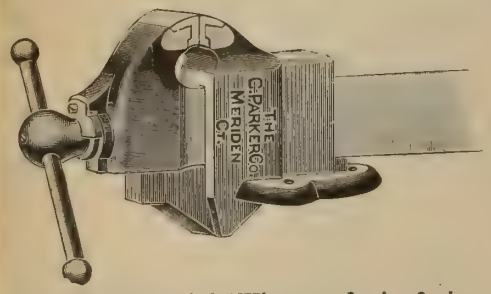
GRAHAM NAILS ARE THE BEST

Factory: Dufferin Street, Toronto, Ont.

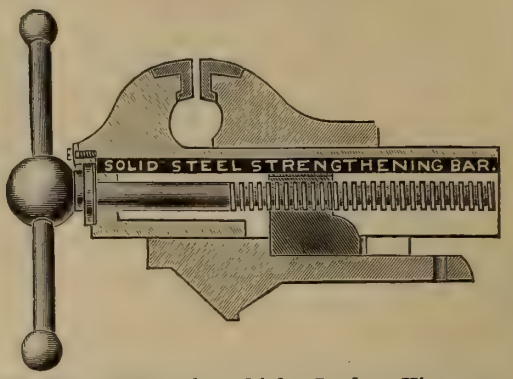
Our Prices are Right

We Ship promptly



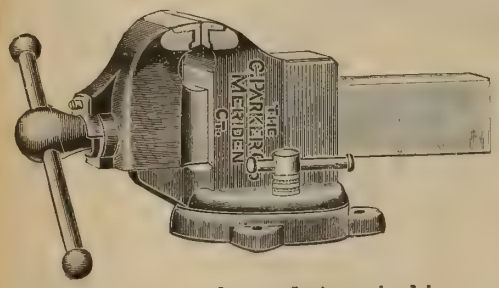
Semi-Steel has a strength several thousand pounds greater than cast iron.

That is why it is used in Parker Vises.

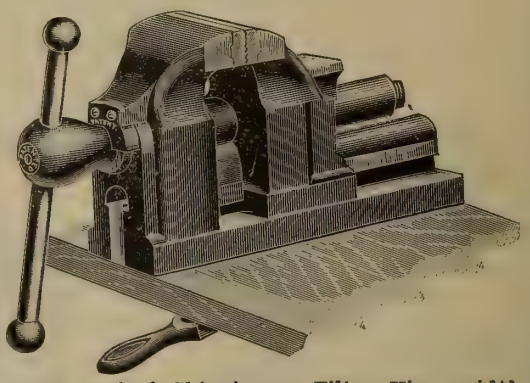


The Parker Vises are made stronger in the weak part of all vises than any other vises are made.

The sliding or moving jaw is the part most liable to break in any vise.



The Parker Company has provided against that danger by casting in the sliding jaw a solid steel bar strengthener. This improvement makes the jaw practically unbreakable. It is found only in Parker Vises.



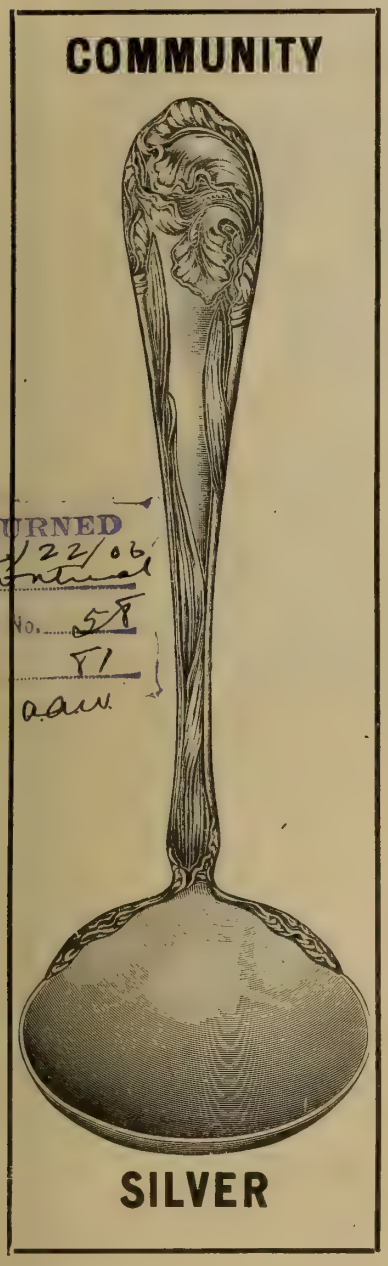
Stationary Machinist Vise, made in 6 sizes with jaws 3¼-in. to 6¼-in.

Showing manner in which Parker Vises are strengthened by a solid steel bar.

Same as above only made to swivel in any direction.

Heavy Swivel Chipping or Filing Vise, width of jaws 5 inches.

Parker Vises are made in all approved shapes and sizes for machinists, pipe fitters, wood workers, etc.



We keep a full line of Parker and other makes of vises.

Business Getters for Tinsmiths

Are there any defective chimneys in your locality?
Then it is your chance to get business.

—THE—

ZEPHYR Ventilator

saves the expense of building a high chimney.

It is so constructed as to guarantee a perfect draft, and, therefore, easy combustion.

By using the ZEPHYR, it is possible to burn soft coal with the best results.

The smoke is easily drawn off, enabling an even heat to be generated

THE ZEPHYR IS STRONGLY PUT UP AND WILL RESIST ANY STORM

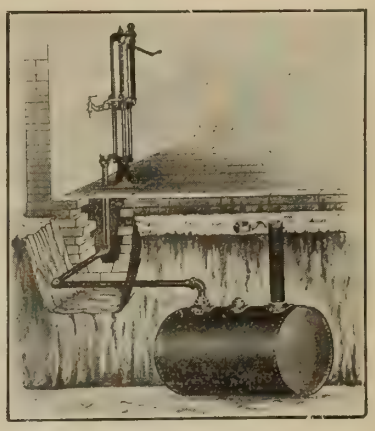
This is what others think of it :

Montreal, June, 1901.

MESSRS. J. W. HARRIS CO., LTD.
Dear Sirs,—
We have been using two [2] of your "AEOLIAN" Ventilators for the past three years and would say that they have given entire satisfaction and are certainly all that you claim for them.

Yours respectfully, WARDEN KING & SON.

We manufacture and guarantee:



The Harris Filter. The Zephyr Ventilator,
The Aeolian Ventilator. Expansion Conductor Pipe.

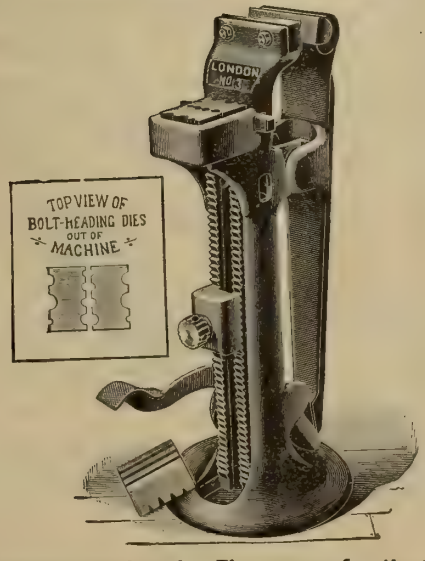
The J. W. HARRIS CO., Limited

Successors to LESSARD & HARRIS.

Contractors - - - - MONTREAL

Explosion Proof

The Bowser Long Distance Outfit makes explosions impossible, because the tank is built for gasolene and not for water, and is then buried safely underground, absolutely preventing leaks, evaporation and deterioration, and because the pump is fitted with an automatic check valve and lever shut-off which immediately cut off the flow of gasolene and prevents dripping.



Besides safety, the Bowser insures economy, facility and cleanliness. Delay is dangerous.

Write to-day for catalog V.

SIDINGS

There is nothing else so suitable as our steel sidings to dress up old buildings with and make them warm—They are also useful for a low priced building where attractive appearances are desired.

CEILINGS

When you sell and erect one of our classified designs you can always count on a well pleased customer—These designs do not get out of date same as patterns carrying out no idea. Give a customer a selection and he will invariably turn to our classified ceilings. They cannot get away from their richness.

The Metal Shingle & Siding Co.,

PRESTON, Ontario LIMITED

Four Reasons why INVICTUS FIBRE is the BEST FIBRE PAPER on the Market

1. Invictus Fibre is made from personally selected pulp wood cut on our own limits.
2. This special pulp wood is again rigidly culled on arrival at our mills.
3. The pulp from which Invictus Fibre is made is manufactured in our own pulp mill and transferred at once to the paper mill, avoiding all drawbacks of transportation.
4. Invictus Fibre will increase in strength and not grow hard and brittle as does fibre made from sulphite pulp. This is a quality of the peculiar and selected pulp from which Invictus Fibre is made.

A trial order will convince you that we are correct. See that each package bears the words "Invictus Fibre." Every ream contains 480 sheets

The "Good Cheer" Oak

NEW SERIES

Single and Double Heater

SECTIONAL VIEW.

Supplied with Feeder if Required

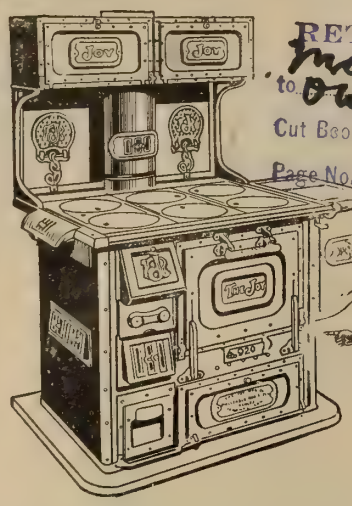
REAR VIEW.

Made in two sizes —either Single or Double Heater

No. 54, 13½ in. Firepot

No. 56, 15½ in. Firepot

This handsome Oak exactly fills the want between the low-priced heater and the more expensive base burner. The double-heater attachment we are able to include at a very small advance over price of a single-heater Oak, and is a feature which will be appreciated. Its construction as illustrated in the Sectional and Rear Views shows what a powerful heating adjunct it is.



Body of Stove is of heavy polished steel, handsomely nickel trimmed. Large feed door with good sized mica lights, making it a very cheerful stove, while screw dampers in both upper and lower doors make it easy to regulate the fire.

A shaking ring draw centre grate is provided, as also a good sized ash pan.

CAN SHIP TO-DAY

Whittaker Stove Works

Windsor, Ont.

I WILL TALK

to practically every Hardware merchant in Canada from the Atlantic to the Pacific. I cannot do it all in one day, but during the first twenty-four hours I will deliver your message to every Hardware merchant in Ontario. I travel all day Sunday and on Monday morning there will not be a village within the limits of Halifax in the East, and Brandon in the West, into which I will not have penetrated.

I cannot go any farther East, so I now devote all my energies to the West, and so many new towns are springing up here each week that I haven't as much time as I used to have to enjoy the scenery. But I like talking to hardwaremen, clerks, travellers and manufacturers, especially as they are always glad to see me and hear the news I have to tell them. Tuesday noon I am at Calgary, Wednesday noon at Kamloops, and by Thursday morning I reach Vancouver having been in all the mining towns and all through the fruit districts of British Columbia.

I have been eighteen years on the road and I have a pretty good connection. I never intrude when a man is busy, but just bide my time, because I know men pay far more attention to what you have to say if you catch them when they have a few moments to spare. So I often creep into their pocket when they are going home at night, and when supper is over Mr. Hardwareman usually finds me. He must be glad to see me because he listens to what I have to say for an hour or more.

THE WANT AD. MAN

I try to always tell the truth, and men put such confidence in what I say that I would feel very sorry to deceive them even inadvertently. Probably some other week I will tell you about the different classes of people I meet. In the meantime if you want a message delivered to HARDWAREMEN, PLUMBERS, CLERKS, MANUFACTURERS or TRAVELLERS—and want it delivered quickly—I'm your man.

Condensed advertisements in Hardware and Metal cost 2c. per word for first insertion, 1c. per word for subsequent insertions. Box number 5c. extra. Send money with advertisement. Write or phone our nearest office . . . . .

A TOWN'S INDUSTRIAL AWAKENING

After Many Years the Town of Welland, Ontario, Suddenly Realized its Future as a Manufacturing Metropolis

Opportunity knocks but once, it's said, but for a whole generation this supposedly elusive visitor has hovered about the threshold of Welland, awaiting but a nod to enter and revolutionize the town. Opportunity has come. Nine new industries have been added to the town within a year, a feat not heretofore paralleled for a town of its size in Canadian industrial history. From all appearances the onward tide must continue until the once standstill hamlet has become a centre of manufacturing industry unsurpassed on the Western peninsula of Ontario. This is strong language but is backed by stronger evidence. Great events are known to spring from incients of small import. The loss of an industry that might have been kept marked the turning point in Welland's career, and initiated a movement that

Map Showing Welland as Railway Centre

will create there a city in the immediate future. The seal of progress has been stamped upon the municipality and it cannot turn back. It is marked for greater strides that must inevitably follow in the train of what has already taken place. With advantages a dozenfold greater than many other Canadian towns, it possesses potentialities that make possible a second Pittsburg such that a prophesy in this direction has very material evidence of future fulfilment.

Far-Reaching Advantages.

In a word Welland has probably the cheapest transportation, cheapest natural gas, cheapest electric power and light and the most inexpensive land values to be found in Canada. A well laid out town with fine public buildings and pleasantly situated in the healthiest district in the world where a progressive and aggressive citizenship exists, the centre of a rich agricultural district, and a proximity to the largest fruit farms and nurseries in Canada are a further combination adding to the desirability of residence in this much favored centre.

Unique Transportation.

First and foremost of these advantages are its unique transportation facilities. The fact of the town's situation at the head of deep water navigation from the Great Lakes gives it a commanding position over other places, insuring beyond peradventure its bounding to the forefront in proportion as the signification of this becomes generally recognized. Railway facilities are superb. The town is located on every trunk railway line in Canada, of which there are five. This leaves no possible want from a shipper's point of view.

The Welland Canal the great shipping channel between the east and west passes directly through the centre of Welland. From Duluth to near Welland the waterways will accommodate vessels drawing twenty feet. From Welland to the Atlantic fourteen feet is the greatest draft. This makes the town the natural lightering point for heavy freight from the West, and consequently a place for manufacturers to locate To accomodate the deep draft vessels from the West, the Government are building a large turning basin which will make, eight miles inland, one of the finest harbors connected with the Great Lakes. Thus shippers get the lowest of lake rates inward and to and from the seaboard, which gives them the advantage of inland competition on all freights during the season of navigation.

Welland is in the Buffalo district for rail shipments and has the same freight rates as that city on all goods coming into Canada from the United States.

The Grand Trunk, the Toronto Hamilton & Buffalo, the Michigan Central, C.P.R., the Pere Marquette, and the Wabash all enter Welland. Thirty-six passenger, mail and express trains go and come every day, making it possible to get in or out of the town at almost any hour of the day or night. It follows with no need of comment that freight facilities are proportionately excellent.

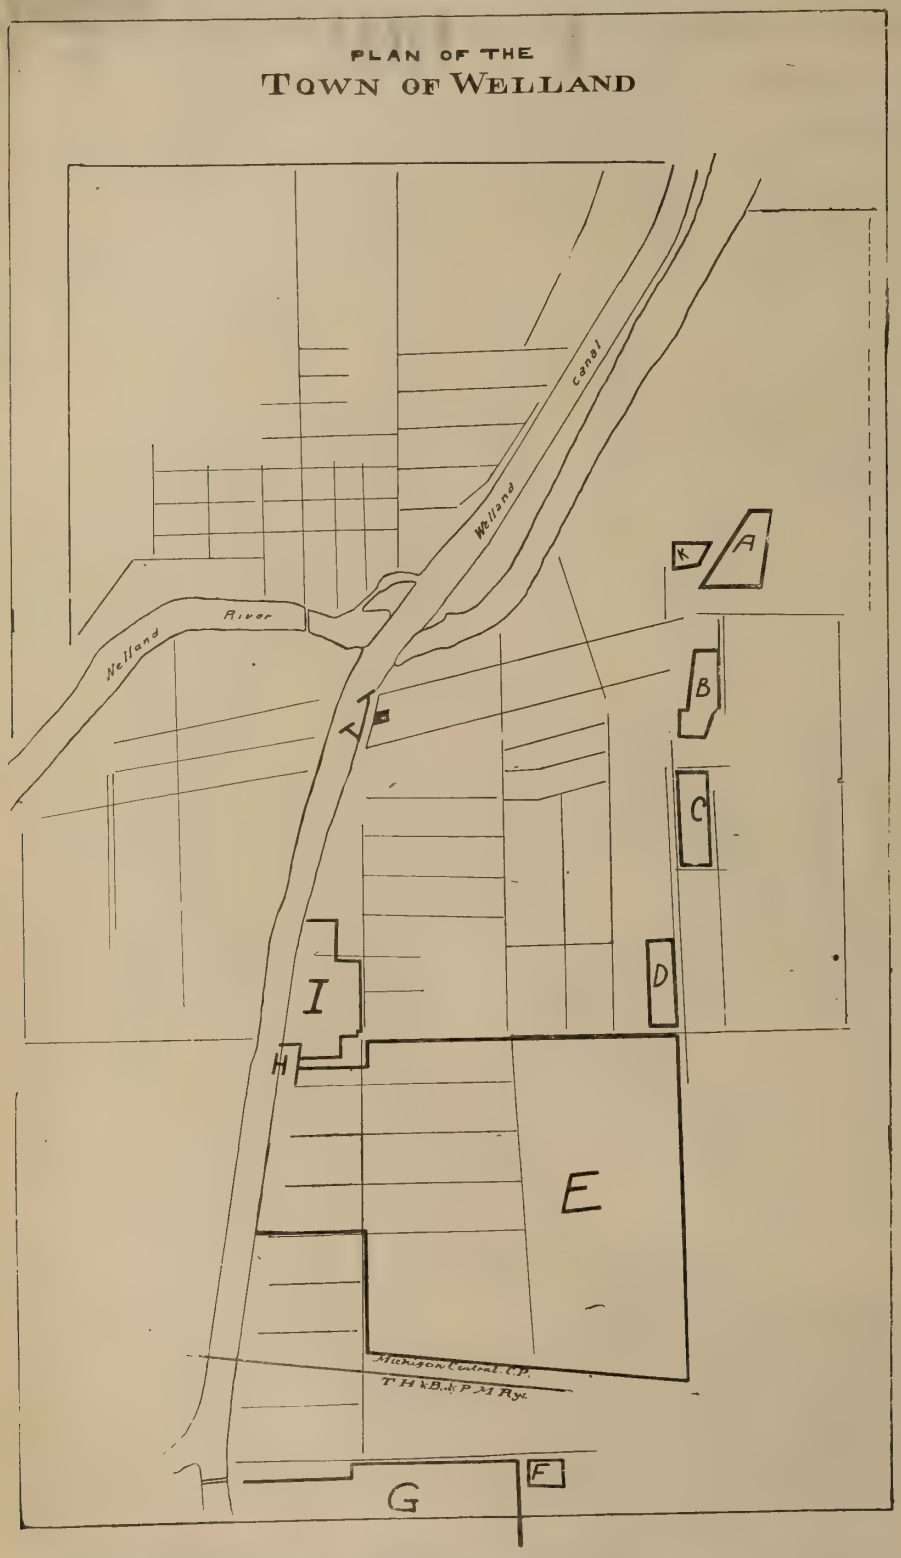
25c Gas and $15.00 Electric Power.

Here is found the cheapest light and power enjoyed by any municipality in Canada. To show Welland's position regarding the availability of electrical energy for light and power needs but a mention of the recent call for tenders to light the town, where five competing companies bid, the contract going to the lowest tenderer at a rate not known elsewhere in Canada, possibly in America. $40 an arc-light year, all night and every night. Niagara Falls is but twelve miles distant with its 5 power companies, and electrical power is available in Welland to-day for the startlingly low sum of $15 per h.p. per annum. Electric power is also being delivered from De Cew Falls, by the Cataract Power Company. Natural gas is abundant. Its abundance makes it cheap. In fact it is sold at so low a figure that people leave their lights burning in much the same manner as electric lights are left on in places where a flat rate is imposed. People heat and light their homes with natural gas. Manufacturers have it ready to run their plants. The cost to the consumer is but 25 cents a thousand cubic feet. This makes it possible to produce power by means of gas engines in the neighborhood of $8 a year. What other town can make such a boast as this?

Some Other Features.

Welland is the county town of the County of Welland. This county is one of the most aggressive in the forward movement for good roads and has arranged in conjunction with the Ontario Government to build 170 miles of permanent roads at a cost of $1,500 a mile or a total cost of $250,000. This system will radiate from Thorold, Niagara Falls, Bridgeburn, Fort Erie, Port Colborne, Wainfleet, Pelham to Welland and will include all centres of population in the county as well as connecting leading roads from adjoining counties.

A system of waterworks has been provided to supply a town five times that of the population of Welland in 1905. The water supply is taken from Lake Erie. The town is well sewered. Ten miles of concrete walk have been built.



A perplexity in the town at present is the house problem. The new industries already started will require the

influx of hundreds of mechanics and several hundred houses must be built almost immediately to supply the demand.

A Bit of History.

A decade ago the town of Welland contained a newspaper, the works of M. Beatty & Sons and Robertson Bros. The first industry to come to the town was the Frost Wire Fence Company, who got a grant amounting to $600 distributed over three years. In the grant was an old church, used as a factory, and part of the fuel. At this time it was hard work to interest the citizens of Welland in industrial advancement. The Frost Company prospered and grew and about five years ago built a new place on the G.T.R. near the station. The council of that day agreed to give the Frost Company exemption of all taxation except the school tax, but neglected putting the by-law to the people. In the course of about three years an antagonistic council was elected who refused to remit the taxes. The by-law was then put to the people and defeated, resulting in the Frost Wire Fence Company moving

This marked the turning point in the career of Welland's industrial development. It was a signal of awakening in the town. When the people realized they had lost the only plant they had been successful in obtaining for a number of years they suddenly became aware of the importance of attracting industries to their town which has so much to offer. Every man in town with any sense of citizenship at once put his shoulder to the wheel with wonderful results.

INDUSTRIAL DEVELOPMENT IN ONE YEAR;
(A). Barcalo Bed Works; (B). Supreme Heating Co. Works; (C). Canada Forge Co; (D). Robertson Machinery Co; (E). Plymouth Cordage Co; (F). Cheese Factory; (G). Ontario Iron and Steel Co; (H). Turning Basin; (I). M. Beatty and Sons; (J). Welland Realty Co.

Recent Industrial Progress.

The first industry to come to the town was the Canadian Barcalo Co., manufacturers of iron beds who employ about twenty men. They took the building of the Frost Wire Fence Company and the town was glad to give the terms previously refused the former company. Then the greatest triumph for the citizens of Welland culminated with the decision of the Plymouth Cordage Company of North Plymouth, Mass., to establish their Canadian factory there. After looking over the advantages of various towns the company refused a bonus of $75,000 cash from one municipality stating that with Welland's advantages that amount would be saved every year. The company have secured 780 acres of land. Buildings are all erected. The machinery has been nearly all installed, and operations will commence immediately. For the property, plant and equipment, houses, etc., the company have spent $1,000,000.

Next on the list was the reorganization of Robertson Bros. into the Robertson Machinery Company to manufacture hoisting engines and to carry on a general machinery business. The company was formed by Welland capital, C. H. Hanson, leaving the Frost Wire Fence Company at Hamilton to take up this work. At the present time the company has five acres of land on the Grand Trunk on which the firm intend building two buildings one 150 by 40 and the other 150 by 60 feet, comprising machine shop, foundry and blacksmith shop. This will increase the facilities about 400 per cent. The calls for orders for this company during the past year amounted to five times the output.

A by-law affecting the Ontario Steel & Iron Company which proposed establishing at Welland and M. Beatty & Son who were already established was put to the people at the same time, both of which passed with only 2 dissenting votes. The firm of M. Beatty & Son are building an enormous new plant of the finest structure possible and asked for a fixed assessment of $10,000 for twenty years. The Steel & Iron Company asked for $6,000 or a site when they had paid out $100,000 for a plant and $100,000 a year in wages. This firm is aggressively going ahead and will be in active operation within a very few months.

The next industrial enterprise to come before the attention of the people of Welland was the Iroquois Motor Com-

pany and a by-law was passed granting them their request of a site of three acres of land and a fixed assessment of $6,000. The foundation of their building has already been built.

History was being rapidly made. Shortly after this another double by-law went before the people, and passed as former ones had, which affected the Supreme Heating Company and the Canada Forge Company. These two by-laws asked for land aggregating $3,300 and water extensions amounting to $2,000. The assessment was fixed at $2,000 each for ten years. The Canada Forge Company is an aggressive organization with Thomas J. Dillon as president and general manager. Their works are now completed and ready for installation of machinery, making a record in building construction. The Supreme Heating Company which will manufacture stoves, is an American concern, the Canadian branch being formed in this country and Canadian capital fostering it.

This in brief shows the wonderful advance that has come to Welland within the past year. It demonstrates more strongly than anything else that Welland must have extraordinary natural advantages to attract so many industries in such a short space of time and at practically no financial outlay. The future of the town of Welland is bright indeed. Enough has been done to demonstrate how much more is possible. The momentum already acquired must carry the town forward industrially and must see it, in less than two years a busy manufacturing city throbbing and pulsating with industrial activity.

The Welland Construction Co.

With such a large amount of building under way in the town of Welland, it is important that a construction company should be established. Only a few months ago the Welland Construction Co. was organized, and already are engaged on a number of the most important building contracts in the town. At present the company are at work on the construction of the iron and steel plant, which is to be in operation about the first of May. They have established a record in building construction in the completion of the Canada Forge Co.'s plant, on Nov. 17, the works being under construction 26 days. One of the greatest secrets of the success of this company is the fact that they have at their disposal an unlimited amount of labor. Coupled with this, is the embodiment of the latest methods in building construction with a practical experience that brings results. The agreement of the Iron & Steel Co. with the town, calls for forty houses before the plant is operating. These likewise will be erected by the Welland Construction Co., who have taken hold of the building up of the town in an admirable manner. Work already done by this company has received high recommendation from various sources, and the town of Welland is glad to have in its midst a company capable of handling the problem of construction, that must confront the municipality in the near future.

Green's foundry of Peterboro will be enlarged doubling the capacity of the works, which makes a specialty of saw and shingle mill machinery.

PUBLIC SPIRITED HARDWARE MERCHANTS

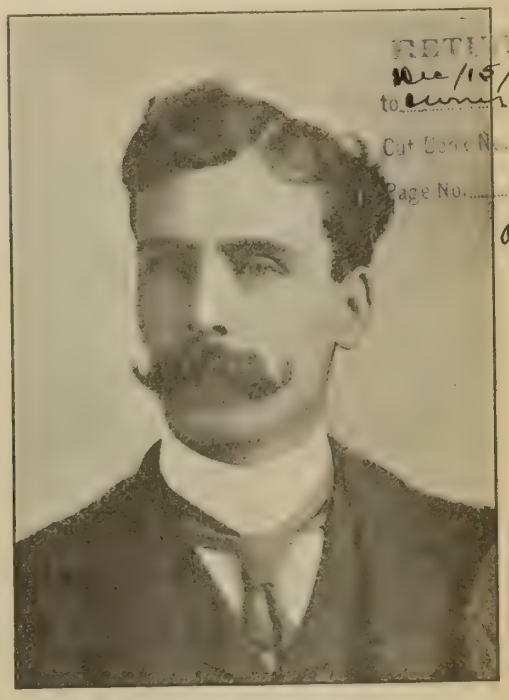
NO. 4

In Rapid City, Manitoba, they have a way of working rapidly, thinking rapidly, and acting rapidly, that shows the town name to be no misnomer, and the man who would gain and secure the confidence of his fellow townsmen must of necessity be a hustler. The Mayor of Rapid City is a hustler, and a first-class business man, as his record in his private and municipal business affairs abundantly approves.

As men count time in the West, Mr. Butchart, although still a young man in the prime of his vigor, is an old timer. Born in Owen Sound, Ontario, in 1870, he moved West when a boy of 12, and started to work in a general store in Rapid City. In 1895 he put aside his clerks apron and became station agent in Rapid City for the C.P.R., a position which he held until March, 1903. But the retail business still had strong fascinations for him, and when he resigned his position with the C.P.R., it was to open a hardware business as senior partner in the firm of Butchart, Adkin & Haslen, now Butchart Bros. & Haslen.

Elected Alderman for Centre Ward in 1903, Mr. Butchart was at once singled out for his shrewdness and exceptional business ability in the management of the municipal affairs. His advance was rapid, and after a successful term in 1905, as Chairman of the Finance Committee, he was elected Mayor in 1906.

In the last year Mr. Butchart has probably accomplished more than has ever been accomplished in the same length of time in the history of the town. Extensive improvements have been made and at the same time, the tax rate has been reduced from 22 to 18 mills.



Coming into office the first of the year, Mr. Butchart and his Council were confronted with prevailing discontent due to the high tax rate, and also with the pressing necessity for extensive public improvements. They grappled with the situation like business men, and general satisfaction is expressed in Rapid City, with the results obtained. Granolithic side-walks have been laid in the busiest streets of the town, and a site has been purchased for a public park. To meet this heavy capital expenditure, debentures were issued, and sold to the Confederation Life Assurance Company, at the satisfactory price of 102 1-5. At the time of writing, it is uncertain whether or not Rapid City is to have a contest for the Mayorality this year, but the indications are that the people have good reason to be satisfied with the administration of a business man.

A FRIENDLY CALL.

G. J. B. Ramsden, Ontario sales representative for J. H. Still Company, handle manufacturers, St. Thomas, was a caller at the Toronto office of Hardware & Metal on Monday. Mr. Ramsden is a pushing young man, who has made a success on the road, and is getting accustomed to orders for 10,000 dozen handles from manufacturers, or a car load of axe-handles for New Ontario jobbers. Mr. Ramsden was formerly in the Caverhill, Learmont & Company's warehouse at Montreal, and his father is the well-known Eastern Ontario representative of that firm.

CANADA PAINT SALESMEN MEET.

The Ontario salesmen of the Canada Paint Co., met in Toronto, on Tuesday, December 11th., and held a conference with Robt. Munro, Montreal, president of the company. An interesting discus-

T. J. BUTCHART,
Mayor, Rapid City, Man.

sion taking place on the company's steady growth and method of salesmanship. The new lines to be manufactured and the important price changes made necessary by the continued advance in the cost of raw material, were also gone into. The meeting resulting in considerable advantage to each traveler present.

A banquet was tendered the salesmen at the Queen's Hotel, on Tuesday evening, at which the following were present in addition to the host: Messrs. H. Clucas and A. Hellma, Toronto; H. H. Ellis, Brantford; R. Bremner, London; Sam. L. Lewis, Smith Falls; Wm. J. Good, R. Sirman, W. H. Allison and James Ayres, Toronto.

The Canada Paint Co. closed their business year on Nov. 30th, and a most satisfactory report of the year's business was made by Mr. Munro, the sales during the past twelve months being far in excess of those of any previous year.

WINDOW AND INTERIOR DISPLAYS

SILVESTRE'S MECHANICAL WINDOW.

One of the best and most original applications of mechanical devices to window display which have yet come to our notice is that of H. Silvestre & Fils, 1111 St. Lawrence St, Montreal. As will be seen from the accompanying cut, a more appropriate contrivance could scarcely be conceived. It represents a ferry-boat in the form of a skate, and is 6 feet 6 inches long. The paddle wheels are fitted with sled skates and the walking beam, which is supported by small hockey sticks, is a twelve inch hockey skate. The box which covers the paddle wheel, is also composed of small hockey sticks, while the smoke stack is a pile of pucks.

This model boat keeps up a perpetual motion with the paddle wheel going around and the walking beam moving up and down just like the conventional side wheeler. The power is supplied by a water motor in the basement. Needless to say, there is always a crowd in front of Sylvestre's window.

Original Mechanical Window Display.

COLORING ELECTRIC LIGHT BULBS.

First mix the white of one egg, previously beaten to a frosting, and one pint of soft water. Strain through a very fine sieve, and make sure that no bubbles remain on the surface of the liquid. The globe should be carefully cleaned and polished, and then dipped into the mixture and hung up on a string to dry. After about half an hour they should be dipped the second time, to insure a perfect coating. When perfectly dry they are ready to be colored. For this, dissolve ten to thirty grains, according to the density of color desired, of any powdered dye in four ounces of collodion. Dip the globes in this and hang up to dry. If not dark enough, after about six hours, when they are dry, dip again. This coating will never crack or peel off. The best container for mixing the fluid is a baking powder or similar can, just a little larger around than the globe. This requires less of the mixture to make enough to cover the globe.

PREVENTING FROST ON SHOW WINDOWS.

During winter weather many shop keepers experience more or less difficulty in keeping their show windows clear of objectionable ice. No doubt all of the devices for keeping glass clear of ice, published from time to time in the journals, have received a fair test, with varying satisfaction. A writer in one of the foreign drug journals, apparently a druggist who has experienced the rigors of high latitudes, insists that none of the ordinary schemes are of much use, and that the only certain remedy for the opaque deposit of solid water is a double layer of glass with a sufficient air-space between. He states that applications of glycerine, alcohol and other solutions are of no avail in extreme weather, and that, in any case, they must be so frequently renewed that they become extremely troublesome. In northern portions of Russia, where zero weather is sufficiently common, experience has taught the owners of show windows that the only effective protection is a 3-inch air-space between two panes of glass. The outer sash is rendered as nearly tight as possible by calking the chinks and pasting strips of paper over the crevices. The glass is then carefully cleaned and dried on a clear, mild day, and a second sash, fitted with the same care to prevent all circulation of air, is inserted about three inches within the first. The double panes are said to obstruct the view very little. The physical cause of the deposit of moisture and ice upon windows is the difference in temperature between the surface of the glass and the air bearing a relatively high proportion of moisture, which comes in contact with it.

MAGNIFICENT WHOLESALE WAREHOUSE.

In a most central location on York street, directly opposite the Grand Trunk railway depot, at London, is located one of the finest buildings occupied by a Canadian hardware jobbing house. D. H. Howden & Co., who had the building erected for them last year are steadily winning a substantial trade for themselves in the western part of Ontario, as far east as Toronto and north and west to S. Ste. Marie and the Algoma district. The firm was established about five years ago, Mr. Howden having been with John Bowman & Co., of London, before entering the jobbing trade on his own account.

The building has a frontage of fifty feet by two hundred in depth, has four stories and basement, and is of modern fireproof construction, having floors which slope gradually from the centre to the wall, where a gutter is constructed to carry off water through self-opening vents at regular distances along the wall of the building. As a result of the scientific methods of construction the company have been granted the lowest insurance rate given on any building in London.

On the ground floor, in addition to a magnificent suite of business and private offices, there is a sample room beautifully finished in highly polished woods, the walls being hidden by sample cases of cutlery and silverware. Behind this is the shipping room, where the goods are assembled from the various departments by elevators and sent to their various destinations. In the basement, stocks of heavy goods are kept, an oil room at the rear being constructed of re-inforced concrete, and absolutely separated from the remainder of the building, so that danger of fire is reduced to a minimum. On the second floor there is another sample room for shelf goods, cutlery, etc., the arrangement of the samples and stock being most complete and convenient for handling. The balance of the second, as well as all the third and fourth floors are used as warerooms, provision having been made for the steady expansion of the firm's business.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

THE PARCELS POST DANGER.

The advent of the Parcels Post C.O.D. system in Canada, foreshadowed by the speech in Parliament of Postmaster General Lemieux, brings before Canadian hardware merchants a question which has troubled the trade in the United States greatly in recent years.

The rapid rise of the departmental store and mail order interests in Canada and their securing control of the most widely circulated daily newspapers in Toronto, Montreal, Winnipeg and other cities, coupled with their present attempt to induce the country weeklies to accept their advertisements through the medium of a Montreal advertising agency indicates that there is a power behind the demand for the extension of the parcels post system and the farmer will be induced if possible to assist in urging the Government to amend the law.

The situation is a critical one and calls for united and prompt action. Individually each retailer should bring the matter before his member of Parliament at once. Collectively the Retail Hardware and Retail Merchants' Associations must work hand in hand to organize the retailers to fight the measure. The advent of this problem proves the necessity of organization and no retailer should remain outside the existing associations.

The Toronto and Montreal Boards of Trade and the Montreal Chambre de Commerce have been approached by those favoring the amendment of the parcels post law and the Montreal bodies have initiated a movement to protest to the Government against the present parcel post rate being enjoyed by mail order houses. It is pointed out that providing these concerns with such facilities destroys the business of many small merchants, and thus at the expense of the country.

EVILS OF PARCEL POST.

The following extract from the address delivered by E. M. Bush, President of the National Retail Hardware Association, before the recent convention of jobbers and manufacturers at Atlantic City will be of interest to the retail trade in Canada at the present time.

"A good deal of the work of our Association," said Mr. Bush, "has been directed with your own against parcel post legislation—very effectively too. We were the first business organization to raise a cry against this iniquitous measure. The first appearance before your two organizations of representatives of the National Retail Association was in 1903, when Mr. Bogardus, then our president, addressed you upon the subject. It is with satisfaction we note the growth of opposition to this measure outside our triple organization.

I have been amazed at what has seemed to me to be almost criminal shortsightedness, when some of our daily papers appear as advocates of this measure—surely with no consideration of the interests of proprietors and stockholders by their editorial writers—since they advocate a plan, which, a veritable boomerang, would sweep away pages of well-paying advertisements.

Mail order houses, which alone are interested in parcels post—once the measure is secured—will quickly abandon the daily papers, for those magazines whose widespread circulation makes them a better advertising medium.

Let me urge that such united action be taken by your two organizations before adjournment of this Convention, as shall being the dire evils of a parcel post, as this business organization sees them, to the attention, the thoughtful consideration and the better understanding of the proprietors and editors of the daily papers of this country. Retailers regard it of paramount importance that this matter be brought by you to the attention of the publishers of these daily papers, who will in the next few months mould public opinion for or against this measure.

The Indiana Federation of Labor, in convention at Indianapolis during the last week in September, went upon record as decidedly opposed to a parcels Post. A resolution to consolidate third and fourth class mail was defeated upon the ground that the resolution was practically endorsing a Parcels Post, and, the Convention declared, would especially favor mail order houses, which in their opinion were responsible for cheap production.

Also at a recent Convention of fourth-class postmasters held in Chicago, a resolution was passed wherein these gentlemen declared themselves squarely against Parcels Post legislation, for the reason that such legislation would be directly in the interest of mail order houses and against the local merchants, a postmaster stating that "it would drive most of our town merchants out of business." These incidents, as straws, show the way of the wind.

Manufacturers and Retailers Co-operate.

To learn how we have succeeded with the aid and leadership of the Joint Committee, against standard goods being sold by the catalogue houses, it is only necessary to compare these latest catalogues with former ones. And, for the organization which I represent, I desire to express both to manufacturer and jobber, our appreciation and gratitude for aid and assistance rendered, and the compliance of so many of you with our desires and requests in this matter.

A few manufacturers have expressed their purpose to continue their business relations with these mail order houses, and in some instances, judging from the prices at which their goods are sold do not care to protect the retailer's interests, exen to the extent of regulating the prices at which their goods are catalogued. We, however, continue to hope they will yet view this matter from our point.

Gentlemen, I would not fairly represent our retail organization did I not emphasize the catalogue house question, though only by brief mention. It is not a theory, but a condition that confronts us in many daily transactions and incidents, nor are words of mine needed for your better understanding of the matter, but herein lies a community of interest that should appeal to us all. We plead for that united and enthusiastic action in this matter, which shall foster and further develop our present system of merchandising, manufacturer to jobber, jobber to retailer, retailer to consumer, rather than the demoralizing methods of mail order houses, which with cut prices, gift-giving schemes, widespread money borrowing systems, that cannot but work disaster upon present day business methods, seek for their own aggrandizement, usurpation of manufacturer, elimination of jobber and distrust of local merchant. We surely have the brains and courage, when awake to the situation, to stem this tide of business demoralization.

Rural delivery, trolley lines and telephones are making country and village life more attractive, more desirable every day, a condition most happy for the we,fare and prosperity of our beloved country. Will this condition be furthered by any sytem of business which does away with the retailers of village and town, and puts in their places, mail order houses, hundreds of miles away?

A mail order house that controls forty million dollars capital, will certainly increase the number of its factories as rapidly as the quantity of goods it can market will justify. Some of them are also doing so large a borrowing or banking business with their distant patrons that bankers are becoming alarmed at the flow of money away from the towns and smaller cities into the hands of these firms. Such vast amounts of money must be invested, and does it not see mthat a syndicate of mail order houses located in the principal business centres, is much nearer realization to-day than when your attention was called to its possibility on a former occasion?

Several mail order houses of no small magnitude have failed in the last year, and we believe with the improve methods of the retailers in conducting business, with the prevention of parcels post legislation, the aid we render one another, the present business method of manufacturer to jobber, jobber to retailer, retailer to customer, will continue to prevail.

AMONGST THE SALESMEN

TRAVELERS TALK ON TACTICS.

"Let me tell you, boys, one thing that I have learned in my travels. That is, that it pays to hang on. And hang on to a merchant until he gives you an order. Never let go—never—is my motto."

The speaker was a member of a group of travelling salesmen who, on a Saturday night, had met about the stove of a hotel in Jamestown, near Chautauqua Lake. He was the youngest member of the group, and he looked very young.

There was silence for a moment. Then up spoke "the old man," as the boys on the road call him, a veteran salesman for a hardware factory in New Britain. He asked:

How long have you been on the road, my son?"

"Two years, and upwards."

"I might have guessed the two years, but never the upwards."

"That's a good while, ain't it?" the young man asked resentfully.

"It's long enough to get some of one's eye-teeth cut," the veteran answered. "But not near enough for his wisdom teeth."

The talk was general for a time, and then "the old man said: "Some of the things you boys have been putting forward as wisdom born of experience, reminds me of an incident that befell me quite a while ago, when I was as fresh as some of you about this stove. There was a merchant on my route whom I had never been able to get next to. I tried all sorts of ways, and hung on to him with the persistent tenacity that "Bub" here has so glowingly described and vouched for. I kept at him until I became as tired of him as he was of me. Finally, in a desperate endeavor to get rid of me, he said: 'If you will go away and let me alone this time, I will promise to give you an order the next time you come around.' 'Do you mean it?' I asked. 'On the very next time?' 'I do,' he said, and I packed up my grip and went away.

"That's where I should have stood pat, but in my haste to push a good thing, I saw a scheme better than that. I worked a couple of towns out beyond him, on the Erie line, and then doubled on my tracks, and in three days I was back again at his store. I marched in as bold as brass, and said: 'Here I am. Next time around. Now come up to time and load me down."

"He didn't fall on my neck. In fact, he looked as though I had handed him a lemon. 'Is this your next trip?' he asked. 'It is,' I answered breezily. 'You know a promise is a promise, and here I am!' 'Oh, I won't go back on my word,' he answered, and I began to unpack my grip.

"He took a full hour going over the samples. Finally he said: 'Really, I don't need anything, but as you seem bound to hold me to my promise, I don't see how I can back down.' 'You can't' I answered, and out came my order book. And this is what he gave me and all he gave me: One quarter dozen mouse traps and one-sixth dozen curry combs!

"And I visited that town for a half dozen years, and never sold him another thing!"

KEEP THE STORE NEAT.

One great fault with many retail stores, is that they are pretty apt to become littered with goods which have been shown to customers but not sold. After an extremely busy quarter of an hour with a shopper who is making an especially and difficult selection, the counter is apt to be piled so high with goods that it is impossible to tell what there is on hand and where different stock belongs.

Not only this, it frequently means the loss of many sales during the day, and the one who first began it in the morning is apt to be a sufferer later in the day through similar acts on the part of other clerks. The firm is as much to blame as the clerks because they do not insist on closer and cleaner work in taking care of stocks, yet the latter are the ones who are able to correct things for the good of their sales sheet, and the article which a customer calls for. In the store where every clerk has the privilege of going to every stock to sell goods, it is almost impossible for every one to keep sufficiently close watch of the goods to know what is sold and what remains in stock. There is only one result when something not in its usual place is called for—if it is not in sight on the counter a sale is lost, and a customer more or less disappointed.

Such a state of affairs easily occurs during the heavy holiday trade. Goods cannot help but be tumbled, but a little reasonable care and foresight will not only save the damages but will also help wonderfully toward making the next sale for the clerk who follows after. It is not difficult to learn to do two things at once, especially when one of the things is with the hands, and another is with the brain.

There is not a manager of a department store in the country who would allow the counters to be muddled in the way they are in the greater numbers of general stores; and the clerks in a big department know that such mussing cannot be done. They take pride in keeping their stocks clean and the counters in good shape. The clerk who goes from the general store to the department store where he will be held behind one counter or in one department will find that his stock must be looked after all the time, and when he does he will find how much easier it is to make sales. Let the clerks have a mutual agreement in the store, whereby each one will be responsible for doing his best to keep goods in fairly good shape.

TREAT YOUR CLERKS WELL

If you have a corps of good clerks, go out of your way to make it pleasant and agreeable for them and they will go out of their way to increase your business. Do not let a good clerk go to a competitor if you can possibly afford to meet his views as to salary.

He is indeed a poor clerk and one whom you may part with without regret, who is so useless that he can not make a few solid friends among your customers.

There are clerks, clerks good, bad and indifferent. Clerks coming and clerks going back. If you have a clerk who has held your confidence, and who is apparently going back, get next to him and find out what's wrong. Perhaps he needs a lift and you may well afford to do a good man a good turn.

Some clerks have an idea that they hold your business securely in the hollow of their hand and that all they have to do to leave you high and dry, stranded, is to cast their lines elsewhere or to start in business for themselves.

Don't you believe it. No man is absorbingly essential to any business. Of course his going may be a loss, but men have dropped out of the harness by the wayside for untold thousands of years. The mighty business men of a century ago, even of a few decades ago, are no more. The world moves on just the same. The sun rises, whistles blow, and men buy, sell, make, lose, sleep, wake and die just as before. The beginner is always green but all adepts were at one time, beginners.

No man can steal your business from you unless you are sound asleep or an old grouchy moss back.

TRAVELERS' CONFERENCES.

Last year about this time, the travelers of the Canada Paint Company held a very instructive and enjoyable conference at the head office in Montreal, coming from all parts of the country to attend it. This fall, however, the company have been so pushed that they found it impossible to take their men off their respective territories, as each salesman has been very busily engaged.

But the benefits accruing from these meetings were so apparent, that the best possible arrangements were made to get the travelers together. The Eastern salesmen have all been in Montreal for a couple of days to refresh themselves with new prices and general information, and the Western travelers met this week in the Queen's Hotel, Toronto.

Business Management

By HOWARD R. WELLINGTON.

The Tenth in a Series of Articles on a Subject of Interest to Every Retailer.

During the period of time in which J. M. Russill has been conducting the business, we have ascertained that he has drawn out for living expenses $700, which should be kept in a separate account, and when the books are closed the total is transferred to the debit of "J. M. Russill capital account" (see Fig. 1).

Similarly the net profits for the period are transferred from the Trading Account, as shown before, to the credit of "J. M. Russill Capital Account," and the balance at the credit of this account now represents the net worth of the business.

It will be noticed that in the Trial Balance at the end of the period Merchandise Account appears as a credit, showing a balance of $350.00, while on the statement of Assets and Liabilities, which will be given in detail in next issue, Merchandise Account shows a debit balance of $4,500.00. In order to reconcile these two amounts it might be pointed out that the Trial Balance is taken before the closing entries effecting Profit and Loss Account are made, and Merchandise Account appears as follows :—

Fig. 1. J. M. Russill—Capital A/c

1906		Dr	Fol.	$	¢	1906		Cr	Fol.	$	¢
Jan	1	Liabilities—Journal	1	2350	00	Jan	1	Assets—Journal	1	7376	00
June	30	Withdrawals—from Personal A/c		700	00	June	30	Net Profits—from Trading A/c		2355	00
	30	Balance Down (Net Worth)		6681	00						
				9731	00					9731	00
						1906 June	30	Bal Down (Net Worth)	—	6681	00

FIG. 1.

On the Debit Side :—

1906.	
June 1. Md'se on hand.....	$2,650.00
June 30. Purchases to date.....	15,000.00
Balance Down	350.00
	$18,000.00

On the Credit Side :—

1906.	
June 30. Sales to date.....	$18,000.00
Balance Brought Down.....	$350.00

After the books are closed the only item brought down in the Merchandise Account is the amount of stock on hand at the end of the period, and this appears as the asset of $4,500.00 in the statement of Assets and Liabilities.

It might be here mentioned that, if J. M. Russill admits a partner into his business, at the present stage, it will be necessary to open a Capital Account for such partner in exactly the same way as shown in Fig. 1, and the net profits are then transferred from the Profit and Loss Account at the end of the period, dividing same in proportion to the amount invested by each partner in the business, or in accordance with the partnership agreement, as the case may be.

In case of partnerships where unequal amounts are invested, the arrangement is very often made, whereby each partner is allowed interest at a specified rate on the amoubt of capital invested, and again, each partner may be paid a salary out of the business for the position which he holds, in addition to his share of the profits for the period.

THE MATTER OF DISCOUNTS.

Have you ever given the matter of discounts your serious consideration? Discounts play an important part in aggregating net profits.

All large department and individual establishments have long since come to recognize in discounts a satisfactory profit. They are all the profits there are in many lines of trade. A merchant doing a business of $540,000 received in discounts $24,000 in one year. Suppose you did one-tenth of this business wouldn't you welcome the $2,400 discount? Wouldn't it make a desirable addition to your net profits.

There are many merchants who are constantly receiving new goods, and to these the discounts should be and are a very important item. If you fail to take the discounts, you are losing easy money. Go to the bank and borrow the cash. The discounts will more than make it up. It will pay you handsomely to pay interest on a loan, when you use the money to take advantage of the discounts.

When you can neither take the discounts or pay your bills you pay interest and this will make competition with the catalog retailers or the cash merchant impossible.

In this case, where do you get off?

The man who can use his money and make 5 to 10 per cent. on it through discount is getting the best results.

IMPENDING BLOW AT RETAIL TRADE.

The announcement made in Parliament a week ago, that the Postmaster-General is preparing an amendment to the Postal Law, providing for an extension of the Parcel Post System, making it also include the Collection on Delivery feature, indicates that there is work ahead for the Ontario Retail Hardware Association, and the Executive are already arranging to inaugurate an active campaign of education and action to head off the proposed capitulation of the Postal Department to the departmental store and mail order interests.

If this proposed extension of the parcel post system is allowed to go unchallenged by the retailers, there is no telling where the stopping point will be. The matter is not a question of party politics, but one in which retailers of every shade of opinion must work side by side and every organization of retail merchants must do its part in fighting the proposed legislation.

The first and most important thing to do is for every retail merchant to at once send a post card to the Member of Parliament representing his constituency, asking him for information regarding the proposed change in the law, and urging him to oppose the proposition when it is presented to Parliament. The sending of thousands of post cards to Ottawa by retail merchants in all parts of Canada will wake up the law makers, and probably prevent the descent of the blow for which the arm of the law is already preparing.

In the United States the retail trade has so far prevented the inauguration of the parcel post plan urged by the mail order houses. Thousands of letters and postals flooded the Congressmen a few months ago, when they were on the point of passing the legislation. The prompt action of the retailers delayed, if it did not kill, the measure. It will come up again at the present session of Congress, but Postmaster-General Cortelyon, has already expressed himself as not being an advocate of the measure. Let Canadian retailers be as active as United States merchants have been, and success will be theirs, as the mail order interests in Canada are not yet as strong as in the United States, although they own or control most of the leading daily newspapers throughout Canada.

On the Association page in this and succeeding issues articles will be published, informing the Canadian trade of the effect of the parcel post system on the retail trade, and the campaign conducted in the States against similar legislation.

MAYOR ASHDOWN.

In the election this week of Jas. H. Ashdown to the position of Mayor of Winnipeg by an overwhelming majority the electors of that city did honor to themselves and to one of the leading business men of the West. It is not often that the foremost business man in a city can be induced to accept civic office and under the circumstances Mr Ashdown deserved the honor of an election by acclamation. The opposition to his candidature was ill-advised and it did not command the sympathy of the best citizens of Winnipeg. The Western Capital is undertaking municipal enterprises which will involve the expenditure of several millions of dollars and it is indeed fortunate that in the expenditure of such large sums the city is to have the advantage of the constant supervision of one of the best financiers in Canada. The paper offers congratulations to Mayor Ashdown and the City of Winnipeg.

TOWNS INDUSTRIALLY INACTIVE.

Commenting on the disinterestedness of many municipalities in their industrial advancement, the current issue of Canadian Machinery and Manufacturing News, points out that many places that should be centres of industrial activity are standing still. In an editorial reference to this in the December issue, it says: "Since our last issue we have had an excellent opportunity of finding out how interested the various towns in the province were in their own growth. In the November issue, an editorial reference regarding a United States manufacturing firm, intending to come to this country to manufacture, was supplemented by a post card sent out to about fifty cities and towns, calling attention to the fact. Of these, at the time of going to press, thirty-seven showed no interest in the subject whatever. This being all the more surprising since the industry in question was not looking for a bonus. It was noticed of the thirteen who did reply, the quickest and most business-like responses were from places having a live Board of Trade. Before the issue had been many hours off the press, and before the card calling attention to the opportunity was sent out, the Secretary of the Board of Trade of one of the most progressive and enterprising towns in Canada, was in our office to get full information. The spirit displayed by the Board of Trade in this instance has been characteristic of its policy for years past. The result is that a manufacturing town has been built up, the result of the citizens' own efforts, that for stability and general beauty, is not surpassed anywhere in Canada."

It points out further that this town is a very great exception, and that on taking town after town, and municipality after municipality in Ontario, it is found that the men who should and could help to build up the place which holds their business interests, are either too engrossed in their own affairs, or else entirely indifferent. It states that an axiom regarding Canadian towns to-day is, "The growth of the place is found to be in direct proportion to the public spiritness of the men who mould public opinion," and, "apart from natural advantages, the reason and solution of a towns' industrial welfare, lies with the citizens themselves."

WESTERN CAR SHORTAGE.

It is related of a Southern Manitoba farmer that one year in the early nineties he had a magnificent crop of wheat which as it matured became the light of his eye and upon which he built many rosy colored financial hopes for the future. But one morning he rose early to find that a severe frost had almost completely ruined what had promised to be an exceptionally heavy and profitable

crop. It was enough to make the best of men angry, and as he strode over his quarter section surveying the deathblow to his cherished hopes his wrath was kindled not a little. Unable to restrain himself longer he burst out with "D—— the C.P.R."

Hostility in the West to the C.P.R. is an old story; it is only natural that when any one road has had for years a monopoly in a big country it should be fashionable, with or without reason, to abuse the management of that corporation. Thus it has been that whenever two or three western farmers met in the general store or in the country hotel abuse of the C.P.R. has been a topic of conversation not less staple than the weather. With the arrival of other roads they also are being included in the abuse which rightly or wrongly is sure to be leveled at the devoted heads of railway managers.

This fall the complaint has been as to the shortage of cars to move the western crop. This shortage has been very considerable, but has not been confined to any one railroad, to any one part of Canada or to any one part of the North American continent. The whole continent has suffered, all interests, commercial, industrial and agricultural, have suffered from inadequate transportation facilities and the Western Canadian farmer is not the only one who has reason to complain. In a period of unprecedented prosperity the simple fact of the matter is that the Canadian railways have not been able to secure the necessary equipment to keep pace with the growth of the country's requirements. Orders for more cars can't be filled, lumber, steel and other raw materials are not to be had in the quantities required and the shops, working now at full capacity, can not turn out the cars and locomotives for which the railway magnates are calling. The trouble is not confined to the West, and it can scarcely be said that the railway management are at fault. Their prosperity is bound up with the prosperity of Western Canada and it is in their interests to do everything possible to put money in free circulation by the speedy handling of the western crops.

THE DUTY ON PACKAGES.

One of the most annoying features of the new tariff, is the duty imposed on packages. The hardware trade would be especially affected by this duty, as many of the packages in which imported goods are carried, are quite costly, though not valuable for any other purpose. In fact, these packages are useless, once the goods are taken out, and they are generally broken up for firewood.

Moreover, a rather serious complication arose in connection with this duty, and it was feared by agents of British houses that its interpretation would work against them and in favor of the United States manufacturers. For it is well known that the latter make no charge for cases and packages. There was room for much dissatisfaction, whether the government decided to impose duty on the invoiced price, or whether it would be based on a valuation which would apply to United States packages as well.

Under the circumstances, the Montreal hardware jobbers and importers, considered it unfair that any such duty should be levied. A strong deputation was sent to Ottawa this week, to interview the minister in this connection. It was composed of Messrs. T. H. Newman, of Caverhill, Learmont & Co.; T. L. Paton, H. W. Dorken and G. J. Crowdy, of James Hutton & Co, who presented their case in such a manner that the Finance Minister listened attentively, and promised a careful consideration. On their return to Montreal, the gentlemen mentioned, expressed themselves as being very well satisfied with their reception, and while it is of course impossible to make any definite statement, they are of the opinion that their request will be not only carefully but favorably considered.

THE METAL SITUATION.

As mentioned in our metal market report, copper is this week the feature of the market. A lively demand is maintained, and is, in fact, so great, that many of the leading dealers are being compelled to refuse orders for spot delivery. It would appear that the market is breaking away from the influence of the producing interests, who have been trying to hold prices down. Our lists this week, show an increase of one cent per pound. Twenty-five cents is now the minimum quotation.

Ingot tin is another metal which is decidedly stronger in tone this week. Prices have not yet been advanced, but it is confidently expected that these will be raised during the coming week.

The pig iron situation is unchanged. The market continues steady and prices show unabated strength. An annoying feature of the situation to Montreal iron merchants, is that a considerable amount which had not as yet been removed from the wharves, has been overtaken by water, as the river has risen much more rapidly than usual.

As predicted in these columns a few weeks ago, prices on cold rolled shafting have been advanced. A discount of 30 per cent. is now being given off the standard list, as against 35 per cent. under the old conditions. This is partly accounted for by the new tariff coming into force. The change came into force on Wednesday of this week.

CANADA'S NATIONAL OCEAN PORT.

Montreal prides itself as being Canada's national port—the head of ocean-going navigation in summer time—but care must be taken if the pride goeth not before a fall.

The oft-repeated story of congestion of freight at Montreal after the close of navigation has been told again this year, the only difference being the added strength to the annual protests from sufferers. It would naturally be supposed that the railways would endeavor to mend matters, in view of past experience, but they prefer to act independent and—it is said—work in with an arrgngement to hold the business in check in order to keep the staffs employed for the balance of the year.

As has been said, the freight problem is this year, worse than ever before. Here's one instance A Western Ontario stove foundry placed an order for pig iron for fall delivery. The iron arrived in Montreal the first week in November—considerably before the close of navigation. The buyer was notified and promised immediate delivery but he is still waiting and the jobber cannot get anything satisfactory from the railway company. Yes, they will move the iron—when they get ready. In the meantime the stove foundry has closed down, the men are idle, and the buyer busy keeping the wires warm in an effort to get his iron. The jobber is also busy—spending half his time writing the customer referred to and others in similar positions and trying to put life into the masters of transportation.

Canning factories are idle, bridges unbuilt, foundries inoperative and both retail customers and manufacturers suffering as a result of this year's congestion, but unless the Railway Commission takes effective action the same old story will be told again next year. For the sake of civic pride it behooves Montreal citizens and public bodies to take the matter up themselves and prevent a recurrence of this year's freight blockade.

Barrie ratepayers voted last week on a by-law providing for a loan of $20,000 for twenty years to N. S. Dyment to aid in the re-establishment of the foundry recently destroyed by fire. Owing to lack of organization the vote was not polled and the by-law was short 47 votes. It will probably be submitted again in January.

HARDWARE TRADE GOSSIP

Ontario.

Mr. Thomson, hardware merchant of Inglewood, called on Toronto jobbers last week.

W. H. Hearst, of the Lake Superior Steel Corporation, Sault Ste. Marie, was in Toronto last week.

The Imperial Oil Works, of Sarnia, have voluntary increased the wages of their employees 10 per cent.

W. C. Staples, hardware merchant, Kirkfield, Ontario, called on the hardware jobbers of Toronto last week.

F. O. Lewis, president of Lewis Bros., wholesale hardware merchants, Montreal, was in Toronto last week on business.

E. A. Button, a Stouffville hardware merchant, was a visitor in Toronto last week, calling on the wholesale hardware trade.

Mr. Watt, of Watt & Squire, hardware merchants, Brantford, called on the wholesale hardware trade in Toronto last week.

The hardware store of J. B. Myers, Stratford, was slightly destroyed by fire on December 9, the loss estimated at about $2,000.

Messrs. Childs and Wilson, travelling representatives of Cluff Bros., Toronto, have left for several days shooting, in the vicinity of Bradford.

Mr. Dowswell, of the Dowswell Manufacturing Company, Hamilton, was a visitor in Toronto last week, calling on the wholesale hardware trade.

The Walkerville Hardware Company are erecting a new building at Walkerville, and intend going into the jobbing business at Walkerville. They have the Canadian agency for several U. S. firms.

Mr. Norton, manufacturer of the Norton System, Telephone Company, has just finished installing an eight phone system for Cluff Bros., in their new building.

The Peninsular Tool Specialty Co., Windsor, have secured a new location on Sandwich street, and the Lufkin Rule forCompany, Saginaw, Mich., have secured their former plant for their Canadian factory.

Worsell & Sons, Goderich, who bought out the Elliott hardware store in Bayfield, are carrying on the business in Mr. Tebbutt's store on Main Street, having removed from the Rouat store on Clangregor Square.

Winnipeg and Toronto may both have hardware merchants as Mayors in 1907 as Miles Vokes, of the Vokes Hardware Company, Toronto, may be a Mayoralty candidate to oppose Mayor Coatsworth. He is being urged by a number of his friends to go into the contest. He was a member of the Toronto Council a dozen years ago, and made a splendid municipal record.

B. S. Jackes, proprietor of the Model Hardware Company, 532 Yonge street, Toronto, was before the Police Magistrate this week for selling pistols to boys, the pistols being used for blank cartridges, but being capable of firing a 22-calibre bullet. Mr. Jackes claimed that the pistols were harmless, but declined to allow a test to be made with himself as a target. The case was dismissed on the dealer promising to discontinue the sale of the pistols.

E. A. Humphries, son of A. W. Humphries, Parkhill, Ontario, who has for the past six years been musical director at the Ontario Institute for the Blind at Brantford, will resign his position after February 1, next, and will take an active interest in the hardware business conducted by his father, under the name of A. W. Humphries & Son, which was recently enlarged by taking over the Magladery Bros. store. Mr. Humphries has made a great success of his work at the Institute for the Blind, and has taken several valuable musical degrees at Toronto institutions, and upwards of one hundred of his blind pupils have obtained musical certificates. The same application given to the work at Parkhill should ensure him even greater success as a hardware merchant.

Quebec.

A. P. Gosselin, general merchant, of St. Alexandre, was a visitor at Montreal hardware jobbing houses this week.

C. Church, of C. Church & Sons, Labelle, was in Montreal this week, purchasing supplies for the firm's saw-mill.

Mr. Besner, of Besner & Chasle, hardware merchants, Valleyfield, visited Montreal on Wednesday, and purchased goods for their store.

E. K. Watson, of the E. K. Watson Company, hardware commission merchants, Montreal, has just returned from a business trip in the West.

Mr. Livingston, of the Marshall, Wells Company, wholesale hardware merchants, Winnipeg, was recently in Montreal, calling on confreres in the trade.

Mr. Lamarche, general storekeeper for the St. Vincent de Paul Penitentiary, was among the out of town visitors to the Montreal hardware warehouses this week. He came in, as usual, to purchase needed supplies for the large institution.

August E. A. Painchand, who has covered part of Quebec Province during the past eighteen years, for Frothingham & Workman, has severed his connection with the firm, and will be succeeded by Chas. Anger, son of Real Anger, a former partner in the firm.

J. D. McCallum, who for two years has represented Frothingham and Workman, Montreal, in Western Ontario, has bought the hardware stock of Donald MacLachlan, Glencoe, and will take possession on January 1st. He has been accompanied on his calls, during December, by Robert Warren, Jr., formerly in charge of city orders in the head office. Mr. Warren will cover this ground after the first of the year.

Several metal importing houses in Montreal have experienced considerable anxiety, during the past week or so, on account of the rapidity with which the water in the St. Lawrence has been rising. Some of the wharves are quite under water. A few days ago, one of the large firms had all their office staff engaged in moving pig iron to a place of safety.

United States.

Nineteen hundred and seven will be the fiftieth anniversary of E. C. Atkins & Company, Indianapolis, Ind. They have in mind a very pleasant surprise for their friends, the nature of which they have not yet revealed. In the meantime they are using a gold seal in commemoration of the approaching golden anniversary.

Maritime Provinces.

Harry Faulkner, of Woodstock, N.B., has opened a tin shop in that place, having formerly been employed with the Kitchen Company, Fredericton, N.B.

H. T. Cohoon, of Bent & Cohoon, hardware merchants, North Sydney, N.S., intends making a trip to England during the present winter, visiting London, Liverpool, Sheffield and other English centres.

Western Canada.

Edward Crouter, hardware merchant of Gladstone, Man., died last Sunday at Winnipeg General Hospital.

Thompson & Axworthy, of Weyburn, Saskatchewan, have sold their hardware business to C. Warden & Company.

Mackenzie, Devlin & Company, hardware merchants, Kinistino, Saskatchewan, have moved into their new store.

In the Winnipeg municipal election on Tuesday, J. H. Ashdown was elected mayor by an overwhelming majority of 5,200 votes.

The A. J. Falconer Company of Roblin, Man., who have been conducting a hardware and lumber business, will, next spring, erect a large department store.

W. M. Butler, of Arnprior, who went to Calgary to enter the services of the Massey-Harris Company, is now with the McBride Hardware Company of that town.

The Winnipeg Saddlery Company suffered $30,000 loss by fire on Thursday. James Billington, one of the proprietors, and several employes, narrowly escaping with their lives.

J. A. Irwin, manager of the paint department in the Marshall Wells Company, Winnipeg, is spending a month's holiday in Montreal and other Eastern points. Mr. Irwin is accompanied by his wife.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Wire—Barb and plain twist, 10c. advance; galvanized, 12½c. advance.
Wire Nails—Now $2.30 base.
Cut Nails—Now $2.30 base.
Coil Chain—Up 10 cents.
Washing Machines—An advance of $3 per doz.
Shelf Goods—Numerous advances in minor lines.
White Lead (ground)—Up 50c. cwt.
White Zinc (ground)—50c. advance per cwt.
Paris Green—1907 list now out.
Pott's Irons—Plain, now 80 cents; nickled, now 92c. cents.

TORONTO.

Pig Iron—Summerlee 60c. higher.
Ingot Copper—Advanced one cent.
Old Material—Several advances.
White Lead—Jumped up 60 cents.
Canada Paint—Advanced 5 cents.
Paris Green—1907 prices quoted—advance of 8 cents over 1906 and 10 cents over 1905.
Washing Machines—Advanced $3.
Barb and Plain Twist Wire—Higher.
Galvanized Wire—Advanced.
Sad Irons—Higher prices quoted.
Shelf Hardware—Several slight changes.
Coil Chain—Advancing.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Dec. 14, 1906.

It is astonishing to note how things have kept moving in hardware circles, with the Christmas season practically at hand. All the local wholesalers report that business is keeping up strongly, in spite of the fact that there are now but few hardwaremen coming into the city to leave their orders personally.

Naturally enough, Christmas goods are the most in evidence in orders going out. In this connection it might be mentioned that skates and sleigh-bells are experiencing quite a boom.

Several price changes have occurred during the week, especially in many lines of wire. All prices on barb, plain twist, and galvanized wire, were withdrawn too late for publication last week, and an advance of 10 cents on barb and plain twist, and 12 1-2 cents on galvanized, was announced at the beginning of the present week. The base price for smooth steel wire has also gone up from $2.15 to $2.25. Furthermore, both wire and cut nails are now being quoted at $2.30 base.

Potts' irons are another line to jump up, this week, plain being now quoted at 80 cents, and nickled at 92 cents. Washing machines, also, have advanced, about $3 per dozen.

AXES. — We quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen. follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—The normal business is being done, at the following prices: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES — We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Sales are picking up again, with the advent of seasonable weather. We quote: Back Straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS — Our discounts remain as follows: Best iron rivets, section, carriage, and wagon box black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half-pound boxes.

HAY WIRE. — Advances have been declared, and we now quote: No. 13, $2.55; No. 14, $2.65; No. 15, $2.80; net cash, f.o.b. Montreal.

MACHINE SCREWS—Business is good. We quote: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.: Felisterhead, iron, 30 per cent.. Felisterhead, brass, 25 per cent.

BOLTS AND NUTS—The scarcity which has existed for some time is still felt as much as ever. The following discounts continue to rule the trade: Carriage bolts, 3-8 and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—A lively demand is evident. Discounts are as follows: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS. — During the past week the base price has been advanced. as a result of the shortage, and primary market conditions. We now quote: $2.30 per keg base f.o.b. Montreal.

CUT NAILS—As was the case with wire nails, cut nails have advanced to $2.30 per keg base, f.o.b. Montreal.

HORSESHOES—Retailers are ordering in large quantities. We quote as follows: P.B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Conditions remain unchanged.

CEMENT AND FIREBRICK—We are still quoting the following prices: "Lehigh" Portland in wood, $2.54, in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN. — An advance of 10 cents was made this week, and current prices are: 5-16 inch, $4.40; 3-8 inch, $3.90; 7-16 inch, $3.70; 1-2 inch, $3.50; 9-16 inch, $3.45; 5-8 inch, $3.35; 3-4 inch, $3.20; 7-8 inch, $3.10; 1 inch, $3.10.

SHOT—Our prices remain as follows: Shot packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—Business is as usual at this season. We are quoting: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

GREEN WIRE CLOTH—Orders are now bieng booked for spring delivery. Our prices are: In 100 ft. rolls, $1.62½ per hundred square feet, in 50 feet rolls, $1.67½ per hundred square feet.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Dec. 14, 1906.

It is with a great deal of enthusiasm that the wholesale hardware merchants speak of this year's business, prices being higher in some staple lines, not having any apparent effect on diminishing the orders.

Christmas goods are very much in evidence just now, with some sorting still being done. Winter sporting lines are particularly active at present, the demand having been so large for skates, that some jobbers report a shortage in that line. Snow shoes, are having quite a call and it is expected some sizes will be short before the season is well on.

We have several advances to quote this week, the principal ones being: washing machines an advance of $3.00 per dozen; barbed and plain twist wire 10c.; galvanized wire 12½c.; Messrs. Pott's sad irons a probable advance is looked for from 75c. to 80c. for plain and 85c. to 92c. in nickel. A few lines of shelf hardware such as Yale padlocks and Union planes have also advanced slightly.

Nails still remain as quoted last week, $2.20 base, but another advance is looked for it being expected they will reach $2.50 base shortly, owing to the great scarcity of material and the advancing prices of wire.

AXES AND HANDLES.—Demand continues very brisk with large shipments the order of the day.

CUTLERY AND SILVERWARE.—Orders arriving daily for express shipments, as everything is rush.

SPORTING GOODS.—The shortage in skates is becoming more apparent and larger orders continue coming in. Snow shoes are also having a great sale and it is expected a shortage will be reported in this line shortly.

CHAIN.—A slight advance is looked for, although just how much is not known and for the present we continue to quote the following: 1 in. $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

RIVETS AND BURRS.—Copper rivets remain at 27½ per cent. and copper burrs 15 per cent.

SCREWS.—Prices remain unchanged, with a scarcity in many lines.

BOLTS AND NUTS.—The scarcity of these articles is still reported, causing considerable inconvenience to the trade.

TOOLS.—Boys' tool boxes are still selling well.

SHOVELS.—A great demand still exists for snow shovels, also a large sale of sidewalk scrapers is reported.

LANTERNS.—Cold blast are still selling at $6.50 per dozen, with large shipments.

EXTENSION AND STEP LADDERS—Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING.—Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE—(Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS.—A further advance is looked for, but we continue to quote $2.20 base.

CUT NAILS—We quote $2.30 base f.o.b. Montreal, Toronto 20c higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—A very large demand continues for these lines and large shipments are the order of the day.

BUILDING PAPER.—Not as brisk as formerly, but continuous booking of large orders for spring shipments.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES, WOOL AND FURS. — The price of hides here and in Chicago is firm. In Europe the market has turned easier. Mink skins being a little better prices.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 14, 1906

While all metals continue as strong as ever, interest this week, centres especially around copper and tin. Copper may be said to be the feature of the market. Sheets are continued at the same price as we quoted last week, but prices on ingot casting copper have advanced 1 cent. It is freely predicted that they will go much higher still. One prominent Montreal jobbing house wrote to a large handler of the metal for prices, this week, and received the response that there was no copper offering at the present time.

Ingot tin is distinctly firmer in tone. So far as prices are concerned, we are still quoting 46½c. to 47c. per pound. It is expected that the prices, too, will experience an early advance.

As stated in a previous issue, cold rolled shafting is subject to higher prices. It is also stated that advanced quotations on boiler tubes will probably be announced during the coming week.

COPPER—This metal is the feature of the market. An advance in ingot copper has transpired. We are now quoting: Ingot copper, 25c. to 25½c.; sheet copper, base sizes, 32c.

INGOT TIN—Tin is very firm and higher prices are expected. We quote: 46½c. to 47c. per lb.

ZINC SPELTER—Conditions indicate a very firm market, but prices are unchanged. We continue to quote: $7.25 to $7.50 per hundred pounds.

PIG LEAD—Prices are still being maintained at $5.40 to $5.50 per hundred pounds.

ANTIMONY—Our price remains 27½ to 28c per pound.

PIG IRON.—We still quote as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—Higher prices will probably be declared next week. Meanwhile we are quoting: British and American tubes, 1¼ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15½c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL.—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.40 ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING—The

expected new prices have not yet been issued, as we go to press. We still quote ' 3-16 inch to 1-4 inch, $7 ; 5-16 inch to 11-32 inch, $5.95 ; 3-8 inch to 17-32 inch, $4.90 ; 9-16 inch to 47-64 inch, $4.20 ; 3-4 inch to 1 7-16 inch, $3.-85 ; 1 1-2 inch to 3 inch, $3.50 ; 3 1-8 inch to 3 7-16 inch, $3.67 ; 3 1-2 inch to 3 15-16 inch, $3.85 ; 4 inch to 4 7-16 inch, $4.20 ; 4 1-2 inch to 4 15-16 inch, $4.55. This is equivalent to 30 per cent. off list.

GALVANIZED IRON—British makers are again raising their quotations, and the following prices show great strength in consequence: Queen's Head, 28 gauge, $4.60 to $4.85; 26 gauge, $4.45; 22 to 24 gauge, $3.90; 16 to 20 gauge, $3.75; Apollo, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 and 20 gauge, $3.60; Comet, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30 to $4.45; 22 and 24, gauge, $3.75 to $4.00; $16 to 20 gauge, $3.60 to $3.85; Fleur-de-Lis, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 to 20 gauge, $3.60; Gorbals "Best Best," 28 gauge, $4.45; Colborne Crown, 28 gauge, $4.45; 26 gauge, $4.30; 24 gauge, $3.75. In less than case lots, 25c extra.

CANADA PLATES—Firmness characterizes the week's market. We are still quoting: 52's, $2.70; 60's, $2.75; 75's, $2.85; full polished, $3.85; galvanized 52's, $4.35; 60's, $4.60.

BLACK SHEETS—An upward tendency is shown, but we are still quoting as follows:: 28 gauge, $2.60; 26 gauge, $2.25; 22 and 24 gauge, $2.45; 20 gauge, $2.40; 18 and 18 gauge, $2.40; 8, 10, 12 and 14 gauge, $2.60.

TIN PLATES—Prices remain as follows: Cokes base size, I.C. 14 x 20, $4.25 to $4.35; charcoal, base size, I.C., 14 x 20, 4.40 to $4.50.

TERNE PLATES—We are still quoting $7.10.

STEEL SHEETS. — We quote: 10 gauge, $2.60; 17, 18 and 20 gauge, $2.40; 22 and 24 gauge, $2.45; 26 gauge, $2.55; 28 gauge, $2.60 per hundred pounds.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6½c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

BAR IRON.—The price remains $2.15 base, f.o.b. Montreal.

OLD MATERIAL. — We quote; Light copper, 17½c.; heavy red brass,17c, yellow brass, 13c.; light brass, 9c.; lead, 4c; zinc, 4½c; machinery cast scrap, $16.00; wrought scrap, $16.00; stove plate scrap, $12.00: mixed rags, $1.00 to $1.20 per 100 lbs.; old rubbers, 8 1-2c. to 8 3-4c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Dec. 14, 1906.

Ingot copper is the feature of this week's market, prices having advanced one cent in response to the keen demand and great scarcity of copper. Sheets are also strong, but have not advanced beyond our previous quotation. In many quarters still higher prices are predicted on both sheets and ingots.

Ingot tin is also much firmer, but we are not advancing prices. Orders for spring and summer delivery of sheets and plates are still being booked with date of deliveries uncertain.

Summerlee pig iron has been advanced 60 cents, and jobbers are in the same difficulty of trying to secure deliveries to customers.

Boiler tubes are booked for an early advance, and metal merchants are in an uncertain state as to whether or not the Government intends to force them out of this line by leaving the new tariff as originally announced. Cold rolled shafting is another line affected by the tariff, the old duty of 5 per cent. being changed to 30 per cent on 1 1-2 inches and under. Prices are being advanced in proportion to the change. One Toronto jobber is being hit this week for a 45 per cent. duty under the dumping clause.

PIG IRON.—Hamilton, Midland and Londonderry are off the market, and Radnor is quoted at $33 at furnace. Middlesborough is quoted at $24.00, and Summerlee, at $25.60, f.o.b., Toronto

BAR IRON.—Bar is still hard to get and we still quote: $2.25, f.o.b., Toronto with 2 per cent. discount.

INGOT TIN. — The market has become much firmer, and buying is lively. Prices are unchanged at 46 to 46 1-2 cents per pound.

TIN PLATES—The market is active and prices firm at recent advances.

SHEETS AND PLATES—Active buying is reported with prices steady. Stocks are light, and there is little prospect of replenishing them before next June.

BRASS.—Conditions are the same as last week, and we continue to quote 26 to 27 1-2 cents per pound for sheets.

COPPER—Stocks are very low, with demand keen. Ingots have advanced, and we now quote: Ingot copper, $25 per 100 lbs., and sheet copper $30 to $31 per 100 lbs.

LEAD—Market is active and prices very firm. We quote: $5.25 for imported pig and $5.75 for bar lead.

ZINC SPELTER—Stocks are light with market firm and active. We quote 7 1-2c. per lb. for foreign and 6 1-2c. per lb. for domestic. Sheet zinc is quoted at 8 1-4c. in casks, and 8 1-2c. in part casks.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. to ½ in., $2:50; ⅝ in.; $2.35 heads, per 100 lbs., $2.75; tank plates, 3-16 in., $2.65; tubes, per 100 feet, 1½ in., $8.50; 2, $9; 2 1-2, $10.75; 3, $12; 3 1-2, $16; 1, $21, Terms, 2 per cent. off.

ANTIMONY—Market is active, and stocks scarce. Prices firm at 27c. to 28c.

OLD Material.—Dealers' buying prices have advanced on several lines. We quote: Heavy copper and wire, 18½c., per lb.; light copper 16c. per lb.; heavy red brass, 15 1-2c. per lb.; heavy yellow brass, 14c. per lb.; light brass, 9 3-4c. per lb.; tea lead, $3.70, per 100 lbs.; heavy lead, $4.10 per 100 lbs., scrap zinc, 4½ per lb.; iron No. 1 wrought, $14.00; No. 2 wrought, $6 to $8; machinery cast scrap, $16.50 to $18; stove plate, $12 to $16; malleable and steel, $6; old rubbers, 9c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—The following prices are quoted on coal, although some kinds cannot be procured at any price, slack being particularly short.

Standard Hocking soft coal f.o.b. at mines, lump $1.75, ¾ inch, $1.65, run of mine, $1.40, nut, $1.25; N. & S. $1.10; P. & S., 85c.

Youghiogheny soft coal in cars, bonded at bridges; lump, $2.90; ¾ inch, $2.70; mine run, $2.60; slack, $2.25.

London, Eng., Metal Markets

From Metal Market Report, Dec. 12, 1906.

Cleveland warrants are quoted at 63s. and Glasgow Standard warrants at 62s. 6d., making price as compared with last week 2s. higher on Cleveland warrants, and 1½s., higher on Glasgow Standard warrants.

TIN—Spot tin opened firm at £196 15s., futures at £196 and after sales of 350 tons of spot and 220 tons of futures closed firm at £196 15s. for spot, £196 for futures, making price compared with last week 10s. lower on spot and 5s. lower on futures.

COPPER—Spot copper opened strong at £104 15s., futures £105 15s., and after sales of 600 tons of spot and 1,000 tons of futures, closed strong at £105 5s. for spot and £106 5s. for futures, making price compared with last week £2 5s. higher on spot and on futures.

LEAD—The market closed at £19 5s., making price as compared with last week 5s. lower.

SPELTER—The market closed at £27 17s. 6d., making price as compared with last week 2s. 6d. lower.

United States Metal Markets

From the Iron Age, Dec. 13 1906.

Pig iron production in November, a short month, was within 9,000 tons of the record breaking total for October. Returns to the Iron Age show that coke and anthracite furnaces produced 2,187,-665 tons in November and 2,196,808 tons in October, or at a daily rate of 72,982 tons last month, as compared with 70,865 tons in October. Active capacity on December 1 was 516,160 tons a week, which, counting charcoal furnaces at about 8,000 tons a week, represents 27,250,000 tons a year. Steel works furnaces fell short of their October performance, while merchant furnaces produced about 32,000 tons more in November than in October.

It may be inferred from the above figures that relief to the present strained conditions is on the way. It is to be remembered that our blast furnaces have not yet been subjected to the test of

real winter weather, also that the south is on the eve of the holiday absenteeism that always plays havoc with its production.

The feature of the pig iron market in the past week has been the cropping out of demand for iron for the second half of 1907, and in some districts a good beginning has been made in contracting for such deliveries. New England buyers have taken about 20,000 tons and an important New York State interest has bought for its malleable and steel foundries. Some sellers are asking $1 a ton less for the third quarter than for the first half, while others make little or no difference. Southern sellers have rather dominated eastern foundry iron markets and sales for the third quarter have been made at $19, Birmingham. Further sales of basic iron for the third quarter have been made at $22.50 to $23, delivered at eastern Pennsylvania mill.

The import movement, including iron afloat or for which shipping arrangements have been made, is variously put at 150,000 to 200,000 tons. Importers are unwilling to commit themselves beyond the winter months and little iron is now offered by foreign sellers that can reach this side before late February. The advances abroad have brought imports practically to a parity with domestic irons; hence no large additional movement is now expected.

Throughout the finished material market the changes are still rung on unparalleled conditions, from which week after week there is no sign of relaxing. Consumption, gauged by pig iron, appears to be increasing.

The Burmah Oil Company's contract for 10-in. pipe for the line from Burmah to Rangoon has been placed entire in the United States, and amounts to 30,000 tons.

In structural material the chief new business is 8,000 tons for the approaches to the Blackwell's Island bridge. Mills are again filling up rapidly after a breathing spell.

Railroad buying of bar iron has been a feature in western markets, and prices on shipments from the central west to Chicago territory have advanced. Everywhere the demand for bars continues heavy.

Higher prices have been paid for the heavier sheets and there is a prospect of a general advance.

In wire products the orders booked thus far in December have exceeded all records for an equal period.

The United States Steel Corporation's programme of new construction in 1907, just announced, represents an addition of about 1,000,000 tons a year in pig iron and 1,500,000 tons in steel, apart from what is provided by the second block of the new capacity at Garry, Ind. An important fact is that the new open hearth furnaces to be built at Duquesne will replace 600,000 tons of Bessemer steel capacity at that plant.

Form the Iron Trade Review, Cleveland, Dec. 13, 1906.

There is a strong inquiry for iron ore by merchant furnaces and a marked scarcity is predicted before the middle of next April, when shipments for the new season will be begun. The extremely cold weather of the past fortnight has rendered December shipments exceedingly small, and has put an end to navigation earlier than was anticipated. The result will be that the season's total will be in the neighborhood of 37,250,000 tons, and because of the pace at which furnaces have been driven during the summer and fall, there is the likelihood that some independent interests will run short.

Pig iron prices manifest little change in the north, but there is a distinct trend toward higher prices of southern product. One large interest has withdrawn from the market for the first half, and the car shortage, coupled with the necessary repairs, has put four furnaces out of blast. Certain foundries in the central west which contracted for castings when iron was low, now find it impossible to conduct business profitably at the present level and have shut down. The first of the year will witness the closing of contracts for castings for 1907, and but little difficulty is anticipated by foundrymen in securing the higher prices rendered necessary.

Finished materials, with the possible exception of structural, are of increased strength. Plate mills are filling up with orders and one large steel carbuilding concern in the Pittsburg district was shut down for two days last week because of lack of material. An advance in shapes is predicted at an early date. Tin plate sales during November were the heaviest in the history of the principal producer.

London Hardware Trade News

London has enjoyed mid-winter weather since early last week—fourteen inches of snow, good sleighing, and, on one occasion, a drop of the mercury to 4 below zero. This has helped business generally and the retail hardware business especially. Aside from the rush on such lines as sleighs and skates for the small boys, there is always a rush on builders' supplies, when the first touch of real winter makes the contractors put forth every effort to get buildings, under construction, in shape to admit of the work being continued when the weather becomes more severe.

The fact that the heavy fall of snow in London last week was local, there being no sleighing at St. Thomas, nor west of Komoka, caused the city's merchants to "count their mercies.".

The McClary Manufacturing Company have established a separate department in their works here for the construction of their new gas stoves and this week the company's salesmen from Montreal, Toronto, Hamilton, Winnipeg and London districts are in the city being instructed in the make-up of the stove from start to finish. This conference of the salesmen marks the introduction of a more complete system on the company's part for keeping the travelers posted about their goods.

W. F. Wyatt's new store at 349-351 Talbot street is one of the most commodious and handsomest retail stores in London. The show room is the largest in the city, being 44 feet wide and 75 feet long, and at the rear of the show room is a work room, 44 feet by 35 feet, a room of considerable size being required for Mr. Wyatt's extensive stove and tinware business. He carries the Souvenir stoves and ranges and has also secured the agency for the Gurney furnaces. His lines include tinware and kitchen utensils of all descriptions and a varied stock of hardware. Mr. Wyatt is a practical man and has had a large experience in the stove and tinware business. He was the junior member of the firm of Wm. Wyatt & Son, and for several years managed the business. The firm sold out a year ago and the senior member, ex-Ald. Wyatt, announced his retirement from business. When W. F. Wyatt decided to go into business for himself he built the store he now occupies and at the opening recently displayed one of the largest stocks in the city. His experience in the past augurs well for his success in the future

---

N.S. Hardware Trade News

Halifax, N.S., Dec 11.

With the arrival of the first cold snap of the season came a good demand for skates. The cold wave came suddenly but the dealers were not caught unawares, as they all had good stocks on hand. The skates used here are almost all of local manufacture. The Starr Company's skates have a world wide reputation, and their sales are very large.

The hardware business is a trifle slack just at present, though generally speaking a fairly good trade moving. Some activity is noted in the gold mining sections, and this helps to keep business up. There is development of properties at Isaac's Harbor, and the owners of the Cow Boy mine on the eastern side of the harbor are pumping it out. The mine has been closed down for a year or more and the resumption of work is welcomed by the people resident in the vicinity.

* * *

Frank Powers, of Lunenburg, has just completed a fish conveyor for the Halifax Fish Company, by which fish can be transferred from the vessel to the warehouses without any handling between the two. The belt is in three sections to overcome the grade of the land. They measure in all about 150 feet in length. Mr. Powers installed the heating apparatus, the fish dryer, and the machinery. The plant is of the most modern type and is now complete.

* * *

Canadian enterprise is to the front again. The Panama Canal construction has brought one good contract at least to Canadian industry, for the Robb-Mumford Boiler Company, which is the American end of a big Nova Scotia Company, has just received an order for twenty-five 300 horse-power boilers, over 5000 horse-power in all. This contract was secured in the face of keen competition from works in various parts of the United States. It is understood that the Robb-Mumford specification for boilers was recommended to the Panama engineers in preference to all others. The Robb-Mumford Company and the Robb Engineering Company, which have been independent concerns under the presidency of D. W. Robb, of Amherst, are on the eve of an amalgamation into one company. The American works are located at South Framingham, Mass. This contract probably means that the Robb-Mumford boilers will be used on all the construction work on the Panama Canal.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

Box Manufacturers.

The Jones Register Co., Toronto, ask for the name of any firms outside of Toronto that manufacture boxes or box shooks.

The James Davidson Box Manufacturing Co., Ottawa, and the Georgian Bay Shook Mills, Midland, are the two leading manufacturers of boxes and box materials, while the Parry Sound Lumber Co., Toronto, and the Firstbrook Box Co., Toronto, are the best known Toronto concerns.—Editor.

WATERPROOF GLUE.

Waterproof glue is manufactured of gum shellac three parts and india-rubber one part by weight, these constituents being dissolved in separate vessels in ether, free from alcohol, subject to a gentle heat. When thoroughly dissolved, the two solutions are mixed, and kept for some time in a vessel tightly sealed. This glue resists the action of water, both hot and cold, as well as most acids and alkalis. If the glue is thinned by the admixture of ether, and applied as a varnish to leather along the seams where this has been sewn together, it renders the joint or seam water-tight, and almost impossible to separate.

RAILWAY CONTRACTS.

The Canadian Northern Railway Co. has let or is letting contracts for over $1,500,000, having contracted with the Rhodes, Curry Co., of Amherst, N. S., for 1,500 box cars, and 22 passenger and baggage cars. The balance of the equipment is in the hands of the Crossen Car Company, Cobourg, Ont., and the Canada Car Co., of Montreal., and orders have also been placed with Canadian companies, for the whole of the output of the Canadian Locomotive works, Kingston, till October next. The Canadian Foundry Company, Toronto, will deliver their whole output for next year, and the Locomotive and Machine works, Montreal, their output for five months of next year. It is the C. N. R.'s intention to place as many orders with Canadian Companies as possible. Only orders that cannot be filled in Canada will be placed with United States firms.

VULCAN IRON WORKS ENLARGE.

The Vulcan Iron Works of Winnipeg, have recently completed a brick and stone pattern and wood-working shop on their property on Meade Street, adjoining the foundry building. This shop which is another evidence of the rapidly increasing business of this firm is 50 by 82 feet, two full storeys and basement, and the general layout and construction are designed to meet the requirements of a first-class shop. In the basement are located the lavatory and bathroom, also the boiler for the steam-heating plant. The ground floor will be used entirely for machines and benches, and includes offices for the foremen. The roof is supported on trusses, leaving the upper floor clear, which will be used as a drafting floor, and benches if so required. Electricity will be used to drive the machinery, and light the building. This shop will cost in the neighbourhood of $11,000 complete, with machinery, and adds another to the list of large and commodious modern workshops which the Vulcan Iron works have erected during the past few years.

SELLING CUTLERY.

E. H. Sutton, sales agent of the National Cutlery Company, Detroit, Mich., recently delivered a short talk on the "Sale of a Pocket Knife," in which he said:

"Selling a knife or cutlery of any kind is a hard proposition. The consumer is compelled to take the merchant's word for the grade of the article he is offering, as practically nothing of its quality can be ascertained from a superficial examination. It would be of inestimable value for the merchant and his clerks to have a knowledge of the manufacture of all kinds of cutlery; to be able to tell the trade whether the knife or any other article was merely blanked out of steel or whether it was forged. I am free to say that oftentimes the finish of the blanked article is superior to that made of high grade forged steel. To talk intelligently on these points a knowledge of manufacture is necessary. Quality should be impressed upon the consumer and while it is true that the cheaper lines undoubtedly keep the business going, the good goods and high grade specialties make the profits. Competition in all lines to-day is keen and as a rule a buyer gets just about what he pays for. Talk quality and you will have a satisfied customer."

A BLUFF THAT WORKED.

"Bluff sometimes goes a long way in business as well as in poker," remarked a well known manufacturer the other day." There is one instance which comes to my mind that happened some years ago. There was a merchant in Toronto who had half a dozen stores scattered throughout the city. I was young in business at the time and he got into my firm for about $2,500. As this was a very important sum to me at the time I began to press him urgently for payment. One day when I called on him personally he said that he would fix it up right for the next day, He would get assistance from the bank.

"But," said I, "how can you do so? Your credit is not good."

He replied, "Oh, you leave that to me, I have a scheme."

When I pressed him as to what his scheme was he astonished me by declaring that he intended going to the manager of his bank and telling him that if he did not advance him the money he would give instructions to the manager of each of his stores to refuse to accept any bills of that bank tendered by his customers. And do you know, the scheme worked.'

LENDING MONEY WITHOUT INTEREST.

If you have cash on your books, go to your debtors and make a plain talk for the money.

Just the minute a merchant extends credit he begins putting out his money without interest. There is a good point to work into the talk you give the farmer. He knows what "money out at interest" means, and what it means to lend without charge.

In the days when he was less prosperous than he is to-day, he paid, perhaps, 10 per cent. interest, perhaps more. If he could not meet the mortgage he was compelled to pay part and then renew, paying a commission on the money, The farmer is reasonably acquainted with the methods of the bank —he knows that when he takes a note to the bank to be discounted he pays interest in advance. He ought to be amenable to reason and either give you a bankable note or cash when your demands are sufficiently urgent to make you ask for a settlement.

The farmers are prosperous. Wheat money is in the banks to their credit. Go after them in a straightforward, manly fashion, neither cringing nor blustering, and it is safe to say that the majority of the farmers will cash too willingly. Try it. Go yourselves, it is bad policy to send another. Go yourself.

SPORTING GOODS TRADE.

Sporting goods for winter lines are receiving a great call from all parts of Canada, snow shoes, skis and skates being particularly sought after.

The snow coming so early this winter had the desired effect of causing a great sale of snow shoes, although most dealers had a large supply left from last year, they are rapidly being sold out and rush orders are being received daily by jobbers and should the demand keep up, a shortage may be reported.

Skates, hockey sticks and pucks are having a banner year, some sizes and lines of skates having been out for some time with no chance of stock being repleted. The shortage on hockey sticks is being relieved.

While skis are practically a new mode of winter amusement for young Canadians, dealers report a large increase over previous years in sales.

Toboggans have also sold well, but dealers had fairly large stocks carried over from last year and jobbers have not, in consequence, done so large a trade as usual up to this time.

PROTECTING THE CUTLERY MARK.

A very decided effort is being made in Sheffield to prevent the marking of foreign-made cultery in such a way as will convey the impression that it is of the Sheffield manufacture. The plan under consideration is to so mark the Sheffield-made goods as will distinguish the genuine from the imitation, but it is pointed out by authorities in England that it would be very difficult to discover any mark which would show conclusively that the goods had been made in England, and would still be out of reach of infringers or imitators.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Dec. 14, 1906.)

Room 511, Union Bank Building, Office of HARDWARE AND METAL, Winnipeg, Man.

Business is still active, but the rush is not so great as a month ago. Values are steady in most lines.

LANTERNS. — Quotations are as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS.—Quoted now at $2.70 per keg.

CUT NAILS.—Quoted since the recent advance at $2.80 per keg.

PRESSED SPIKES — Prices are quoted as follows since the recent advance: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Discounts are quoted as follows since the recent advance in the price of copper rivets: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ½, $7.20; ⅝, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES.—Quotations are: Bench axes, 40; broad axes, 25 p.c. dis. off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ½c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

GALVANIZED WARE. — The discount on pail is now 37 1-2 per cent., and on other galvanized lines the discount is 30 per cent.

CORDAGE—We quote: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Quotations are as follows: Cartridges, Dominion R.F. 50 and 5; Dominion, C.F., 33⅓ C.F., pistol, p.c.; C.F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL.—Quotations are: Bar iron basis, $2.70. Swedish iron basis, $4.95; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop. $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—Quoted a $5.85 per cwt.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

IRON PIPE AND FITTINGS— Revised prices are as follows:—Black pipe, ¼ inch, $2.65; ⅜, $2.80; ½, $3.50; ¾, $4.40; 1, $6.35; 1¼, $8.65; 1½, $10.40; 2, 13.85; 2½, $19.00; 3, $25.00. Galvanized iron pipe, ⅜ inch. $3.75; ½, $4.35; ¾, $5.65; 1, $8.10; 1¼, $11.00; 1½, $13.25; 2, inch, $17.65. Nipples, discounts 70 and 10 per cent.; Unions, couplings, bushings and plugs, 60 per cent.

LEAD PIPE—The price, $7.80, is firmly maintained in view of the advancing lead market.

GALVANIZED IRON—Quoted as follows:—Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65, 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.50; 26, $4.65; 28, $5.00.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Quoted as follows: Canada plate, 18 x 21, 18 x 24, $3.40; 20 x 28, $3.65; full polished, $4.15.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE.—Silver Star in brls. per gal., 20c.; Sunlight in brls, per gal., 21c.; per case, $2.30; Eocene in brls, per gal., 23c.; per case, $2.50; Pennoline in brls., per gal., 24c.; Crystal Spray, 23c.; Silver Light, 21c.; Engine gasoline in barrels, per gal., 28c., f.o.b. Winnipeg in cases, $2.75

We have been fortunate enough to secure the Western Agency for BERRY BROS. celebrated VARNISHES and are carrying a full stock from which all orders will be shipped promptly.

THE

WINNIPEG PAINT AND GLASS CO. Limited

Warehouses CALGARY EDMONTON WINNIPEG

PAINTS, OILS & TURPENTINE — Turpentine is firm at the recent advance White lead, pure, $7; bladder putty in barrels, 2½c.; in kegs, 3¾c.; turpentine, barrel lots, Winnipeg, $1.01; Calgary, $1.08; Lethbridge, $1.08; Edmonton, $1.09. Less than barrel lots 5c. per gallon advance. Linseed oil, raw, Winnipeg, 64c.; Calgary, 71c.; Lethbridge, 71c.; Edmonton, 72c.; boiled oil, 3c. per gal. advance on these prices.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

METALS MELTED IN SAN FRANCISCO FIRE.

AFTER the great San Francisco fire, hundreds of tons of lead, zinc, and other metals owned by the Selby Smelting Company were found melted into a solid block at the base of the shot tower that was for many years one of the landmarks of the old city says the Scientific American. The problem of recovering the metals, which were worth many hundreds of thousands of dollars, was a difficult one. The great mass could not be raised or broken up into fragments of a practicable size by any ordinary means. A method has, however, been found by which it is hoped to recover the valuable metals. After removing several tons of brick and debris, channels have been cut through the great block of metal by an electric arc process. The bed of metal is from three to four feet thick, and covers the entire area of the ruins of the tower. The heat and light produced by the process are intense, though only ten volts are used for each implement. The men who are engaged in cutting the channels have their heads and faces covered with canvas to protect them from the blinding light. Large blocks have been cut away from the great pile, and it is expected that the whole work will take up the winter. About two hundred tons of lead, zinc, and tin still remain to be recovered. The work, is of so unusual a character, that it is constantly watched by a crowd of interested people. The metal is recovered in blocks weighing nearly a ton each.

NEW PROCESS FOR MALLEABLE IRON AND STEEL.

Two Australians have evolved a process for directly converting iron ore into malleable iron or steel by a continuous system. It is claimed that the new discovery will effect a saving of 25 per cent. in the manufacture. The ore is simply concentrated by ordinary methods, or if it is magnetic it is separated electrically until the pure oxide of iron is obtained. The oxide of iron is passed through a revolving cylinder heated by waste gases from subsequent operations, and brought in that cylinder to a dull red heat. It drops from the cylinder to a second similar cylinder, and in the latter it is brought into contact with the deoxidizing gas, which is forced through and brought into contact with the heated ore. The heated ore is thus converted into a pure iron. Accompanied by and protected by the deoxidizing gas, it is passed into a third chamber or melting hearth, where it falls into a bath of molten iron, and is converted directly into steel or balled up as malleable iron.

WALL PAPER.

Fall orders, on account of their heavy increase, could not be delivered quite as early as usual. Manufacturers are rushing through their work so as to be ready for the sampling season. A superior line of designs is promised for next season, and some novelties in borders are in prospect. The success of the flat prices is causing general satisfaction.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the Western Trade to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

BEST OF REFERENCES

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

Plumbing Catalogue.

The James Robertson Company, of Toronto, manufacturers of plumbing goods and sanitary appliances, have issued to the trade a miniature catalogue of about 3½ in. by 6 in., containing 60 pages fully illustrated, with sizes and list prices of a few standard lines, taken from Catalogue E. This catalogue will prove invaluable to the plumber as it can be freely distributed among prospective builders, and is of convenient size to be carried in the pocket

Electric Supplies.

A small pamphlet has been issued by the Canadian General Electric Co., Toronto, announcing reduced prices on miscellaneous material. The pamphlet will be found very useful to any hardware merchant desiring to purchase electric supplies.

Machines Knives, Grilles, and Railings.

A neat booklet of forty pages has been issued by Joseph Paquette, manufacturer of machine knives and ornamental iron work, 59 Lacroix St., Montreal. It is printed in both English and French, and is well illustrated with various lines of planer, moulding, matcher and shaper knives, etc. Steel and iron fencing, railing, and fire escapes are also illustrated, and a complete price list for the machine knives is given. The booklet is of a very convenient size, and well printed.

Screen Doors and Windows.

The Sanderson, Harold Co., of Paris, have issued to the trade their catalogue No. 5, which contains fifty pages fully illustrated with their thirty styles and sizes of refrigerators, ten styles of doors, and fifteen styles and sizes of screen windows, manufactured by them. The book also contains much useful reading matter as to construction of refrigerators, which will be found instructive to the hardware merchant. Send for a copy and mention this paper.

GROWTH OF READY ROOFING INDUSTRY.

The demand for ready roofing has increased so fast in the last year or two, that new brands have come on to the market within a short time. A large number of ready roofing have been on the market long enough to prove that a ready roofing can be made to take the place of shingles, which are deteriorating in quality so fast and growing more expensive every day.

An old established firm making a "ready roofing" with a complete roofing kit inside of each roll, is F. W. Bird & Son., who were established in East Walpole, Mass., in 1817. Their brand, which is called Paroid, is familiar to railroad systems and to builders and dealers all over Canada. The steady growth of the Paroid business compelled the manufacturers to build an extensive plant at Hamilton, Ontario, last year, the plant being shown in the accompanying engraving.

Paroid is made from start to finish in F. W. Bird & Son's own mill. The foundation, or felt, is made from strong wool felt and this felt is soaked in a special water and weather proof preparation. The felt is then given a thick, strong, and pliable coating. It is not affected by extreme cold nor will it run or dry out in the heat. Sparks and cinders will not ignite it and fumes and gases of all kinds have no effect upon it. Sufficient roofing caps, nails, cement for the joints and complete directions are packed inside of each roll and a jackknife and hammer are all the tools required for laying it.

A patent has just been granted to F. W. Bird & Son on a new rust-proof roofing cap, which has many advantages over the ordinary roofing cap. The Paroid cap is made of sheet steel and there is no chance for irregularity in thickness or in shape. It is square and, therefore, has more binding surface than the round cap. This is important because a roofing cannot be fastened too tight. Their cap is also waterproof all over, which prevents rusting and leaks.

The Paroid roofing manufacturers have a good advertising plan for getting business for the dealers and readers should write them for their dealers' proposition.

F. W. Bird & Sons' Hamilton Plant.

1907 Calendar.

A very handsome calendar has been issued by E. A. De Laplante, hardware merchant, East Toronto, whose original and extensive advertising has advanced him to a position as one of the foremost retail merchants in Ontario.

Electric Fixtures.

Pass & Seymore, Solway, N.Y., have forwarded one of their latest catalogues of electrical fixtures and supplies. The book comprises over one hundred pages illustrated by cuts of various lines of supplies manufactured and sold by this company. The company is represented in Canada by R. E. T. Pringle Company, Montreal and Toronto.

Turner Brass Goods.

An illustrated catalogue, No 50, has been issued by the Turner Brass Works, Chicago, with several hundred cuts, containing information concerning the construction of articles manufactured by them, including mechanical appliances using as fuel, gasoline, kerosene, alcohol and gas. The catalogue should prove exceedingly useful to painters, plumbers and hardware dealers, and will be mailed to any dealer on receipt of name.

IVORY HANDLED CUTLERY.

The manufacturers of cutlery in Sheffield are facing a marked advance of certain raw materials, which may affect seriously the price at which the finished article can be placed upon the market. Celluloid has advanced about 10 per cent., and even more serious than this is the recent advances in the price of ivory. Within a short time past this material has advanced £12 per hundredweight in price. For a number of years past the Sheffield buyers who have attended the ivory auction sales have declined to bid because they could not afford the prices paid for ivory by American manufacturers of piano keys, who were apparently in need of all of the stock that was offered. It is said, on good authority, that in the past three months Sheffield has cut up for use the smallest amount of ivory ever before used in that period of time.

It is just as important that clerks and proprietors should have the qualities of salesmen and of honest men back of them, as it is that they should have quality and honesty back of the goods that they sell.

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1446. Steel constructional work, &c.—North England firm would be pleased to quote prices to Canadian enquirers for bridge building work, constructional steel work for roofs, and all kinds of iron and steel constructional work.

1450. Machinery.—Yorkshire firm manufacturing every description of woodworking machinery for sawing, planing, moulding, mortising, &c., invites Canadian inquiries for these goods.

1448. Sectional and structural steel, &c.—North England firm manufacturing sectional and structural steel, beams, angles, channels, flats, &c., invites correspondence with Canadian buyers. Catalogues and section books sent on application.

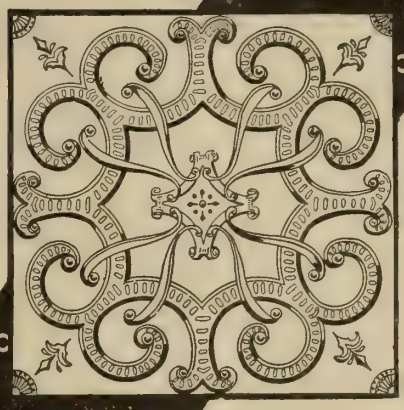
1432. Paints and varnishes.—A firm in England would like to get in touch with Canadian importers of paints and varnishes.

1433. Iron and steel bars, joists, &c.—A London firm, doing an extensive shipping trade and in a position to compete favorably, desire to extend their connection to Canada, and would be pleased to correspond with buyers of all sections iron and steel bars, joists, angles, tees, channels, &c., galvanized, corrugated, tinned, leadcoated, sheets, tank, boiler, ship and tinplates, hoops, nails, wire, gas, water and steam tubes, chains and anchors. Specialties in large and small machine tools particularly suited to colonial markets, giving handsome return, combined with unlimited scope for large turnover.

A NOVEL BUSINESS PLAN.

Watt & Squire, hardware merchants, Brantford, are planning a calendar exhibit early in January, to which they invite their customers and Brantford citizens generally. They are asking for the co-operation of manufacturers of hardware and kindred lines as well as jobbers, all being requested to send copies of their calendars for 1907 as soon as issued.

Watt & Squire, through the means of this exhibit expect to interest their customers in many new lines. It would be a good plan for them to have some suitable souvenir for distribution to all who visit the store during the exhibition, and to announce the fact generally through the local newspapers.



WINNIPEG HARDWARE HOCKEY LEAGUE.

The Wholesale Hardware Hockey League, of Winnipeg, held their annual meeting at the office of Geo. D. Wood & Co. The gathering was a most enthuiastic one, and the season of 1906-1907 promises to be a very successful one.

The following officers were elected: Patrons, Geo. D. Wood, J. H. Ashdown, H. Miller, H. Annis, J. E. A. Wildman; President, A. A. Cattanach; Vice-President, W. Reynolds; Secretary-Treasurer, H. H. Trigge; Executive Committee, Thos. Hodgson, J. F. Foulds, E. M. Elliott, J. Erwin, Norman Bell.

INTERIOR DECORATION

THAT RETAINS IT'S BEAUTY!

Our Metallic Ceilings AND Walls

are in highest favor with practical and artistic people alike.

We make countless beautiful designs, with borders, friezes, dados and every detail to match; they are easily applied, in old buildings over plaster, or in new ones where plaster is not required.

They are suited for every building where practical, durable beauty is desired in the decorative finish, and are fire-proof and sanitary.

EXPENSIVE? Not at all. First cost is small. The plates are so carefully made they fit accurately.

We will give you an estimate if you send an outline showing shape and measurements of your ceilings and walls. Let us hear from you.

FOUNDRY AND METAL INDUSTRIES

WHERE THE WORLD'S NICKEL COMES FROM.

One of the most valuable metals of commerce is nickel. Gold is where you find it—and so is nickel. Up to the present time, nickel is found only in two places—eatern Australia and in the region of Sudbury, Ontario. These Canadian nickel mines were discovered by accident, and for years went begging for recognition—no one seemed to know the metal had any value.

When the Canadian Pacific Railway was building its main line through Western Ontario, the graders cut through a rock formation carrying both copper and iron. This was a point north of Georgian Bay, now known on the map as Sudbury.

The per cent. of copper in the rock was small, running from two to three per cent., but it was sufficiently rich to warrant an attempt at development. The Canadian Copper Company was formed, and the Copper Cliff mines opened up. The ore was shipped, some to Wales, and some to the copper reducing works at New Jersey.

Combined with the copper, was another metal besides iron. No one seemed to know what it was. It was new to the experts, both at the mines, and at the reduction works. So the New Jersey smelter allowed it to run off with the slag. Not so with the Welshmen—they knew the metal and also knew its value. Like good business men they kept their secret and bought all of this particular copper ore they could get—the nickel was worth more than the copper—and it was clear profit. But the secret at last came out, and the Sudbury copper mines became the greatest nickel mines in the world.

The mines at Copper Cliff, a few miles from the present town of Sudbury, resembles the ordinary copper mines—the shafts have already reached a depth of 1,200 feet—and the nickel-copper bearing vein shows no sign of exhaustion. The Creighton mines, however, are like the mines of the Mesaba iron range—vast excavations where the steam shovel has laid bare acres upon acres of rich ore—there seems to be no limit to the amount. The ore runs about two per cent. copper, six per cent. nickel, 40 per cent. iron and the rest mostly sulphur. After reduction, a ton of ore will turn out about 120 pounds of nickel, which now bring 40 cents per pound.

The ore is partially reduced at the mines. It is crushed and screened, then spread out over vast beds of cord wood—acres in extent. Fire is applied, and the ore roasts for sixty days. This process drives out most of the sulphur leaving the metals in a form called matte. This matte is shipped to the refining works in Constable, N.J., where the nickel of commerce is made.

A large iron foundry and machine shop is to be erected at Anaconda, B.C. Messrs. B. A. Isaacs and R. W. Hinton, of the Nelson Iron Works, are promoters of the enterprise.

Prepare *Now* for Spring Business

The wise dealer is preparing *now* for his spring business. It is profitable to prepare early and get into the game early. It is also profitable to make a careful selection of the lines for the spring trade. Such business acumen augers well for success.

The dealer who selects ***Sherwin-Williams Paints and Varnishes*** for his trade makes a wise and discriminating choice. He not only secures products that are standard of excellence, but he opens up almost limitless selling opportunities. He places behind him the reputation of The Sherwin-Williams Co. and its strong advertising and promoting organization. He is given co-operation from start to finish in building up a trade.

Prepare now for your spring paint and varnish business by becoming a Sherwin-Williams agent and securing all the high prestige that affords. Our advertising helps this year are the best we have ever prepared. We want our agents to get an early start, and we want to get an early start, too, in going after the business for them and with them.

Let us hear from you today about our proposition.

Paint, Oil and Brush Trades

PAINTS A HARDWARE LINE.

Paint is one of the composite parts of the hardware business instead of, what a great many people have thought and still think, merely a side line, writes J. H. Sayward, a successful hardware merchant. We necessarily go after the house owner or his finishings in the line of hardware throughout, and in doing this we necessarily have a splendid opportunity to sell, or at least try to, the paint.

Confidence is a very successful requisite in making a thorough success of the paint business as well as anything else that is, confidence in the manufacturer from whom you purchase and in his ability to make good goods, and confidence in your own ability to instill into your customers your own thorough belief in the advantageous qualities of prepared paint over the much-mooted lead and oil.

Ability to thoroughly instill into your clerks your confidence in the product you purchase is a very important factor, and furthermore, they should be thoroughly competent to instill that same degree of confidence into the prospective customer. I fully realize that this is a pretty stiff problem for us all, yet we are very dependent on our clerks, and, as a matter of fact, from my own point of view, their thorough familiarity with the product is of even greater importance than my own.

A Personal Experience.

I do not know of any better way of demonstrating to you the advisability of paying attention to the paint end of the business than by giving you a brief outline of my own experience. I have been in business for a great many years, and up to 1898, although I had handled paint for a number of years previous to that time, my paint purchases, aside from lead and oil, were very small.

In 1898 my lead sales were probably from 12 to 14 tons per year. In 1904 I possibly sold four tons. From a profit point of view, without my entering into it, you will note that the returns from lead sales were extremely small and, in fact, it has been contended, and rightfully so, for a good many years that you practically roll 15 per cent. out of your store with each keg of lead, and oil and turpentine would appear in the same catagory.

In 1898 I had an opportunity to take the agency of a reputable paint manufacturer, a concern who not only manufactured first-class goods, but also firmly believed in effective advertising and system in following up. I first visited the factory and spent some time in satisfying myself that the paint was what they claimed it to be. Instead of using my own methods I adopted theirs to a very great extent, and with the advertising which I have always done have reaped the reward not only in increased sales but in increased profits as well. From this concern I purchased in 1898 $496 worth of goods, increasing my purchases year by year, until in 1904 I bought 842 per cent. more paint than in 1898, while there has been a decrease of 71 per cent in my lead purchases.

Figuring my gross profit on lead in 1898 at 16 per cent, I made $230, whereas, figuring 33 1-3 per cent. on paint, my net returns were $1,560 in 1904. Therefore, you will readily see that attention to this important branch of our business pays.

Advantage of Prepared Paint.

I have always made it a point to use a pencil to a very great extent in demonstrating to the prospective customer why he should use prepared paint instead of lead and oil, pointing out very clearly the fact that he should acknowledge the ability of the manufacturer to take lead, zinc, turpentine, dryer and tinting colors and thoroughly assemble same by formula and machinery much better than the average painter could take the same ingredients and mix them together by the rub of thumb and paddle. Furthermore, it has always been my contention that a painter in buying several different articles has the corresponding number of concerns to contend with in case of difficulty, whereas in using prepared paint, in case of any difficulty he has simply the dealer and the manufacturer to look to. In case of difficulty we find the reputable manufacturer ready to listen to his troubles through the dealer, whereas with lead and oil there is practically no redress and never has been.

I have also pointed out the fact that the painter is obliged to go to the manufacturer and buy the several ingredients contained in the paint, and such being the case, why is it not feasible that the manufacturer of several ingredients should be in a better position than the painter to incorporate these ingredients by machinery? A paint mixed by the

Paint and Oil Markets

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 14, 1906

There was a little excitement in turpentine early in the week, as it was thought that the Government had taken off the duty, and holders naturally receded in their price. But later advices from Ottawa do not warrant this assumption, and normal figures have been resumed, pending authoritive information on the subject.

New prices for white lead are out this week. The leading grinders now quote another advance of 50 cents per hundred pounds, as will be seen by our detailed statement of current quotations.

Quotations on paris green for the season of 1907, have just been issued by the Canadian makers. These prices will be noticed in our list this week, and they will hold good until further notice.

Prices on ground white zinc have also been advanced 50 cents per hundred pounds, as a result of stiff conditions in primary markets.

LINSEED OIL.—The situation is unchanged. We continue to quote: Raw, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.; boiled, 1 to 4 barrels, 58c.; 5 to 9 barrels, 57c.

TURPENTINE.—After a flurry during which prices came down because it was thought the Government had taken off the duty, things have settled down again, and we continue to quote the following prices: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD.—Owing to continued high prices in pig lead, the leading Canadian grinders have again advanced their quotations, and we are now quoting: Best brands Government Standard, $7.25 to $7.50; No. 1, $6.90 to $7.15; No. 2, $6.55 to $6.90; No. 3, $6.30 to $6.55 all f.o.b., Montreal.

DRY WHITE ZINC.—We still quote as follows: V.M. Red Seal, 7½c to 8c; Red Seal, 7c to 8c; French V.M., 6c to 7c; Lehigh, 5c to 6c.

WHITE ZINC (ground in oil)—Manufacturers have raised their prices, and we now quote: Pure, 8½c to 9½c.; No. 1, 7c. to 8c.; No. 2, 5¾c. to 6¾c.

PUTTY—A heavy demand is shown. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—The following quotations are firm: Genuine red lead in casks, $6.00; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

PARIS GREEN.—Canadian manufacturers have issued their price list for the season of 1907. Quotations are as follows: In barrels, about 600 pounds, 23¼c. per lb.; in arsenic kegs, 250 lbs., 23½c.; in 50 lb. drums, 24c.; in 25 lb. drums, 24½c.; in 1 lb. packets, 100 lbs. in case, 25c.; in 1 lb packets, 50 lbs in case, 25½c.; in ½ lb. packets, 100 lbs in case, 27c.; in 1 lb. tins, 26c. f.o.b. Montreal. Term three months net or 2 per cent. 30 days.

SHELLAC—Our prices are:—Shellac Bleached, in bars or ground, 46c per lb., f.o.b. Eastern Canadian points, Bone Dry, 57c per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 48c per lb. f.o.b. New York.

SHELLAC VARNISH—The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

BENZINE—We still quote 25 cents in barrels, and 30 cents in smaller quantities.

WINDOW GLASS—Our prices are: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, December 14, 1906

Big surprises have developed in the paint markets this week.

The continued use of material has compelled another paint manufacturer to advance the price of paints, the Canada Paint increasing their quotations with another probable advance of 5 cents early in the spring. Their quotation is now $1.30 per gallon.

White lead has gone almost out of

YOUR PAINT TRADE FOR 1907

will be interesting if you do it with

LET US POST YOU

A. RAMSAY & SON COMPANY

Est. 1842 **MONTREAL** **PAINT MAKERS**

Just try some ordinary green paint on a panel of wood, see how hard it works,—don't cover, lacks body. Then try on another panel

LUCAS IMPERIAL FRENCH GREEN

notice how easy it spreads, how well it covers,—that's body. Makes the cost less for this reason alone, and stays fresh and brilliant. It preserves the wood, keeps the weather out and the color in. It is the **ONE** Green that is free from arsenic or verdigris.

BEWARE OF IMITATIONS

JOHN LUCAS & CO.

NEW YORK, PHILADELPHIA, CHICAGO

A GOOD RULE!

A good rule is a good thing to go by, provided you know the rule is correct and dependable.

For instance—

IT'S A GOOD RULE

to make every effort not only to hold, but to increase your business — that goes without saying.

IT'S A GOOD RULE

to get acquainted with the quality and make up of the goods you handle—you can talk them to better advantage to your customers.

IT'S A GOOD RULE

to have an iron-clad guarantee from the manufacturers as to the ingredients in the paints you are selling, or intend to sell—it shows your good, hard-headed common sense.

We guarantee the **Martin-Senour 100 per cent. Pure Paint** (except a few dark shades that cannot be prepared from lead and zinc) to be made from Pure Carbonate of Lead, Pure Oxide of Zinc, with coloring matter in proportionate quantities necessary to make their respective shades and tints, with Pure Linseed Oil, Dryer and Turpentine for thinning, and to be entirely free from Water, Benzine, Barytes, Whiting and adulteration, and sold subject to chemical analysis.—*The Martin-Senour Co., Ltd.*

IT'S A GOOD RULE

to have the exclusive agency in your town of the **Martin-Senour Paint, 100 per cent. pure,** because the agency will enable you to have the best paint trade in your locality, and you will find it

A GOOD RULE

to **write at once for particulars of our proposition** and the line of advertising supplied our exclusive agents. Just send a post card and you'll get a prompt response.

The Martin-Senour Co., Ltd.

NOT for the simple reason that it is "Made in Canada" are you asked to buy The Canada Paint Company's

PARIS GREEN

but because it is strictly pure, of the highest class and warranted superior to the Government standard.

THE CANADA PAINT COMPANY LIMITED

Makers of Paris Green

sight, it having advanced 60 cents per cwt., on last week's quotations, the advance being in line with our recent predictions.

The general shortage and high price of pig lead in all markets had placed merchants on the lookout for a raise, but the advance quoted this week is beyond all expectation, pure white now being quoted at $7.40.

Turpentine and boiled oil have not advanced further, and remain as quoted last week.

Another tremendous advance is quoted on paris green, an advance of about 30 per cent. over last year and of about 40 per cent. over that of two years ago. The cause is quite apparent, the large advances in copper, and the fact that the arsenic mines in Austria were damaged by flood some time ago, causing a great scarcity of arsenic. Canadian manufacturers are quoting their base price at 25c. and on English 25¾c. is quoted f.o.b. Toronto.

And where formerly orders were accepted dated June 1st, terms are now changed and all orders are taken, 2 per cent. 30 days from date of shipment. This will mean that both jobbers and retailers will not stock up as early as usual.

WHITE LEAD — Ex Toronto, pure white, $6.95; No. 1, $6.42½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $7.00.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6.50; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.25.

DRY WHITE ZINC— In casks, 7 1-2c.; in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 80c. per gallon.

PARIS WHITE—90c. in barrels to $1.25 per 100 lbs.

WHITING—60c. per 100 lbs. in barrels; Gilders' bolted whiting, 90c. in barrels, $1.15 in smaller quantities.

SHELLAC VARNISH—Pure orange in barrels, $2.70; white, $2.82 1-2 per barrel; No. 1 (orange) $2.50; gum shellac, bone dry, 63c., Toronto. T. N. (orange) 51c. net Toronto.

LINSEED OIL—We still quote: Raw, 1 to 4 barrels, 57c.; 5 to 9 barrels, 57c.; boiled, 1 to 4 barrels, 60c.; 5 to 9 barrels, 59c. Toronto, Hamilton, London and Guelph; net 30 days. Advance of 2c. for delivery to outside points.

TURPENTINE—Single barrels, 97c.; 2 to 4 barrels, 96c.; f.o.b. point of shipment, net 30 days. Less than barrels, $1.02 per gallon.

GLUES—French Medal, 12 1-2c. per pound; domestic shee', 10 1-2c. per lb.

PUTTY—Ordinary, 800 casks, $1.50; 100 drums, $1.75; barrels or bladders, $1.75; 100-lb. cases, $1.90;; 25-lb. irons, $1.85; 25-lb. tins (4 to case) $1.90; 12 ½ lb. tins (8 to case) $2.10.

LIQUID PAINTS—Pure, $1.20 to $1.35 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS—Gals., 70c. to 80c.

BRIDGE PAINTS—Gals., 75c. to $1.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

PAINTS A HARDWARE LINE.

(Continued from page 48.)

painter from lead and oil is more expensive than a good paint purchased from the dealer, for the reason that although it costs less per gallon it costs more per quantity. In other words, it will take one-third less prepared paint to paint a house than a paint made from lead and oil; consequently you have appealed to the man's pocket, and your reputation as a merchant backed up by the reputable manufacturer's goods handled by you should clinch the argument.

Carry a Complete Line.

I carry the complete line manufactured by this concern, and when a customer mentions paint I try to find out first what is to be painted and then proceed to sell the customer a special paint that is made for that particular purpose, and by doing so I show the customer I am interested in giving him what is right. When he finds out on using the goods that I was right and the job is even better than he expected that man is sure to come again for paint or anything else he may need in my line. I also display in a prominent place in my store all the different kinds of paint I have, and keep my windows talking paint nine months out of the twelve. In many other ways I keep reminding the public that I sell paint, and long before the painting season opens I have sold paint for several houses. I keep a record of each color of the house paint as it comes in, and it keeps me to a great extent in ordering a new supply, as I can determine very quickly just how much of that particular kind I have sold in any given time.

Keep a Card Record.

I keep a card record, a card index, of all the paint sold for outside painting, entering the data, quantity, different shades, and weather conditions, and in that way am not only able to determine when the paint was applied and under what conditions, in case of difficulty, but also have a means of interesting the new customer, for by referring him to or showing him where I have sold paint to Bill Smith and John Brown, men with whom he in the majority of cases is well acquainted, I impress upon him the fact that there must be some virtue in it or these men would not use it, and in this way I am also able to refer him to houses which in many instances have been painted for a number of years.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

Another nitro-glycerine factory has been started at Petrolea.

Wingham is after a $15,000 grant from Andrew Carnegie for a Public Library building.

The Marine Iron works, of Victoria, B.C., was damaged by fire to the extent of $5,000.

A new Presbyterian church will be erected in St. John, N. B., at the cost of $50,000.

The village of Dublin is to be lighted by an acetylene gas plant now being installed by the Kurtz Company.

The Manitoba Cartage and Warehousing Co., are applying for authority to increase their capital stock from $150,000 to $250,000.

John Glenn, Dungannon, is completing a machine which is an invention of his own, for the making of small cement tile for farm use.

The Macdonald Manufacturing Company, Toronto, have secured a permit for the building of a four storey addition to their factory, to cost $18,000.

A warehouse will be built at Saskatoon for the Manson, Campbell Co. and the Chatham Carriage Works, to be used as a distributing centre for their vehicles in the West.

West, Taylor, Bickle & Co., broom manufacturers, of Norwich, Ont., have moved their head office to Toronto, and will build extensive additions to their factory at Norwich.

Fire supposed to have originated from a workman's torch destroyed the C. N. R. boiler shop in Winnipeg and much valuable machinery. The loss is between $60,000 and $100,000.

The National Cement Company of Durham, is in a very flourishing condition, having turned out 1,110 barrels per day all summer. They will construct a building for storage purposes, which will be 250 feet long and 50 feet wide.

Tenders are being asked for city supplies for Calgary, Alberta, and will be received by H. E. Tillis, city clerk, until the 31st of December, for the following materials: cement, lead pipe, corporation cocks, cast iron water pipe, sewer pipe.

The Fernie strike has cost nearly a million dollars—the Crow's Nest Coal Company has lost $500,000 in profits, and it will cost $50,000 to place the mines in good condition again. The men lost $300,000 in wages and the Government lost $20,000 in royalties.

Asbestos in payable quantity and quality has been discovered in the Transvaal. An expert who has examined the deposit states that it is of abnormal width and equal to the finest in Canada or Italy. An offer of £10 per ton has been received from Germany for the best quality.

Tenders are being asked for the supply and delivery of various articles of timber, hardware, castings, furl, paints, oils, etc., for use on the Welland Canal and its branches, for the year 1907. Tenders will be received at St. Catharines until Monday, the 31st of December, 1906.

One enterprising lumber firm in British Columbia, are building a small town on their limit, having erected houses for the married men, and plans are being prepared for the erection of a large hotel for the accommodation of the unmarried men, with a $2,000 bowling alley in the building.

Building permits to the value of $136,000 have been issued in Toronto since Dec. 1st. These permits include 34 dwelling houses, the Independent Oddfellows' Hall, $10,000, a factory for Walter Davidson & Co., $19,400, and a one and two storey brick additions to the Canadian Oil Company's factory to cost $20,000.

The Dominion Carbonic Company has been incorporated with a share capital of $40,000, with head office Toronto, for the purpose of manufacturing gas, and dealing in all gas products, chemicals, and chemical products. Provisional Directors of the company will be R. J. Quale, and H. Woodbury, of Buffalo, N. Y.; Allen and J. J. Maclennan, of Toronto.

A company has been formed for the purpose of building and equipping cars for railways, also to manufacture all railway equipment and appliances. The corporate name of the company will be the National Car Company, with a share capital of $300,000, and head office at Toronto. The Provisional Directors of the company will be A. Stewart, T. H. Kilgore and L. Williams, of Toronto.

The Frost Wire Fence Co., of Hamilton, has not been affected in any way by the giving up of the charter of the Frost Wire Fence Co. of Welland. At the time the Frost Wire Fence Co. moved from Welland to Hamilton the Company was reorganized and a new charter secured. The cancellation of the old charter has only recently been attended to, and this has caused the confusion following the announcement that the Company had given up its charter.

The Collingwood Shipbuilding Co. have under construction for the Midland Navigation Co., the largest propeller ever built in Canadian or United States waters. Work on the new leviathan, the Midland Prince, was begun early in June. This last and incomparably the largest addition to the freight carriers on the Lake Superior route is 486 feet over all in length and 55 feet wide, with what is known as a molded depth of 31 feet, while her engines are of 2,500 horsepower.

The Ontario Bank is petitioning for the winding up of the William Hamilton Manufacturing Company of Peterboro, which makes saw-mills, mining machinery, etc. The bank's specific claim is about $200, but there is an overdue promisary note for $66,000. The company was formed in 1883, with an authorized capital of $200,000. Of this $80,-

000 was issued in preferred stock and $100,000 in common. On December 6th the company met and decided to admit insolvency. There are 225 employes, and wages are due.

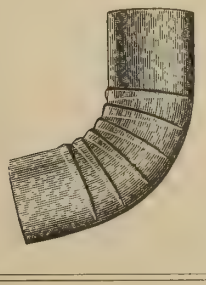
Large discoveries of iron have been made near Port Arthur, Ont., development work is now in progress and plans are being laid for the building of an ore dock at Port Arthur to be ready for operation on May 1st, 1907. The ore will be quarried out of the face and carried to a crusher by aerial cable. From the crusher a light railway will convey the ore to the chutes on the dock, whence it will be delivered directly to the vessel alongside. The plant is being designed with a tonnage capacity of 3,000 tons a day of ten hours, with loading capacity of 6,000 tons every 24 hours, which will mean that a vessel will remain at the dock only one day.

In addition to the two important industrial bylaws passed by the Town of Goderich recently, there are three more occupying the attention of the Council. The Rogers Mfg. Co., of Toronto, the Kensington Furniture Co., and the Goderich Carriage Co., are asking for loans amounting in the aggregate to $80,000, and these will be submitted to popular vote on municipal voting day in January. The first-named Company purchased last week the plant of the Goderich Engine Co., and propose to add to it and manufacture certain railway specialties, a patent open-end journal box for railway cars, dust-proof guards and a lubricator box. The Kensington Furniture Co., controlled by the Rumballs, of London, propose to double their plant and the number of hands employed, if the loan is secured, and the Carriage Company is composed of local men, who intend to very much enlarge the Walker Carriage works.

L. O. Armstrong, colonization agent of the Canadian Pacific, who has just returned from a northern trip, states that the indications are that many important new mining camps will be made known as soon as the coming of spring warrants the commencement of operations. "Active development," he says, "is going on in the graphite fields in the Laurentians, directly north of Montreal. They have already aroused the keenest interest on account of the strong demand for graphite, particularly the quality used for making crucibles, which must be free from mica, because mica melts and causes a loss of the precious metals that are treated in the vessel. Where the mica has been melted away the graphite crucible is found to be full of small holes that look as if they had been perforated with pins. Metal refiners to whom the Laurentian graphite have been submitted pronounce the specimens to be pure and good. These opinions have greatly encouraged development work, and the indications are that shipments will begin practically forthwith."

HANDLE INDUSTRY EXPANDS.

American hickory axe and hammer handles have been imported in fairly large quantities in the past by Canadian hardware jobbers, but the expansion of the business of the J. H. Still & Co., St. Thomas, will make it practically unnecessary for any foreign goods to be imported in future. On the manufacture of handles a duty of 25 per cent. has been imposed while raw material in the shape of billets of hickory timber can be imported free. The Still Company, during the past summer, secured extensive timber limits in the South and this fall commenced the importation of second growth Southern hickory for use in the manufacture of their best grades of axe and hammer handles and hockey sticks.



The company has now adopted a plan of branding the above lines, the names chosen being "Empire" which will be pure white hickory, "Imperial" containing very little red hickory, and "Champion," which will be all red hickory. All of these lines will be highly polished and waxed besides having the label attached, this guaranteeing the handles and sticks to be the best qualities manufactured, and the only Canadian lines which are branded by manufacturers. Dealers who have not yet received samples and prices on these new lines can secure them on request.

The Still factory is working night and day endeavoring to keep pace with the demand for handles and hockey sticks, they still continuing to make tool and fork handles of northern woods. In previous years the manufacture of hockey sticks was discontinued about October 1st, but the demand this year has been so great that the factory is still turning out thousands of sticks weekly, and it is probable that they will continue to be cut until about February 1st, in order to keep the jobbers supplied and able to fill sorting orders received from retailers who have been unable to secure quantities ordered by them for fall delivery.

A NEW TYPE OF BUILDING CONSTRUCTION.

There has recently been completed in New York City a new type of building construction which promises to become as well known in its line as the steel cage construction of a decade ago. This building, which may be briefly described as a structure of reinforced concrete built on a steel fabric and covered with sheet metal, is designed to be strictly fireproof. By this method of construction an ornamental exterior can be secured which is not subject to the danger of chipping by fire, as is the case when granite or stone is used. A building of this type has been opened to the public as the uptown station and ferry house of the Delaware Lackawanna & Western Railroad. The building above the floor is entirely of fireproof material, except where wood strips are used for nailing pieces to fasten the copper which covers the entire outside. The interior is finished in staff and white marble.

Plumbing and Steamfitting

THE PLUMBING OF A COTTAGE

By J. A. F. Cardiff in the National Builder, Chicago

Article XIII.

Sub-Soil Drains.

In locations where foundation walls are exposed to surface water, sub-soil drains are provided to receive and carry away the water so as to prevent it from percolating through the walls and causing damp or wet cellars.

They are constructed in the following manner: The excavation for the main building is made about eighteen inches larger all around than the building, and that portion of the excavation which is outside of the foundation wall (A Fig. 56) is carried to a depth of about ten ins. below the bottom of the footing course (B). A foundation for the drain is made by filling in to a depth of four or five inches with broken stone or large size gravel, tamping until it forms a firm bed and sloping one-half of an inch to the foot.

The drain is then laid all around the foundation walls and consists of field tile (E) laid with one-half inch open joints (H), through which the surface water enters. Gutter pieces (G) and cap pieces (F) are provided to cover all open joints so as to keep out dirt. Burlap, muslin, tar paper, and similar materials are also used to cover the open joints.

The excavation outside of the foundation walls should be filled in with broken stone or large, coarse gravel (C) up

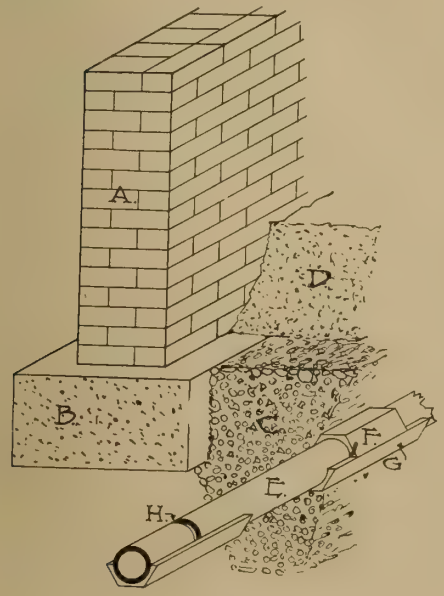

Fig. 56.

to the top of the footing course The filling should be carefully packed about the drain. Above this, the filling should consist of sand, gravel or other porous material, except the top twelve inches which may be of top soil or loam (D) suitable for gardening.

All surface water about the building will readily flow through this porous filling and, entering the drain through the open joints, will pass away.

Where there is considerable surface

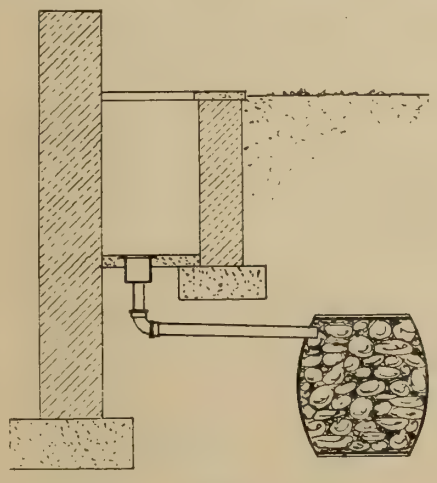

Fig. 57.

water, the drains are connected to the house sewer or other means of sewage disposal and are trapped close to the house sewer. Where there is only a small amount of surface water, the drains are frequently discharged by running spur drains from the corners of the building and discharging them through the ground about ten or fifteen feet from the building.

In many of the more modern cottages which are exposed to surface water, the sub-soil drains are omitted and the foundation walls and cellar floor are waterproofed instead, so as to render them impervious to moisture. This waterproofing consists of tarred felt in three or four layers, put together with hot coal tar pitch. It is carried down on the outside surfaces of the walls from grade level to the footing course, through the wall at that point, and on through the concrete paving of the cellar floor. The paving is put down in three layers; the first two inches thick as a bed for the waterproofing, the second three inches thick over the waterproofing, and the third a cement finish one inch thick.

In locations where the ground is porous, the surface water in areas is frequently disposed of by sub-soil drainage instead of being emptied into the house drain. This is done by sinking a barrel (Fig. 57) below the area floor and a couple of feet beyond the area, and filling it with loose stone, broken stone or large sized gravel. The cast iron cesspool or catch basin in tke area floor is then connected to the barrel by means of a length of earthenware pipe. In this manner the surface water is distributed through the ground.

HUMIDITY AND VENTILATION.

In the design of any system of heating the engineer should plan to furnish sufficient heat to maintain a comfortable temperature, sufficient moisture to keep the humidity normal, and sufficient fresh air to dilute the gases of respired air to a point where they become harmless.

From the effects of deficient humidity the rich suffer more than the poor. Among the poorer people the kitchen stove is often the only source of heat; and a boiling kettle keeps the humidity normal. In flats heated by a hall stove, a water pan helps to moisten the air, and similarly houses heated by hot air furnaces have a tank from which water evaporates. It is therefore, chiefly with steam and hot water heating that we find too dry an atmosphere and its consequent effects, overheating and stuffiness.

Water vapor exists in the atmosphere and mixes with it just as does any other gas. It is a common fallacy to consider that water is absorbed by the air, though a vapor will form whether air is present or not. Water exists in three states, solid, liquid, and gaseous, 212 degrees F. being the boiling point at atmospheric pressure. Below the boiling point a vapor will form, but there is a limit fixed by the temperature and pressure to the amount of vapor which a cubic foot of space may contain. When this limit is reached evaporation ceases, and the vapor is said to be saturated. If the temperature is increased further evaporation may take place and if decreased some of the vapor will be forced back into the liquid state.

With the humidity as low as 30 per cent. the effects of dryness are very noticeable. A thermometer registering 70 degrees will drop, if the bulb is covered by a wet cloth, to 53 degrees. Moreover, a temperature of 70 in an atmosphere so dry will not be comfortable some people demanding from 74 to 76, and others as high as 78. The temperature recorded by the wet bulb thermometer is the temperature one would feel if ones clothes were saturated with moisture as after emerging from an accidental bath. Since the body is always kept moist, however, by excretions from the pores of the skin, the wet bulb temperature, plus a few degrees, is the temperature one always feels. On the other hand 70 with a normal relative humidity of 60 per cent. would be universally declared too warm. It is apparent, therefore, that to accept the readings of a dry bulb thermometer as a gauge of the sensible temperature is clearly unscientific, inadequate and misleading.

Moisture evaporating from the body

produces a sensation of chilliness, which is not in accord with the temperature, for evaporation invariably abstracts heat. The cooling effect of evaporation is well demonstrated by dropping on the skin a little ether, alcohol, or any other liquid which volatilizes at ordinary temperature. With the humidity normal the evaporation is so slow as to produce no sensible effect, for as the vapor approaches the saturation point the tendency to evaporate is not so strong. With the humidity at 30 per cent., however, the rate of evaporation is very rapid, making it necessary to maintain high temperatures in order to offset the chill of evaporation. Moreover, since different constitutions keep the skin differently moistened, a temperature satisfactory to one person may be too hot or too cold to suit another, if the air is dry enough to make the cooling effect of vaporation an important factor.

A standard Buffalo ventilating system has been used to a great extent to supply moisture with the entering air. An electric fan is used which draws the air through a water spray thoroughly cleansing and purifying the air and at the same time adding moisture. The Sovereign Bank, Montreal, have a plant in operation and other apparatus of a similar nature is being installed in the House of Commons, Ottawa, at the Molson's Bank, Toronto, and in Montreal at the Provincial Bank of Canada and the Western Hospital. These installations were made by the Canadian Buffalo Forge Co., of Montreal, who control the patents of the Air Washing apparatus.

THE SALE OF GAS APPLIANCES.

As a general proposition, gas companies should engage in the sale of gas appliances until the use of gas fuel becomes practically universal, but no longer. The length of time required to reach this happy condition depends largely upon the price of gas as compared with the price of other fuels, the climatic conditions, the value placed upon convenience and cleanliness by fuel consumers, and the energy and liberality of the gas company, said W. B. Cline in a recent address before the Pacific Coast Gas Association.

If, prior to gas becoming the practically universal fuel, the appliance business is wholly intrusted to regular dealers, the growth of the business will be very slow as compared with the result if handled solely or partly by the gas company. For the dealer has no particular interest in the sale of gas appliances, and furnishes his customers with appliances consuming whatever fuel they desire. Having sold the appliance the dealer's interest in it practically ceases. This is not the case with the gas company. Its interest lies in selling every gas appliance possible, and in seeing that the appliances are kept in good order and used after their sale.

Even after gas has become the universal fuel it may be necessary for the company to handle appliances in order to meet the competition of a gas supplier. The latter, in order to secure customers, may offer appliances on such advantageous terms that the company will be forced to meet these terms to protect its gas business proper.

One very important advantage to a gas company in not handling appliances is that contact with customers is thereby minimized. Dissatisfaction with the time taken to fill an appliance order, or the manner in which the work is done, or the amount of the bill therefor, is often the cause of the consumer treasuring up a grievance against the company, although he is well satisfied with his treatment otherwise.

Experience in Los Angeles.

As the gas company in Los Angeles reached, about the first of last year the point where the gas fuel became practically universally used, it seems as if I could not do better than offer its experience in proof of the correctness of my conclusion expressed at the beginning of this paper. For 15 years the company handled appliances on a large scale, and to promote their sale offered ranges, water heaters, appliance connections, house piping and plain lighting fixtures at cost, for cash or on installments of $1 per month; other appliances at cost, for cash. The installment plan was a tremendous booster to the business. Weekly free cooking lessons were given in a well appointed hall, an attractive salesroom was maintained, solicitors made house to house canvasses, and newspaper and other advertising was resorted to. Particular attention was given to houses along new mains, and solicitors did not relax their efforts until the use of gas fuel therein had been generally adopted. None but the best fuel appliances were handled, and orders were promptly attended to. House piping and plain lighting fixtures were placed only in premises which would not otherwise have been equipped for gas lighting, this fact being fully understood and our policy concurred in by gas fitting firms. On account of the low prices and liberal terms of payment offered by the company, there was no incentive for other stove dealers to push the sale of gas appliances; several of the dealers carried them, but naturally made but little effort to sell them.

During this period the company was burdened each month with attending to, in addition to legitimate appliance complaints, hundreds of trifling complaints, which the consumer should have remedied. The people had become so accustomed to depend upon the company to cure the slightest fault in the operation of their appliances that they did not hestitate to even frequently ask to have their burners regulated or their appliances cleaned. This entailed a very considerable expense upon the company.

About two years ago the company concluded that the time was rapidly approaching when the use of gas would become so practically universal that the appliance business could be safely intrusted to the regular appliance dealers. In order that thees dealers might be able to obtain a fair profit from purchasers without the latter feeling that they were being quoted prices very high as compared with the prices previously charged by the company, the company raised its prices and abolished its instalment terms.

Retirement of Gas Company as Retailer

About a year and a half ago the company retired from the appliance business, and the result has been entirely satisfactory. In the principal business section the business is now carried on by two or three exclusive gas appliance stores, practically every hardware store and department store, and many of the large furniture stores. These concerns advertise appliances quite extensively. In nearly every business settlement throughout the residence district appliances are sold and repaired. The appliances offered for sale are, in the main, of high grade, and nearly every make of such appliances is represented. Fair prices are maintained and the principal dealers sell for cash or on instalments. The dealers state that they had rather sell gas ranges than coal ranges; that the business is cleaner and less troublesome.

Altogether, the business is well handled, is on a sound basis and is booming. Eighteen of the principal dealers are selling in the aggregate an average of about 850 gas ranges per month; including as many more small dealers, it is safe to say that the total number of ranges sold per month is at least 1,000. Complaints and repairs are now well attended to at reasonable charges by several concerns, which make a special ty of this branch of the business. One of the largest dealers gives a guarantee with each stove sold that it will operate properly, and that for one year any necessary repairs will be made free of charge. Probably 95 per cent. of the gas consumers use gas for fuel. One prominent dealer recently stated that the gas appliance business had practically brought about his success, and many of the dealers declare that this line has become one of the most important branches of their business. To sum up, there are now dozens of dealers actively pushing the sale of gas appliances, whereas prior to last year the gas company was practically alone in the good work.

NOVEL GAS PIPES.

Paper pipes for carrying gas were recently described in a French journal of industrial chemistry. Manila paper, cut in strips of a width equal to the length of the pipes to be made, is put in a receiver filled with fused asphalt and rolled solidly and uniformly around a rod or core of iron until the desired thickness is obtained. After the pipe thus produced has been submitted to strong pressure the exterior is covered with sand and the whole cooled in water. The core is removed and the outer surface covered with a waterproof product.

Determine to use your energy in 1907 in planning to conduct your business along systematic lines and with the minimum of loss through credits.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 14, 1906.

Although there is nothing new to report, in the matter of prices, it is stated that the scarcity in iron pipe is being even more acutely felt, that at any time during the past few weeks. It looks as if quotations would have to be advanced, to meet the stringent condition of the market.

While orders are not so numerous this week, they are much in excess of the normal volume for this time of year. Travellers are nearly all off the road, and holiday conditions prevail generally. Prices are firm, on all lines.

RANGE BOILERS— Conditions are unchanged, and prices are as follows: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29,50; 40 gallon, $32 net.

LEAD PIPE—A good demand is in evidence. We still quote 5 p.c. discount f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c per hundred lbs extra; f.o.b. Hamilton, 10c per hundred lbs. extra.

IRON PIPE FITTINGS—Business is as usual. We give the following prices: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent., 3½ inch to 2 inch, 55 per cent.

IRON PIPE—An even more acute scarcity prevails. Our prices are: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, 11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27.00; 2 inches, $36.50, discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 70 per cent., and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—We still quote as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Nothing new has transpired. We still quote: Bar solder, half-and-half, guaranteed, 25c; No. 2 wiping solder, 22c.

ENAMELWARE—We give the following prices: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65 special, $18.65; plate E11 and E21 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, December 14, 1906

An advanced price on iron pipe from two to four inches is being quoted this week as predicted in our last week's issue, the advance being caused by higher duty imposed on these sizes of pipe from United States. All jobbers have not made the advance and considerable pipe is still being sold at the old quotations. Several houses, however, have already made a change. Pipe remains as scarce as ever, jobbers being unable to supply any of the most used size except when a car load is received and pipe is sent direct to customers without being carried in stock at all. Reports of many jobs being held up and plumbers and steamfitters forced to stand idle are being received from different parts of the country. Slightly lower prices are being quoted this week on cast iron fittings.

New figures showing lower discounts on Kerr Valves are being quoted in the current market quotations at the back of the paper, the advance averaging from 5 to 10 per cent.

Business in plumbing material has fallen off greatly on account of the winter weather, which has prevailed during the past fortnight. Business in heating materials is also declining and some jobbers whose business year closes on December 30, are already taking stock.

LEAD PIPE — The discount on lead pipe continues at 5 per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 6c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—The scarcity is not being relieved and work is being delayed. One-inch black pipe is now being quoted at $4.80 and one-inch galvanized at $6.43. Full list in current market quotations.

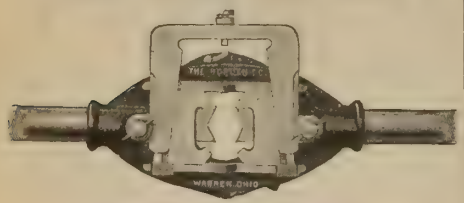
IRON PIPE FITTINGS — New lists are as follows: Cast iron elbows, tees, crosses, etc., 62½ per cent.; cast iron plugs and bushings, 62½ per cent.; flange unions, 62½ per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.

GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.

RADIATORS—Prices are very stiff at: Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain firm as follows: Bar solder, half-and-half, guaranteed, 27c.; wiping, 23c.

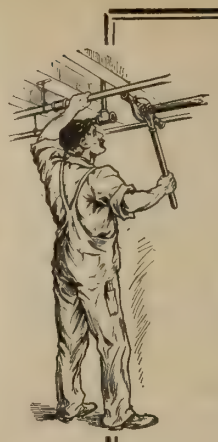
ENAMELWARE—A general 5 per cent advance on American and Canadian lines is looked for owing to tariff changes. We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25: plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.



CATALOGUE HOUSE GOT STUCK.

A catalogue house transaction which reflects the disinclination of such concerns to enter into competition for large furnace installations or belief in an insufficient capacity in their heaters is shown in the following experience of a furnace setter. An estimate was made for heating a large church having a pointed roof with a large glass exposure and cubical contents of about 120,000 feet. The furnace man offered to do the work with two high-class heaters for a stated sum. The amount was considered too high by one member of the church committee, who believed that the catalogue house was a panacea for all ills and accordingly he wrote for an estimate. After some figuring the catalogue house answered that such a building could not be heated with less than seven furnaces. Needless to say the furnace man got the contract to do the work.

PLUMBERS AS MEAT INSPECTORS.



Out-of-work plumbers have recently been appointed as meat inspectors at Battersea, Eng., and Pittsburg, Pa. Are these appointments made because the men in question are supposed to possess olfactory organs inured to unpleasant smells?

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

Points To Remember About "THE SOVEREIGN"

The Sifting Grate of "The Sovereign" saves a good many dollars annually because it saves pounds of good fuel daily.

There is no possibility of a leak because there are no internal joints in the water section of the boiler.

The advantages of the hot water system are emphasized where "Sovereign" hot water boilers are installed.

It pays the dealer to recommend "The Sovereign" all the time.

Write us and we'll tell you why.

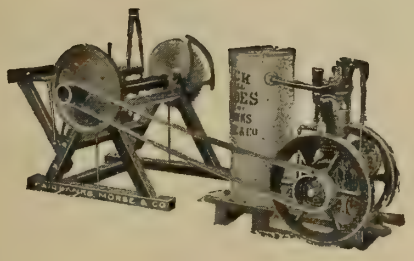
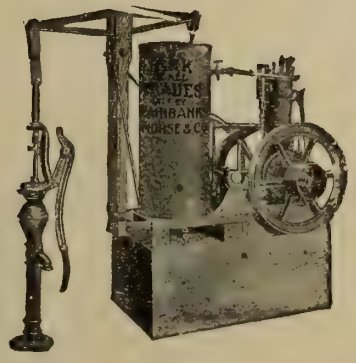
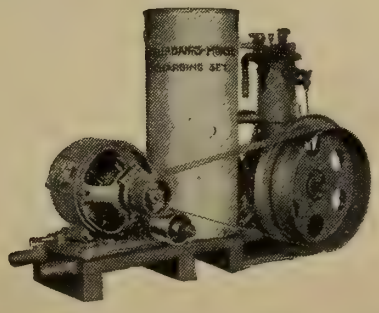
THE CANADIAN FAIRBANKS CO., Ltd.



FAIRBANKS STANDARD SCALES



FAIRBANKS MORSE GAS AND GASOLINE ENGINES, STEAM PUMP AND WIND MILLS



444 ST. JAMES STREET

MONTREAL, QUE., DEC. 22th, 1906

MR. HARDWARE DEALER:—

How many Farmers do you know in your district?

How many of these Farmers would buy from you, something they absolutely needed, if you had it to sell to them?

There is as much difference in farming methods of the present day, compared with 20 years ago, as there is between a town pump and an up-to-date fire engine. A Gasoline Engine, such as shown on the side of this letter, is as necessary on a farm to-day, as a horse or cow, and it is only a question of time until every Farmer will have one. It will pump his water, saw his wood, grind his feed, run cream separators, thrash, and in fact, furnish power for any purpose on the farm, as shown by the enclosed circular.

He has got to buy this Engine from somebody, and nine chances out of ten, he will buy the very best he can get, which is a FAIRBANKS-MORSE; he may not purchase this year, but he surely will next.

Why should you not be in a position to sell him this Engine, when he is ready for it?

Opportunity is now knocking at your door. We are starting in to appoint Agents for FAIRBANKS-MORSE Gasoline Engines for farm use for the year of 1907.

This entails no trouble whatever on your part, and if you will cut out and send us coupon herewith, and ask us for our agency proposition for 1907, we will go into this matter further with you, and show you how you can add materially to your profits for the coming year.

We advertise largely through newspapers, and by circulars, and our Agents get the benefit of this, in helping them to make sales.

We trust you will realize what an opportunity this is, and will write us at once.

RETURNED
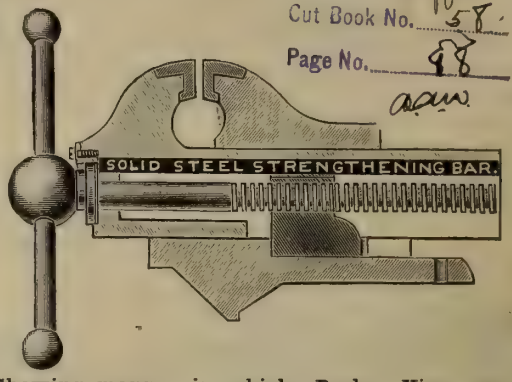
DEC 26 1906



Stationary Machinist Vise, made in 6 sizes with jaws 3¼-in. to 6¼-in.

Semi-Steel has a strength several thousand pounds greater than cast iron.

That is why it is used in Parker Vises.

The Parker Vises are made stronger in the weak part of all vises than any other vises are made.

RETURNED
Dec 24/06
to Montreal Office
Cut Book No. 58
Page No. 88
a.a.w.

Showing manner in which Parker Vises are strengthened by a solid steel bar.

RETURNED
DEC 26 1906

Same as above only made to swivel in any direction.

The sliding or moving jaw is the part most liable to break in any vise.

The Parker Company has provided against that danger by casting in the sliding jaw a solid steel bar strengthener. This improvement makes the jaw practically unbreakable. It is found only in Parker Vises.

RETURNED
DEC 26 1906

Heavy Swivel Chipping or Filing Vise, width of jaws 5 inches.

Parker Vises are made in all approved shapes and sizes for machinists, pipe fitters, wood workers, etc.

We keep a full line of Parker and other makes of vises.

DOLLARS FOR YOU

"MONEY SAVED IS MONEY MADE"

If we can save **YOU** money you won't feel badly about it. This is how it is.

American Hickory Axe and Hammer Handles have never come over the line duty free in our time—

THE RAW MATERIAL DOES

We figured that if we could secure timber concessions in the South we could save 25 per cent imposed on the finish product. You perceive!

We are already importing the second growth of Southern Hickory from our timber reserves for use in the best grades of axe and hammer handles and hockey sticks. For **YOUR** protection we have branded our best lines as you see below.

"**Empire**" line is manufactured of pure white hickory.

"**Imperial**" part red.

"**Champion**" is red hickory through and through.

These names stand for perfection and quality in handles and sticks.

Dealers should secure samples and prices at once. Study the labels for a minute. They mean more business and more dollars for you.

The J. H. Still Manufacturing Company, Limited

SIDINGS

There is nothing else so suitable as our steel sidings to dress up old buildings with and make them warm—They are also useful for a low priced building where attractive appearances are desired.

CEILINGS

When you sell and erect one of our classified designs you can always count on a well pleased customer—These designs do not get out of date same as patterns carrying out no idea. Give a customer a selection and he will invariably turn to our classified ceilings. They cannot get away from their richness.

The Metal Shingle & Siding Co., LIMITED

PRESTON, Ontario

Four Reasons why INVICTUS FIBRE is the BEST FIBRE PAPER on the Market

1. Invictus Fibre is made from personally selected pulp wood cut on our own limits.
2. This special pulp wood is again rigidly culled on arrival at our mills
3. The pulp from which Invictus Fibre is made is manufactured in our own pulp mill and transferred at once to the paper mill, avoiding all drawbacks of transportation.
4. Invictus Fibre will increase in strength and not grow hard and brittle as does fibre made from sulphite pulp. This is a quality of the peculiar and selected pulp from which Invictus Fibre is made.

A trial order will convince you that we are correct. See that each package bears the words "Invictus Fibre." Every ream contains 480 sheets

This Does Concern You!

Mr. Advertiser! Here's a little problem for you :—If General Nogi had sent a battalion against Port Arthur one week, half a battalion the next, a troop of cavalry the week after that, how long do you suppose the Russians would have held the Gibraltar of the Far East?

"The Japanese would never have entered Port Arthur that way," you reply, without hesitancy, because you are perfectly sure about it. So are we. No force on earth, within the walls of Port Arthur, could have held out much longer than the Russians did. The besieging army was gradually strengthened to an **irresistible force,** and then the Japs closed in with a tread as inexorable as fate.

What's Your Objective?

The best business in **your** line. You might not put it just that way; but that's exactly what you are after. You have your own ideas about advertising. Some business men consider advertising a nuisance—others look upon it as a necessary evil—**but all business men know that it pays.**

Your objective is a progressive, prosperous business. Has your advertising reached the irresistible point? Emergencies call for increased space occasionally. Success calls for cool, deliberate, decisive advertising **all** the time. Because when your objective is gained you must hold the fort against the brainiest and most energetic men in your business. Ignore all schemes. There isn't one good business-making scheme in a hundred. Go after trade in an approved way. Keep on advertising in the MacLean Trade Papers. Others owe a large measure of their success and their present impregnable position in the business world to us. Why not you?

¶ Manufacturers and wholesalers may have our advice regarding any business crisis, or advertising campaign, absolutely free. Write our Advertising Department regarding **that** matter. Do it to-day!

N.B.—Our advice places you under no obligation.

Peerless Woven Wire Fence

Here is a fence that will sell. Once up no need for repairs. It lasts for years—just what you are looking for. It's horse-high, pig-tight and bull-strong. No stock can get over, under or through it. The most unruly animal can't butt it down and there are no barbs to tear and injure stock. It's

WIND AND WEATHER PROOF

The Peerless lock holds it perfectly rigid and the wires can't slip up, down, nor sidewise. Cold weather won't snap it and hot weather won't make it sag. It's the greatest thing out for farmers, stockmen and all other fence users which makes it a red hot proposition for dealers. It comes in rolls all ready to put up. It's easy to handle. Write for prices.

We Can Deliver These Stoves

RETURNED
FEB 13 1907
Cut Exp. No. 60
Page No. 24

WITH OVEN—230 Series

To be exact, we can ship baseburners the same day we receive your order.

"Famous" baseburners are made in two styles and five sizes.

The No. 230 series is a heavy, durable stove, with a three flue construction which distinguishes it from nearly all other makes. Is made in three sizes, for parlor and two with oven.

Our No. 113 series is a lighter stove, but well made and excellent value for the money. Is made in two sizes for parlor and one with oven.

You can sell either of these lines and feel satisfied that your customers are getting the best that experience and skill can build.

A Box of "C" Brand Horse Nails

Will be in season at Xmas or any other time of the year. Unlike other Xmas boxes, you are never surprised at what you find inside; you expect the best horse nails, and your expectations are realized. The farrier who buys them is particularly well satisfied, because the shoes he puts on with the "C" brand nails stay fast. They please his customers also—they don't have their horses limping along the road on account of a shoe being "cast off" from the fault of the nails breaking at the neck. That don't happen when "C" brand nails are used. Why? Because they are hot-forged from the best material known or used in the world for the purpose, and made by a company who have been making nothing else but horse nails in Canada by Canadian labor for forty years.

Your preference solicited in ordering.

SUCCESSFUL STORE KEEPING

With Woman Your Chief Customer, Make Your Store One That Will Appeal to Her, in Externals and Arrangement as Well as in the Stock You Carry.

Success in retailing is well-nigh impossible without a thorough appreciation of general trade tendencies and a hearty willingness to work with, instead of against, these tendencies.

The largest business to-day is done by the store offering the greatest variety; woman has become almost exclusively the purchaser of the articles that meet every day needs. These are two signs of changed conditions the retailer must heed, or fall far short of success, points out Butler Brothers Expert Service.

Stores used to carry what their proprietors thought their customers ought to buy. What these customers wanted or might be made to want, with proper suggestion, cut small figure in their plans or purchases.

The old type store is still doing business. The only ones, though, that are growing are those that have branched out and persistently feature the varied offerings of their bargain departments—department stores in miniature.

The stores in the big cities that get the business are the ones that sell the many every-day things most people—the masses—want. They are the trade leaders, not the one-line establishments. It is worth noting, however, that many of the latter are beginning to profit by the lesson. The story is repeating itself everywhere.

Cater to Women.

The storekeeper who makes quality his sole consideration, not variety as well, who caters to a class, or too much to men, is likely to sit with folded hands, while his business steadily drops away. The women, who should come to him and who would, if he met their wishes, are buying the goods they want at the stores that have those goods, and which treat women as they like to be treated.

Only blindness to patent facts and prejudice are responsible for this loss of trade.

Their own time and convenience mean more to people than used to be the case. They don't like to go to one store for one article, to a second for another and so on down the street, when they can get everything under one roof, usually in larger variety and more attractively displayed.

With women your chief customers, make your store one that will appeal to her—in externals, in arrangement as well as the stock you carry. Nothing makes a better impression on a woman than cleanliness, brightness, neatness or arrangement.

Begin with your store windows, for these can be made one of your best advertisements. Kept spotlessly clean and neat, they are an index of the store's interior. Don't overcrowd them, make the effect simple, with room enough for each article, plainly priced, to be seen and studied.

See to it that the same principle rules inside. Don't keep only the portions clean on which the light falls brightest. No nook or corner should be immune from broom or brush. It is easy to cultivate store pride in your clerks, but be sure, when you preach neatness, as well as courtesy and the other virtues that make a good salesman, that you stick to your text yourself.

The Ideal Store.

The ideal store, of course, would be one where every article is so displayed that a customer can tell, without asking a question, exactly what is for sale and its price. Though this may be a physical impossibility, still a good many stores, by wise buying and proper arrangement, could come a good deal closer to it than they do.

A merchant will often tell you: "Yes, I know, side lines pay. I'd like to add some myself that my trade is asking for, but—I haven't got the room—in fact I haven't really space for the goods I have got."

Yet you would find that merchant's shelves clogged with stickers, overstocks, five or six times as much of some lines as he needed, which clever salesmen had induced him to buy, "to save (?) the discount."

There they lie, eating up capital and profits just because Mr. Merchant hasn't the nerve to unload them at a loss and fill their places with a variety of goods that people want and he could easily sell.

Often, too, goods are so poorly displayed that they make no impression, while taking up twice the room they should, or in certain lines, half the shelf room, unused, is going to waste.

Before you decide you have no space for new lines, home-goods or a bargain counter, overhaul your goods with a view to better arrangement and economy of room and a determination to get rid of your stickers. You are likely to be surprised at the supply of the latter you will uncover and the vacant space disclosed or possibly to make.

Display Goods.

Remember, the primary object of shelving is to display goods, not serve as a store room. When you build it up to a height where a woman has to crane her neck and strain her eyes to see what is on it, you lose all its display value, to say nothing of the time wasted in keeping the goods looking fresh and clean.

If you will insist on building shelving up out of reach, use it for reserve and not for stock to sell from. The goods you want and expect to sell—get them down where your customers can see, and where she or you can reach them.

How many times you hear the same half-complaint, half-apology and yet see tables loosely covered or valuable space given up to articles the season for which has passed and which should give place to other seasonable goods until another season and its demands come round.

To get the trade of the masses, not that of a limited class, means success in store keeping. Two-thirds of the families in this country have incomes of $75 a month or less, half of them less than $50. They are careful buyers—dollars look big to them.

They have dimes and nickles and quarters and halves, however, and are ready to spend them. Offer something the masses need, something that will lighten labor or appeal to their fancy, something that will cost under rather than over the dollar, and how quick the response! In this fact roots the 5 and 10 cent stores success and that of the bargain department. The bulk of business is done in the little things—the every day things at the little prices.

The store that has a variety of such articles, always timely and ever changing, has a constant remedy against dull seasons and hard times. Selected with reference to variety, not amount, they are quick sellers, and keep your dollars constantly at work.

The only trade worth having is the come-again sort. Not the appearance of your store and its arrangements nor the variety of its lines will get this, though they play their part. The one way to win it is to make your store known for its courtesy and attention and make your customers feel that every statement you make about your goods is absolutely true.

If the average clerk or the average merchant used half the care in waiting on his customers, half the thoughtfulness in anticipating their wishes or in remembering their peculiarities that a competent hotel clerk does in the case of his guests, the year's balance sheet would tell a different story.

You cannot secure too much information about your customers nor afford to let any opportunity pass of coming in personal touch with them. That does not mean however, that you should presume on your acquaintance or grow careless or over-familiar. Treat every cus-

tomer at every visit as if it were her first and your chances of making a sale or retaining her future patronage depended entirely upon the way you treated her.

Make your store known as one where a telephone order will be filled as satisfactorily as one personally given, where the little boy or girl will be waited on just as promptly and fairly as the father or mother and where those of moderate or little means or education will be as welcome as the cultured or the wealthy.

A plain price on every article increases sales and makes your clerk's labor lighter. Give good value in everything you sell, and go a step beyond—show that you believe that your goods are worth as much to you in your store as your customers pay for them, by taking them back, the instant dissatisfaction is expressed and refunding the money.

Don't grumble, scowl or hesitate having the largest run.

Don't grumble, scowl, or hesitate about it though. Don't begin if you can't do it promptly, smilingly, as if you liked it. Your willingness may be abused at first. If you are sincere, they will recognize it after a few times and the requests grow less frequent. If you are in the least degree slow or grudging, they will instantly feel the insincerity of your attitude.

There is probably no surer way to secure and retain your customers' confidence. The world's greatest retail store does it with such willingness that it is almost ridiculously easy to get your money back. There the policy certainly has proven a profitable one.

While your show windows, properly arranged and attractively trimmed, will prove effective advertisements in bringing people to your store, the ones, however, that will see them are but a fraction at most, of those you wish to reach. This large majority you must reach by your printed advertising.

Advertising.

So-called "experts" have written a lot of nonsense about advertising. So impressively hazy has been their talk that a good many merchants have been led to believe that it is impossible to prepare satisfactory advertising matter themselves.

When you are selling goods over your counters, you don't turn handsprings across the floor, wave your arms, indulge in a lot of high-flown rhetoric or drop into poetry. You simply tell your customer just the things about your goods, their quality, price, style, durability, that you think will lead her to buy them, that will convince her she wants them.

That is just what your printed advertising should be—not verbal somersaults or fire works, but the arguments you would use in person, put before the world in printer's ink.

You have got good values, your prices and your policy are right, you stand ready to refund the money if your goods are not all you claim—tell the customers so, just as you would to her face.

Be yourself always, don't try to be clever or funny. If your advertisement sounds like your talk about a few good things, you have got something that will pull business. Your competitor cannot use it, either, nor borrow it.

And in every bit of printed matter you send out be sure to strike the same note and see that it fits in with and supplements the story told in your show windows, your store policy and all the rest of your advertising.

This does not mean, though, that you should get in a rut. You are aiming at a constant variety in your stock, at newness and freshness. Do the same with your advertising. Don't be like that house in Iowa that advertised sleighs in April—not on the bargain counter either!

Don't be spasmodic in your advertising, always between a feast and a famine. Advertising of that kind, no matter how good, is almost as bad as none at all. Unless you keep at it steadily, people will forget all about you between whiles. Let them know everything you do and do nothing that isn't worth telling. When they once find you make good and keep faith with them, they will be on the watch for all you do.

The Mailing List.

One of the most important aids to good advertising—its complement in fact—is a good mailing list. Suppose you do prepare satisfactory advertising, you want it to do its perfect work—and the most effective way is through a first-class mailing list. This is an easier thing to get than most merchants think—many times they have plenty of material right at hand.

The really good mailing list is not merely one or so many names. Put each name on a card and fill the card with every bit of vital information you can get about the customer, the kind of purchases she makes, her porsible needs, her acquaintances. With this at hand and used constantly, you can find plenty of opportunities to offer her just what she wants, or suggest desires she was not conscious of.

Keep your cards right where you can put your hands on them, when you have a spare moment, study them constantly from every possible angle. They will give you inspiration for special sales you never dreamed of.

Keeping pace with trade tendencies, adding new lines whenever possible, especially the little things of every day needs, seeking variety and shunning overbuying, having the courage to get rid of stickers even at a loss and to turn tied-up capital into profit-producing lines, catering to women, the great "purchasing agent for the home," following an intelligent, consistent, persistent advertising plan, the merchant should secure the best results of successful storekeeping.

The vital thing in successful storekeeping, however, is to keep faith absolutely, even in the smallest detail, from start to finish with every person who comes into your store. Let her find every article exactly as represented—even better—and every statement kept to the letter.

"On the Road," a new magazine for Canadian commercial travellers made its appearance this month. It presented a first-class typographical appearance.

SUCCESSFUL JOBBERS AND SALESMEN.

No. 32.

J. F. L. Carron, though a comparatively young man, is old in the stove and heating business, having been for twenty years in the employ of the Gurney-Massey Company, Montreal. No man in the business is better known to the trade from the lakes to the Atlantic, than he is. For many years he has been considered an expert on hot water, steam and warm air heating, and he has solved many difficult problems in this line, for fitters in all parts of his territory.

Mr. Carron was born in Brockville, where he spent all his life until he joined the travelling force of the Gurney-

J. F. L. CARRON,
Manager Gurney Massey Co., Montreal.

Massey Company twenty years ago. Ever since that time he has been a frequent visitor in the old town, and his summer cottage in the vicinity has been an annual attraction for him.

Hardware and Metal understands that on the completion of his twenty years' service with his firm in the spring Mr. Carron will retire from active business for a time, and take a few months' well deserved vacation, beginning with a trip to the South. Having been tied down to the manager's desk for the past two years the travelling instincts acquired "on the road" are beginning to assert themselves.

It is hinted that, after his holiday, he may make his home in some part of Western Canada, but, wherever he goes, there is sure to be "something doing" in the heating business. His friends, who may be found in every town in the East, will wish him every success.

CANADIAN HARDWARE STORES
No. 9.

PORT ARTHUR'S SPLENDID STORE

In the accompanying engraving we present a view of one of the most roomy and splendidly equipped hardware establishments in Canada—the hardware department of the store of the Marks-Clavet-Dobie Co., Port Arthur. The editor of Hardware and Metal had the privilege of being shown over the premises recently and found the store to be as modern and up-to-date as any seen by him in any part of Canada.

and does not show the wall of Bennett shelf boxes which, together with the long stretch of counters and show cases are the main selling features of the department. The wide frontage allows plenty of scope for window display and good advantage is taken of the opportunity. Mr. Dobie stating that he has found their windows to be a cheap method of advertising which brings excellent returns for the money and energy invested.

An elevated office runs across the back of the store, the proprietors thus securing a commanding view of the entire store. The upper storeys as well as the basement are used for storage and warehouse purposes while workshops and shipping rooms are situated behind the store, the rear of the basement being on a level with the roadway, a fact which

ment of their town, the Marks Clavet Dobie firm have an excellent opportunity to still further expand their growing trade and build up a reputation for themselves as the largest general merchants in New Ontario.

A QUEER TEAM.

"I have seen many amusing systems of transportation," said a wholesaler, "but that which I saw in Austria when I was over there was, I think, the most amusing. It was a cart of merchandise to which was hitched a cow, a pig and a dog, and a woman was giving a helping hand. I might say it is not the first time that I have seen a pig used for drawing carts in some of the European countries."

CANADIAN HARDWARE STORES NO. 9.
Hardware Department Marks, Clavet & Dobie Store, Port Arthur.

The combined hardware and grocery stores of the company occupy a frontage of about 130 feet on Port Arthur's leading street, with a similar frontage on one of the streets running down to the waterfront, several large warehouses also being located in the rear of the store building and convenient to the docks where the boats unload freight consigned to the firm.

The hardware department, as will be seen by the illustration occupies a large floor space, amply sufficient to display stoves and similar goods as well as for counters and silent salesmen. The view looks towards the grocery department

is taken full advantage of in shipping and receiving goods. The growth of the Marks-Clavet-Dobie business, since the consolidation of the three firms eight years ago, has been phenomenal, a large jobbing being done in addition to the retail trade. Each year sees a new development, that of the past year being the purchase of a large site for an additional warehouse in which to carry their immense stock. Situated in a rapidly growing business centre at the head of navigation, in a town where the business men are sufficiently far sighted to refuse to allow petty bickering to interfere with the growth and develop-

PUSH COLLECTIONS.

Push collections for all you are worth. That is if you have credits due. If you haven't, it should be a matter of congratulation to you. If you have gathered in your money while yet there is money to be had, for the time cometh when it will be expended and the slow collector will not find the wherewithal to liquidate his own acounts.

A new rink to be built at Bradwardine, Man., will be constructed of iron, costing about $2,000.

WINDOW AND INTERIOR DISPLAYS

INSIDE DISPLAYS INCREASE SALES.

As increased sales usually mean increased profits, any method that will tend to bring about this result should be utilized by the up-to-date hardware merchant, writes A. W. Walker, in the National Retail Hardware Bulletin.

Newspaper advertising and window displays will interest people and attract them into the store. When they have done this, they have served their purpose.

But to sustain their interest and increase the sales, attractive displays of merchandise within the store are necessary.

Woman has come to be recognized as the "purchasing agent of the American home." This being the case, the present day merchant will cater to her whims and fancies, and, by insistent and persistent advertising and attractive displays of his wares, try to secure as much of her trade as possible.

A woman likes to shop. She wants to feel free to roam around a store looking at this and examing that. Usually she leaves home with the intention of buying a certain article and when she goes home it is with her arms full of bundles her money all spent and with a feeling in her heart that if she only had twenty-three cents more she could have bought that cute little tea pot (probably marked down from twenty-five cents.)

It is obvious, therefore, other things being equal, that she will trade at the store that is kept neat and clean and where the goods are displayed in an attractive manner.

Considering it broadly, any neat and orderly arrangement and grouping of goods on the shelves, counters or in the show cases, can be termed inside displays. But that is not the sense in which I want to use the term in this article

By inside displays I mean some one counter or place on a counter where seasonable specialties and bargain items can be brought together and the buyers' attention attracted to them by forceful show cards and price tickets.

A Well-Arranged Store.

In the store with which the writer is connected there is a bargain table near the main entrance, on which all odds and ends, special sale goods and specialities of all kinds are grouped for quick selling. There is not a day passes but what several items are sold from this table.

There is one thing to remember in running a table of this kind and that is, to keep changing the goods and have a new grist of bargains every week or two. By doing this your bargain table will never grow stale and people will get into the habit of looking for it every time they come in. Price every article in plain figures and you will be surprised how easily the goods will sell themselves.

On another counter are displayed seasonable household specialties, all the year, and attention attracted to them by cleverly worded show cards and price tickets attached to the goods.

A FINAL REMINDER.

Hardware merchants and clerks are reminded that our competition in holiday window displays is drawing to a closing point. There are some fine displays being made this week and now is the time to have the photos taken if this has not already been done.

Last year Hardware and Metal awarded prizes for the three best displays made during the Xmas season. This year we will give five prizes, but the displays must be of goods sold in hardware stores and suitable for Christmas presents, such as silverware, razors, cutlery sporting or house furnishing goods hardware specialties, etc. The prizes are :—

1st prize. $6 00
2nd prize 4 00
3rd, 4th and 5th, a year's subscription to Hardware and Metal.

All photographs of displays must be mailed to us not later than December 31, 1906, and they should be accompanied by a short description of how the display was constructed, the display artist's name and, if possible, samples of the Christmas advertisements in the local papers backing up the window display advertising.

In addition to the above we offer a special prize of a handsome fountain pen for the best Xmas advertisement in a local paper pushing the goods shown in the window displays.

Many women come into the store with little intention of buying a certain article. They are attracted by the display of the goods on the bargain table and counters, and if there is anything they can use a sale is made and without any effort on the part of the clerks.

There is another counter devoted entirely to the display of gray enameled ware and another showing a line of blue and white ware. As all these goods are marked in plain figures, they practically sell themselves. Whenever new goods come in, a card is put on the particular counter calling attention to the fact.

It is well to change the arrangement of goods on the shelves from time to time. This gives the store a different appearance and creates the impression of newness in the minds of your customers. It also serves to bring forward the slow sellers and turns them into cold cash.

The trend of the times seems to be toward better displays of goods in the store and the up-to-date merchant will forsee this condition and adapt himself to it. It takes time, work and planning ahead, but when the year rolls round and you look over the balance sheet, the profit account will prove that it is all worth the effort.

VALUE OF PRICE CARDS.

Since the days when I occasionally looked into the shop windows on Broadway, Sixth and Fifth Avenues, and the other splendid retail centres of New York, as well as those of Boston, and other large eastern cities, I have been convinced of the value of price cards—indoors, outdoors, in the show window and everywhere that it is possible or politic to use them, writes a Minnesota hardware merchant in the Hardware Trade.

The poor sinner who travels the walks gazes at the manifold offerings in the show windows in a large city, wondering which of them he can afford and which he need never for a moment consider, for the price card is conspicuously absent just when he wishes it were present. It is the evident purpose of the average merchant to attract the prospective purchaser with a tempting display and thus obtain a goodly profit rather than by the magic of price, and what is true of the city is also true of the country

The people however prefer finding the price displayed in the windows rather than go in the average store.

"How much is it ?"

This is what the people want to know.

"Can I afford it?"

That is the chief concern of the average purchaser and the would-be buyer.

The price cards tell the story.

In many city windows I have been disappointed to find only those things priced in which I was not interested while those I really thought of investing in were without a suggestion of their value.

Hence when I went back into the retail business I carried with me a strong appreciation of the value of a

price card, and I cannot too strongly urge its use, especially in the show window.

Shopping is tedious work at best.

Anything the merchant does that will make the task easier is a boon to the public as well as to his own salespeople.

Price cards do make shopping easier.

When a price card accompanies the merchandise there is little need for questions.

The goods are there to speak for themselves.

If they are lacking in quality the chances are they will be quietly passed.

If they are of good value at the card price they will move.

Thus it is desirable to judge well the value of merchandise before fixing on a price at which to display and offer it for sale.

Display and price cards go hand in hand.

There are so many goods in a general store—and so many forms of displaying them—that a discussion along those lines would be interesting but extensive. Hence we must pass that phase of the matter.

Suffice to say, however, that goods should be gotten off the floor, up from behind the counters, out of the drawers and other concealments as much as possible and be displayed on tables, counters, shelves, hanging cords, rods suspended from the ceiling, fixtures which will get them up into the air and in sight of the people who visit the store.

And a price card should accompany as many things as it is possible to attach them to.

Scrub brushes will sell better with a price card behind them.

So will almost any other article kept in the average store.

If one does not care to buy neatly printed ones he can easily make price cards with pasteboard and a soft crayon.

I know of only one objection to price cards—fear that a competitor might see them and cut under.

Reflection will convince the average merchant, however, that his competitors are just as anxious to make a profit on their sales, while his patrons are forever asking:

"How much is it?"

The people want to know.

If they are not told they may ask—and they may not.

If prices are where they ought to be the price card will lose no business.

The use of home made signs will help out in many cases where cards cannot be so effectively used—signs of the "Tom Murray" type.

The cardboard is always easily obtainable and it is much easier to use a single card to talk to all your patrons rather than to compel them to ask you questions about everything that they wish to know.

The kind of cards I favor are the bold ones—bold in color, bold in size, bold in every detail.

A good, clear black, or a bright red are a thousand times more effective than a poor purple or some other delicate shade of ink.

Goods neatly arranged on a counter, or a window topped by a price card, are pretty sure to outsell those left under the counter—and almost any article sold in a general store can be moved out if the proper display, the proper card and the proper price are hitched to them.

A SHOOTING SEASON DISPLAY.

An easily arranged display is shown in the accompanying engraving made from a photo of one of R. J. Walkem's hardware store windows at Tottenham, Ont., last month. The framed picture and calendars are obtainable by every hardwareman and are such as will attract the attention of new as well as old users of shooting goods.

More attention might have been given to advantage to the arrangement of the rifles and guns. The eyes of passers-by would probably have been caught more readily if several rifles had been stacked in army fashion or strung from the ceiling such as the one in the centre. The background of calendars would also have been strengthened if the bulk of the display was not on the floor of the window.

Manufacturers of sporting goods, rifles and ammunition know the value of window display and dealers should take full advantage of their expert advice and assistance.

FIRE MARSHAL'S DON'TS.

State Fire Marshal D. S. Creamer of Ohio, gives following warning regarding merchants' Christmas displays: "In every December figures of fire losses reach this office which eloquently plead for more care in the displaying of Christmas goods. The greater number of these fires start in show windows, especially in those which are dust proof. These tightly enclosed show boxes, after the lights (even electrical) are turned on acquire a temperature higher than blood heat, so everything in them is ready to blaze on slight provocation. Don't use swinging gas brackets, ever. Don't decorate with straw, leaves or paper. Don't use cotton to imitate snow anywhere. Don't use an electric wire for a clothes line.

"Don't fail to put out the smoker—or his cigar. Don't use an arc light without a spark arrester. Don't use any light without a globe or a wire screen. Don't entirely cut off ventilation from a show window. Don't put inflamable stuff against an electric lamp socket. Don't have electric bulbs in show windows hung by flexible cords. Don't have open lights for ribbons, fancy papers and light fabrics to blow into. Don't block aisles or exits with displays so as to increase the danger from a fire panic.

Don't let cotton goods or paper shades rest against electric light bulbs. They may char and when charred ignite. Don't fail, to test all fire apparatus, to have extra clerks participate in a fire drill.

Rifles and Ammunition Window Display made by R. J Walkem, Tottenham, Ont.

GAVE HIMSELF AWAY.

Five young men went into a shop the other day to buy a hat each.

Seeing that they were in a joking mood, the shopman said, "Are you married?"

They said, "Yes."

"Then I'll give a hat to the one who can truthfully say he has not kissed any other woman but his own wife since he was married."

"Hand over a hat," said one of the party, "I've won it."

"When were you married?"

"Yesterday," was the reply, and the hat was handed over.

One of the others was laughing heartily whilst telling his wife the joke, but suddenly pulled up when she said:

"I say, John, how was it you didn't bring one?"

PUBLIC SPIRITED HARDWARE MERCHANTS

NO. 5

We have pleasure in presenting to our readers in this issue, a sketch of Mr. George Clavet, Mayor of Port Arthur, Ontario.

Mr. Clavet is a native of the Province of Quebec, and located in Port Arthur about thirty-three years ago. Forseeing the future that was in store for this now growing city, he shortly after his arrival established himself in the grocery business, which he successfully carried on in his original building for almost twenty-five years.

About eight years ago a consolidation of three Port Arthur business houses took place, under the name of The Marks-Clavet-Dobie Co., Limited, which embraced the grocery business of Mr. Clavet and W. C. Dobie & Co., and the grocery and hardware business of Thomas Marks & Co.

Port Arthur at this time, was just on the eve of prosperity and the business of The Marks-Clavet-Dobie Co. has grown in keeping with the development that has taken place at the important Canadian city at the head of the Great Lakes.

The block and warehouses which now house the mammoth stock of this, the largest mercantile house in New Ontario are considered among the handsomest and most complete to be found on this continent, and advertise Port Arthur from coast to coast.

Some years ago, Mr. Clavet entered municipal politics and after serving several years in the council, became the mayor of the town, which position he has filled for three terms.

During his regime, the most prosperous in the town's history, many matters affecting the town's welfare have been successfully brought to an issue.

The water and sewage systems have been installed during his occupancy of the mayor's chair, and the energy that he displayed in carrying out these extensive and important works, to some extent reflect the ability that he always displays in matters of business.

It would, indeed, be difficult to write a history of Port Arthur without including the name of the present mayor, whose great ability and energy is evidenced in many ways, in both the business and municipal worlds of his adopted city.

Probably the purchase of the Strathcona property, bought with a view of placing the town in a position to offer intending manufacturers sheap sites with water frontage, demonstrates more clearly than any other action of Mayor Clavet's his keen business insight, and the town is now getting a practical illustration, in being able to offer desirable sites to manufacturers, as two important industries are about to be located on this property, which otherwise might have gone to some other point, owing to being unable to procure desirable sites.

Mayor Clavet is such an active man, and has so many interests, that it is difficult to write a short sketch of his succissful business and municipal career without feeling that in condensing the sketch that many worthy achievements are necessarily omitted. Port Arthur is to be congratulated in having such an able business man at the head of its municipal affairs.

HOW TO SELL A FOOD CHOPPER.

These days of butchering and fresh meats are the time paramount to interest her. Do not take offense if she turns in disgust from the tiny affair as rather a legitimate part of a doll's culinary outfit, but give proof of the rapidity of work, together with advantage gained by the little room in which it can be tucked away when not in use.

Convince her that it is more than a speedy substitute for the chopping bowl in converting the waste bits of meats into delicious fillings for sandwiches; that the work is not only quickly but evenly done. Onions and horse

GEORGE CLAVET
Mayor of Port Arthur, Ontario.

radish, tear producers by the old process, are rapidly and painlessly disposed of. By using the finest attachment spices may be bought in bulk and ground at home, thus leaving no chance for adulteration. Nuts can be ground into nut butter, a most delicious and wholesome filling for sandwiches, or chopped fine or coarse as desired, and added to cake, frosting or candy.

New kitchen devices cover so wide a range of work. The owner of a food chopped uses it almost daily the year around, and is continually coming upon new ways for its use.—Hardware.

T. Miles, sales manager of the United Factories, Limited, is on a business trip to the Pacific coast, and will take in Calgary, Edmonton, and other important commercial centres between Winnipeg and Victoria. Mr. Myles will be welcome , for few men are better known to the trade.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

Bank Discounts.

Sir,—Perhaps some of the 20th century bank managers would explain to readers how it is the present rate of interest is 3 per cent. on savings, while a few years ago when the country was not in such a prosperous condition, depositors received a larger rate of interest—3 1-2 and 4 per cent. but in those days no Bankers' Associations existed, and there were no massive and handsome bank buildings. Rates of interest were lower and funds more plentiful. What has been done with the difference in funds? Are shareholders enriched at expense of the depositors? The bank gives the depositor 3 per cent., then turns around and loan it out on security at 7 per cent. and 8 per cent. The Bankers' Association is a combine, and the Banking Act needs revising and amending for the benefit of depositors.

DEPOSITOR.

BRITISH CYCLE TRADE.

The London Statist, in reviewing the cycle industry in the United Kingdom in a recent issue, says: Speakng generally, the year just ended has proved one of the most satisfactory that the trade has yet had—the works have been busier and the output greater than at any other period. On the other hand the larger output has been accompanied by a smaller margin of profit than was the case when there was a "boom" in the industry in 1897. So that with a broader basis the trade is in a healthier

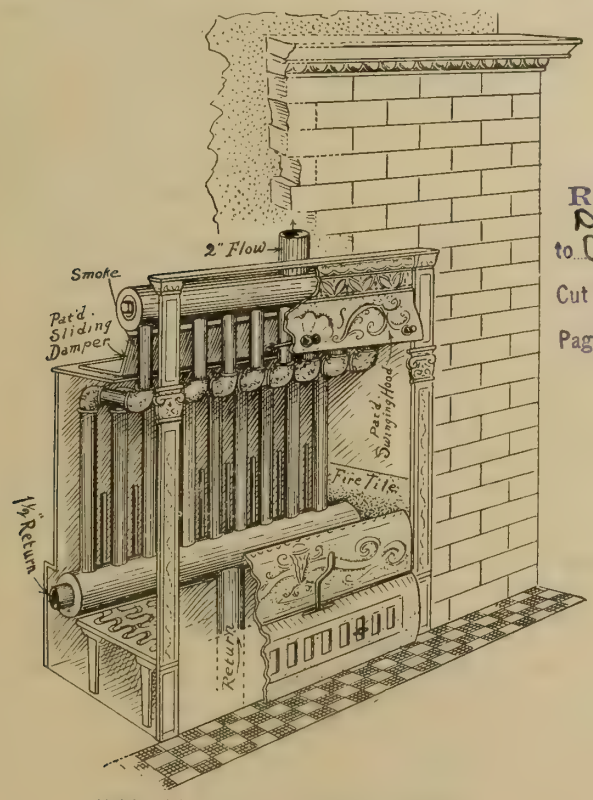
12%	"	....	30

Example. Interest on $144.00 for 169 days at 5 per cent.; $144 \times 1.69 = 243.36$, which divided by 72 = $3.38, the required interest.

Short Cut Interest Rule.

To find the interest on any sum for six days at 6 per cent. per annum without figuring; Move the decimal point three places to the left. Example: What is the interest on $1,574.35 for six days at 6 per cent ?



Answer: Six days' interest at 6 per cent. equals $1.57.

STOVES AND TINWARE

NEW HOT WATER GRATE.

The air we breathe is of more importance to our health than almost anything else. It is generally conceded that the grate or open fire-place reigns supreme as a ventilator for residences. But owing to the immense amount of heat lost through the flue in the ordinary grate they have often been prohibitive.

The accompanying illustration shows the hot water circulating grate manufactured by the Heitland Grate & Mantel Company, 833 Maine St., Quincy, Illinois. By means of its hot blast, return draft construction waste of fuel is said to be overcome and all the advantages of a mantel grate retained. With the water pipe coil, shown in the illustration, connected to radiators, placed in the rooms, on the same or upper floors, five times the amount of heat will be derived, it is claimed, from the the same amount of fuel consumed in the ordinary grate.

Heitland Hot Water Circulating Fireplace.

As will be noted in the cut, the device is a model of simplicity The dampers are operated automatically by means of a swinging hood, which, in connection with the slide in the ash-screen, reduces the draft to a minimum. The fire may be retained over night.

The basket or fire box has a closed either independently or in connection front and, as a consequence, ashes will not fall onto the hearth. With a motion of the crank, connected with the swing ing grate bars, they will drop directly into the cellar ash-pit.

The pipe coil, with its twelve square feet of heating surface, is made of boiler iron, encased in heavy cast iron. The entire system is not subject to rust, it is claimed. There is no danger of steam pressure, owing to an open expansion tank

The heater is tested to fifty pounds, cold water pressure, and may be used with a regular water system. The latter could be used for coldest weather, while the grate fire would be sufficient during spring and fall.

It is adapted for any kind of fuel and is especially recommended for the natural gas districts. It may be, installed without exceptional mechanical skill or much trouble.

The company guarantees the capacity of grate fire and radiators to be sufficient to heat 8,000 to 10,000 cubic feet of space, in any part of building, to 72 degrees Fahrenheit in zero weather. The company intend to introduce their line on the Canadian market, and will send additional informaton on request.

HEATING CONTRACTS.

The Standard Plumbing Co., Edmonton, are installing a Pease Waldon heating and ventilating system in the Isolation Hospital in that city in accordance with plans and specifications drawn by E. C. Hopkins, architect.

Skelding & Jackson, Neepawa, Man., are installing a Pease Waldon warm air heating and ventilating system in the Neepawa public school.

Red Deer, Alta., is building a new 10 room public school and the School Board have adopted the Pease Waldon heating ventilating system for the new building. The specifications call for two Economy steam heaters and ventilators arranged for quality or mechanical ventilation. R. G. Gordon, Calgary, is the architect in charge.

THE RECOVERY OF TIN FROM TINPLATE.

By far the largest proportion of the tin used in the arts is employed for making tin-plates, and these, in turn, are mainly used for making the tins in which various comestibles are preserved. The total weight of the tin on the plating is said to average 5 per cent. of the total weight of the sheet; and there has been in the past great difficulty in recovering this tin by a commercially profitable process, in spite of the high price of the metal. That contained in the solder used in making the joints of the tin can be, and is, recovered by simply heating the tins sufficiently hot to cause the solder to flow; but this process is useless as a means of recovering the rest of the metal. According to the Electrotechnische Zeitschrift, however, this feat is now being successfully accomplished at Copenhagen by the Gergsoe process. In this a solution of stannic chloride is passed over the tinned surface when it takes up further tin forming the stannous salt. The latter is then electrolysed, the additional tin dissolved is deposited, and stannic chloride reformed. The tins can, it is stated, be treated without requiring a preliminary cleansing. A hole is punched in the bottom of each, and a number are then placed in a basket, in which they remain during the whole of the subsequent treatment. When filled, the baskets are placed in a series of tanks, through which flows a 2 per cent. solution of stannic chloride. As this solution flows from tank to tank it gradually becomes richer and richer in tin by forming the stannous salt of the metal, as explained above. From the last tank of the series it is raised into the electrolytic vats by a pump constructed entirely of brass, so as to be unacted on by the fluid passed through. Here the stannous chloride is again reduced to stannic chloride, which is returned to the dissolving vats, whence it picks up more tin, to be again regenerated by electrolysis. The process is therefore a cyclical one. The tin is deposited in small crystals measuring about 1-50 in. long. Being perfectly pure, it is saleable at the same price as Banca. The energy expended in the electrolysis is said to be 47 kilowatt-hours per ton of the metal recovered. Though, as stated, the process is a cyclical one, the same solution cannot be used for more than three or four rounds of the vats, since it becomes charged with chloride of iron.—Kuhlow's German Trade Review.

Adscript, Canada

MERRY CHRISTMAS.

Readers of Hardware and Metal can spend a Merry Christmas this year. The weather during December and the general prosperity has been such as to cause a most satisfactory holiday trade, jobbers, manufacturers and retailers all sharing in the rush of work as well as in the financial results.

If any people on the face of this mud speck in the universe can unite in thanksgiving at this festive season to celebrate the birth of the Man of Galilee it is the people of Canada and of all business men in this Dominion none can enter more freely into the spirit of the holiday season than the hardware men.

At Christmas time the world's heart throbs with the spirit of brotherhood. Distant friends and relatives are remembered and ties of friendship are renewed and strengthened. The unfortunate amongst us, forgotten though they may be during the rest of the year, are given a taste of human brotherhood for one day at least. The overworked clerk deliveryman, expressman, postman and newspaper carrier boy are given tokens of appreciation for their services and the one touch of nature, the Christmas spirit of brotherhood which has survived the hurly-burly of business warfare, makes the whole world kin.

Jealousies and antagonisms between business competitors are forgotten, and old and young, rich and poor, merchant and clerk, all unite at Christmas time in sending onward those heart and thought vibrations which move us all to put more vigor in our handshakes and added meaning in our salutations.

Let us all, therefore, wish each other a truly "Merry Christmas," and do what we can to make the day a joyous one for all with whom we come in daily contact. And let us not forget that the spirit of brotherhood which overspreads the earth at this time become permanent and universal when we, as a people, decide that the sword of commercialism shall be sheathed and that a new motto shall prevail throughout all time: "On earth, peace, good will to all men."

"Merry Christmas!"

SPOIL THE EGYPTIANS.

There is a movement afoot at Ottawa to enlarge the parcel post system. The departmental store interests are at the bottom of it and it is a blow at the business of every ordinary retailer from Halifax to Vancouver. The retailers of the Dominion are not well organised but they can handle this matter very well individually. Every one of them should send to his representative at Ottawa a post card denouncing the proposal and asking that it be opposed. Such a post card campaign would be found very effectual.

The mail order business done by the few large departmental stores in Canada is enormous, but it is small compared with what would be done by them and exclusively mail order houses that would spring up if the Government undertook to facilitate the movement by becoming the delivery wagon for it.

The mail order people would not be satisfied to have the Government make a profit. The express companies are doing that now and doing the work very well. What these mail order gentry want is to enlarge their business at the expense of the national treasury. To be quite accurate, they want to enliven their competition with the retailers throughout the country and make the retailer, through his taxes, pay the additional expense.

The consumers are not asking for this extension of the postal service and do not need it. The country is better without it. Better far in the interest of the national life a thousand independent business men than one business man with a thousand or five thousand employees. This movement means pulling down small business institutions all over the country to build up a few mammoth houses in the cities. Surely the cities are draining the country too fast now. What the Government should be doing is trying to stem the exodus from the village and the town to the large centres of population rather than facilitating it by aiding in the despoilation of the retailers.

Get the post card campaign going; it is the retailer's opportunity to spoil the Egyptian.

MONEY IN GAS ENGINES.

Enquiries amongst retail hardware men in various parts of Canada indicate that many are neglecting to make the possible profits out of such good lines as gas and gasoline engines, articles which are now universally used by farmers, both in Eastern and Western Canada. As a general rule this line, along with many others sold to farmers, are left to implement agents, whose only advantage appears to be is that they have more time at their disposal, and are more active in getting around amongst the farmers, than hardware merchants.

Where manufacturers and jobbers, however, supply dealers with catalogues and other advertising matter, there is no reason why gas and gasoline engines should not be sold through the hardware trade. It is not necessary to carry stocks as machines can be procured from the branch houses in the large cities on short notice. The profits on sales of such side lines are, therefore, almost a clear gain, and well repay an extra effort in seeing that every possible buyer receives advertising matter, and that good "prospects" are followed up for sales.

This is the age of power and farmers are being educated by the agricultural newspapers to do their labor in pumping, threshing, wood sawing, lighting, etc., in the most economical and up-to-date manner. Every successful farmer is a possible customer and none should be neglected.

Hardware men who have not been handling these side lines in 1906, should get in touch with jobbers of gasoline engines, and start early in 1907 to work up business. Effective work can be done in the dull months of February and March. This is an opportune time to reach the farmers ear and pocket book, by circulars sent by the office staff or clerks or by personal calls at the farm houses by the merchant himself. But the present is the opportune time to arrange for agencies for side lines.

APPOINTED HARBOR COMMISSIONER.

Hardware men will be interested in the Dominion Government's appointment of the Montreal Harbor Commissioners, announced on Thursday. The Chairman of the Commission will be Major G. W. Stephens, President of the Canadian Rubber Company, and he will have as associates, C. C. Ballantyne, manager of the Sherwin-Williams Com-

pany, and L. O. Geoffrion, of Chaput, Fils & Cie., wholesale grocers.

Few men have been so persistently in the public view these last few years, than C. C. Ballantyne. Although under forty years of age, Mr. Ballantyne has, in addition to his connection with many large industries, held the Presidency of the Canadian Manufacturers' Association, with great credit to himself and to the Association. Hardware men everywhere will be glad to hear of this further distinction.

BLAST FURNACE TO TORONTO.

The banquet tendered Messrs. William Mackenzie and Donald D. Mann by the Toronto Board of Trade on Friday of last week was a timely honor tendered to two of Canada's most energetic and enterprising business men. Their career teaches one lesson—the value of concentrated effort. With less than half a dozen men chiefly interested decisions on important matters could be made in an hour, instead of waiting days or weeks for consultations with directors in Great Britain or other parts of the country. The advantages of prompt action are innumerable in such large enterprises as the two railroad builders have been engaged in.

One of the most important statements made in Mr. MacKenzie's address was his definite promise to establish blast furnaces and steel and iron rolling mills in Toronto, bringing the iron ore from the famous Moose Mountain range in Hutton township, 25 miles north of Sudbury and only 300 miles from Toronto. The road is already graded through to the mines and the shipment of ore to Toronto will be a comparatively easy matter.

The establishment of an iron and steel industry at Toronto should be encouraged by the city officials as it will do much to make Toronto one of the most important industrial centres in North America. Once before Toronto had an opportunity of securing such an industry, but lack of foresight allowed Hamilton to run off with the prize while the useless marsh land then asked for still remains unused.

THE METAL SITUATION.

An unabated demand for nearly all the metals on our list, is this week's experience with every prominent metal merchant. The cry is still to obtain deliveries from producers, and fill orders now in hand.

Copper has again risen in price, but the demand is so much out of proportion to the supply, that even the new figures may be considered very close, and they are based on stocks now in the warehouse—not on goods for immediate importation. A few jobbers are fairly well situated with regard to copper stocks, but the majority are clamoring for deliveries from brokers and producers in the United States. One of the large Montreal house, on receipt of an order requiring immediate delivery, were unable to secure shipments from any of the leading producers and finally had to content themselves with a small quantity from a New York broker. From present appearances, it would seem that no let-up in the price situation can be expected for a long time yet.

While there is but little pig iron to offer, the prices which we have been quoting are by no means high enough to reflect the condition of the market. This week, our figures are revised, but it is said that many sales have been effected at even higher prices. The extraordinary demand for iron is being maintained, and during the past few days, sterling prices have advanced about 6 shillings.

Our readers are well acquainted with the unusual rise in all metals during 1906. The cold figures, however, may surprise some, and we append a comparison of present quotations on leading metals, with those current the closing week of 1905.

	End of 1906	End of 1905
Ingot Copper	25½c.	20½c.
Sheet Copper (base sizes)	32c.	25c.
Tin	46½c.	39½c.
Zinc Spelter	7¼c.	7c.
Pig Lead	$5.50	$4.75
Antimony	27½c.	14c.
Pig Iron :—		
Londonderry	$25.50	$20.50
Carron (No. 1)	25.50	23.00
Carron (Special)	24.50	22.00
Summerlee No. 1 (none obtainable)		23.50
Summerlee (No. 2 Selected)	$25.50	
Summerlee (No. 3 Soft)	24.50	

The Dover Manufacturing Company, Canal Dover, Ohio, have closed a contract with the Toronto Daily Star for several thousand of their French sets, No. 66, which has been very popular with American newspapers for premium purposes. The Star will push the irons as premiums and the publicity given them in their advertising and by the personal canvass made by subscription solicitors ought to very materially help the sale of the larger sized laundry sets sold through the retail hardware trade.

TECHNICAL EDUCATION ENDORSED.

Considerable significance attached to the utterance of Premier Gouin of Quebec, at the recent banquet given by the Canadian Manufacurers' Association, to ex-President Ballantyne, especially as he outlined the policy of his Government with regard to technical schools.

For many years past, an agitation has been carried on by the manufacturers, trade unions and educationalists of the country, aiming at the establishment of institutions where mechanics and factory hands could learn the technicalities of their respective trades. Many schemes of education have been proposed tending to put students—machinists, boiler makers, plumbers, and a host of others—in touch with broad general principles which they could readily adapt to the particular requirements of their work.

But the question of ways and means was the most difficult, and it was incessantly debated whether the responsibility for financing the schools should rest with the federal, provincial or civic Government. New hope was aroused, when, after the conference of Provincial Premiers, it was announced by Premier Gouin that the additional subsidy for Quebec would be largely devoted to education. Consequently, the supporters of technical schools, awaited with great interest, some official announcement in the matter.

And such is the construction which has been placed upon the latest speech of the Premier. Speaking to manufacturers, who are particularly interested in advancing the excellence of goods "made in Canada," by educating their workmen, he, first of all, warned them that they, themselves were neglecting their duty. In Germany, where technical education has played so prominent a part in the country's industrial supremacy, the crusade was begun by the manufacturers establishing and supporting schools. In this country, too, said Mr. Gouin, the manufacturers who have most at stake, should advance from resolutions to actions. Amid great applause, he promised liberal assistance from the Government, to such a movement. And now, the public await the action of the Quebec manufacturers. It's apparently "up to them."

To know when to be generous and when firm—that is wisdom.

HARDWARE TRADE GOSSIP

Ontario.

Geo. Storey, hardware merchant, of Milton, has sold his business to J. T. Hannatt.

Mr. Button, hardware merchant, Stouffville, Ont., was a visitor in Toronto this week.

J. Simpson, of the Simpson Manufacturing Company, Brantford, called on the wholesale hardware merchants of Toronto this week.

Edmund Lawrence, a teamster, had his his leg broken while unloading pipe at the Fairbanks Company's warehouse in Toronto early this week.

The Kemp Manufacturing Company, Toronto, have put two new travelers on the road, Philip Dykes in Western Ontario and Roy White in Toronto.

Fire in the basement of the premises of the Toronto Furnace and Crematory Company, in the rear of 72 King Street East, Toronto, did about $1,500 damages Tuesday evening.

Fred Ross, of the firm of Ross Bros., wholesale hardware merchants, Edmonton, Alberta, has received a Christmas present from his wife in the shape of a handsome little daughter.

James Boxall, of Boxall & Matthie, plumbers, Lindsay, was in Toronto this week calling on the supply houses. Mr. Boxall was recently tendered a banquet by his Lindsay friends.

James Noxon, founder of the Noxon Bros. Manufacturing Company, Ingersoll, died at his home in Toronto. The remains were shipped to Ingersoll where interment took place on Wednesday.

John Sommerville, Jr., of John Sommerville & Son, hardware merchants, of Edmonton, Alberta, is on a visit to the East, having been several days in Chicago as well as visiting Toronto this week.

The Archer Lighting, Heating and Power Company, Toronto, are now installed in larger premises at 36-38 Lombard Street, opposite Cluff Bros. big warehouse. They manufacture the Archer Gas hot water and house heaters.

L. Thomas, of Thomas & Smith, Chicago, inventor of the Thomas Acme Air Washer, already installed in two of Toronto's best buildings, was in Toronto this week conferring with Cluff Bros., the Canadian representatives of the Thomas system.

Louis A. Payette and J. C. King, of Warden King & Son, Montreal, were in Toronto this week conferring with Cluff Bros. regarding the continued development of their business in Toronto. Messrs. J. C. King and R. J. Cluff, left on Wednesday night on a business trip to the United States.

Harry Morrison, formerly employed with Rice Lewis & Son, wholesale hardware merchants, of Toronto, and now one of the traveling representatives of Ross Bros., in Edmonton, is on a visit to his home in Mount Forest, also calling on his old friends in Toronto. Harry reports everything very brisk in the West, with the expectation of a much larger business for 1907.

Albert E. Karges, formerly with Gardner & Company, hardware merchants, Woodstock, but for the past six months the Eastern Ontario traveler for the James Stewart Company, Woodstock, has been promoted to the management of the Winnipeg branch of the Stewart Company's business. Mr. Karges is a persistent worker and deserves the promotion he has so speedily won.

Olin A. Beach, manager of the Cupar Hardware Company, Cupar, Sask., was a caller at the Toronto office of Hardware and Metal on Wednesday. Mr. and Mrs. Beach have been visiting their parents at Iroquois and Palmerston. Mr. Beach reports the coal shortage as overdrawn in the daily press and says lack of cars has prevented most farmers from disposing of their grain as yet.

Quebec.

E. Chown, of Winnipeg, was a visitor in Montreal this week.

W. H. Evans, of the Canada Paint Company, Montreal, spent a few days of last week in Toronto, in the interests of his firm.

H. Giddings, of H. & F. Giddings & Co., general merchants, Barry's Bay, purchasing hardware supplies in Montreal recently.

W. B. Arthur and F. R. Turner, of the Maritime traveling staff of Caverhill Learmont & Co., are at Montreal headquarters this week.

Frank Stafford, of Frank Stafford & Co., general merchants, Barrey's Bay, visited Montreal and placed orders with his wholesale connections this week.

Thos. Blaikie, city traveler for the Dominion Wire Company, Montreal, is enjoying a brief Christmas vacation at his home in Sarnia.

Chas. Dodderidge, formerly of H. & J. Young, wholesale hardware merchants, Quebec, and recently with J. R. Kane, of the same city, has joined the traveling staff of Lewis Bros., Montreal.

Grippe seems to have been busy among the paint and oil men this week, and we notice that Mr. Edwards, manager of Brandram-Henderson and Mr. Dowsley, secretary of A. Ramsay & Son., are both laid up in consequence.

Mr. Agnew, of The Agnew Bros., Hardware Company, Prince Albert, Sask., was in Montreal one day this week, on his way to England. He will stop over in the Royal City again, on his return.

C. M. Strange, sales manager of Lewis Bros., Montreal, is proudly showing his visitors this week, a finely decorated lamb skin presented to him by Linton & Hall, hardware merchants, of Calgary. The whole work was a product of Calgary.

Jas. Craig, Maritime representative of the Canada Paint Company, arrived in Montreal this week, from Halifax. He will spend a few days there going over his samples and preparing for the New Year. Mr. Craig looks as if life by the sea agreed with him.

John P. Seybold, president of the Seybold & Sons Company, wholesale hardware merchants, Montreal, is away from his desk this week as the result of a painful accident. While walking across his lawn Mr. Seybold slipped on the ice, and sustained a fracture of his left arm.

Among the new additions to Caverhill Learmont & Co.'s staff is Auguste Painchaud, who will represent them on the Gaspe Coast, and Intercolonial Railway. Mr. Painchaud, who has represented Wm. Darling & Co. for seven years and Frothingham & Workman for the past eighteen years, will go over his ground shortly, fully equipped with samples of the leading lines, including many new articles.

Western Canada.

J. W. Smith, of Smith & Ferguson, Regina, has been elected Mayor of his town by acclamation.

W. M. Gordon, of Watt & Gordon, Winnipeg, was elected school trustee in Ward 6 by acclamation.

Geo. D. Wood, of Geo. D. Wood & Company, Winnipeg, is still confined to his home through illness.

C. D. Waldon, manager of the Pease-Waldon Company, Winnipeg, went East this week on a business and pleasure trip.

Jas. H. Ashdown is spending a few days in Eastern Canada as relaxation after a strenuous mayorality campaign.

W. L. Livingstone, manager of the Builders' Hardware Department in the Marshall-Wells Company, Winnipeg, is holidaying in the East.

The Ogilvie Hardware Company, of Victoria, B.C., are being complimented by their local papers, for the great enterprise shown by them in window display and store arrangement.

Thomas Hodgson who has been in charge of the city desk for Geo. D Wood & Company, has been promoted to a position on the traveling staff. He goes on the road the first of the year.

Wm. C. Perry, assistant buyer for Geo. D. Wood & Company, Winnipeg, is seriously ill with pneumonia. Mr. Perry has a wide acquaintance among the Western trade having spent some years on the road.

The Hanbury Hardware Company, with a capital stock of $300,000 is among the recently incorporated companies. The incorporators are: John Hanbury, J. M. Brown, E. H. Johnson, G. R. Coldwell with Brandon as the chief place of business.

Maritime Provinces.

The Munroe Hardware Company's store of Londonderry, N.S., was destroyed by fire on December 13, five buildings in all being destroyed with a total loss of about $30,000 with $6,000 insurance.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 70.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Turpentine—Now 96c. single bbls.
Brass Wire—Discount reduced to 40 per cent.
Copper Wire—Discount reduced to 40 per cent.
Soldering Irons—Have advanced about 2c. per lb.
Cotton Rope / Sash Cord—Factory prices are higher.
Butts and Hinges—Prices have advanced.
Ingot Copper—25½c. to 26c.
Pig Lead—Quoted at $5.50 to $5.60.
Paris Green—Prices for spring delivery—Berger's English—have been issued.
Pig Iron—Carron No. 1, now $25.50; Carron (special), now $24.50; Summerlee No. 2 (selected), $25.50; Summerlee No. 3 (soft), $24.50; Londonderry, now $25.50.

TORONTO.

Soil Pipe—Advance predicted.
Hotwater Boilers—Will advance.
Compression Work—Some changes.
Wire Nails—Now $2.30 base.
Sash Cord—No. 6, 35c. lb.; No. 7, 34c. lb.
Cotton Twine—4 ply 2½c. advance.
Barb and Plain Twist Wire—15c. higher.
Coil Spring Wire—Up 25 cents.
Ingot and Sheet Copper—Advanced.
Pig Lead—Now quoted at $5.40.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Dec. 21, 1906.

Hardware lines are still going higher, and numerous price changes will be seen in our lists this week. In nearly all the warehouses, travelers are in from the road going over their samples and getting into shape for the 1907 campaign. Of course, the volume of business is not so great as during the past few weeks, but even so, a steady stream of orders has been coming in by mail, and as yet, the jobbing houses have not been able to make much headway in their stock-taking.

Butts and hinges show another advance this week. Light straps, light T's and hinge hasps have gone up 10 per cent., while heavy straps, heavy T's and butts are 5 per cent. higher. Both cotton rope and sash rope have advanced at the factory, so that it is reasonable to expect jobbers also to increase their prices in the near future.

Brass and copper wire are now being sold at a discount of 40 per cent., as against the 45 per cent previously quoted. Soldering irons have also advanced about 2c. per pound.

A decided shortage in medium-priced skates has developed. One of the Montreal department stores this week sent in a large order for skates to a local hardware jobbing house, but, of the entire number ordered, only seven pairs were available.

AXES. — We quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen. follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—The normal business is being done, at the following prices: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES — We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS.—Belated orders are being sent forward this week. We quote: Back Straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS.—With copper still advancing, copper goods in this line may command higher prices ere long. Meanwhile we quote: Best iron rivets, section, carriage, and wagon box black rivets, tinned do.,copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half-pound boxes.

HAY WIRE.—Last week's advanced prices are being firmly held. Our quotations are: No. 13, $2.55; No. 14, $2.-65; No. 15, $2.80; net cash, f.o.b. Montreal.

MACHINE SCREWS.—Trade is about as usual. We quote: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.: Felisterhead, iron, 30 per cent.. Felisterhead, brass, 25 per cent.

BOLTS AND NUTS.—Bolts are still scarce, no relief from the shortage having been experienced. Our discounts remain: Carriage bolts, 3 and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS.—Sales this week have been large and prices are well maintained. Discounts are as follows: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS.—The market is now firm at $2.30 per keg base f.o.b. Montreal.

CUT NAILS—We continue to quote: $3.50 per 100 lbs.; M.R.M. Co., latest $2.30 per keg base, f.o.b. Montreal.

HORSESHOES.—A steady business is reported. We quote as follows: P.B. new pattern, base price improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Conditions remain unchanged.

CEMENT AND FIREBRICK—We are still quoting the following prices: "Lehigh" Portland in wood, $2.54, in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN.—Last week's advance still holds. We are quoting as follows: 5-16 inch, $4.40; 3-8 inch, $3.90; 7-16 inch, $3.70; 1-2 inch, $3.50; 9-16 inch, $3.45; 5-8 inch, $3.35; 3-4 inch, $3.20; 7-8 inch, $3.10; 1 inch, $3.10.

SHOT—Our prices remain as follows: Fhot packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION. — Trade is normal. We are quoting as follows: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

GREEN WIRE CLOTH. — Bookings are very satisfactory. Our prices are: In 100 foot rolls, $1.62½ per hundred square feet, in 50 feet rolls, $1.67½ per hundred square feet.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Dec. 21, 1906.

The hardware market of late has had a tendency to raise in nearly all branches. Stocks in many lines have run out and cannot be repleted for some time.

Barb and plain twist wire has advanc-

ed from $2.55 to $2.70, and No. 9 coil spring wire from $2.55 to $2.90 with the following extras per cwt. for other sizes: 6 to 8, 40c.; 10, 50c.; 11, 55c.; 12, 25c.; 13, 40c.

Chain as predicted by us a couple of weeks ago has advanced 10c. per cwt. Nails have again advanced 10c cwt. on base price, the demand continuing right up to the present time. It is predicted by good authority that another advance is forthcoming shortly, and the Spring will see nail higher than ever.

Sash cord has advanced being now quoted as follows: No. 6, 35c. lb.; No. 7, 34c. lb.; and wrapping cotton, 4-ply, from 29c to 21½c per lc.

AXES AND HANDLES.— Demand still continues very brisk with large shipments being made daily.

CUTLERY AND SILVERWARE.—Sorting orders arriving in great number taxing the wholesale houses to their utmost to fill orders.

SPORTING GOODS.—Demand continues good, large sorting orders being sent on for skates which are a very scarce article with most jobbers. Although some claim to have quite a supply still on hand. Snow shoes are selling very freely and a scarcity is reported by some jobbers in this line.

CHAIN.—The advance predicted by us last week has taken place and we now quote: ⅝ in. $3.50; 9-16 in., $3.55; ½ in., $3.60; 7-16 in., $3.85; 3-8 in., $4.10; 5-16 in. $4.70; 1-4 in. $5.10.

RIVETS AND BURRS—No apparent change in these articles and we still quote rivets 27½ per cent. and burrs 15 per cent.

SCREWS.—No change in price with stocks increasing.

BOLTS AND NUTS.—These articles still remain short in many lines.

TOOLS.—Tool boxes, coping saws, and tools which comprise a boys' outfit are selling well.

SHOVELS.—The snow shovel demand still exists, and is likely to do so for some time.

LANTERNS.—Big demand still exists, for cold blast selling at $6.50 per dozen.

EXTENSION AND STEP LADDERS—Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING.—Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE—(Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS.—A further advance of 10c. per cwt. on base price, has been put in force this week and are now quoting at $2.30 base.

CUT NAILS—We quote $2.30 base f.o.b. Montreal, Toronto 20c higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50, and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS.—Large sorting orders are received and big shipments are being made daily.

BUILDING PAPER.—Business has gradually eased away for the present, and one manufacturer of building paper says he is booking orders only until end of present year, as all contracts for raw materials are made by them the 1st of the year and cannot book orders for later shipment on that account.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES, WOOL AND FURS.—Chicago is slightly easier in hides, but prices here are unchanged.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 21, 1906

Once more, pig lead is away higher than any previous quotations. Sterling prices are above £20, and Canadian jobbers have been forced to advance their figures to a minimum of $5.50. The market is very firm, even at this remarkable price.

As predicted in our last issue, copper has again gone higher. This metal is extremely scarce, and the big people in the trade scarcely know how to quote, as nobody seems to have even a fair stock.

On boiler tubes, a revision of prices is momentarily expected, but so far, nothing definite has been done. It is certain that high prices will be declared in the near future.

All sheet metals continue very firm, and scarce. It is more than likely that Canadian quotations on many of these sheets will soon have to be advanced. Indeed, at the present time,, some lines, notably Canada plate and tin plates, can be bought in Canada more cheaply than they can be imported.

COPPER.—Still further advances have taken place this week, and it is thought that the market will go higher. We are now quoting: Ingot copper, 25½c. to 26c. sheet copper, base sizes, 32c.

INGOT TIN.—This metal continues firm, but we still quote: 46½c. to 47c. per lb.

ZINC SPELTER.—Zinc is in a very strong position in the market. We continue to quote: $7.25 to $7.50 per hundred pounds.

PIG LEAD.—Higher prices in England have boosted quotations here and we now quote: $5.50 to $5.60 per hundred pounds.

ANTIMONY—Our price remains 27½ to 28c per pound.

PIG IRON.—We still quote as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES.—The expected new prices have not yet been issued. Our prices in the meantime remain as follows: British & American tubes, 1½ in., 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL.—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.40 ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING.—We still quote: 3-16 in. to 1-4 in., $7; 5-16 inch to 11-32 inch, $5.95; 3-8 inch to 17-32 inch, $4.90; 9-16 inch to 47-64 inch, $4.20; 3-4 inch to 1 7-16 inch, $3.85; 1 1-2 inch to 3 inch, $3.50; 3 1-8 inch to 3 7-16 inch, $3.67; 3 1-2 inch to 3 15-16 inch, $3.85; 4 inch to 4 7-16 inch, $4.20; 4 1-2 inch to 4 15-16 inch, $4.55. This is equivalent to 30 per cent. off list.

GALVANIZED IRON.—Firmness prevails in the market. We are still quoting Queen's Head, 28 gauge, $4.60 to $4.85; 26 gauge, $4.45; 22 to 24 gauge, $3.90; 16 to 20 gauge, $3.75; Apollo, 28 gauge. $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 and 20 gauge, $3.60; Comet, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30 to $4.45;

A MERRY CHRISTMAS

1906

December 22nd, 1906

To Our Friends and Customers :

We wish you one and all **the Compliments of the Season.**

May 1907 bring you nothing but continued prosperity, health and happiness—we mean to do all in our power to bring about this happy state of affairs.

Our New Year's resolution is to induce our friends to become our customers, and by fair treatment, **make** our customers always remain our friends.

We'll be back to see you soon with a bunch of prices that will compel you to buy. This is going to be our **BIG** year, and any dealer who sticks to us will get his share of the sunny side of the Hardware business for the next 12 months.

Yours for prosperity,

The Travelling Representatives

22 and 24, gauge, $3.75 to $4.00; $16 to 20 gauge, $3.60 to $3.85; Fleur-de-Lis, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 to 20 gauge, $3.60; Gorbals "Best Best," 28 gauge, $4.45; Colborne Crown, 28 gauge, $4.45; 26 gauge, $4.30; 24 gauge, $3.75. In less than case lots, 25c extra.

CANADA PLATES—It is expected that prices will soon be advanced. We are now quoting; 52's, $2.70; 60's, $2.75; 75's, $2.85; full polished, $3.85; galvanized 52's, $4.35; 60's, $4.60.

BLACK SHEETS.—Conditions continue very firm. We quote as follows: 28 gauge, $2.60; 26 gauge, $2.25; 22 and 24 gauge, $2.45; 20 gauge, $2.40; 18 and 18 gauge, $2.40; 8, 10, 12 and 14 gauge, $2.60.

TIN PLATES.—Our prices are as follows: Cokes base size, I.C. 14 x 20, $4.25 to $4.35; charcoal, base size, I.C., 14 x 20, 4.40 to $4.50.

TERNE PLATES—We are still quoting $7.10.

STEEL SHEETS. — We quote: 10 gauge, $2.60; 17, 18 and 20 gauge, $2.40; 22 and 24 gauge, $2.45; 26 gauge, $2.55; 28 gauge, $2.60 per hundred pounds.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6¼c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

BAR IRON.—The price remains $2.15 base, f.o.b. Montreal.

OLD MATERIAL. — We quote; Light copper, 17½c.; heavy red brass, 17c, yellow brass, 13c.; light brass, 9c.; lead, 4c; zinc, 4½c; machinery cast scrap, $16.00; wrought scrap, $16.00; stove plate scrap, $12.00; mixed rags, $1.00 to $1.20 per 100 lbs.; old rubbers, 8 1-2c. to 8 3-4c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Dec. 21, 1906

Copper continues to occupy the centre of the stage. Prices on both sheet and ingot copper having advanced 1c. in Toronto during the past week. The situation in copper is a surprising one. Most buyers have been holding off in the expectation of prices dropping considerably, the general impression being the prices prevailing recently have been of an artificial nature. Instead of the market weakening, however, it has taken a turn upwards and the situation is that both jobbers and manufacturers stocks are practically bare, while the largest producers refuse to sell for January, February or March delivery. There seems to be no telling where copper will land during the coming spring and summer.

Lead has taken another jump and we are advancing our quotations on imported pig from $5.25 to $5.40 while $6.00 is being asked by some jobbers of bar lead. The market in England is very strong and this has added considerably to the already stiff conditions which have existed locally for some time

Delivery of metals from Montreal are being made very slowly and stocks of pig iron and sheet metal which should have been delivered in November will not be received by buyers until early in January. The general situation in sheet metals continues very firm and as Canadian quotations are lower than stocks can be replaced for it seems altogether likely that still higher prices will rule during the next half year.

Pig iron continues very firm and exceedingly hard to get, and the closing down of the Hamilton plant owing to an accident which will necessitate relining the furnace makes the situation even more difficult for buyers. Middlesborough is now being quoted at $24.50 and Summerlee at from $25.50 to $26.00. Manufacturers are objecting strongly to the new tariff which practically shuts them out of business by the increased tariff on tank plates used for smoke stacks and kindred purposes. Boiler tubes have not yet advanced but higher prices are looked for on account of the new tariff.

Advances are being quoted on The Canada Metal Co's. babbit metals, Imperial Genuine now being quoted 60c, Hercules at 25c. and No. 4 at 9c.

PIG IRON.—Hamilton, Midland and Londonderry are off the market, and Radnor is quoted at $33 at furnace. Middlesborough is quoted at $24.50, and Summerlee, at $25.75, f.o.b., Toronto.

BAR IRON.—Bar continues hard to get and we still quote: $2.25, f.o.b., Toronto with 2 per cent. discount.

INGOT TIN.—Buying is lively and prices unchanged at 46 to 46½ cents per pound.

TIN PLATES—The market is active and prices firm at recent advances.

SHEETS AND PLATES—Active buying is reported with prices steady. Stocks are light.

BRASS.—We continue to quote: 26 to 27½ cents per pound for sheets.

COPPER.—The market keeps advancing and we now quote: Ingot copper $26 per 100 lbs., and sheet copper $31 to $32 per 100 lbs.

LEAD—Market is active and prices very firm. We quote: $5.40 for imported pig and $5.75 to $6.00 for bar lead.

ZINC SPELTER—Stocks are light with market firm and active. We quote 7 1-2c. per lb. for foreign and 7c. per lb. for domestic. Sheet zinc is quoted at 8 1-4c. in casks, and 8 1-2c. in part casks.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. to ½ in., $2.50; ⅝ in., $2.35 heads, per 100 lbs., $2.75; tank plates, 3-16 in., $2.65; tubes, per 100 feet, 1½ in., $8.50; 2, $9; 2 1-2, $10.75; 3, $12; 3 1-2, $16; 1, $21, Terms, 2 per cent. off.

ANTIMONY—Market is active, and stocks scarce. Prices firm at 27c. to 28c.

OLD MATERIAL.—Dealers' buying prices continue at the following. Heavy copper and wire, 18½c., per lb.; light copper 16c. per lb.; heavy red brass, 15 1-2c. per lb.; heavy yellow brass, 14c. per lb.; light brass, 9 3-4c. per lb.; tea lead, $3.70, per 100 lbs.; heavy lead, $4.10 per 100 lbs., scrap zinc, 4½ per lb.; iron No. 1 wrought, $14.00; No. 2 wrought, $6 to $8; machinery cast scrap, $16.50 to $18; stove plate, $12 to $16; malleable and steel, $6; old rubbers, 9c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—The following prices are quoted on coal, slack being short.

Standard Hocking soft coal f.o.b. at mines, lump $1.75, ¾ inch, $1.65, run of mine, $1.40, nut, $1.25; N. & S. $1.10; P. & S., 85c.

Youghiogheny soft coal in cars, bonded at bridges; lump, $2.90; ¾ inch, $2.70; mine run, $2.60; slack, $2.25.

London, Eng., Metal Markets

From Metal Market Report, Dec. 19, 1906.

Cleveland warrants are quoted at 60s. 6d. and Glasgow Standard warrants at 60s., making price as compared with last week 3s. 9d. lower on Cleveland warrants and 2s. 6d. lower on Glasgow Standard warrants.

TIN.—Spot tin opened weak at £195 5s., futures at £195 5s., and after sales of 180 tons of spot and 300 tons of futures closed quiet at £195 5s. for spot, £195 5s. for futures making price compared with last week £1 10s. lower on spot and 15s. lower on futures.

COPPER.—Spot copper opened irregular at £107, futures £108, and after sales of 300 tons of spot and 800 tons of futures, closed steady at £107 for spot, and £108 for futures making price compared with last week £1 15s. higher on spot and on futures.

LEAD.—The market closed at £19 17s 6d., making price as compared with last week 12s. 6d. higher.

SPELTER.—The market closed at £28 2s. 6d., making price as compared with last week 5s. 6d. higher.

United States Metal Markets

From the Iron Age, Dec. 20 1906.

Activity has centred during the last two weeks in the Eastern Pig Iron markets where buyers have taken hold of covering requirements for the third quarter. In some cases these have extended throughout the last quarter, and in others the second quarter is included. During the past two weeks, eastern Pennsylvania mills have bought about 75,000 tons of basic pig, for delivery during the third quarter chiefly, the price having been $22 delivered and upward. Some additional business is pending. Foundry interests have continued to buy for forward delivery, among them the largest concerns, who seem to have confidence in the future. Present prices are regarded by many in the trade as dangerously high,

for the basis of distant commitments, and yet it is the consumer who is most eager to take his chances. Southern makers have advanced their price for the third quarter from $17.50 to $18 for No. 2 Foundry, Birmingham, and have booked some tonnage at that.

The situation in the South is growing more serious, through inadequate transportation facilities and scarcity of labor. Iron is accumulating at the furnaces which is sorely needed by distant melters, and the delivery of raw materials seems to be becoming more and more precarious.

There has been less activity in Foreign Foundry Irons lately. The Middlesborough market showed some decline but has rallied again on heavy buying.

Rail makers have been booking some additional good orders among them being 19,000 tons for the Texas Railway, 15,000 tons additional for the Great Northern, 7,000 tons for the Spokane Inland and 5,000 tons for the Monon road. There is an inquiry in the market for a lot of 25,000 tons from a Western road.

Eastern plate makers have been forced again to put up their prices $2 per ton, making the third advance of like amount during the current month. The manufacturers state that while they are loath to take such action they are forced to it through rising costs.

Quite a good run of small sized structural contracts has come in. Among them are 3,000 tons for a building at St. Louis, 2,500 tons for the Fall River Bridge, 2,400 tons additional for Gary and 1,500 tons for two buildings in San Francisco. Some large contracts are still pending. The bids for the 8,300 tons for the Blackwell's Island Bridge are in, but no award has yet been made.

In the lighter lines the trade is looking for an early advance in sheets and tin plates. Bars are strong and are now quotably higher in the East.

Complete returns to The Iron Age show that the total water shipments of Lake Superior ores in 1906 were 37,513,642 gross tons. All-rail shipments to blast furnaces in the Northwest will bring the total close to 38,250,000 tons. This is an increase of approximately 3,900,000 tons over 1905, all but 300,000 tons of which is to the credit of the Mesaba range. The Steel Corporation's shipments were 20,978,651 tons. Its programme for 1907 is 23,000,000 tons.

From the Iron Trade Review, Cleveland, Dec. 20, 1906.

Consumers of pig iron in increasing numbers are coming into the market to cover their requirements for the last half of the coming year. In some instances sales are reported for fourth quarter delivery only, indicating the belief of manufacturers that the present level of price bids fair to be continued and that, at any rate, the possibility of an iron famine through 1907 renders it necessary to secure an iron supply at this early date. Prices show little change, but there is an increasing firmness. In the New York district alone sales for the last half during the week aggregated 100,000 tons. Some interests in the central West are unwilling to quote for delivery ahead of July 1, while others are selling heavily at from $21.50 to $22.50 valley. Furnacemen complain that considerable off iron is being turned out, thus adding to their difficulties in keeping up on deliveries. The southern car situation is unimproved and the end of the year will see Southern furnace yards storing at least 50,000 tons of pig iron which was sold months ago, and for which melters are now clamoring. For the last half $19 furnace is being secured for Southern iron. Still further freight advances are rumored.

The week has seen the close of navigation of the great lakes. The past season has been unprecedently successful, both in point of cargoes and profit. December ore movements were unusually heavy, bringing the season's movement by water up to 37,513,589 tons, an increase over 1905 in excess of 4,000,000 tons. With all rail shipments included, the total amount of ore brought down from the ranges will be near 38,500,000 tons.

An extremely heavy demand is noted for practically all lines of finished materials, structural shapes being the only exception. Iron and steel bar specifications will keep Western plants busy until well through the Spring [illegible] dependent plate mills, which heretofore have been giving prompt deliveries, are filling up on orders to such an extent that one interest has made its fourth advance within a few weeks, and is now quoting $40 Pittsburg. Wire and wire products are in strong demand, spring contracting having opened at an unusually early date.

N.S. Hardware Trade News

Halifax, N.S., Dec. 18, 1906.

"The hardware trade is practically at a standstill at present" said the manager of one of the largest jobbing houses in this city, to the correspondent of Hardware and Metal to-day. "Yes," said he, "Trade is dull and all the travelers are in off the road for the holiday season. There will be very little doing from now until the end of the year, but we have noting to complain of so far as business is concerned."

"Any change in prices?"

"Well, I would not care to quote prices just at present. The markets for various causes are somewhat disturbed and fixed prices are somewhat of an uncertainty, but it is anticipated that they will be straightened in a short time." The most notable change in the local market is the big jump in nails. An advance of twenty cents per keg both on wire and cut has just been made. Wire are now quoted f.o.b. at $2.50 base and cut at $2.60 f.o.b. base. Jobbers attribute the increase to the cost of wire. A meeting of the Maritime hardware men will be held at St. John this week and a number of important matters are to come up, among which will be a revision of price list. The Nova Scotians who will attend the meeting are : W. H. Sterns of H. H. Fuller & Co., Halifax; Percy Symonds, of Symonds & Co., Dartmouth; Captain Douglas, of William Stairs, Son & Morrow, Halifax; and E. K. Spinney of Yarmouth.

* * *

At a meeting of the Sydney Cement Company held last week the following officers were appointed : President, A. C. Ross; Vice-President and managing director, H. C. Burchill; Secretary, H. S. Ross. The company is working up quite a cement trade with Mexico, and some large shipments have been made. Recently an order was received for one thousand barrels from Mexico.

* * *

The Oxford Copper Company at Oxford, N.S., has sold one-eighth of their property to local parties, and leased the other seven-eighths to a Montreal Company. It is the intention of the company to develop the property early in the Spring, and if the mine pans out well, a crusher will be installed.

* * *

The steamer Pontiac which recently arrived at Sydney from Glasgow, landed three hundred ingot moulds for the Nova Scotia Steel Company.

* * *

A concern is said to be organizing in Sydney with Graham Fraser at its head, for the manufacture of car wheels by a special process.

* * *

J. O. James, M.T., manager of the Wine Harbor Gold Mining Company is so pleased with the outlook of the property, that the company will install a crusher of 100 stamps, and a cyanide plant of the most modern pattern—tube mills and cyanide vats. This cyanide plant is of the pattern that has produced such profitable results in the great Rand mining districts in South Africa.

CANADA METAL CO. EXPANDS.

W. G. Harris of the Canada Metal Company, Toronto, has purchased the Toronto Ball Grounds occupying 3½ acres adjacent to the Grand Trunk and Canadian Pacific Railway in Parkdale and will next fall commence the erection of two buildings 40 feet wide by 500 feet in length, the railroad site being run between the two buildings which will be of concrete fire proof construction, one two storeys in height and the other one storey.

The Canada Metal Company have outgrown their present premises on William Street, the rapid development of their business having made necessary the present changes. They have recently constructed several furnaces for smelting copper, lead and zinc ores and intend to develop this branch of their trade so that it can be gone into on a larger scale when the new buildings are erected. The large floor space which will be available in the new premises will allow the company to still further develop their lead and tin rolling, galvanizing and tinning industry as well as taking up the smelting of ores.

The growth of the Canada Metal Company's business under Mr. Harris' management has been almost extraordinary, and they are to be congratulated upon securing such a splendid site for the enlargement of their business. The site is immediately adjoining the present plant of the Toronto Foundry Company, and of the land purchased a block of about 183 x 500 feet will be held for future developments.

I WILL TALK

to practically every Hardware merchant in Canada from the Atlantic to the Pacific. I cannot do it all in one day, but during the first twenty-four hours I will deliver your message to every Hardware merchant in Ontario. I travel all day Sunday and on Monday morning there will not be a village within the limits of Halifax in the East, and Brandon in the West, into which I will not have penetrated.

I cannot go any farther East, so I now devote all my energies to the West, and so many new towns are springing up here each week that I haven't as much time as I used to have to enjoy the scenery. But I like talking to hardwaremen, clerks, travellers and manufacturers, especially as they are always glad to see me and hear the news I have to tell them. Tuesday noon I am at Calgary, Wednesday noon at Kamloops, and by Thursday morning I reach Vancouver having been in all the mining towns and all through the fruit districts of British Columbia.

I have been eighteen years on the road and I have a pretty good connection. I never intrude when a man is busy, but just bide my time, because I know men pay far more attention to what you have to say if you catch them when they have a few moments to spare. So I often creep into their pocket when they are going home at night, and when supper is over Mr. Hardwareman usually finds me. He must be glad to see me because he listens to what I have to say for an hour or more.

THE WANT AD. MAN

I try to always tell the truth, and men put such confidence in what I say that I would feel very sorry to deceive them even inadvertently. Probably some other week I will tell you about the different classes of people I meet. In the meantime if you want a message delivered to HARDWAREMEN, PLUMBERS, CLERKS, MANUFACTURERS or TRAVELLERS—and want it delivered quickly—I'm your man.

Our sample books of BAS-KA-NO—(something new in wall hangings—standard colors) and LIN-UNA (a high-class colored tapestry burlap—all colors), sized and oil-coated burlaps will be out in a few days. We would like to mail you one of these. Send us your orders.

AFTER THE XMAS RUSH

is the time to refit your store. It is the slackest time in the whole year. You have been promising yourself some new fixtures, why not instal them now.

There is an opportunity always for some one man or firm to rear a mighty bulwark—build a great business—by attaining a reputation for having the neatest store and giving the quickest service.

Get this reputation and you will thrive in spite of nearby neighbors who blatantly and brazenly boast of their cut prices and cheapness.

16 feet long, 8 feet 8 inches high

This section contains 138 Bennett Steel Hardware Shelf Boxes, ranging in size from 6x6x12 to 6x18x12. Our price for the boxes alone is $40.00. This is for boxes with oak fronts, hard oil finish, brass pulls attached to each box. Can you afford to be without shelf boxes at this price? Our catalogue gives other illustrations and full particulars regarding prices of various sizes of boxes.

CAMERON & CAMPBELL, TORONTO, ONT.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the **Western Trade** to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1462. Asbestos and mica—A Birmingham firm wishes to hear from Canadian firsm open to supply asbestos and mica.

1466. Scrap metals—A Birmingham firm is open to buy large quantities of scrap metals.

1470. Handles—A Birmingham firm is open to purchase large quantities of handles for chisels, awls, etc.

1471. Hardware—A Birmingham firm trading with South Africa inquire for firms manufacturing general hardware such as hammers, saws, etc., agricultural implements, including ploughs, harrows, hoes, shovels, rakes, and anything made in Canada for general South African trade.

1473. Baths, etc.—A Birmingham firm wishes to get in touch with Canadian firms open to sell baths and lavatory appliances.

1477. Wooden handles—A Birmingham firm is open to purchase large quantities of wooden handles.

1479. Shovel handles—A Midland firm wishes to hear from Canadian firms open to supply shovel handles.

1480. Pine doors—A Staffordshire firm would like to hear from Canadian firms in a position to supply yellow pine doors.

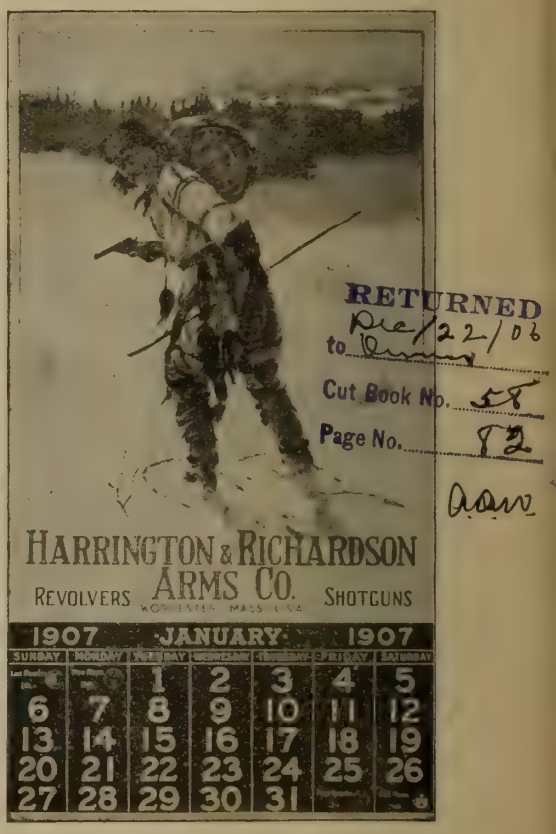
1482. Fish hooks, needles, etc.—A Midland firm wishes to place sea and river fish hooks, needles, etc., on the Canadian market.

1483. Cycles—A Birmingham firm wishes to appoint an agent in Canada for the sale of their cycles.

1486. Guns and cycle parts—A Birmingham firm wishes to place sporting guns, and cycle parts on the Canadian market.

LEAD MINING.

After being deserted and idle for over thirty years the Derbyshire lead mines in England are once more showing signs of activity. When lead dropped down to £12 per ton the mines were abandoned as unprofitable, but to-day, with the price at £20 per ton, there is a rush of prospectors to the King's Field, a vast tract of land belonging to the Duchy of Lancaster, and comprising the wapentake of Wicksworth and the High Peak. By the Acts of 1851 and 1852, which embody the immemorial laws and customs of mining in Derbyshire, anybody has the right to search anywhere for lead, but the owner of a mine must work it or yield his right to one who will exercise it.



CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

"The Canadian Trapper."

We are showing on this page a representation of the Harrington & Richardson Arms Company's 1907 calendar. The calendar is 14 x 26 3-4 inches in size, and is a lithograph in ten colors, of "The Canadian Trapper." This company has always been known for tasty calendars, suggestive of their goods, but their previous efforts seem to have been excelled this year. A postal card mentioning this paper will bring the calendar to any hardwareman.

Pike's Stones.

The Pike Manufacturing Company, of Pike, New Hampshire, have issued three most complete catalogues, the first dealing with corundum wheels, giving complete history and general description of the wheels and the process by which they are made. It also contains hints as to selecting wheels, as to coarseness and hardness, suggestions for mounting, the use and care of wheels, grade list, diagram of shapes, and true list of regular wheels, something which will be found of great value to hardware merchants and machinists. In this catalogue are diagrams of wheels, reduced

sizes, made expressly for use on special grinding machines, giving price, diameter, and thickness, as no doubt nearly everybody has had some trouble procuring a wheel to fit a certain machine, and these cuts will prove of great value in ordering.

The second book is of the same size, 6 x 9 inches, and contains about 90 pages, fully illustrated. This is the ninth edition of their catalogues dealing with oilstones, scythestones, razor hones, corundum wheels, emery wheels, and abrasives, going particularly into the manufacture and choosing of the former, the different styles, and sizes, prices, etc., information which will prove instructive to any person selling these goods, and enable dealers to talk intelligently as to construction and different grades of stones.

The third is a much smaller catalogue of about 4 x 6 inches, containing 17 pages fully illustrated, with cuts of carvers slips, India oil stones, mounted and in wheel form. These stones have not been on the market so long as the others, but, are well and favorably known. These catalogues should prove a great help in ordering goods, and can be procured by any dealer who mentions this paper.

Greening's Calendar.

The B. Greening Wire Company, Hamilton, Ontario, are sending their customers a 1907 calendar, which is of a good useful size, and will be greatly appreciated by all receiving one. The cut used is the same as in former years, showing their factory, also portraits of the president and incorporator of the present firm, the founder of the Hamilton business, and the founder of the firm in Warrington, England. No additions have been made to the buildings this year, but there will be a considerable increase during 1907, to take care of the increased volume of trade, that this firm is sharing with other manufacturers in Canada. Inclosed in the calender is a letter with a talk to the trade requesting correspondence regarding any of the different lines. Catalogues will be furnished on inquiry.

Owen Sound Stoves.

The Canadian Heating and Ventilating Company, Owen Sound, have a complete catalogue about 6 x 9 inches in size and containing 40 pages fully illustrated, showing the different lines manufactured by them, such as the Empire Queen cast range in different sizes with and without reservoir, the Empire steel range for coal and wood, and many different styles of cook stoves for wood, as well as some for coal and wood, with quite a supply of heaters, base and surface burners, wood air tights, made of polished sheet iron, laundry stoves, hollow ware, and cast iron kitchen sinks. The Empire King furnace, which is manufactured by them is also illustrated by a cut, accompanied by a full explanation of its merit. A separate pamphlet inclosed in the catalogue, contains full illustrations of the construction and working parts of their stoves.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

Prices on Oshawa Fittings.

The Oshawa Steam and Gas Fittings Company, have issued a new classification and price list of malleable iron fittings, manufactured by them. The booklet also specifies sizes kept in stock, which should prove a great assistance to the hardware and plumbing merchant in ordering goods.

Original Calendar Design.

The Canada Paint Company, Montreal, have issued a very handsome 1907 calendar showing a painter sitting on a step ladder admiring his visage in the varnished panel of a door, which has been done with the contents of a can, which contained the Canada Paint Company's amberite varnish. The calendar will prove both useful and ornamental to the home or office, having the date printed in large bold type.

The sketch is a new and original one, and any dealer not on the company's mailing list should write for a copy, mentioning Hardware and Metal.

MAKE FEW BAD DEBTS.

When a hardware merchant knows his trade he will make few bad debts. He will know the slow pay and the never pay. Thus posted he will be able to say "no," in such a way that it will not make you enemies.

One of the leading financiers in the country owes his position to his ability to say "no," in such a way as to actually make the applicant for loans believe that he doesn't need the money. This is a great card in the trade.

To thoroughly know your trade is to have mastered the chiefest part of your business.

FOUNDRY AND METAL INDUSTRIES

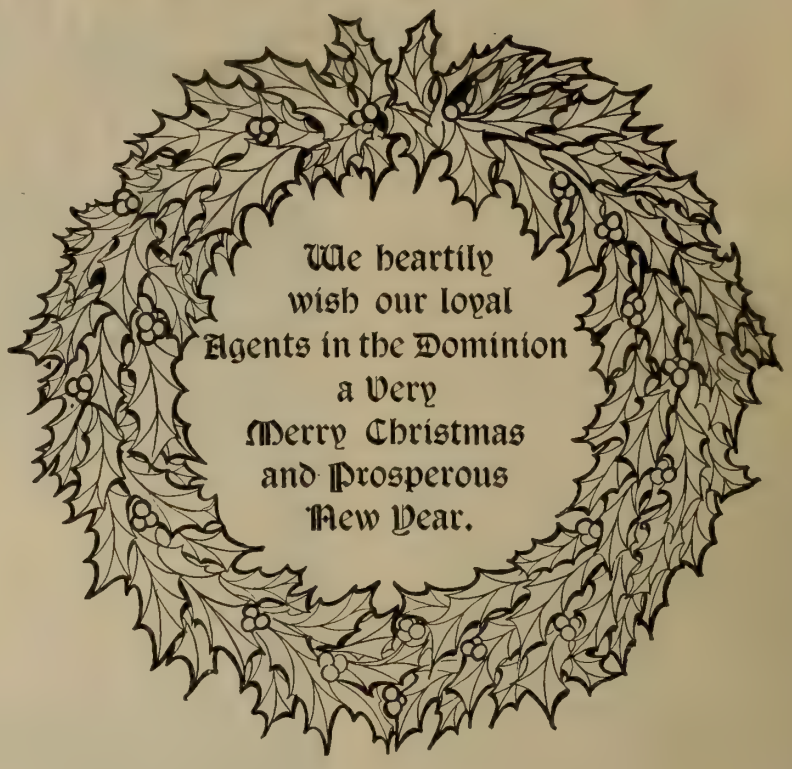
The Nova Scotia Steel Company's forge building at New Glasgow was burned yesterday. The tools were saved.

The Wm. Hamilton Manufacturing Company, of Peterboro, has been taken over by the Trusts and Guarantee Company, of Toronto.

A valuable discovery of iron ore was recently made in the Township of Snowdon, in the Haliburton District, about three-quarters of a mile from the line of the Irondale and Bancroft Railway. The deposit is 150 feet wide, and the ore a high grade magnetite. It is the largest body of ore yet discovered in the district.

The Canada Foundry Company, of Toronto, have completed the erection of the structural steel for the west side of the Canada General Electric Company's new transformer building. Work will now begin on the east side wall, and in three week's time it is expected, the job of placing the roof on the building will be commenced. Operations will be continued all winter.

The Ontario Iron & Steel Company of Welland, Ont., have added another large building to their original plans. A steel foundry building, 175 x 250 feet in size, to be constructed of structural steel and corrugated iron. The plant now being built will cost with the equipment fully $300,000, which is three times the size that the company agreed to put up when granted the bonus.



The big brick addition to the Bertram shops at Dundas, is being rapidly pushed to completion. The big shop runs between the new molding shop and the main building. The firm has an ever-increasing demand for working space, and when the new buildings are all completed the shops will be about the most important in Canada.

A steel industry capitalized at five millions, is the latest proposition to come before the Goderich Council, they state that the plant would employ about 1,500 hands, and occupy 100 acres. They ask certain bonuses, and the council have decided to take the matter up with the Canadian Pacific, with whom the steel interests have already communicated, and see what inducements can be offered.

OLD AGE DEFIED.

The Hungarian chemist Brunn, claims to have discovered a liquid chemical compound which renders certain kinds of matter proof against the effects of time. He asserts that it doubles the density of nearly every kind of stone and renders it water proof. It imparts to all metals qualities which defy oxygen and rust. The professor says that while traveling in Greece some twenty-five years ago, he noticed that the mortar in stones of ruins which were known to be over 2,000 years old, was as hard, fresh, and tenacious as if it had been made only a year. He secured a piece of mortar and has been working on it ever since until now, when he says, he has discovered the secret. His discovery, he claims, will, at least double the life of metal exposed to the air, such as bridges, railroads, vessels, and tanks.

ALZEN, A NEW METAL.

Alzen is the name given to a new metal, which is composed of two parts of aluminum and one part zinc, writes United States Consul-General Guenther, from Frankfort, Germany. It is said to equal cast-iron in strength, but is much more elastic. Alzen is superior because it does not rust as easily as does iron and it takes a high polish. Besides being very strong, this new metal is capable of filling out the most delicate lines and figures of forms in casting.

Paint, Oil and Brush Trades

ADVANCE IN TURPENTINE EXPLAINED.

Though the turpentine market in the United States is generally governed in its fluctuations by the natural law of supply and demand, there undoubtedly have been other and more artificial elements entering into the continued upward movement in prices which has characterized the market throughout the last four years. Primarily, however, says a writer in the American Druggist, the cause for the advancing tendency is the fact that the big pine forests in the North and South Carolinas have been almost exhausted and are now practically abandoned by the boxers or turpentine tappers. The abandonment of these exhausted tracts of forest land as sources of supply now limits the producing territories to the forests in the Southern part of Georgia and the greater part of Florida. From these two tracts the supply must be obtained for practically the entire world, as in most European countries the national laws prohibit the cutting of pine trees. As a result of this European prohibition, English and Continental users of turpentine are compelled to cover the bulk, if not all, of their requirements in this country, and at the present time these foreign buyers are making the heaviest purchases in Savannah, the primary market for the entire world. If it were not for this big foreign consumption, the supply available for American consumption would be much larger and prices would be materially lower. At present the Antwerp Naval Stores Company, the London-Savannah Naval Stores Company, and Nichols & Knight of London, are the three largest buyers of American turpentine, and every time they make unusually large purchases they send the American market up. These foreign buyers get the best turpentine available in this country and the domestic consumers are frequently compelled to take the leavings and pay exorbitant prices for them, because of the fact that the primary market is bare of desirable offerings.

So much for the natural law of supply and demand, the supply, as previously mentioned, being greatly diminished within the last few years and the demand being greatly augmented by foreign purchasers.

The American market, however, is also manipulated to some extent by combinations among distillers, combinations among factors and combinations among export houses. The combinations among distillers in certain districts of the southern producing regions frequently agree to hold their supplies for an indefinite period and refuse to market them until they can obtain higher prices. The combinations among the factors, who advance money to the distillers on shipments, take advantage of any scarcity of spot goods and occasionally advance the market by creating an artificial scarcity, and, last but not least, the combinations of American export houses, backed by the Standard Oil company's interests, frequently raise their prices arbitrarily by holding back supplies when they would otherwise be almost immediately available for shipment abroad. With the already diminished supply, the increasing foreign demand and the juggling of these three classes of combinations, the American turpentine market is reaching top notch figures, and the tendency continues upward.

In Europe, however, the impression prevails that there is one gigantic combination of turpentine interests in America, which absolutely controls and dominates the situation and makes the market to suit itself, therefore forcing the foreign consumer to pay the bill. It is true that American capital is naturally enlisted in a market of this kind in which the supply is already diminishing and the consumption increasing. Capital always hastens to take advantage of a natural scarcity of supplies and render it more acute, but the primary reasons for the continued upward movement in prices are those previously mentioned—viz: The curtailment of the producing territory and the enormous foreign buying, two elements which did not enter into the American turpentine market seven years ago.

It has been suggested that the production of turpentine might be augmented by tapping the big pine forests in South America, but this cannot be done to advantage for the reason that the South American pine trees are of the short needle variety, and the sap obtained from this kind of pine tree does not contain enough spirits to make it profitable to distill it. The pine trees in southern Georgia and Florida, on the other hand, are the long needle variety and produce spirits, when distilled, in abundance. The distillers in the United States, however, were not foresighted enough to replant the for-

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 21, 1906.

With the advent of winter rates and severe weather, shipments of paints and colors have fallen off materially. As a large number of travelers are now off their territory in view of the coming Christmas vacation, general business may be described as dull.

Linseed oil and turpentine both keep very firm, and there seems to be no difficulty in getting the advanced prices for white lead recorded last week.

LINSEED OIL—We continue to quote: Raw, 1 to 4 barrels, 55c; 5 to 9 barrels, 54c.; boiled, 1 to 4 barrels, 58c.; 5 to 9 barrels, 57c.

TURPENTINE—An advance of 1 cent has taken place, and we are now quoting: Single barrel, 96c per gal.; two barrels or over, 95c per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—Last week's advance is being rigidly maintained and grinders have no trouble in getting the following prices: Best brands Government Standard, $7.25 to $7.50; No. 1, $6.90 to $7.15; No. 2, $6.55 to $6.90; No. 3, $6.30 to $6.55 all f.o.b., Montreal.

DRY WHITE ZINC.—We still quote as follows: V.M. Red Seal, 7½c to 8c; Red Seal, 7c to 8c; French V.M., 6c to 7c; Lehigh, 5c to 6c.

WHITE ZINC (ground in oil)—Manufacturers have raised their prices, and we now quote: Pure, 8½c to 9½c.; No. 1, 7c. to 8c.; No. 2, 5¾c. to 6¾c.

PUTTY—A heavy demand is shown. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—The following quotations are firm: Genuine red lead in casks, $6.00; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

PARIS GREEN—Prices are as follows: In barrels, about 600 pounds, 23½c. per lb.; in arsenic kegs, 250 lbs., 23½c.; in 50 lb. drums, 24c.; in 25 lb. drums, 24½c.; in 1 lb. packets, 100 lbs. in case, 25c.; in 1 lb packets, 50 lbs in case, 25½c.; in ½ lb. packets, 100 lbs in case, 27c.; in 1 lb. tins, 26c. f.o.b. Montreal. Term three months net or 2 per cent. 30 days.

SHELLAC—Quotations are as follows: Bleached, in bars or ground, 46c per lb., f.o.b. Eastern Canadian points, Bone Dry, 57c per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 48c per lb. f.o.b. New York.

SHELLAC VARNISH—The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

BENZINE—We still quote 25 cents in barrels, and 30 cents in smaller quantities.

WINDOW GLASS—Our prices are: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

—

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, December 21, 1906

No changes are quoted this week, lead remaining firm at $7.40 for pure. There appears to be a lot of white lead in oil on the market that has not been ground fine, and contains small particles of lead crystals uncorroded. While this lead is perfectly qualified to bear the pure label seal, as it contains no adulteration, it will prove very unsatisfactory to the trade, the lumps would not permit of a good job being made by the use of it.

No change is reported in turpentine, but it is generally expected to take a raise, as the shortage in the production, and the large demand is almost sure to warrant a further advance. Boiled oil remains firm with no advance on last week's quotations. The great

YOUR PAINT TRADE FOR 1907

will be interesting if you do it with

LET US POST YOU

A. RAMSAY & SON COMPANY

Just try some ordinary green paint on a panel of wood, see how hard it works,—don't cover, lacks body. Then try on another panel

LUCAS IMPERIAL FRENCH GREEN

notice how easy it spreads, how well it covers,—that's body. Makes the cost less for this reason alone, and stays fresh and brilliant. It preserves the wood, keeps the weather out and the color in. It is the **ONE** Green that is free from arsenic or verdigris.

BEWARE OF IMITATIONS

JOHN LUCAS & CO.

NEW YORK, PHILADELPHIA, CHICAGO

A GOOD RULE!

A good rule is a good thing to go by, provided you know the rule is correct and dependable.

For instance—

IT'S A GOOD RULE

to make every effort not only to hold, but to increase your business — that goes without saying.

IT'S A GOOD RULE

to get acquainted with the quality and make up of the goods you handle—you can talk them to better advantage to your customers.

IT'S A GOOD RULE

to have an iron-clad guarantee from the manufacturers as to the ingredients in the paints you are selling, or intend to sell—it shows your good, hard-headed common sense.

We guarantee the Martin-Senour 100 per cent. Pure Paint (except a few dark shades that cannot be prepared from lead and zinc) to be made from Pure Carbonate of Lead, Pure Oxide of Zinc, with coloring matter in proportionate quantities necessary to make their respective shades and tints, with Pure Linseed Oil, Dryer and Turpentine for thinning, and to be entirely free from Water, Benzine, Barytes, Whiting and adulteration, and sold subject to chemical analysis.—*The Martin-Senour Co., Ltd.*

IT'S A GOOD RULE

to have the exclusive agency in your town of the **Martin-Senour Paint, 100 per cent. pure**, because the agency will enable you to have the best paint trade in your locality, and you will find it

A GOOD RULE

to **write at once for particulars of our proposition** and the line of advertising supplied our exclusive agents. Just send a post card and you'll get a prompt response.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

ADVANCE IN TURPENTINE EXPLAINED.

(Continued from Page 50.)

ests killed by the constant tapping, and so large tracts in North and South Carolina have been abandoned as no longer productive of enough turpentine to make it practicable to work them. It takes 12 years for a sapling long needle pine to reach maturity when it can be tapped profitably, and the life of the tree after the tapping process has been begun is only four years. In Georgia this tapping generally begins in April and continues up to the middle of November, while in Florida it continues throughout the entire year.

One of the most experienced independent dealers in New York predicts still higher prices for turpentine this winter and believes that there is every reason for thinking that prices will reach a higher level than ever before in the history of the industry. He bases his prediction on the fact that, although tapping is still being conducted in Florida, the Savannah market is now at 67½ cents, so that when tapping stops and the production comes to a standstill, the diminishing supply will naturally send prices up sharply. The only exception to this rule is noted when the distillers and factors have set aside heavy accumulations of spirits. Even if such accumulations are available, however, this authority believes that the price of turpentine in Savannah will reach 77 cents per gallon by January 1. Two years ago the Savannah market reached 79 cents during the winter. This year, even in the height of the producing season, the price did not decline proportionately as much as during the corresponding periods of previous years, and it is therefore likely that high prices will prevail this winter.

NO LOST TIME.

United Factories, Limited, Toronto, have not lost any time since the fire in clearing out all the stock that was damaged by fire or water. The warehouse and offices are now being re-constructed and they expect to be doing business at the old stand before the year expires. This firm has not missed a single days business and have not in any way been effected by the fire as regards filling their orders, owing to the heavy stocks carried at the Toronto, London and Newmarket factories, and also at the Montreal branch. All orders for Boeckh's brushes and brooms are now being filled promptly from their Clarence St. warehouse, and the Bryan's brushes and Cane's woodenware are being shipped direct from the factory, so that any business entrusted to their care will receive prompt attention.

The company are to be complimented in having such a capable staff who are fully equal to the task which was put upon their shoulders without a moment's notice.

Toronto, December 17th, 1906

To the Trade

We wish to thank our many customers and the Trade generally for their patronage and support during the past year. Our three factories which are fully equipped and up-to-date in every way are in a better position than ever to handle a largely increased business for the coming year. We have added many new lines and improved others, and we are now offering a larger variety than any other Brush Manufacturer in Canada, at the lowest market values consistent with quality.

Wishing you A Merry Christmas and A Prosperous New Year, we remain,

Yours Truly,

UNITED FACTORIES, LIMITED

THE STATEMENT

was recently made that **every** dealer used **ALABASTINE** in his own home or store in preference to Kalsomines or other forms of decoration. We believe this to be close to the actual fact and count on the confident recommendation of

ALABASTINE

from this **personal knowledge** of its **merits** and **superiority.**

ALABASTINE is standard, the demand is increasing and this season every Canadian home, in which a paper is read will have **ALABASTINE** brought to their notice as never before.

Our publicity campaign also includes a liberal supply of tastily printed literature, handsome show cards, hangers, etc.

In our 32-page pamphlet "**HOMES, HEALTHFUL AND BEAUTIFUL,**" we show three-color illustrations of actual **ALABASTINE** decorations.

This is without doubt, the finest advertising booklet in the trade. Dealers receive copies free, the public pays 10c.

This advertising coupled with your own knowledge of **ALABASTINE'S** merits **MEANS LARGER SALES**. Order accordingly and **DO IT NOW**, spring dating.

The ALABASTINE CO., Limited, PARIS, Ont.

ANY OLD PAINT IS GOOD ENOUGH

for the dealer who doesn't care about results, and has no ambition to build up a permanent trade and reputation, but those who want **THE BEST**, and to whom price isn't everything, sell—

"Sterling" Pure Prepared Paint

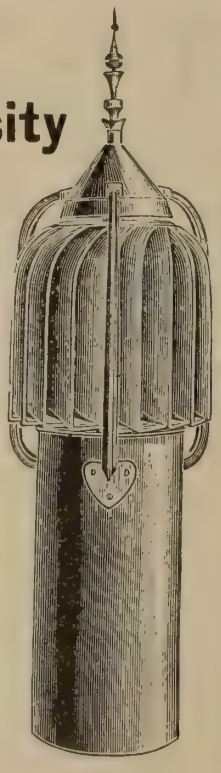
That is the reason why the best stores all over Canada carry this brand.

"STERLING" IN NAME. **"STERLING" IN QUALITY.**

Quality never shone to such advantage as in this age of keen competition.

Manufactured by

CANADIAN OIL COMPANY, LIMITED, TORONTO



MONTREAL ST. JOHN OTTAWA WINNIPEG VANCOUVER

It Saves Lives

A Building Necessity

These are the names that have been made synonymous with

AEOLIAN VENTILATOR

We are the manufacturers of it and control the patents.

We have placed it on some of the finest buildings in the Dominion.

It is a scientific fact that no modern buildings can afford to neglect sanitation.

We are contractors and sanitary experts. Our ventilator is guaranteed and is placed in position to suit the building as to quality and size.

One Testimony

Montreal, June 12th, 1903.
Canadian Pacific Railway Company
Messrs. J. W. Harris Co., Limited,
7 St. Elizabeth Street, Montreal, Que.

Gentlemen, - Answering yours of June 1st, I am not personally familiar with the merits of the "Aeolian" Ventilators, but our Assistant Engineer, Mr. F. Crossley, reports that the Ventilators of this type manufactured by you and used by this Company at the Place Viger Hotel, Chateau Frontenac, Windsor Street Station and elsewhere, have proved satisfactory. Yours truly,

E. H. McHENRY,
Chief Engineer.

Reach the Right People!

Hardware and Metal want ads reach the right people. It is the only paper in Canada that will reach the hardwaremen, plumbers, manufacturers and travellers from the Atlantic to the Pacific.

For a mere trifle you can talk to all the men in Canada who are interested in the hardware trade.

Are you taking advantage of this ?

Somebody in Canada wants just what you have to sell : we can find that somebody for you.

Condensed advertisements in Hardware and Metal cost 2c. per word for first insertion, 1c. per word for subsequent insertions. Box number 5c. extra. Send money with advertisement. Write or phone our nearest office.

A Brief Paint Discourse

The fellows who tell you that all paints are about alike know more about evading the truth than they know about the paint industry.

All reputable manufacturers produce good paint but—**there is a best brand of Paint**—a brand that stands unrivalled for its lasting life and lustre.

Ark Brand Paint

You practical men know the value of a paint with no fade as a business builder. The margin of direct profit is greater on Ark Brand than on most good paints—the indirect profits in the way of pulling business, well, they're unparalleled.

MURESCO WALL FINISH

Every time you use Muresco you take out a policy assuring more business. There is no wall finish on the market comparable with Muresco, and it pays—pays well.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

The Dominion Dash Company, Walkerville, Ont., will erect a new building there.

The Sydney Cement Company, Sydney, N.S., will operate their plant all winter.

Building permits issued in Toronto from December 8, to 15, amounted to over $116,000.

Stellarton, N.S., is having a new $8,000 skating and hockey rink erected, with a seating accommodation of 5,000.

A new company with a capital stock of $50,000, will be formed in St. John, N.B., for the manufacture of hardwood flooring.

Jones Bros. & Company, manufacturers of show cases, etc., Toronto, have increased their capital stock from $60,000 to $200,000.

The British Columbia Tie and Lumber Company's lumber mill at Prince Rupert, will have a capacity of 70,000 feet of lumber per day.

The Northern Navigation Company, which owned the steamer Monarch, recently lost on Isle Royale, will build a duplicate of their steamer Huronic.

Tenders are asked for the erection of a school to be built in Davidson, Sask., and will be received by F. S. T. Hutchinson, up to January 15, 1907.

The Dominion Carriage Company, Truro, N.S., has been organized with a $250,000 capital, and will erect buildings in the spring, employing 100 men.

The Vancouver Portland Cement Company are preparing to enlarge their premises, so as to have an output of 1,000 barrels per day. Their capacity is now 650 barrels per day.

The expenditure of a quarter of a million dollars at Stratford, by the G. T.R., for the erection of a new station, and extending its locomotive repair workshops, has been decided upon.

O. P. Letchworth, expresses the opinion that the Brantford plant of the Pratt & Letchworth Company, will be increased rather than reduced, despite the fact that his company is about to have another plant in Montreal.

Douglas Bros. Company, Toronto, have been incorporated, as contractors for roofing and sheet metal work, with a share capital of $100,000, provisional directors of the company will be, T. Douglas, E. Douglas and G. R. Douglas, of Toronto.

The Canadian Folding Box Company, of Brantford, was partly destroyed by fire last week, with loss estimated at $5,000. The business has been taken over by a London firm, which may result in them not rebuilding, and moving to London.

A company is to be established at Halifax, N.S., for the manufacture of railway box cars, flat cars, coal hoppers, and baggage cars. The plant will have a capacity of 1,500 cars a year, employing 250 men, with an annual wage outlay of $150,000.

Purdy Mansell Company, have been incorporated with a share capital of $100,000, as plumbers, gas, hot water and steam fitters, with head office in Toronto, and provisional directors, to be: A. S. Purdy, Wm. Mansell, C. P. Mansell, and F. Lucas of Toronto.

W. N. Sawyer, who has been general manager of the Lake Superior Corporation, has resigned his position with that firm, and will go to Cleveland, to become general manager of the Willman, Searer, Morgan Company, one of the largest engineering concerns in the United States.

Edmonton passed four money by-laws this week, totalling $275.000. Of this $121,000 was for paving, $119.000 for rails for the street railway : $45.000 for an incinerator, and $60 000 for the purchase of a third park site, two having previously been purchased. All the by-laws were passed by large majorities.

The Vulcan Company have been incorporated with a share capital of $100,000, and head office at London, Ontario, to manufacture furnaces, stoves, and other heating and cooking appliances. The provisional directors of the company will be: R. W. Shaw, E. W. M. Flock, and F. G. Mitchell, of London.

The Canadian Clothes-Pin Manufacturning Company, Arnprior, have been incorporated with a capital of $40,000, to manufacture clothes pins and all kinds of wooden ware. Provisional directors of the company will be, W. M. Howe, W. A. Cameron, R. Richardi, S. R. Rudd, M. Havey, J. J. Neilson, and J. G. Ledgerwood, of Arnprior.

The Dominion Heating and Ventilating Company have been incorporated with a share capital of $40,000, to manufacture heating and ventilating systems, also iron, brass, aluminum, etc., machinery and casting, with head office in Hespeler. The provisional directors of the company will be, E. McNally, M. A. Secord and L. Reid of Galt.

The Algoma Steel Bridge Company have been incorporated with a share capital of $40,000, and head office at S. Ste. Marie, Ont., for the purpose of manufacturing and erecting steel bridges. Provisional directors of the company will be: A. Y. Bayne, M. McCollum, C. L. Brown, M. B. Stone, of Min-

neapolis, Minn., and A. B. Hillier, of S. Ste. Marie.

C. Ormsby & Company, Toronto, has been incorporated, with a share capital of $50,000, for the purpose of manufacturing, metal roofing, sheeting, and metal building materials, also to engage in building operations, as contractors. The provisional directors of the company will be: C. E. Ormsby, W. J. Cook, and G. A. Graham, of Toronto.

The Safety Door Hanger Company has been incorporated with head office at Hamilton, for the purpose of manufacturing door hangers, hardware, and hardware specialties. The company will have a share capital of $40,000, and the provisional directors will be, W. Topping, E. W. Topping, Ashland, Ohio; J. W. Nesbitt, J. G. Gauld, and James Dickson, of Hamilton.

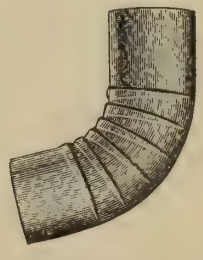
The Canadian Hardware and Manufacturing Company, has been incorporated with a share capital of $50,000, with heal office at Toronto, to carry on business as machinists, engineers, foundrymen, fitters, and smiths. The provisional directors will be: W. S. Harrison, W. H. Alderson, S. M. Linn, and W. J. McManus, of Toronto.

The Union Standard Furnace Company, have been incorporated with a share capital of $100,000, and head office at Toronto, to manufacture stoves, ranges, furnaces, steam and hot water boilers, radiators, pipes and heating apparatus of all kinds, plumbing and steam fitting supplies. Directors of the company will be: C. A. Ryerson C. L. Rosevear, T. M. Arnold, T. Shepard, and W. M. Weeks, of Toronto.

The Delany and Pettit Sand Paper Company has been incorporated with a share capital of $50,000, to manufacture all kinds of sand paper, and sand cloth, including garnet, flint, emery, corundum, carborundum, and all other abrasives, and in pumice and rottenstone, also glue and other adhesives. The head office of the company is to be at Toronto, and the provisional directors will be: C. Delany, C. S. Pettit, of Toronto, and T. H. Pettit, of Welland.

Notwithstanding the taking off of the bounty July 1, the net earnings of the Lake Superior Corporations for four months since the close of the fiscal year have been fully equal to those for the corresponding period in 1905. The restored bounty goes into effect January 1, 1907, and from then on, the company will receive the benefit, which should still more favorably affect the business as compared with that of a year ago. The steel rail tonnage has been running about 15,000 tons a month, and all of the subsidiary companies operated, with the exception of one trolley line, are contributing something to the net revenue, as they are all earning their fixed charges and something besides.

The Saunderson Manufacturing Company, the most recently established of Sydney, N.S. industries, is capitalized at $45,000, the directors being: A. E. Collas, Halifax, President; Gervais Lagros, Jersey; W. A. Black and Arthus L. Mervin, Halifax, R. C. Baconi, Moncton, and A. O. Saunderson, Sydney. The company are manufacturing tarred papers, ready roofings, sheathing, asphalt cements, refined tars and pitch, known as the "Seal Brand," and large shipments have already been made. A. O. Saunderson, the general manager has had long and varied experience in connection with industries of this character having been ten years manager of a plant at Halifax and subsequently held a similar position in Montreal, and afterwards in Toronto.



Never before was so much money paid for carrying freight in lake vessels as during the season just closed. A rough estimate places it at $61,000,000 for coal, iron ore, grain and lumber. The profits to the vessels were perhaps the largest in the history of the lakes. Careful computations based on the earnings of typical steamers show a net profit on steel ships of 13 per cent. On wooden ships of between 3,000 and 3,500 tons capacity the profits have ranged as high as 30 per cent., with an average of more than 25 per cent. on their insurance valuation. The cause of this great prosperity was the demand for the country for iron and steel. The total movement of iron ore for the season was 27,513,839 tons, an increase of 4,036 tons over 1905. Grain from Duluth moved in a larger volume than ever before. There was shipped from the head of Lake Superior 81,608,000 bushels, as compared with 59,678,000 bushels in 1905.

Details of Canada's trade for the five months ending August 31 last show a very large expansion compared with the same period in 1905. Our imports from Great Britain for the period under review this year amounted to $32,754,296, as against $27,847,690 for the year previous, and $25,934,295 for 1904. The exports were $43. 493 420 in 1904. $41,153,071 in 1905, and $55,653,099 in 1906. The imports into Canada from the West Indies up to Aug. 31 amounted to $3,106,646, a gain of $336,922 compared with 1905, and of $675,143 compared with 1904. The exports to Canada from the West Indies totaled $1,076,968, showing gains of $187,274 and $178,814 when contrasted with the same period of two years immediately preceding. The imports from the United States totalled $83,420,899, a betterment of $13,323,606 over the previous year, and $11,202,497 over 1904. Canadian exports to the United States were for the five month periods, as follows: For five months: 1904, $32,803,904; 1905, $35,892,221; 1906, $47,036,371.

Accidental Discharge Impossible—

True only if it is an

IVER JOHNSON

This is why

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.

Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

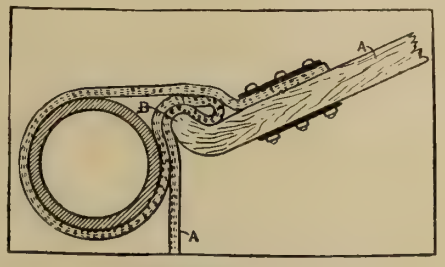
Plumbing and Steamfitting



DEPARTMENTAL STORE COMPETITION

John H. Allen, in the National Hardware Bulletin

The Master Plumbers and Steam and Hot Water Fitters of the United States have for many years been well organized into associations. The wholesale dealers in these goods are likewise organized into associations and work in harmony with the associations of manufacturers of plumbing and heating goods and also with the associations of master workmen who install the materials. Through the ceaseless efforts of these organizations extending in the case of the Master Plumbers over a period of twenty-four years, and in the case of the Steam and Hot Water Fitters over a period of eighteen years, the distribution and installation of plumbing and heating goods have been more than usually well confined to what are termed "legitimate channels." There has been a tendency on the part of the department stores to carry goods which in some cases closely border upon plumbing supplies, and in some cases, which are actually of that character. But as plumbing goods and the public health are so closely allied, and as nearly all cities have ordinances providing for the sanitary installation and inspection of plumbing work, it is almost essential that such materials shall be installed by master plumbers, and as through their associations both national, state and local, they have taken the stand that master plumbers should not install goods which are not purchased of them, this tendency referred to has not made much headway.

The mail order houses, however, are able to command a market, reaching as they do the country trade, where plumbers and steamfitters do not abound but where water supply is available through wind power, and where recent years of prosperity have placed the farmer in a position to be able to secure sanitary conveniences. As yet the master plumbers and steam and hot water fitters do not keenly feel this kind of competition, but efforts are being made to forestall it, there evidently being a feeling that it will increase to dangerous proportions. It is growing constantly. One catalogue house in Chicago has been able to place in charge of its steam and and hot water heating department one of the best designers of steam and hot water heating plants to be had. The same firm carries a very large stock of plumbing supplies and does a large business. I have understood, although I do not give this as being authoritive, that fifty per cent. of the plumbing goods sold by the catalogue house referred to are sold direct to the plumbing trade, that twenty-five per cent. more go to building contractors, and that only twenty-five per cent, is sold directly to what is known as the consuming trade.

The volume of goods handled by this house has been so great that, not being able to secure the goods from manufacturers direct because of trade understandings, they have purchased immense plants in which they manufacture their own product. This would seem to indicate that the business is sufficiently large to warrant their staying in it. Because of the fact that most of the plumbing goods sold by them direct to consumers are put in by people not engaged in the plumbing business, there are no cases where master plumbers have been seriously affected or driven out of business by this form of competition, and in the large cities we are quite certain that master plumbers and steam and hot water fitters are not affected at all. Still, the volume of business which has been done by the catalogue houses is sufficient to have attracted the attention of the trade and through their associations the subject is now being agitated and a solution of the problem is being sought. There is intense hostility among the wholesale dealers and the master plumbers, steam and hot water fitters against this kind of business, and if there is any way to prevent the manufacturer from selling plumbing and heating goods to the catalogue houses, I dare say it will be found. But up to the present time no such solution of the difficulty has been discovered.

Home-Made Wrench.

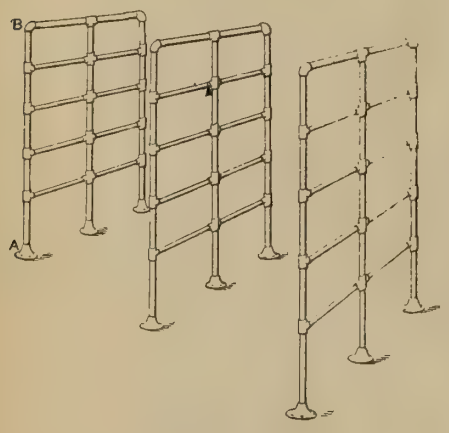
FRICTION PIPE WRENCH.

A simple friction wrench for manipulating polished brass and nickel-plated pipes writes John Weldon, in Popular Mechanics, and shown in the accompanying sketch, is constructed of the handle, A, a piece of oak wood 1 inch thick, 3 inches wide, 14 inches long, with end of same rounded as shown at B; a piece of canvas, C, so folded as to make three thicknesses and the same width as handle and about 18 inches long, so that it will encircle all ordinary work. It is fastened about 3 inches from end of handle by means of two brass plates 3 inches square and five countersunk bolts as shown.

To use the wrench pass the canvas around the pipe or other cylindrical object and tuck the folded end between the canvas and wood, as shown in the sketch. Then, when the handle is pulled down, the canvas will tighten around the pipe and under all ordinary conditions produce sufficient friction to turn it.

The use of this wrench will not mar the surface of the work, nor bend the pipe, because the compression is distributed evenly over nearly the entire circumference.

FREQUENT TESTS OF PLUMBING SYSTEMS.



The plumber who does not call the attention of his customers to the desirability of occasionally having the plumbing in their buildings subjected to a test is overlooking an important source of profit. Some plumbers may be surprised to know that there are property owners in New York City who make it a point to have the plumbing in their fine residences tested every year, and in the fall season when they are about to return from a sojourn in the country to their city homes the plumber is employed to make a test. The advisability of this course is shown in the experience of an owner of a fine residence on Fifth Avenue in New York. The annual test of the plumbing for several years had disclosed no leaks of any character, notwithstanding that a combination of the peppermint and smoke test was applied. This fall, however, on returning home, split hubs in the wall stacks, broken wiped joints on vent connections and strained connections to many of the fixtures were discovered, requiring a great deal of work to put this plumbing system in a sanitary condition.

Naturally some investigation was made to discover the cause, and it was found that the residence was not the only one in the immediate vicinity which had suffered in a similar way. The true cause was found to be the excessive blasts used in building operations in the immediate vicinity. Under much of New York City and very near the surface in many places is hard rock, which must be drilled and worked very much the same as a stone quarry to provide a cellar for a new building or to carry foundation walls down in accordance with the building regulations. Formerly contractors showed some consideration for the rights of owners who had already erected buildings. In recent years apparently no thought is given to anything else but blasting out the cellar at the cheapest possible cost. In consequence dynamite is used, and in such quantities that the whole rock ledge underlying buildings for some distance is severely shaken, and occasionionally rocks are thrown up in the air to endanger the lives of the people and cause damage to adjacent buildings. It

is remarkable that no action has been brought against the responsible parties for this violation of the rights of property owners or calling in the Board of Health to prevent the destruction of the plumbing systems which have so important a bearing on the health of the occupants of the building and over which the Health Board has in the past exerted such a stringent supervision.—Metal Worker.

KEEPING THE APPRENTICE AT WORK.

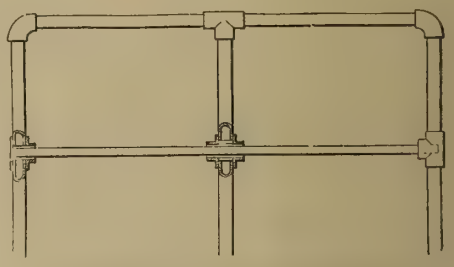
Perhaps one of the reasons why I appreciate the short-comings of the present apprentice system is that I was at one time an apprentice myself and learned the trade, writes Alex. Wallace in the Metal Worker. In those days we not only had to do all sorts of apprentice work, but we washed the windows in the shop, took care of the horse, and if there was anything to be done the apprentice usually had a finger in the pie. Probably one of the reasons why we cannot obtain competent journeymen at present is be-

A Pipe Rack of Pipe.

cause employers for the past 10 or 15 years have tried to get value received out of the apprentice and give him little or no instruction. The slack season is now coming on in many establishments and probably not a few apprentices will be summarily dismissed and left to shift for themselves during the winter. Some of these will come back in the spring, but they will be the poorest ones, as the brighest boys and the most ambitious ones will have hunted for another job either in a factory or some shop which promised them steady employment all the year round. Consequently the plumber must start in with the first work of the spring to train in new boys, unless he thinks of some method to hold on to the old ones.

For the past half dozen years I have made it a practice to keep the brightest of the boys at work all winter even if I lost money in doing it, which I usually did; but I have figured it down pretty close and find that my losses were not much. In fact, last winter, keeping three boys, I found that two of them paid their own way, while on the third I was out a dollar a week. The first month's work in the spring, however, more than made up the dollar a week loss and I was in better shape throughout the busy summer than any of my competitors.

Keeping the boys busy is the particular thing. It is no advantage to the plumber or to the boy to hire a boy and let him sit on the top of a bench smoking cigarettes and listening to the talk of the men all winter. It makes him lazy and when spring comes he does not know what it is to get out and hustle. A good share of the time I keep the boys busy sorting things, cutting nipples of all kinds and sizes out of left over pieces of pipe, melting lead pigs up in small cakes so that they can be more readily taken on the job, and melting up old lead traps and skimming off the dross so that it can be used for calking lead in the spring. Nipple cutting is the best work for the boys, as it teaches them the use of the machines, gets them accustomed to make actual measurements and uses up the old pipe in the shop. The money expended in cutting nipples with untrained boys will just about buy nipples from some supply houses, but I get a better nipple, use up my old pipe and keep the boys working, so I count it a gain.



I have often had them build up benches and racks out of pipe in order to facilitate work in the spring and get them more accustomed to making exact measurements. The pipe rack that two of my boys made a couple of years ago is so satisfactory to me that I have sketched it so that other plumbers may build one like it. It is composed of three frames, each made up of pipe, elbows and tees. An enlarged section of a portion of the rack is shown in the smaller illustrations, which gives a clearer idea of its construction. The boys made up the legs of 1 1-2 inch pipe, putting 1 1-2 inch fittings as shown. The top is joined together rigidly by elbows, and the laterals, which in turn support the pipe, are made of 1 inch pipe slipped through the middle leg and into the sides and then the whole screwed up tight. The reason why 1 inch pipe is used is that, fitting loosely in the 1 1-2 inch fittings, it can roll when pipe is being pushed into the rack, the cross-pipe rests thus acting as supporting rollers and making it easier than otherwise to handle pipe being put into or taken from the rack. In my shop all the pipe is put in from the right hand end and taken out from the left hand end, where the machine is located. This saves handling the pipe once and facilitates working,. The larger pipe, of course, is kept on the bottom rack, with the smaller sizes higher up. Black pipe is laid in one side of the rack, while galvanized is placed in the other.

The Welland Canal was officially closed December 17, and everything is being made secure for winter.

BALTIMORE'S NEW SEWERS

Work has been started on the much-talked-about and long-deferred sewerage system which is to make Baltimore the healthiest city in the land. The enabling act of the Legislature provides for two complete systems—one for carrying off storm water, which will empty into the harbor, and the other sanitary, with and elaborate disposal plant located in the county. The work is one of extraordinary magnitude and, incidentally, Baltimore is the only city in the country which has undertaken the construction of a storm water and a sanitary drainage simultaneously. It is a stupendous project, involving many complications and engineering problems. Contracts for ten miles of the storm sewers and two miles of the sanitary sewers have been let. The latter is to connect with an experimental disposal plant, but will eventually form a part of the completed system.

An idea of the prodigiousness of the undertaking may be obtained when it is stated that the two systems embrace 1,400 miles of sewers. It is estimated that the sanitary system will be completed in about seven years, the storm sewers may take longer, as they are larger and more complicated. Concrete will enter largely into the construction and arrangements have been made to supply this commodity in quantities needed, so there will be no delay on account of material. The greatest diffi-

Enlarged Section Showing Construction.

culty will be the mesh of gas and water mains which spread over the city like network. The railroad tunnels are another problem to be dealt with, but it is believed the plans have discounted these drawbacks and the work will be pushed to completion without delay. There are now available about $10,000,000 for the big job, but it is impossible to forecast what will be the ultimate cost.

With the work completed Baltimore will have as perfect a sewerage system as any city in the world. It is an immense outlay, but it is believed Baltimore will be more than compensated by the advantages derived and by the inducement a healthy, hygenic city presents to attract capital and a desirable increment to its residential population.

GIRLS STUDY PLUMBING.

A new class has been established at the Toledo manual training school for the study of household sanitation planning and plumbing will be started within a few days for the young ladies attending the school. The school authorities are of the opinion that these studies are conducive to a happier married life. The drawing of architectural plans is also included.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 21, 1906.

Business has naturally fallen off somewhat during the past week, but it is still far above the average volume of trade for this season, and the staffs of the various supply houses here have been kept very busy. In fact one frequently hears a wish expressed that trade should fall off a little so as to enable the annual stock-taking to proceed.

Iron pipe is beyond a doubt becoming more scarce with every day. It is very difficult, now, to fill orders for many sizes. Prices have not yet been advanced, however.

RANGE BOILERS—There is a good demand and the following prices are well maintained: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—Primary markets are still rising, and pipe is firmer. We still quote 5 per cent. discount f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c per hundred lbs extra; f.o.b. Hamilton, 10c per hundred lbs. extra.

IRON PIPE FITTINGS—The usual trade is being done at unchanged prices. we quote: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent., 3½ inch to 2 inch, 55 per cent.

IRON PIPE—Supplies are all the time becoming shorter. Prices, however, remain as follows: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, 11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27.00; 2 inches, $36.50, discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches. $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 70 per cent., and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—Our prices remain as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Quotations are unchanged. Our prices are: Bar solder, half-and-half, guaranteed, 25c; No. 2 wiping solder, 22c.

ENAMELWARE — Prices are currently quoted as follows: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65 special, $18.65; plate E11 and E21 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, December 21, 1906

Business in both plumbing and heating is comparatively slow on account of the lateness of the season and shortage of iron pipe. All jobbers of pipe continue to report a scarcity, and as soon as a carload is received it is rushed out to customers who have been waiting for supplies for several weeks. In many cases journeymen have been laid off work waiting for pipe to be secured. The greatest scarcity exists in ¼ inch size. The reason given for the scarcity by manufacturers is their inability to secure skelp, the chief source of supply being from The United States Steel Corporation. This has suggested to some that the Steel Corporation is behind recent changes among Canadian producers of iron pipe, the shortness of skelp being used to work up the price of pipe to a profitable figure where it can be kept permanently by a strong combination. This is interesting to users of pipe as it indicates a possible scarcity both of skelp and pipe for several months to come.

Soil pipe which has been sold at open market prices during the past few months is slated for an advance within the next few days. Makers have been selling at rock bottom without advancing selling prices while the price of iron has jumped several dollars per ton. As intimated by us some weeks ago, the existing low prices would probably continue until the first of the year, but we are now looking for an immediate advance. Another line on which we expect to see higher prices is hot water boilers. A couple of months ago stoves, furnaces and radiators advanced, but boilers remained unchanged. Present indications are, that they will be advanced 5 or 10 per cent in keeping with the higher cost of raw material.

Changes are also being made in compression, fuller and ground work. One house is quoting the following advanced prices:—1½ inch compression bibbs, stops and stop and wastes discounts have been lowered from 60 to 55 per cent., on other sizes, ⅝ and 1 inch 45 and 5 irs now quoted except stop and wastes which are straight 45. ½ inch ground work is quoted at 55 and other sizes 57½. ½ inch filler bibbs are quoted at 65 per cent., and other sizes 55 and 5 per cent.

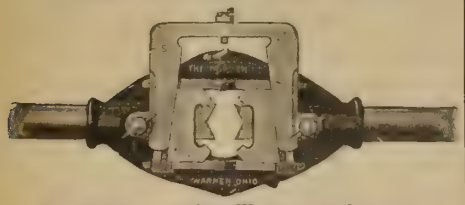
No changes have yet taken place on enamelware, an advance having been looked for as a result of the increased tariff on all earthenware and enamelware lines.

LEAD PIPE — The discount on lead pipe continues at 5 per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 6c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—The scarcity is not being relieved and work is being delayed. One-inch black pipe is now being quoted at $4.80 and one-inch galvanized at $6.43. Full list in current market quotations.

IRON PIPE FITTINGS — New lists are as follows: Cast iron elbows, tees, crosses, etc., 62½ per cent.; cast iron plugs and bushings, 62½ per cent.; flange unions, 62½ per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.



GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.

RADIATORS—Prices are very stiff at: Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain firm as follows: Bar solder, half-and-half, guaranteed, 27c.; wiping, 23c.

ENAMELWARE—We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25; plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

The Quality and Economy of "SOVEREIGN" Hot Water Boilers

EXPLAINS the whole story of the ever-increasing demand.
The "SOVEREIGN" has reduced the heating problem to an exact and simple science.
The "SOVEREIGN" saves money because it saves lots of fuel boilers built on other lines must waste.
The "SOVEREIGN" is the hot water boiler for the dealer to recommend who wants more business and "GOOD-FRIEND" customers.

How Many Slow Debts Have You?

How many of these debts are due to the debtor or to your own carelessness? If you insist upon prompt collections you usually get them, but it is important that you properly approach the delinquent debtor when forcing a settlement.

THE MONTHLY ACCOUNT SYSTEM

has proved the most efficient means of approaching debtors. Make it known to your customers that you have adopted the new system—the monthly account system of rendering accounts—and you will be surprised at the returns. Short accounts make best friends. Do your part to foster the friendship and goodwill of your customers by letting them know monthly how they stand on your books. Leave your accounts to a convenient time for making them up, when they have piled up into a big amount, and you have distrust. They may not tell you so, but they wonder how it ever amounted up to such an amount.

WRITE US FOR FURTHER INFORMATION.

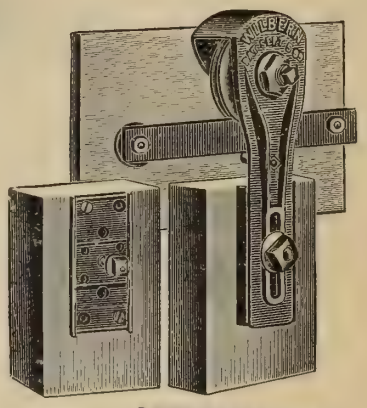
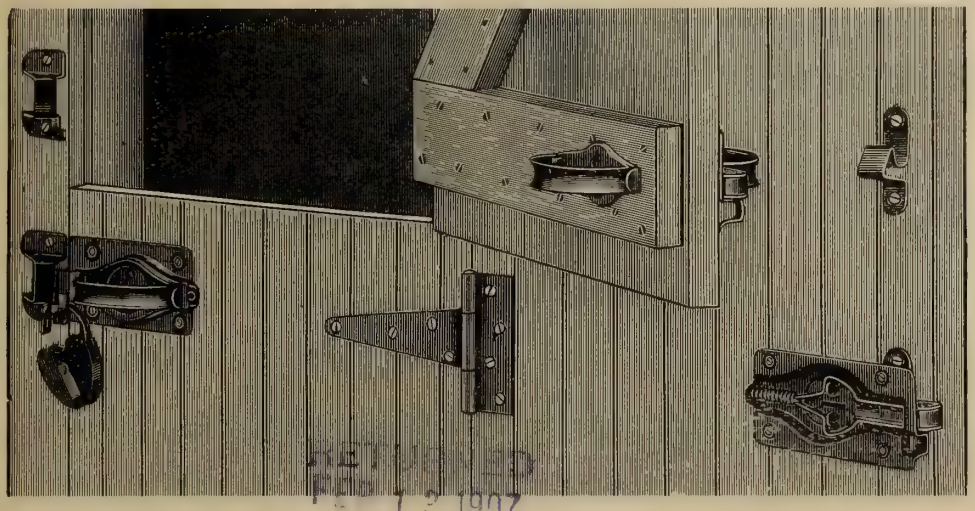
BARN DOOR EQUIPMENT

WILBERN HANGER



THE "Wilbern" Barn Door Hanger is a departure from the old style hanger; it **stays on the track,** but is the only stay-on-hanger that doesn't require a special track. It will fit any make, style or size, of flat track.

A door that has sagged and is scraping the floor, can be raised by one nut—other hangers must be taken off the door to allow adjustment.



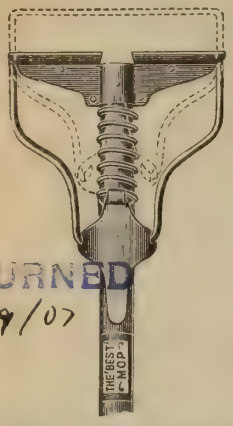
Any thickness of door can be drawn snug with the barn, or a door that binds can be drawn away from the barn.

The Wilbern is made of malleable iron and will carry a 1,200 lb. door, is roller bearing on a cold rolled shafting axle, and packed one pair in a box, complete with screws and bolts.

WHITCOMB STEEL LATCH

ENAMEL FINISH, GALVANIZED BOLT

A STRONG, durable, convenient latch. Easily adjusted to a door of any thickness. Will not catch in harness. Two large handles make it easy to hold the door, or to open it from either side. Two catches are furnished with each latch so that the door or gate can be held open or closed.



If you're looking for profitable lines, write us for prices on the above.

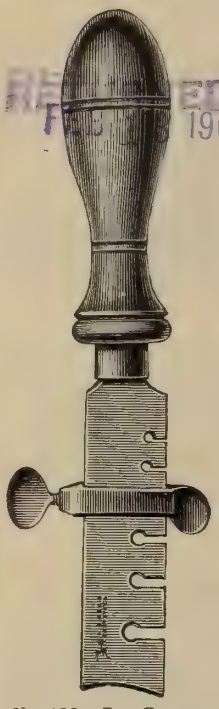
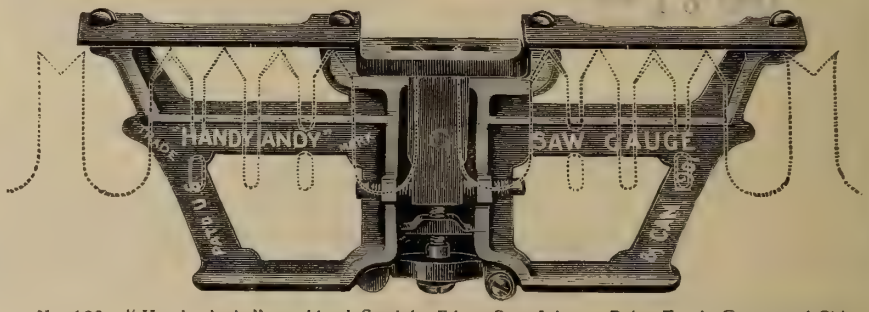
RESOLVE

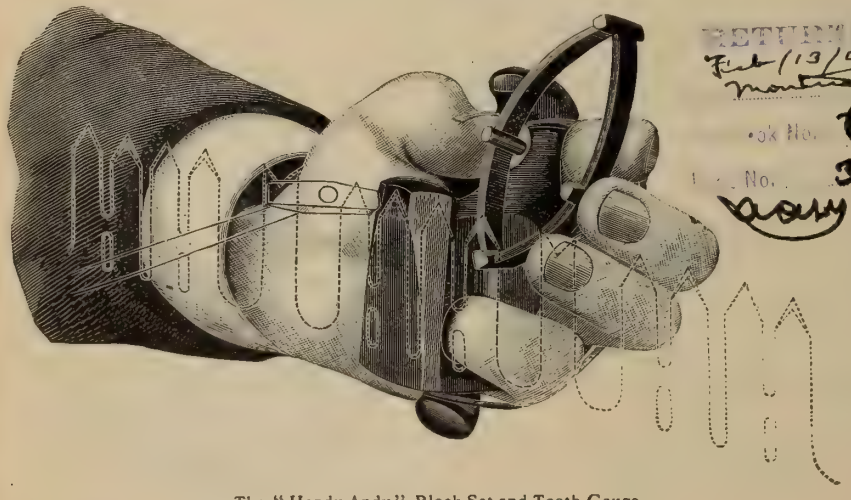


during 1907 to increase your business and your profits.

You can increase your business by keeping in stock what the people want. Don't be caught saying: "Sorry, but I don't keep that," or making the excuse that the goods are on the way. Watch your stock and don't let profitable lines get exhausted. Watch what people ask for, and if asked often for a new article put it in your stock. Your profits will grow if you secure the reputation for your store of keeping what people want.



Just now your line of Saw Sets and Cross-cut Saw Tools should be complete. The lines here are good sellers. Have you them in stock?



No. 120. Whiting Patent Saw Set. A low priced and efficient tool. No. 101 is a cheaper finish of the same tool.

No. 432. For Cross-cut Saws. At 40 cents each it gives a profit of 50 per cent.

No. 120. "Handy Andy" combined Straight Edge, Saw Jointer, Raker Tooth Gauge and Side Filer. Sold with the Block Set and Tooth Gauge in a set. This set of tools is more carefully made than most tools of the kind. They sell. Have you them in stock?

The "Handy Andy" Block Set and Tooth Gauge.

We have many other tools for users of Cross-cut Saws. Our travellers will show you the line in their catalogs and quote prices.

Four Reasons why INVICTUS FIBRE is the BEST FIBRE PAPER on the Market

1. Invictus Fibre is made from personally selected pulp wood cut on our own limits.
2. This special pulp wood is again rigidly culled on arrival at our mills
3. The pulp from which Invictus Fibre is made is manufactured in our own pulp mill and transferred at once to the paper mill, avoiding all drawbacks of transportation.
4. Invictus Fibre will increase in strength and not grow hard and brittle as does fibre made from sulphite pulp. This is a quality of the peculiar and selected pulp from which Invictus Fibre is made.

A trial order will convince you that we are correct. See that each package bears the words "Invictus Fibre." Every ream contains 480 sheets

Peerless Woven Wire Fence

Here is a fence that will sell. Once up no need for repairs. It lasts for years—just what you are looking for. It's horse-high, pig-tight and bull-strong. No stock can get over, under or through it. The most unruly animal can't butt it down and there are no barbs to tear and injure stock. It's

WIND AND WEATHER PROOF

The Peerless lock holds it perfectly rigid and the wires can't slip up, down, nor sidewise. Cold weather won't snap it and hot weather won't make it sag. It's the greatest thing out for farmers, stockmen and all other fence users which makes it a red hot proposition for dealers. It comes in rolls all ready to put up. It's easy to handle. Write for prices.

THE M.B. PUDDING STEAMER

The Only Rational Method of Cooking a Pudding

Simplicity, Durability, Utility.
Excellent for Fish and Meats.
No Burning. No Disappointment.
Produces Perfect Puddings.

The **M. B.** Steamer consists of an enamelled bowl with retinned cover held by patent wire clasp. As its name implies it is a "Steamer," not a "Boiler." When it is used the Steamer should be put in a saucepan with a close-fitting cover. Do not cover the steamer with the water, all it wants is a little in the bottom of the saucepan to generate steam. The Bowl is made of Best Quality Enamelled Steel and is practically indestructible.

SIZE OF BOWL—No. 1, 5½; No. 2, 6½; No. 3, 7½; No. 4, 8 in. Diameter.

EACH SIZE PACKED IN CARDBOARD BOX.

Dainty Book of 22 Original and Economical Recipes Enclosed with Each Steamer

TO BE OBTAINED FROM

H. & R. greatest revolver value for the money

The Talking Points That Sell
H. & R. REVOLVERS
Excellence of Construction
Accuracy
Rapidity of Action
Absolute Safety

No matter which model or at what price it may be sold, every **H. & R. Revolver** undergoes the most rigid inspection both as to material and workmanship. Every part is accurate to the thousandth part of an inch and absolutely without a flaw.

H. & R. POLICE PREMIER REVOLVERS

combine more good features than any revolvers of other make selling for twice the money. The **safety hammer** enables them to be discharged quicker than any other hammer revolver. **Automatic Ejector, Independent Cylinder Stop** (found only on other make revolvers of much higher price), **Light Weight, Beautiful in Design and Finish** are the points that make them sell rapidly.

Our Catalog tells about our full line and gives valuable selling points.

From 1865 To 1907

FORTY-ONE YEARS

We have been pounding away making horse nails for the past forty-one years. Long enough to know how to make them don't you think? And have a fair acquaintance with the wants of the horseshoers who use them, and the hardware trade who sell them. And yet we haven't learned all. There is another firm whose representatives "know it all," in fact it is stated 'they are going to put us out of business in a year;" have a case of wine put up with our friend K. to this effect. Well! Well! Tennyson said in the Brook, "Men may come and men may go, but I go on for ever." We are going to try and hold out the year 1907, if not forever, and we think our "C" brand horse nails are of such good quality and that we have made friends enough in Canadian Hardware trade during the past forty-one years, to warrant us in thinking we shall. Will you do your share, by ordering the "C" brand. Don't accept substitutes; insist on having the brand of horse nails you order and let it always be the "C" brand.

WISHING OUR FRIENDS A HAPPY AND PROSPEROUS NEW YEAR.

WHAT TO DO NEXT MONTH

The passing of the holiday season and the opening of the new year is an opportune time for the merchant to "take stock," not only of the goods on his shelves or in his store or warerooms, but also of the methods of doing business which he has been using in the past. If the past year's business has not shown an increase over previous years there is something wrong and it should be the merchant's immediate business to find out the weak point in his system.

* * *

One of the most likely causes of leakage is in the giving of credit. The successful hardware merchant will give as little credit as he possibly can avoid. He will build up an asset for himself in the form of a reputation for taking advantage of every discount and settling all bills as promptly as they fall due. But he cannot do this unless he impresses on his customers the fact that he can best serve them by doing a cash business and that they can get better and cheaper goods by paying cash and not asking for credit. Look well to the cash end, therefore, and start the year with a determination that during 1907 all jobbers' discounts will be taken and all possible credit refused.

* * *

At the beginning of the year the office end of the work should be given considerable attention. Are the books kept in modern style? Can time be saved by the adoption of the up-to-date loose leaf systems so extensively advertised and so universally used by the larger firms in the leading business centres? Any of the enterprising concerns who use our advertising pages will be glad to supply information regarding the working of their system in a retail hardware store.

Another leakage may be in the lack of organization of the clerks. Many manufacturing houses hold annual conferences of their travelling salesmen, who go over the company's works, get familiar with the processes of manufacture, hear addresses on scientific salesmanship, talk over prices and methods of approaching customers, and generally learn how to increase their value as salesmen. Jobbers also have conferences of their salesmen several times each year. Why cannot retail dealers profit by the same plan? The existence of a distant feeling between merchant and clerk is too often the result of the absence of heart-to-heart talks on matters affecting the store. The clerks should be made to feel that they are integral parts of the business and their future advancement depends largely upon its success. The merchant who shows an interest in his employees can develop a spirit of loyalty and encourage some fine "team work" by holding weekly or monthly conferences to discuss how best to increase the business done. The idea might be further developed by placing certain departments under the control of special clerks and offering prizes for the clerk showing the greatest increase in department or total sales during the year. In January is, of course, the best time to put such a plan in operation.

* * *

Too many merchants look upon the months of January and February as a "dull season." Such a time calls for the best efforts of the entire selling force of a store. The left-over holiday goods should be disposed of. It costs too much to tie up capital by carrying over the stock until next season. Follow the plan of the departmental stores in having a swift turn-over, even at the expense of a short profit. But avoid promiscuous price cutting. Select a few bargains of skates, hockey sticks, sleigh bells, silverware, etc., and advertise that you have a few odd lines of left over holiday goods on your "bargain table." Realize that the purse-strings are more tightly drawn than before the holidays but that many did not get the useful presents they expected. Go after this business, naming only a few selected "bargains" and you should not only do a good trade in the lines advertised but also in other seasonable lines which you will get opportunities to talk up and show at reasonable prices.

* * *

Every hardware merchant has a different method of keeping his store before the public, and at this time of year many are giving something to the children, such as one foot and three foot rulers on which is some advertising matter. Another good line for children is scribbling books with store advertising on both covers. These should be sold at 3 for 5 cents which, while not covering the cost of large books makes the children more careful of them.

* * *

After business has settled down, and the dealer has pushed all the special sales to their utmost, attention should be given to stock taking, which is generally done in February or March, the object being to ascertain how much money has been made during the year. It is also a great benefit, in sorting and dusting old stock which may have been pushed back on the shelves and can now be brought forward and disposed of on the bargain table. By doing this every year stock can be kept up to the standard.

* * *

At present crosscut saws, axes, handles, wedges, and in fact all tools used in the timber industry would be a very seasonable line to display in the window. The farmers' attention can be drawn to the display through the medium of the local papers.

* * *

Every merchant has his special method for stock taking. Our method is to start two clerks along the shelves counting articles in different boxes, and making just opposite the price the number it contains, with the year—such as 8–07. Goods and shelves can be dusted at the same time. The clerks should be allowed a little start and followed up by another reading the quantity and price off the box, and writing it down on strips of ordinary light wrapping paper about 6 inches wide from which the records can be copied into the stock book. Freight is generally added to all goods as they are marked.

This is one of the greatest helps to a new clerk, as he will learn more through one stock taking than six months of ordinary service. Besides it freshens up all articles, and starts the new year with a clean, fresh stock.

* * *

There is one thing that every hardware merchant in Canada should do in January—he should write his local member of Parliament urging him to see the Postmaster General and oppose the proposed Parcels Post C.O.D. Collection System. The merchant should also write the Postmaster General on his own letterhead, urging him to reconsider his proposed action as it will seriously hurt the retail trade and benefit the mail order houses. The editor of the local newspapers should also be interviewed by several merchants who are large advertisers and if he sees that the proposed legislation will benefit the city stores who pay no taxes in the country towns, and hurt the business men who pay a large share of the taxes, he will take up the subject in his editorial columns.

This Parcels Post question is an important matter. Show that you are alive to the interests of the trade and by doing so, not only will you ward off the present danger, but you will make the law-makers realize that measures affecting the interests of thousands of merchants cannot be sacrificed in order to satisfy the desires of the magnates who control the departmental stores and the newspapers through which they advertise.

HOW ABOUT IT?

Are you going to discount your bills this year or are you going to give this extra profit to the jobber?

There's enough leeway to the retailer who discounts his bills, to meet competition either from his neighbor or the catalogue house. It's a special point of advantage. The discounts of an average country merchant, will amount to a very respectable percentage of his annual profits.

You should be in a position to figure up the discounts that you have profited by or lost during the year 1905, and the commutation will well repay the time taken to make it.

If you are not in a position to take advantage of the full discounts, make the most of what you can. Partial discounts are better than none at all. With full advantage of discounts you will be able to make larger profits and meet competition when it comes.

AMONGST THE SALESMEN

Montreal Travelers' Banquet.

Just once a year do the members of the Dominion Commercial Travellers' Association, stay up overly late on pleasure bent, and this is upon the occasion of their annual banquet which takes place each year about Christmas time.

The Montreal Association held their gathering on the night of December 20th at the fine old Windsor Hostelry. Nearly 300 sat down. Contrary to the stereotyped plan of long rows of tables for all, there was only one long table, this for the guests of honor, whilst the rank and file sat about the spacious dining room in social groups of half dozens, each with a table to themselves.

The gathering was particularly fortunate in the presence of several distinguished speakers including Hon. Rudolph Lemieux, Post Master General; Hon. Lomer Gouin, Premier of Quebec; F. D. Monk, M.P.; Hon. P. E. Leblanc; F. H. Matthewson, President of the Board of Trade; J. H. Ashdown, Mayor of Winnipeg; Alderman Robinson, and others. so that the feast was both physical and intellectual. Short speeches were the rule of the evening and interspersed with some good vocal and instrumental music the whole contributed to a delightful programme.

E. D. Marceau, the new President-Elect of the association made a model chairman and he was ably assisted in the vice chairs by J. Paterson, Vice-President, R. C. Wilkins, Treasurer, and W. J. Egan.

Two important announcements were made during the evening by the politicians present, the one which met with most general favor being an assertion on the part of Premier Gouin that the

President, E. D. Marceau.

now notorious Quebec Tax, which has been levied against commercial travellers entering this province, will be repealed at the next meeting of the Legislature. Hon. Mr. Lemieux also created some enthusiasm by stating that if he got the necessary support in parliament, that before many months there would be "an intellectual preference" in the direction of cheaper postage on magazines and periodicals coming from Great Britain.

A Pillar of Commerce.

E. D. Marceau in welcoming the guests of the evening referred to the importance of the association of which he had been recently honored with the Presidency. He said, "I consider that this meeting is not without its utility to the men who preside over the destiny of our Dominion and our Province, and to those who are at the head of our Chambers of Commerce and our

Treasurer R. C. Wilkins

great Transportation Companies. The commercial man to-day is a very important and very different individual from that jolly chap and good story teller whom he has replaced. The traveller has not lost any of his good qualities of old, but to be successful to-day he must be active, temperate, keen to judge human nature and above all things know his business, that is, know his goods from the time they leave the raw material state to the time when they are ready for the consumer. The commercial man has not only progressed with the country, but he has even anticipated the changes and prepared himself for them. He is the feeder of the factory, the provider of the salary for the workingman and the subsistance of his family; he assures the payment of due liabilities; he is the certitude of the present and security for the future; he is, to a great extent, the credit and the material wealth of the country. Since the commercial traveller is all these things it is, I say, of great utility for you to meet him and know his views.

The Shilling Cable.

Hon. Mr. Lemieux in responding to the toast of the Parliament of Canada referred to the commercial traveller as having his finger on the pulse of the

J. S. N. Dougall.

temper of the country. When those engaged in politics wanted to know what that temper was, whether it was good or bad, they had to come to the traveller for information. The temper of the traveller also was a reflex of the temper of the country. If he was in good humor, then it was a foregone conclusion that the country was prosperous, and vice versa. Mr. Lemieux added, amid laughter, that he was glad to see by those at the banquet that the country was obviously prosperous.

Mr. Lemieux stated that the time had come for the "Shilling Cable" from one end of the Empire to the other. With the advent of the "Shilling Cable" would come a greater union of Canada with the mother country and the rest of the Empire. The penny postage had become an established fact and the "Shilling Cable" was on the way. The matter had been taken up recently in a lecture at the Eighty Club, London, and the idea was received with favor.

Mr. Monk also responded to this toast saying that there was no body of men to whom he would go with greater confidence to find out the trend of public opinion than to the commercial traveller of the Dominion. Theirs was the power to mold public opinion, and even to impress thgt opinion upon Parliament itself. The commercial traveller could also disseminate throughout Canada that broad spirit of citizenship so necessary if Canada was to become a great nation.

Travelers Tax to Go.

Hon. Lomer Gouin responded in a brief speech to the Toast of the Legislature, proposed by Mr. Wilkins. After referring to the good work that the travellers could do for the country, he made the important announcement with reference to the abolition of the Quebec Tax before referred to.

One of the most popular speakers of the evening was Mayor J. H. Ashdown of Winnipeg, who happened to be in the city and was a welcome guest. In a happy little speech he referred to the

great growth of his home city, though he put the audience in good humor by saying that it could never hope to outdistance its older sister of the great metropolis of Montreal. By the time that Winnipeg was as old as Montreal however, there would be a larger city in the West than Montreal was to-day though he gave credit to the metropolis for being able to hold its own in the general increase throughout the country.

TORONTO TRAVELERS' MUTUAL.

At the annual nomination meeting of the Commercial Travellers' Mutual Benefit Society of Toronto, held recently, the following officers were elected by acclamation for 1907: President, S. R. Wickett; Vice-President, Ald. Jos. Oliver, and Treasurer, Harry Goodman.

There were four vacancies on the Board to be filled, three Trustees for the term of three years, and one for two years, the latter to fill the place of Jas. Turpin, who resigned owing to removal from the city. The following were nominated for the three year term: R. G. Hector, John Gibson, C. S. Parsons, E. M. Burke, T. F. Corey, J. H. Morin, and C. A. Barnard. For the term of two years, the following were nominated: H. L. Wilmott, R. Maxwell, D. R. Hawley, and R. R. Davis. All trustees for outside cities and towns were re-elected by acclamation.

The Annual Meeting has been arranged for January 26.

TORONTO TRAVELERS DINE.

The Commercial Travelers' Association of Canada held a very successful dinner at Toronto, Wednesday night, over 200 being present. T. McQuillan presided over the gathering, and, after the loyal and patriotic toasts had been duly honored, M. J. Hopwood proposed the toast of the "Association." He mentioned that from small beginnings they had steadily grown until they had now a membership of 8,000, with a capital of half a million. Responding to the toast, Mr. Fielding, the treasurer, said that in the past seven years $246.-127 had been paid out on behalf of the widows' and orphans' fund, and from the relief fund $6,097. In proposing the toast of "The Commercial Travelers Mutual Benefit Society of Toronto." J. Oliver said that during the 26 years of its existence it had paid about $410,-000 to widows and orphans, largely in the Province of Ontario. Mr. Taylor, in his response, suggested the advisability of adopting an annuity scheme similar to that prevailing in England. The chairman proposed "The Wholesale and Manufacturing Interests," and this was responded to by Messrs. J. W. Woods and Kinnear. "Sister Associations" was proposed by Geo. West, and responded to by J. H. Morin, Montreal, and by Wm. Gray, past-president of the London Association.

The Merchant's great door of Success hinges on a well-dressed window.

SUCCESSFUL JOBBERS AND SALESMEN.

No. 33.

M. F. Irwin, the new manager of the McClary Manufacturing Company's Maritime branch at St. John, N.B., has had a varied and practical experience in the heating and tinware trades and if knowledge on these subjects, combined with persistent effort, will bring success in his new field steady growth in the Company's Maritime trade is already assured for the future.

One new feature he intends introducing is the manufacture at St. John of the lighter goods, such as pails, cans, etc., occupying much space but weighing little, and commonly known under the term "Wind" by those who pay heavy freight rates on these goods. As the tin plates and other raw material is procured in Wales, the saving in freight on raw material one way and on finished goods the other, will give a considerable advantage to the new venture. Another feature to be adopted will be the making of furnace pipes, etc., at St. John, thus enabling local hardware dealers to secure supplies readily by sending floor plans of buildings and doing the work of installation themselves.

M. F. IRWIN
Manager of McClary Mfg. Co's branch at St. John, N.B.

Mr. Irwin learned the tinsmithing trade with his uncle, Thomas McGrattan, of Uxbridge, Ont., working with him for twelve years and leaving in 1889 to accept a position in the McClary tinshop at London. At the end of a year he was put on the road as a furnace traveler in Western Ontario, after six years being transferred to the Toronto branch and covering the ground between Toronto and Fort William. In 1897 he was transferred back to London, making special trips from time to time from Quebec in the East to Victoria in the West. In 1900 he was made sales-manager at London, a position which he filled acceptably until his present appointment on Nov. 1st last.

When his present promotion was announced the esteem with which he is held by his fellow employees on leaving the office staff was indicated by the presentation to him of a gold mounted pen accompanied by an illustrated address. Mr. Irwin's old friends in Ontario, Quebec and Western Canada will join with the London staff in wishing him a bumper business "Way Down East."

DOMINION COMMERCIAL TRAVELERS.

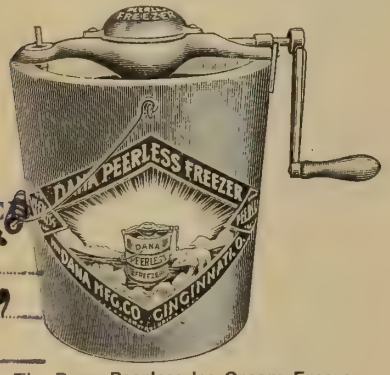
Much business of importance was discussed at the recent annual meeting of the Dominion Commercial Travelers' Association in Montreal. The association at present numbers 5,684 members, a gain over last year of 499. Financially the association is in excellent condition. The amount received on revenue account is $67,597. Annual subscription fees make up $54,340 of this amount and interest on investments $13,110.

The report of the Mutual Benefit Association, read by J. S. N. Dougall, showed that this department of the association was in a flourishing condition. It was proposed that besides the annual dinner members should hold once a month a smoking concert or lecture, in order that the members should enjoy greater social pleasure among themselves.

Concerning the commercial rates on railroads the annual report had to say: "It is pleasing to note that, in accordance with the request made for a reduction in the commercial rate in the Northwest provinces, the C.P.R. have reduced the rate from 3 cents to 2 1-2 cents per mile on their main line between Manitoba, Calgary and Macleod, including all branches in Saskatchewan and certain branches in Alberta. The same concession has been obtained on the Canadian Northern Railway lines in the Northwest as they now exist."

The increase of the rates from two cents to 2 cents and a quarter over the Intercolonial Railway was commented upon, as well as the taxes which had lately been put on commercial travelers in certain provinces. This latter it was hoped to have remedied during the present session of the House, when a bill will be introduced to abolish the tax

ACCOMMODATING HOTEL CLERK.



"Speaking of accommodating hotel clerks," remarked a traveler, "the best I ever saw was in a certain town. I reached the hotel late in the evening. Just before I retired I heard a scampering under the bed, and saw a couple of large rats just escaping. I complained at the office. The clerk was as serene as a summer breeze."

"'I'll fix that all right, sir,' he said. 'James! Take up a cat to Room 23 at once.'"

STOVES AND TINWARE

THE DANA PEERLESS FREEZER.

That the Dana Peerless Freezer is a quick and easy-working ice-cream freezer is shown by the fact that three minutes is the freezing time, and the cream is as much frozen at the centre as at the edge. It can be turned without effort until the cream is completely frozen. What makes most freezers so hard to turn is that the dasher has to be pushed through the gradually freezing cream. As the cream becomes frozen, the turning becomes more and more difficult. In the Dana Peerless Freezer the can revolves around the dasher. The dasher doesn't move at all. It has fewer parts than any other freezer. It's the simplest constructed freezer on the market. Gears, enclosed in a ball-like frame, impart the motion of the crank to the can. The gears can't get out of order. They can't catch the ice or salt.

The Dana Peerless Ice Cream Freezer.

The Dana Manufacturing Company help the dealers to sell their product. Millions of people are reached—are told how quickly and easily the Dana Peerless Freezers freezes cream and that it can be obtained of any dealer. These factories are among the most modern in the country. Here, every part of the Dana Freezer is constructed. Even the castings are made here, and the tinning done. The new pure food law and the danger of "ptomaine" ice-cream is leading more housewives each year to do their own freezing. Those who use the Dana, find it so quick and easy that they gladly recommend it to others, while dealers who handle it are making handsome profits: It may be obtained through any jobber.

NOVEL DUST PAN.

W. N. Steele, New York City, has secured an American patent for a novel dust pan. His aim being to provide a pan arranged to permit convenient sweeping of the dust, crumbs, and the like into the pan, to securely retain the sweepings, and to allow ready dumping of the accumulated sweepings whenever it is desired to do so and without danger of spilling any of the sweepings while carrying the pan and contents from the room to a place of discharge.

HOT WATER HEATING.

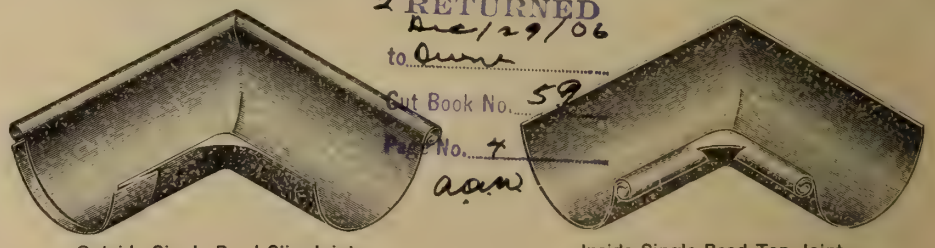
Hot water for room heating purposes, where steam is employed to heat the water, can be attained in a good many ways, says an exchange. In a system of direct hot water radiation which has been installed in some tall buildings the risers are designed for steam circulation from a steam boiler in the basement, with special designed enlargements or reservoirs on the steam risers, from which branch pipes are taken to the direct radiators. These reservoirs or enlargements of the riser pipes are designed to catch the water or condensation as it is formed in the radiators until the amount is sufficiently great, when additional condensation overflows into the steam risers to return to the steam boiler. Without going into details, the system when the steam is first turned on operates entirely as a direct steam heating system. As the water gradually collects into the reservoir, the radiators become filled with water, as the reservoirs are in line with them. After they are thus converted into hot water radiators the steam which is constantly supplied through the steam pipes heats the water in these reservoirs, so that each reservoir acts as a small steam boiler, with a local circulation from the reservoir through radiation and back again to the reservoir. With such a system a wide range of radiator temperature is available, and means are at hand for quick warming in starting up.

OIL STOVES IN EGYPT.

Oil cooking stoves are enjoying a permanent growing and profitable market in Egypt. A United States manufacturer introduced an excellent oil cooking range, according to Special Agent Charles M. Pepper of the Department of Commerce and Labor, which was retailed at a moderate price. It sprang into immediate popularity and commanded a large sale. Other oil cooking ranges, similar in appearance and offered at a lower price, were soon in the market. They were said to come from Germany. It has taken time, he says, to demonstrate that these ranges are inferior to the American make, but this has happened, and in the future with proper pushing American cooking ranges and portable stoves should be used in much larger numbers.

CHIMNEYS AT FAULT.

A heating expert who has had over thirty-two years' experience in the stove business, and has examined from four to five thousand complaints in that time, announces that, without recalling one exception, he has always found the source of complaint to be the chimney. According to him, mortar and brick obstruct the draft of the chimney, and occasionally a bird's nest causes the same difficulty. At other times, he has found that the mortar between the bricks of the chimney has been washed out by rain or snow, or the expansion and contraction of the bricks has caused openings which permitted of a counterdraft from the side. This man declares that it is just as reasonable to say that a stove does not draw as it is to say that water would not run out of a pail when tipped.



MALAY TIN OUTPUT.

The report of the commissioner of Mines of the Federated Malay States showing the output of tin for the first nine months of 1906, shows a decrease in the output as compared with 1905 of 1,656 tons.

The following table gives the output of all the tin-bearing States of the Malay Peninsula for the first nine months during the years 1905 and 1906, expressed in tons of 2,240 pounds :

	1906	1905
Perak	19,271	19,740
Selangor	11,975	12,889
Negri Sembilan	3,452	3,738
Pahang	1,515	1,502
Total.....	36,213	37,869

According to the market reports of shipments from the Straits Settlements for the first nine months of 1906, there was shipped 43,262 tons, or 7,049 tons more than the commissioner of mines reports the output of the mines. This shows conclusively that there was a large amount of tin on hand, held back to control the market and take advantage of the high prices which have prevailed during the past few months.

Outside Single Bead Slip Joint. Inside Single Bead Tap Joint.

ONE PIECE MITRES.

The J. E. Whiteacre Manufacturing Company, Rockford, Ill., manufacture the one-piece mitre eavetroughing shown in the accompanying engraving. There is a large saving made by tinners who use this article, it requiring no stopping for repairs or bracing, thus economizing labor considerably. Additional information, prices and discounts can be secured on request from the company.

HARDWARE TRADE GOSSIP

Quebec.

N. Dreany of Dreany Bros., Cobalt, Ont., was in Montreal this week.

A. C. Jenkins & Co., hardware merchants, of Montreal, have dissolved partnership.

Lewis Bros.' travellers gathered in annual banquet Friday night at the Engineers' Club.

C. M. Strange, sales manager for Lewis Bros. Ltd., spent a pleasant Christmas holiday at his home in Kingston.

Paul H. Hansen, the new representative of the Canadian Rubber Co., at St. John N.B., spent Christmas holidays in Montreal.

Geo. Caverhill of Caverhill Learmont & Co., is the most likely candidate for the position of President of the Montreal Board of Trade.

Mr. S. D. Pearson has been successful in placing a number of ventilators in the Incineration Department of the City Council of Montreal.

The Mount Royal Color and Varnish Company, of Montreal, has been acquired by H. Lamontagne, J. Lusignan, N. Morency, H. Lapierre and E. Lamontagne, of Montreal, and will be run in future by the aforesaid members.

Among the well-known travellers of Caverhill Learmont & Co., in town this week were: J. H. Brent of Toronto; W. H. Martin, North Bay; George Browne, Eastern Townships; J. R. MacKay, The Gatineau; Geo. Ramsden, Port Hope; J. A. Laporte of the city.

Chas. Augers, son of the late Roul Augers, one of the oldest partners in the firm of Frothingham & Workman, has taken up the work of travelling in the Eastern Townships in succession to E. A. Painchaud. Mr. Augers has been with the firm for years in the warehouse and should be successful.

Hector MacKenzie, one of the best known and most highly respected plumbers in Montreal, died suddenly this week at Hotel Dieu. Mr. MacKenzie was for years a traveller for Thos. Robertson & Co. and was widely known in the trade. His demise was quite unexpected and was greatly deplored.

C. E. McDonald of the shipping department of Frothingham & Workman Co., Montreal, died suddenly this week. Mr. McDonald was 53 years of age and had been 21 years in the service of the company. He was well off. His funeral took place from his late residence, 18 Bethelot St. and was largely attended.

Ontario.

F. Occomore, hardware merchant, Collingwood, was a visitor in Toronto last week.

David Clark, plumber, is one of the aldermanic candidates in Toronto's municipal fight.

J. D. Eplett, hardware merchant, of New Liskeard, has sold his business to Magladery Bros.

Mr. Bailes, jr., of John Bailes & Son, hardware merchants, Oshawa, called on the Toronto jobbers this week.

C. Beirel, hardware merchant, of Markham, was calling on the wholesale hardware jobbers in Toronto last week

Fred C. Mount has opened a plumbing business in O. E. Woods' sheet metal and tinshop at 1001 Bloor street west, Toronto.

Westman's hardware store, Chatham, was saved from destruction by fire last week by fire in the oil room being discovered in time.

L. Mahen, the newly established hardware merchant, of Penetang, was a visitor in Toronto this week calling on the wholesale hardware merchants.

The site now occupied by Harold A. Wilson's sporting goods store at 35 King Street West, Toronto, has been sold and new premises will have to be secured.

J. R. Skelton, has bought out the interest of Mr. Lundy in the firm of Skelton & Lundy, hardware merchants, Palmerston, and will now conduct the business on his own account.

Hugh Rowland, one of the traveling representatives of the Kemp Manufacturing Company, was quietly married on Christmas Day to Miss Laidlaw, of Orillia. Hardware and Metal joins Hugh's many friends in wishing himself and Miss Rowland a very Happy New Year.

Geo. H. Clarke & Company, hardware merchants, of Niagara Falls, Ont., have purchased the present premises occupied by them, also another store located next door. They intend making extensive alterations and improvements, to make room for their rapidly growing business.

C. E. Oldacre, whose answer to the hot water problem is published this week, is a prominent member of the American Society Heating and Ventilating Engineers who recently accepted a responsible position with the Gurney Foundry Company, Toronto. Mr. Oldacre is an acquisition to the trade in Canada and we hope to be able to publish more from his pen in future issues.

W. R. Tait, Niagara Peninsula traveling representative for Lewis Bros., wholesale hardware merchants of Montreal, has been appointed to succeed Max Morrell their Toronto representative, who becomes sales manager with Rice Lewis & Son, of Toronto. Billie Tait is succeeded on Lewis Bros. travelling staff by Jack Anderson, formerly representing H. S. Howland, Sons & Co., of Toronto, in Western Ontario.

W. I. Wagg, hardware merchant, Providence Bay, writes Hardware and Metal, stating that it was his brother Thomas M. Wagg, and not his father, F. Wagg, general merchant, Mindemoya, who was drowned in the recent Jones disaster on Georgian Bay. Mr. Wagg was on his way home from a trip to British Columbia, his wife dying only six months ago. W. I. Wagg lost $900 worth of goods with no insurance.

The Barnes Hardware Company, have opened in larger premises at Port Arthur. The business had its origin four years ago, when Joseph Barnes opened up a small tin shop, with one man as a helper. The next step in Mr. Barnes' career came last March when in order to cope with the wonderful growth the business was organized as the Barnes Hardware Company, with Mr. Barnes as manager. The latest stage in the company's march of progress has now come and the new company will do a general hardware and plumbing trade. During the year they employed 22 hands.

Western.

The Smith & Ferguson Company, hardware merchants, of Regina, have sold their stock to the Western Hardware Company.

W. Arthur Hossie, of the Diamond Flint Glass Company, Winnipeg, with wife and daughter, spent Christmas at the parental home near Brantford.

Wm. C. Perry, assistant manager for Geo. D. Wood & Co., died suddenly in Winnipeg last week. He had been ill for about two weeks with pneumonia but fatal results were not expected and his death came as a sad surprise to his wide circle of acquaintances in the trade. Mr. Perry was known among the hardware trade in both the West and the East, having learned the business in Toronto and having traveled extensively in the prairie provinces and in British Columbia. He was very popular and highly respected for his many admirable qualities of heart and head.

Maritime.

Andy Hyslop, traveling representative of the Canada Cycle and Motor Company, has been transferred to the Maritime Provinces, taking the place of Fred Luke, who now is traveling in tke Canadian West.

The hardware and tinware business conducted at Sussex by H. H. Dryden, which was recently organized as a stock company, known as the H. H. Dryden Company, with a capital stock of $50,000, is preparing to enter the wholesale field on an extensive scale and also to manufacture cheese factory and dairy supplies as well as a full line of tinware. The new factory, 50 x 60 two storeys high, is ready for the installation of the machinery, which will comprise power presses, double seamers, folders and grooves, power wiring machines, and power rollers. The power will be gasoline.

The annual meeting of the Maritime Commercial Travellers' Association was held last week with an increase in membership from 707 1905 to 781 for 1906, with 457 belonging to Nova Scotia and the balance to New Brunswick. The treasurer's statement shows the funds on hand to be $3,683 which with the investments made by the trustees amounting at cost to $36,073, makes the resources of the association $39,756, an increase of $3,948.61 over last year. The election of officers resulted in Ald. J. B. Douglas being appointed President, the vice presidents for the year are, Chas. Blackie, H. E. Pyke, J. C. Jones, A. M. Fraser. Vice-Presidents for New Brunswick, R. A. Mirch, D. M. Doherty, A. Binning, C. C. Starr and B. N. Barrs newly appointed directors.

United States.

Joe Fogler and Eddie Root won the recent six-day bicycle race at New York, on Iver Johnson Truss Frame Bicycles, it being the most imuortant cycling event of the whole year.

THE NEW YEAR.

Canada crosses the threshold of the New Year prospering as never before. Every industry, agriculture, mining, fisheries and manufacturing, expanding and progressing, every mercantile house straining under its weight of business, means of transportation expanding as as never before and the nation is beginning to appreciate its possibilities and take them seriously. All this is first rate and adds zest to universal "Happy New Year," but aside from the mere accident of enabling the world to kept tab on time the main economic reason for New Year is that it makes a full stop in every man's life. Every man is confronted with the opportunity of making a fresh start.

In business this is essential. The right method of conducting any sort of business requires a balance sheet periodically. By a proper system of accounting and stock-taking a merchant can know just what his business has been doing for him. He will know too, the cost of doing business and he will be in a position to improve his methods. The wise merchant will not lose sight of the year and its possibilities.

AIDS MAIL ORDER HOUSES.

If a Toronto catalogue house sends a package by mail to say, Hamilton, the postage is one cent per ounce. The same package might be forwarded to Vancouver, without any increase in the charges. For one mile or a thousand the parcel post rate is the same.

A merchant located at Calgary, or Edmonton pays freight charges that are admittedly very heavy, and bring the actual cost of his goods up to a high mark. Quotations to his customers must represent this figure, with the addition of a fair profit. Mail order houses send catalogues into his district, and prices stated therein are naturally lower than he is able to offer, the disparity being mainly due to the cost of carriage which he bears.

Mail order houses and the local merchant are in competition for business from the same people in most districts from Halifax to Vancouver. We are concerned here only with business to which the former cater by means of the postal service. They pay no more for getting merchandise on the ground in the far west than for placing it in the hands of a consumer a few miles away.

The expense borne by the retail merchant in securing his goods depends entirely upon the distance that he brings them. Obviously local merchants as a whole are placed at a disadvantage in this respect, and they have just ground for urging upon the Government such revision of the parcel post rates as will afford them the proper amount of protection.

When the parcel post was inaugurated the flat rate was designed as a public convenience, and with no thought of providing means for unfair business competition. Now that the latter has appeared, and grown to somewhat alarming proportions, the time is ripe for a number of modifications. One suggestion is that certain rates be fixed for certain zones.

Any change whatever would affect the tariff on all parcels, whether sent by mail order houses or not. At the present time the limit of weight for packages handled by the Post Office Department is five pounds. Where goods going to one person weigh more than that it is a simple matter to divide them into two or more packages.

Now that the Postmaster-General has taken up the parcels post matter and announces that he will introduce legislation to still further extend the system by adding a c.o.d. collection feature an extension obviously in the interest of the big departmental stores and mail order houses, retail merchants generally should not only actively oppose the proposed extension, but should urge their local newspapers and representatives in Parliament to consider the revision of the whole parcels post system.

Legislation which favors the tax shirking corporations in the big cities at the expense of the tax paying merchants in the smaller towns is not in the interests of the country as a whole. It is calculated to still further encourage the migration from country to city, a movement which cannot but have a serious effect upon all farm, village, and town property.

The time to get busy is before, rather than after, the Postmaster-General has brought down his proposed legislation. Do not be content with writing your member of Parliament and the Postmaster-General yourself. See your neighboring merchants and have them do likewise.

HOLIDAY WINDOW DISPLAYS.

There is still time for any merchant or clerk to send an entry for the window display competition announced in recent issues of Hardware & Metal. Entries sent within one week of the receipt of this paper by subscribers will be accepted.

Travelers say there have been some fine window advertising done by hardware merchants this year. Everybody has been busy, but after a window is dressed it doesn't take long or cost much to photograph it, while the advantage of comparing your display with those of other display artists in other towns is worth considerable.

Our prizes are worth competing for and according to the entries already in, they will be carried of by competitors who would be the first to admit that there are many better dressed windows than their own.

Act at once, therefore, and forward a photo and description of your Xmas window display and samples of your holiday advertising.

A GOOD SUGGESTION.

Fresh from a visit to Great Britain, James T. Madden makes the suggestion that every Canadian going abroad should be furnished by the Government with information about Canada in handy form. They could be distributed through the medium of steamship ticket offices. This is a first rate idea and we recommend it to those having authority. A Canadian abroad is naturally asked a great many questions that ordinarily he cannot answer save in the most general terms. An enthusiastic Canadian abroad gets talking about Canada's industries and development. Some one asks him "Well, what was the value of your manufacturing exports

last year ?" How many Canadians besides the Finance Minister could answer that offhand. Skimped of such easy questions the cautious man will keep his enthusiasm tightly corked and an effectual damper is placed on the very best kind of advertising the country can get.

A WINDOW TICKET BOOMERANG.

At this season when Christmas window displays are accompanied with attractive window tickets, it behooves the live hardware merchant to be careful not to duplicate the experience of a New England hardware firm who last winter hung out this sign :

JONES & SMITH
Cheap Skates

It was several days before the double meaning of the wording dawned on them and in the meantime a wag had got hold of the joke and the whole town had a laugh. It had an advertsing value, of course, but it was unintended and, in a sense, unpleasant.

RETURNED DRAFTS.

Much is said of the advantage to a merchant of improving and maintaining his business reputation among those to whom he sells. It is also very important that he be jealous of his reputation among those from whom he buys. Because of this we have drawn attention several times recently to the evil of returned drafts. A firm in Montreal have written us as follows :

"It is with satisfaction that we have read your latest article on 'Returned Drafts,' as we consider that the agitation against this evil cannot be overdone. We ourselves have been sufferers so long that we would like to see continued publicity given to the matter, in order that business firms may in time fully realize the great inconvenience and loss that results ro drawers from inconsiderate returning of drafts for trivial excuses. If the grievance is hard to bear from retailers, the annoyance is double when it happens on the part of wholesalers and manufacturers, who from their experience in such matters should know better. We always make a point of notifying drawees from five to seven days previous to depositing our draft, and furthermore on our statement we guarantee to rectify any discrepancies which may be found in the account. Notwithstanding this we frequently have drafts returned with endorsations such as named in your article.

"We hope that firms who are accustomed to paying for their purchases by sight drafts may come to realize that it is by attention to these matters that a good impression is formed of them, and a sound reputation is built up."

No one can read this letter without being convinced of the seriousness of the writer. It's so easy to return a draft, but if merchants before doing so would put themselves in the place of the man at the other end and consider what he will say when he gets it, the returned drafts, at least for trivial causes, would be fewer.

ELECTING BANK DIRECTORS.

A bank director, the head of one of the largest mercantile institutions in Toronto, stated the other day that bank directors were appointed by the managers. That he asserts, was the practical result of the method in vogue. At the annual meeting of shareholders a ballot bearing the names of persons to be voted for as directors was handed each shareholder. These ballots were prepared by the manager and, all the shareholders had to do was mark the ballots and pass them back. That gave the form of election.

It's the shareholders' fault. Their money is at stake and any of them could nominate other directors. It might be scandalous but it would be only business. Many people regard banks with feeling of awe, the real temples of mammon, scarcely to be entered with one's boots on, and the Board Room as the Holy of Holies. A bank deals in money, securities and credit, just as a grocer deals in food stuffs and they hustle for business too. When bank shareholders in annual meeting realize their possibilities they will no longer continue as the great seal of the institution in the hands of the general manager.

A Glad and Happy New Year

Apart from the exhilarating joy of mere existence that should be ever present there is in the Spirit of the New Year an added zest and interest in life. The past year with whatever of good or ill it may have brought is gone forever and another opens before us with all the freshness and gladness and glowing possibilities that the mind's eye may see fit to conjure.

May the coming New Year see for you the long delayed hope fulfilled and the cherished ambition realized. May this New Year be the happiest you have yet seen and full of that joy and gladness and content that go towards the Life Ideal.

TRAVELERS' MEET IN TORONTO.

The thirty-fourth annual meeting of the Commercial Travellers' Association of Canada was held in Toronto on Thursday.

The membership of the association is now 8,003, an increase of 593 over last year. Mortuary benefits to the extent of $36,230 represent the year's insurance payments. The financial statement shows receipts of $153,195.70, with a balance of $1,777.48 in the bank.

Provincial taxes on commercial travellers are being fought by the association and representations have been made to the License Department of the Ontario Government, with a view to improving the accommodation and sanitary condition of hotels.

AN ADVANCE ON HINGES.

The manufacturers of hinges in Canada have been compelled through the rapidly increasing prices in raw material and labor, to again advance prices on hinges, butts, etc. of all kinds. Raw material for these purposes is exceptionally scarce and merchants would do well to specify liberally and early for their season's requirements, as in all probability when the building season starts, hardware stocks will be entirely run out of the staple sizes. The demand from the West is so great that Ontario and Quebec jobbers find it difficult to secure supplies.

HARDWARE EXECUTIVE MEET.

The executive committee of the Ontario Retail Hardware Association will meet in Toronto on Monday, Dec. 31, in the office of the secretary. The parcels post question will be discussed and action will be taken on other matters before the association, while arrangements will also be made for the annual convention next March.

IVES COMPANY MOVE.

The H. R. Ives Company, Montreal, whose Toronto representative is O. M. Hodson, formerly organizer of the Ontario Retail Hardware Association, have moved their Toronto warerooms from 45 Front street east to 235 Yonge street. In the new premises there will be splendid facilities for sample and show rooms in which to display the company's "Bizon" hot water boilers and their iron and brass beds.

Mr. Hodson has had a very successful half year as manager of the Toronto branch and the large increase in business secured by him has made necessary the present expansion. He will also be Toronto agent for the Alaska Feather & Down Company, a line which works in nicely with the Ives line of iron and brass beds.

Mr. Hodson's many friends amongst the retail trade will be pleased to learn of his rapid advancement in the jobbing end of the trade.

A woman seldom listens to a man's explanation, yet it makes her angry if he refuses to offer one.

It is the unfailing law of trade and of nature that nothing is ever given away, you pay for everything you get.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 70.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Sheet Copper—One cent higher.
Sheet Zinc—Advanced ¼ cent.

TORONTO.

Brass Tubing—Advanced 3 cents.
Copper Tubing—Up 4 cents.
Soil Pipe—Advanced as predicted.
Hand Saws—S. & D. advanced 5 per cent.
Packing—Rainbow 6c. per lb.
Tarred Felt—Up 25c. per cwt.
Old Materials—Several advances.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Dec. 28, 1906.

Holiday dullness does not hold this week as orders have been very numerous in all the big hardware houses. The absent workers had to be replaced and plenty of business was done. Travellers will again be off to the trade next week and the frayed edges of most active life have been snipped off and machinery of duty will wheel more easily on its rounds. The advance in butts and hinges was well maintained. Cotton rope and sash are firm at the advance of last week and jobbers have increased their prices.

The reduced discounts in copper wire remain at 40 per cent.

Skates are very scarce and the strong winter weather has accentuated the situation.

AXES.—We quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen. follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—The normal business is being done, at the following prices: "Prism" globes, $1.20; Cold blast, $6.50; No. 0, Safety, $4.00.

COW TIES AND STALL FIXTURES — We still quote: Cow ties discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS.—Some orders are being sent forward this week. We quote: Back Straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS.—Copper is still high and advance in ore expected. We quote: Best iron rivets, section, carriage, and wagon box black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 27½ per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 15 per cent., subject to usual charge for half-pound boxes.

HAY WIRE.—Last week's advanced prices are being firmly held. Our quotations are: No. 13, $2.55; No. 14, $2.65; No. 15, $2.80; net cash, f.o.b. Montreal.

MACHINE SCREWS.—Trade is about as usual. We quote: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.. Felisterhead, brass, 25 per cent.

BOLTS AND NUTS.—Bolts are still scarce, no relief from the shortage having been experienced. Our discounts remain: Carriage bolts, 3 and under 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS.—Sales this week have been large and prices are well maintained. Discounts are as follows: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS.—The market is now firm at $2.30 per keg base f.o.b. Montreal.

CUT NAILS—We continue to quote: $3.50 per 100 lbs.; M.R.M. Co., latest $2.30 per keg base, f.o.b. Montreal.

HORSESHOES.—A steady business is reported. We quote as follows: P.B. new pattern, base price improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Conditions remain unchanged.

CEMENT AND FIREBRICK—We are still quoting the following prices: "Lehigh" Portland in wood, $2.54, in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN.—Last week's advance still holds. We are quoting as follows: 5-16 inch, $4.40; 3-8 inch, $3.90; 7-16 inch, $3.70; 1-2 inch, $3.50; 9-16 inch, $3.45; 5-8 inch, $3.35; 3-4 inch, $3.20; 7-8 inch, $3.10; 1 inch, $3.10.

SHOT—Our prices remain as follows: Fhot packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION. — Trade is normal. We are quoting as follows: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

GREEN WIRE CLOTH. — Bookings are very satisfactory. Our prices are: In 100 foot rolls, $1.62½ per hundred square feet, in 50 feet rolls, $1.67½ per hundred square feet.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Dec. 28, 1906.

The hardware markets this week are very quiet, and very few changes have to be reported. Shurly & Dietrich hand saws have been subject to a five per cent. advance, and are now being quoted at 35 per cent. instead of 40 per cent. as before. Rainbow packing has advanced 6 cents. Tar felt is now quoted at $2.25 per cwt., instead of $2.00 as formerly. Nails still remain firm at $2.30 base, but another raise is predicted in the near future.

All hardware travellers are at present off the road, and stock taking is the order of the day.

AXES AND HANDLES. — The demand still continues brisk and is likely to continue so for some time.

CUTLERY AND SILVERWARE. — Very few orders at present, as the busy season is practically over for this line of goods. Jobbers all report being cleaned out of most lines of case goods.

SPORTING GOODS. — Demand still continues good. Skates and hockey sticks continue in good demand, with snow shoes a close second. All retail

merchants report a banner year in these lines.

CHAIN. — Firm at the advance price, and we still continue to quote: 5/8, in. $3.50; 9-16 in., $3.55; 1/2 in., $3.60; 7-16 in., $3.85; 3-8 in., $4.10; 5-16 in. $4.70; 1-4 in. $5.10.

RIVETS AND BURRS—No apparent change in these articles and we still quote rivets 27½ per cent. and burrs 15 per cent.

SCREWS.—No change in price with stocks increasing.

BOLTS AND NUTS.—Stocks are in much better shape and manufacturers are doing their best to fill Ontario orders.

TOOLS.—Tool boxes, coping saws, and tools which comprise a boys' outfit are selling well.

SHOVELS.—The snow shovel demand still exists with a large increase over last year.

LANTERNS.—No let up to the demand, and still selling at $6.50 per dozen.

EXTENSION AND STEP LADDERS —Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING.—Barb and plain twist fencing, galvanized and coiled spring wire are all firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS.—Are still quoted at last week's advance, $2.30 base, but are generally looked for to advance still further.

CUT NAILS—We quote $2.30 base f.o.b. Montreal, Toronto 20c higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS.—Orders still coming in, the demand for these goods have been far in expectation of anything expected, as it was generally supposed that the demand would be light on account of the large numbers left on retailers last winter.

BUILDING PAPER.—While there is not much doing in this line at present, travellers are preparing to go on the road the first of the year looking for spring shipments.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES, WOOL AND FURS. — The Christmas deliveries of hides have been very steady. In furs mink is very scarce.

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 28, 1906

Outside of holidays, the feature of the week is still pig lead. The advance last week being higher than all previous quotations. New figures are now in order. Copper is running higher every day. Its scarcity is still notable. None of the large dealers are able to give any idea as to price as no stock is available.

The expected revision in the boiler tube prices has not at the time of writing taken place, but it may become operative any day.

Firmness in sheet metals dominate and scarcity holds. As prophesied, Canadian quotations will be advanced in part, the home prices on Canada plate and tin plate are cheaper than rates for imported stock. The zinc market is advancing and sheet zinc is to-day quoted at $8.25 to $8.50.

Business is reported fine and up to Christmas Eve, big firms reported one of the heaviest mails of the year.

COPPER.—Still further advances have taken place this week, and it is thought that the market will go higher. We are now quoting: Ingot copper, 25½c. to 26c. sheet copper, base sizes, 34c.

INGOT TIN.—This metal continues firm, but we still quote: 46½c. to 47c. per lb.

ZINC SPELTER.—Zinc is in a very strong position in the market. We continue to quote: $7.25 to $7.50 per hundred pounds.

PIG LEAD.—Higher prices in England have boosted quotations here and we now quote: $5.50 to $5.60 per hundred pounds.

ANTIMONY—Our price remains 27½ to 28c per pound.

PIG IRON.—We still quote as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES.—The expected new prices have not yet been issued. Our prices in the meantime remain as follows: British & American tubes, 1½ in., 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL.—Our prices are as follows: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.40 ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING. — We still quote: 3-16 in. to 1-4 in., $7; 5-16 inch to 11-32 inch, $5.95; 3-8 inch to 17-32 inch, $4.90; 9-16 inch to 47-64 inch, $4.20; 3-4 inch to 1 7-16 inch, $3.85; 1 1-2 inch to 3 inch, $3.50; 3 1-8 inch to 3 7-16 inch, $3.67; 3 1-2 inch to 3 15-16 inch, $3.85; 4 inch to 4 7-16 inch, $4.20; 4 1-2 inch to 4 15-16 inch, $4.55. This is equivalent to 30 per cent. off list.

GALVANIZED IRON.—Firmness prevails in the market. We are still quoting Queen's Head, 28 gauge, $4.60 to $4.85; 26 gauge, $4.45; 22 to 24 gauge, $3.90; 16 to 20 gauge, $3.75; Apollo, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 and 20 gauge, $3.60; Comet, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30 to $4.45; 22 and 24, gauge, $3.75 to $4.00; $16 to 20 gauge, $3.60 to $3.85; Fleur-de-Lis, 28 gauge, $4.45 to $4.70; 26 gauge, $4.30; 22 and 24 gauge, $3.75; 16 to 20 gauge, $3.60; Gorbals "Best Best," 28 gauge, $4.45; Colborne Crown, 28 gauge, $4.45; 26 gauge, $4.30; 24 gauge, $3.75. In less than case lots, 25c extra.

CANADA PLATES—It is expected that prices will soon be advanced. We are now quoting; 52's, $2.70; 60's, $2.75; 75's, $2.85; full polished, $3.85; galvanized 52's, $4.35; 60's, $4.60.

BLACK SHEETS.—Conditions continue very firm. We quote as follows: 28 gauge, $2.60; 26 gauge, $2.25; 22 and 24 gauge, $2.45; 20 gauge, $2.40; 18 and 18 gauge, $2.40; 8, 10, 12 and 14 gauge, $2.60.

TIN PLATES.—Our prices are as follows: Cokes base size, I.C. 14 x 20, $4.25 to $4.35; charcoal, base size, I.C., 14 x 20, 4.40 to $4.50.

TERNE PLATES—We are still quoting $7.10.

STEEL SHEETS. — We quote: 10 gauge, $2.60; 17, 18 and 20 gauge, $2.40; 22 and 24 gauge, $2.45; 26 gauge, $2.55; 28 gauge, $2.60 per hundred pounds.

SHEET ZINC—Conditions are unchanged and we continue to quote :$8.-25 in casks, $8.50 in less than casks.

SHEET LEAD—Our prices remain: 2½lbs., 6½c. by the roll; 3lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

BAR IRON.—The price remains $2.15 base, f.o.b. Montreal.

OLD MATERIAL. — We quote; Light copper, 17½c.; heavy red brass,17c, yellow brass, 13c.; light brass, 9c.; lead, 4c; zinc, 4½c; machinery cast scrap, $16.00; wrought scrap, $16.00; stove plate scrap, $12.00; mixed rags, $1.00 to $1.20 per 100 lbs.; old rubbers, 8 1-2c. to 8 3-4c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, D c. 28, 1906

Stock-taking is being done by most jobbers, business being dull between the holidays, and the travelers being off the road.

The chief feature continues to be copper, stocks of which are very short, some jobbers having booked orders amounting to several carloads for present delivery which they now find it impossible to fill. Producers have sold their output for the first half of 1907 and are holding off for the second half in the expectation of even higher prices.

Lead and Zinc are also hard to get, and prices are, in consequence, very firm.

Pig iron continues to strengthen and we are advancing our quotations on Summerlee to $26, these being very close figures. Bar iron continues unchanged, but bolts and nuts are easier and stocks in much better shape as the mills are giving their attention to Ontario orders where Western business demand attention before the close of navigation.

Brass tubing has advanced 3 cents per pound and copper tubing 4 cents, the new brass prices being 5-16 to 2 inch brazed, 33 cents; ¾ to 3 inch, iron pipe size, 33 cents; 1 to 3 inch, seamless, 40 cents; copper tubing being 5 cents extra over the brass quotations. The change went into effect Dec. 20.

PIG IRON.—Hamilton, Midland and Londonderry are off the market, and Radnor is quoted at $33 at furnace. Middlesborough is quoted at $24.50, and Summerlee, at $26 f.o.b., Toronto.

BAR IRON.—Bar continues hard to get and we still quote: $2.25, f.o.b., Toronto with 2 per cent. discount.

INGOT TIN—Buying is still lively and prices unchanged at 46 to 46 1-2c per pound.

TIN PLATES—Market continues active and prices firm at recent advances.

SHEETS AND PLATES—Active buying is reported with prices steady. Stocks are light.

BRASS.—We continue to quote: 26 to 27½c per pound for sheets. Brass has advanced 3c per pound.

COPPER—Shortages are reported with prices still on the upward climb. We now quote: Ingot copper $26 per 100 lbs., and sheet copper $31 to $32 per 100 lbs.

LEAD—Market is active and prices very firm. We quote: $5.40 for imported pig and $5.75 to $6.00 for bar lead.

ZINC SPELTER—Stocks continue light with market firm and active. We quote 7½c. per lb. for foreign and 7c. per lb. for domestic. Sheet zinc is quoted at 8 1-4c. in casks, and 8 1-2c. in part casks.

BOILER PLATES AND TUBES—We quote : Plates, per 100 lbs., ¼ in. to ½ in., $2.50; ⅝ in., $2.35 heads, per 100 lbs., $2.75; tank plates, 3-16 in., $2.65; tubes, per 100 feet, 1½ in., $8.50; 2, $9; 2 1-2, $10.75; 3, $12; 3 1-2, $16; 1, $21, Terms, 2 per cent. off.

ANTIMONY—Market is active, and stocks scarce. Prices firm at 27c. to 28c.

OLD MATERIAL.—Dealers' buying prices are as follows: Heavy copper and wire, 18½c., copper and wire, 18 1-2c. per lb:; light copper 16½c per lb.; heavy red brass, 16½c per lb.; heavy yellow brass, 14½c per lb.; light brass 10½c per lb.; tea lead, $3.70, per 100 lbs.; heavy lead, $4.10 per 100 lbs., scrap zinc, 4½ per lb.; iron No. 1 wrought, $14.00; No. 2 wrought, $6 to $8; machinery cast scrap, $16.50 to $18; stove plate. $13 to $14. malleable and steel, $8; old rubbers, 9c per pound; country mixed rags, $1 to $1.25 per 100 lbs.. according to quality.

COAL—The following prices are quoted on coal, slack being short.

Standard Hocking soft coal f.o.b. at mines, lump $1.75, ¾ inch, $1.65, run of mine, $1.40, nut, $1.25; N. & S. $1.10; P. & S., 85c.

Youghiogheny soft coal in cars, bonded at bridges; lump, $2.90; ¾ inch, $2.70; mine run, $2.60; slack, $2.25.

London, Eng., Metal Markets

From Metal Market Report, Dec. 28, 1906.

Cleveland warrants are quoted at 62s. 1½d., and Glasgow Standard warrants at 61s. 6d., making price as compared with last week 1s. 7½d. higher on Cleveland warrants, and 1s. 7d. higher on Glasgow Standard warrants.

TIN—Spot Tin opened firm at £196 5s., futures at £196 15s., and after sales of 150 tons of spot and 100 tons of futures closed easy at £196 for spot, £196 12s. 6d. for futures, making price compared with last week 15s. higher on spot and £1 7s. 6d. higher on futures.

COPPER—Spot Copper opened firm at £107, futures £108 10s., and after sales of 250 tons of spot and 500 tons of futures, closed quiet at £106 15s. for spot, and £108 5s. for futures, making price compared with last week 5s. lower on spot and 5s. higher on futures.

LEAD—The market closed at £19 17s. 6d., making price as compared with last week unchanged.

SPELTER—The market closed at £28, making price as compared with last week 2s. 6d. lower.

United States Metal Markets

From the Iron Age, Dec. 27, 1906.

Buying for the second half of 1907 on the part of consumers of pig iron has developed in increasing volume in the Eastern markets, and is becoming a feature, too, in the Central West. In the East it has been taken up by nearly all classes of melters, and appears to be confined largely to the covering of work already in hand. Conspicuous among the purchasers are again the Open Hearth Steel producers. One tidewater plant has taken an aggregate of 31,000 tons of basic pig, nearly all for the second half, at prices ranging from $22 to $23.25 at furnace. It is understood that further business is pending. Another works in New York State has taken about 15,000 tons, partly for summer delivery and partly for the second half at even better prices. Locomotive works have purchased an aggregate of about 20,000 tons, also for the second half, while a Western agricultural implement maker is making inquiries for a round lot of Foreign Foundry Iron for April shipment.

Some Buffalo furnace interests have followed the example of the Southern producers in opening their books for the second half at a considerably lower price than that prevailing for earlier deliveries. Thus important Birmingham interests quote $22 for the first quarter. $21 for the second quarter, $18.50 to $19 for the third quarter and $18 to $18.50 for the second half.

That consumers should be willing to contract for delivery so far ahead, at prices which would have seemed extravagant six months ago, is a surprising proof of confidence in the future, and in some branches seems hardly in harmony with the outlook for values in finished material which powerful interests are striving to hold at old levels.

An event of more than passing interest is the reappearance in the market of the Bethlehem Steel Company as a seller of steel rails. For many years the rails of this company stood first in quality, and it was an important factor in the industry. Then it disappeared entirely as a maker. Now the plant under construction will make a specialty of special rails, and will produce open hearth steel rails exclusively. The company has just effected a sale of 22,500 tons to the Oregon & Washington road, after the middle of the year. Among other sales we note 4,000 tons to the Iowa Central and 5,500 tons to the Bangor Railway. Light rails have been advanced in price to $33, base, Pittsburgh.

Only smaller contracts for bridge work and structural material have been placed, although some good work is coming in, and specifications are flowing in to the mills at a satisfactory rate. The American Bridge Company will probably fabricate a little over 600,000 tons this year, while its orders sum up over 700,000 tons. An interesting recent order is for 3,700 tons of riveted pipe for the Telluride Power Company.

After a series of advances the makers of pipe have finally, last week, restored the level of prices which ruled in April, 1905. This last advance amounts to $2 per ton on merchant pipe, $4 per ton on boiler tubes and a like amount on oil country goods. There is an inquiry in the market for 285 miles of 8-inch pipe for California.

The demand for bars continues heavy from all sources. In sheets and tin plate an advance is believed imminent. In the wire trade the question of being able to accumulate some stock for spring requirements is troubling the mills, in view of the steady demand for prompt shipments. The problem really is whether the trade has changed and is not so much subject to a spring rush as in the past.

From the Iron Trade Review, Cleveland, Dec. 27, 1906.

The Iron Trade Review of December 27, says:

The remarkable prosperity which has prevailed throughout the past year closed the year with record activity in iron and steel making. So insistent is the demand for both iron and finished materials that the usual holiday slackening of operations is being omitted whenever possible. The selling of pig iron during the week has been largely confined to the East, though throughout the country there have been numerous sales for third quarter delivery, to such an extent in fact that a number of producers are already out of the market for that period. Basic has been selling readily in the East for the last half of 1907. Southern pig iron continues to advance while railroad conditions are growing worse.

A tendency of the times is indicated in the purchase by the Lackawanna Steel Company of extensive coal properties of J. W. Ellsworth & Company, the idea being to provide the steel company with an adequate supply of coking and gas coal. Coke is in much demand for spot delivery with prices tending upwards in most sections.

Lake navigation closed with a very heavy tonnage of ore on lower lake docks and there is little possibility of suffering on the part of furnaces tributary to this district. In the East and Virginia, however, a number of furnaces which delayed making contracts are now becoming alarmed over their ore supply, and may not be able to operate continuously during the coming year.

In structural and other finished materials, increased activity is manifested. Both plate and sheet deliveries are now well into the future and much premium business is being done. Wire products, iron and steel bars are sold many months ahead. An advance is announced on merchant pipe and boiler tubes.

N.S. Hardware Trade News

Halifax, N.S., December 26.

Hardware prices throughout the list are very firm. Sheet iron has been advanced from $2.40 to $2.55, base, and bar iron has gone up five cents, being now quoted at $2.40, base.

* * *

The Halifax delegates to the Hardware Association meeting in St. John, have returned to the city, and are very reticient as to what transpired. It is understood, however, that the brush and broom situation formed the chief topic of discussion, while the wire nail situation was also considered. Nova Scotia dealers are not by any means satisfied with the manufacturer's prices on wire nails.

* * *

An announcement that will cause quite a stir in the nail situation has just been made. The Dartmouth Rolling Mills Company, whose plant is situated at Dartmouth, N.S., is about putting in a plant for the manufacture of wire nails, a feature of the business to be carried on in addition to the present works.

* * *

One of the most attractive and original window displays made in Halifax during the holiday season, was that of A. M. Bell & Co., hardware merchants. It was the centre of attraction for thousands, both young and old. There's nothing that attracts the attention of an intending purchaser quicker than a nicely dressed window and A. M. Bell & Co. have an excellent show. It is an illustration of how this firm gets its Christmas goods direct from the moon and China via the Electrical road; the Luna gravity railroad and the elevated cages through the earth to China. The south end of the display is shown a station house of the Transcontinental Railway at Halifax with a gilt dome, 18 or 20 art glass windows lighted by electricity. The electric train passes through the station, which has self-closing doors and then climbs the hill and cliffs, crossing the bridge to the Halifax Junction of the Luna Gravity R.R.; thence passing through a tunnel to the elevated cars on the China road; thence back to Halifax. In the centre of the window viewed beneath the bridges are elevated cages in motion passing through rocks on the surface of water. The Luna Gravity train, laden with Christmas toys leaves the Junction and climbs the hill to the moon, passes through the face of the moon, and thence through the distant sky making an exit through a tunnel (at the back of the window), and descending, passes along the curved railway tracks back to the station.

At the north-end of the window is shown a beautiful sky, back of which is an angel carrying the motto "Peace on Earth." To the south of the moon is a glimpse of Klondike with power house in motion and leather bands passing through a shaft to the interior of the mines. Cars laden with nuggets are shown at the entrance to the shaft. Beneath the bridges are seen the C.P.R. steamers and a full rigged barque. The display has to be seen to be appreciated, and the architect, S. S. Wetmore, is being complimented for his efforts.

B.C. Hardware Trade News

Vancouver, B.C., Dec. 21, 1906.

Extreme activity in all seasonable lines of hardware specialties has marked the holiday trade this year, and the season of holiday buying has been rather longer than usual. This year the merchants began their campaign early in November. From that time on the trade has been excellent and there has been no let-up. To make conditions more satisfactory, the trade in staples has been continuous and very heavy. The building trades have all continued right thro[illegible] the winter so far. Indeed the season has made no difference in trade, and all classes of materials are as much in demand as in the height of the building season last summer. There never has been a time when merchants could accumulate stocks for added to big steady demand there has been the usual condition of slow arrivals of goods, two causes contributing. The first is tardiness of delivery on part of transportation companies after goods have been shipped. The second is the impossibility almost, of getting orders filed with any degree of promptitude. In many cases goods badly needed in some lines have been on order since early last spring and not supplied yet. This is true in the case of hydrants and similar goods.

But despite difficulties, oft-times vexatious to put it mildly, the hardware trade has been extremely satisfactory in the year about completed. The general prosperity and increase in volume of trade has been evenly distributed and hardware men have shared fully in the rewards. With bank clearings as a basis of estimate, and the customs returns and shipping records as side lights on the trade situation, the presumption is well warranted that December has been a record month in the whole history of the Province and in the holiday trade of the coast cities.

* * *

Another electric line to be operated by the B.C. Electric Railway Co., is projected, to connect the city of New Westminster from Eburne on the north arm of the Fraser river close to the sea coast. This will be run along the mainland close to the bank of the north arm of the Fraser and work will be carried on until it is completed. The B.C. will operate the road under a charter held by the C.P.R. Co.

The B.C. Electric Company's other projected line, from New Westminster to Chilliwack is to go ahead rapidly as surveys can be made. Already parties are in the field and it will not be many months till the line is working. It will be nearly 60 miles in length, and run to Chilliwack on the south side of the Fraser river all the way. En route it will open up some fine agricultural lands which have always been handicapped by distance from means of transportation.

There is Twenty Years of Experience in this Can

Doesn't this point the way for you? Stephen's Pure Paint has now a proven record of over twenty years' hard use, under many difficult conditions.

Every gallon is made with Manitoba Linseed Oil—properly aged—this increases not only the body, but also the wearing qualities of the paint.

PAINT AND COLOR DEALERS

WINNIPEG, - CANADA

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Dec. 28, 1906.)

Room 511, Union Bank Building, Office of HARDWARE AND METAL, Winnipeg, Man.

Christmas week is the quiet week of the year and nearly all the travelers are off the road for a short time. Wholesale houses are commencing stock-taking.

LANTERNS. — Quotations are as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS.—Quoted now at $2.70 per keg.

CUT NAILS.—As noted last week cut nails have been advanced to $2.90 per keg.

PRESSED SPIKES — Prices are quoted as follows since the recent advance: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Discounts are quoted as follows since the recent advance in the price of copper rivets: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN.—Prices have been revised the general effect being an advance. Quotations now are: ¼ inch $7.00; 5-16, $5.35; ⅜, $4.75; 7-16, $4.50; ½, $4.25; 9-16, $4.20; ⅝, $4.25; ¾, $4.10.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES.—Quotations are: Bench axes, 40; broad axes, 25 p.c. dis. off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

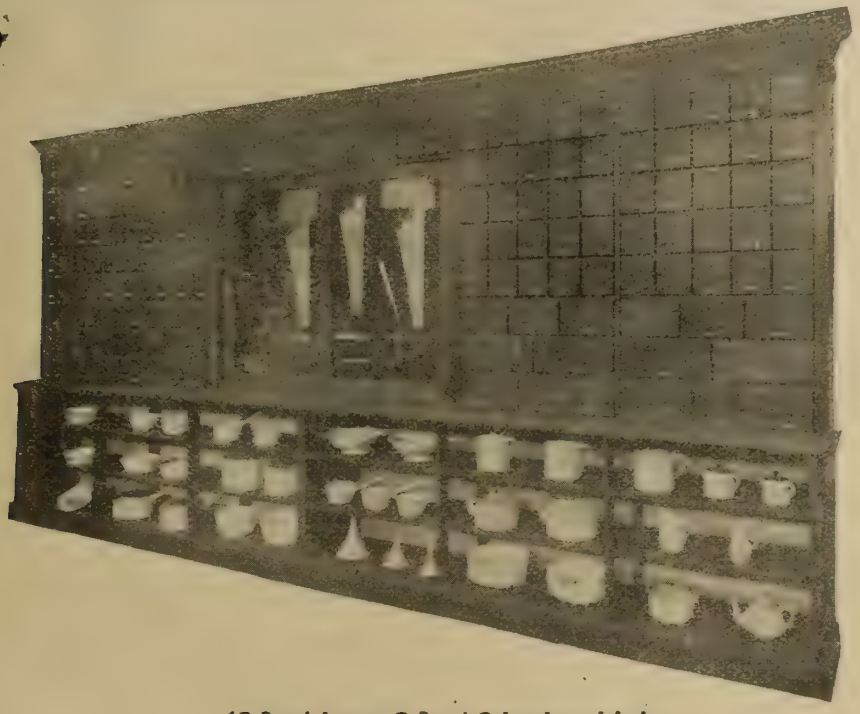
Our sample books of **BAS-KA-NO**—(something new in wall hangings—standard colors) and **LIN-UNA** (a high-class colored tapestry burlap—all colors), sized and oil-coated burlaps will be out in a few days. We would like to mail you one of these. Send us your orders.



AFTER THE XMAS RUSH

is the time to refit your store. It is the slackest time in the whole year. You have been promising yourself some new fixtures, why not instal them now.

There is an opportunity always for some one man or firm to rear a mighty bulwark—build a great business—by attaining a reputation for having the neatest store and giving the quickest service.

Get this reputation and you will thrive in spite of nearby neighbors who blatantly and brazenly boast of their cut prices and cheapness.

16 feet long, 8 feet 8 inches high

This section contains 138 Bennett Steel Hardware Shelf Boxes, ranging in size from 6x6x12 to 6x18x12. Our price for the boxes alone is $40.00. This is for boxes with oak fronts, hard oil finish, brass pulls attached to each box. Can you afford to be without shelf boxes at this price? Our catalogue gives other illustrations and full particulars regarding prices of various sizes of boxes.

Don't forget to mention Hardware and Metal.

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the **Western Trade** to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

A CHRISTMAS REMINDER.

Rev. Father A. E. Burke, the familiar delegate to the Annual Convention of the Maritime Board of Trade, who has been a member of the Prince Edward Island contingent for years, remembered the MacLean Company's special representative this year, by a dainty souvenir, in the form of a post card, on which was a life sized photograph of the priest-delegate, surrounded by suitable holly border in tint of green.

The "Best Christmas Wishes" extended are cordially reciprocated with Father Burke.

IT PAYS TO BE CIVIL.

Civility is one of the most useful and easily acquired habits, but the ease with which it can be acquired leads one to be without it. Travellers representing wholesale houses should make it a point to be cordial with clerks as well as propriefor, as the clerks of to-day are the business men of to-morrow.

A representative of a large Montreal wholesale house recently related some of his experiences on the road, which go to show that civility can be made both a business, and a pleasure; While calling on a certain retail firm in Eastern Ontario, which also had a tin shop in connection (while not having any business with that part of the firm) he generally went around and made himself agreeable to the tinsmith. It so happened that this tinsmith fell heir to some money and deciding to start a hardware store, immediately proceeded to the headquarters of this traveller and placed an order with him for a complete stock.

The speaker also told of a driver, for a hardware store who he used to treat as cordially as any one. One day he noticed this fellow driving along and said, "Hello Bill," the driver replied, "How are you Mr. ——," and adding that he would like to see the traveller a minute, got off the rig and said that he and his brother thought of starting a hardware store. After asking a few questions as to different articles, he promised that the opening order would be given the traveller on his next trip.

PUBLIC SPIRITED HARDWARE MERCHANTS
NO. 6

Rosthern, Sask., has a Board of Trade that is active in its endeavors to promote the interests of the town, and, at its head, is a hardware man, James M. Hackney.

Mr. Hackney moved West in 1891 and engaged in the grain business in Oak Lake and Manitou, Man., until 1897, when he moved to Morris and started in the lumber and machine business. In 1904 he moved westward to Rosthern, Sask., where he is now conducting a successful hardware and machine business.

Mr. Hackney is a busy man but he is also a public spirited man and he has not been disposed to shirk any public

Cut Book No. 59
Page No. 8

JAMES M. HACKNEY

President Board of Trade, Rosthern, Sask.

duties which presented themselves to him. Public office has never had any attraction for him and he has accepted only under pressure; but when it became his clear duty to accept office he has not pleaded pressure of business as so many business men are disposed to do.

For a number of years Mr. Hackney was a member of the Town Council and School Board in Morris and he also acted at one time as Secretary-Treasurer of that town. He has now been President of the Rosthern Board of Trade or two years and a member of the Town Council for one year. It is largely due to his efforts since moving to Rosthern that that town now has a municipal gas plant and is at present installing a telephone system.

It's not what the other fellow has, but how much of it you can get.

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

Three in One.

The Canada Cycle and Motor Company, Toronto Junction, are sending out to the trade a very beautiful lithograph sheet, with three cuts of the different lines manufactured by them, the first being called A Summer Holiday, with an engraving of a lady and gentleman resting by the wayside, with two cushion frame bicycles reclining against a mile post; another of a party in a Russell touring car, with the words "We Win," at the bottom of the cut. The third and last, is entitled "Health and Pleasure of Winter," showing a boy and girl, on a bench by the edge of a river, the boy placing a pair of skates on the girl's feet, representing the automobile skate manufactured by this company. This 3 in 1 display, will be sent to any dealer mentioning this paper.

Desk Calendar.

The Canadian United Manufacturers' Agency of London, England, manufacturers of advertising novelties, have issued a very handsome desk calendar in oxidized work, with a copy of which they have favored some of their Canadian customers and friends.

Purvis Bros. Calendar.

Purvis Bros., hardware merchants of Sudbury, have a very handsome calendar, which they are sending to their patrons, it being handsomely lithographed. The calendar has no advertisement to mar the picture.

Regina's Souvenir Book.

A book of about 7 x 10 inches, containing 50 pages fully illustrated, with views of the city hall, churches, schools, residental parts of the town, industrial concerns, banks, and several street scenes. There are also birds eye views of the city of Regina, the capital of Saskatchewan. It has been issued by the Board of Trade, and contains a good write up of the advantages Regina has for manufacturers and home seekers.

Brant's Ford.

The Brantford Carriage Company are sending out a picturesque calendar for 1907. This calendar represents Captain Joseph Brant, "Thayendanegea" together with his tribe of Mohawks, and British Commissioners, fording the Grand River to take possession of the lands granted them by the British Government. This firm are to be congratulated in securing such a beautiful calendar. Copies will be sent to dealers mentioning this paper.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

Conductor Pipe Elbows.

Ferdinand Dieckmann, Cincinnati, manufacturer of conductor elbows, are sending their new calendars to the trade. It is of good sensible size, with large plain figures, the upper part containing cuts of the works and of different shapes and styles of elbows. Any dealer can have one on request.

NEW MADE-IN-CANADA LINES.

Six months ago The Shirreff Manufacturing Co., of Brockville, Ont., moved into their new spacious quarters, which was found necessary owing to their steadily increasing business, after their only being in business six months. Their new large factory which is situated on the banks of the St. Lawrence is a solid brick and was formerly occupied by The Canadian Oak Belting Co., and now with the addition of new machinery which has recently been installed they are able to fill orders promptly.

Mr. C. J. Shireff, the president of the company, has had considerable experience in the manufacturing business, having been connected with The Harding & Shirreff Wringer Co., and for the past ten years European representative for The Jas. Smart Mfg. Co., of Brockville, Ont..

They manufacture food choppers, break makers, step ladders, store trolley ladders, and wagon jacks, and are also adding carpet sweepers which they hope to have ready for the trade before spring.

In addition to their general catalogue The Shirreff Company have issued a very attractive cook-book containing many excellent receipts, the first few pages being devoted to advertising their meat choppers, and bread-makers. A copy of this book and a catalogue will be sent to any one in the trade for the asking.

FOUNDRY AND METAL INDUSTRIES

A lime industry is spoken of for Port Arthur, and a location is being looked for on which to start the plant.

The coal famine still exists in the West, although coal is being shipped there at the rate of 900 tons daily.

The blast furnace plant of the Atikokan Iron Company in Port Arthur, under construction all summer, is now almost complete.

Great interest is being manifested in the iron resources of the Port Arthur district, a great number of prospectors being out for American capitalists.

An employee of the Taylor-Forbes factory, Guelph, was severely scalded last week. He was walking through the building when he accidentally stepped into a tank of boiling water used for dipping metal.

USES OF ALUMINUM.

The United States produces more aluminum than any other country in the world. According to the metalurgical experts at Washington, and it is likely to be the first nation to employ the metal in its coinage. Next fall, it is reported, the Director of the Mint will experiment with aluminum coins as substitutes for the bronze one cent piece at present in use.

Only a few years ago considerations of expense would have forbidden any such action. In 1885 a pound of the metal cost $200. So late as 1889 it sold for $4.50 a pound. Now it is quite within the probabilities that in another year it will be profitably produced for 35 cents a pound.

Nature has been lavish enough in this instance, but man is slow to learn her secret. In its various compounds—and it enters into composition of a very large number of minerals—aluminum forms about one-twelfth of the crust of the earth.

Ordinarily it is extracted from the oxide alumina, which is the chief constituent of common clay. Until a few years ago, however, only expensive processes have served to separate the metal from the combinations of which it is found.

During the last decade American scientists and inventors have overcome many of the old obstacles. The first article ever made of the metal was in compliment to Louis Napoleon who had helped St. Clair Neville, the first manufacturer—a table for the baby prince imperial. At present it seems impossible to name a use to which the metal may not be put.

Aluminum is lighter than glass, and only one-fourth as heavy as silver, which it somewhat resembles. Though it is as hard as zinc, scarcely any metal is equally malleable and ductile. It can be drawn into the finest wire and hammered into the thinnest sheets.

If sold at a low price aluminum, which does not tarnish, will largely supplant silver for decorating purposes. It is an excellent conductor and might take the place of copper in electric plants. Since no metal save steel of the highest grade is, weight for weight, its equal in strength, it would compete with the former in almost every manufacturing industry.

France and Germany and the United States have built torpedo boats of aluminum, finding that its lightness insures speed, and that it resists corrosion and galvanic action better than any other metal. Yachts, rowboats, bicycles, motorcars, surgical instruments, skates and cooking utensils have already been made from it.

Sell the Paints and Varnishes that sell themselves—the best known and best advertised—

SHERWIN-WILLIAMS PRODUCTS

The same effort that does a large business with ordinary paints and varnishes can do a record business with The S-W. Line.

SHERWIN-WILLIAMS METHODS of selling will build up new trade for any dealer who lends his hearty co-operation. We don't lose interest after we sell a bill of goods but simply transfer our energy towards moving the goods from the dealer's shelves. Our advertising helps are strong and produce results.

SHERWIN-WILLIAMS QUALITY will hold your customers' trade. There are no complaints on **S-W. PAINTS AND VARNISHES.** They are the best paints and varnishes that can be made because they are a combination of the purest and highest grade materials and the greatest skill in manufacture.

We have a good proposition to make you. Write for it today.

LATEST CANADIAN PATENTS.

The following up-to-date list of Canadian patents is reported to us by Egerton R. Case, Solicitor of Patents, Temple Building, Toronto:

Jos. O. Brousseau, de North Hatley, Que., acetylene gas generators; Frank Ed. Lauer, Toronto, anti-friction bearings; Chas. Brent, Brandon, Man., fire extinguishers; Wm. H. Mackenrot, Fort William, Ont., commode tops; Wm. H. Decker, Regina, Sask., oil pumps; Decaire Ceel, Caughnawaga, Que., lacrosse sticks; Jno. Honkel, Montreal, Que., spring beds; Albert J. Hitch, Ridgetown, Ont., railway signalling apparatus; John McQuat Mackie, Montreal, Que., feed water heaters.

MANUFACTURE OF IRON IN CHINA.

Iron in China is made by mixing four parts of the ore, one part of decomposed coal dust, and one part of small coal. The mixture is placed in crucibles each about 18 inches deep and 6½ inches in diameter. The crucibles are heated in a furnace having walls about 3 feet high and a floor 4 feet by 6 1-2 feet, which is covererd with clay and spread with a layer of coarse coal to a height of 7 inches or 8 inches above the clay. The furnace holds about sixty of these crucibles. The space between them is filled with small coal, and on top is placed a 3-inch layer of small coal, followed by a layer of cinders and ashes of the same depth. About sixteen hours of strong heat suffices to convert the mixture into a mass of carbon iron. This is made into wrought iron by reheating over a wood fire and by hammering it when red hot.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

A new post-office and custom house is to be built at Glace Bay, costing $20,000.

A project is on foot to establish a large railway car building plant in St. John, N.B.

A new Oddfellows' Hall will be erected on Broadview Ave., Toronto, at a cost of about $10,000.

A new cement roundhouse has just been completed at Brantford for the G.T.R. at the cost of $8,000.

Over one hundred thousand dollars has been subscribed by Sydney, N.S., citizens for stock in the new railway construction plant, in that city.

The Stanley Smelting Company, of Maine, have received a license to manufacture iron, steel, maganese, coke, copper, lumber, etc., in Ontario.

The Massey-Harris Company, Toronto, have taken out a permit for a small addition to their building. The Toronto Carpet Company will also enlarge.

The Majestic Wire Fencing Co., Detroit, Mich., will erect a factory at Victoria, B.C., for the manufacture of concrete reinforcements at a cost of about $40,000.

Butler Bros.-Hoff Company, incorporated under the laws of the State of New York, have received a license to carry on work, as builders, contractors and decorators in Ontario.

The Commercial Cement Company, of Carman, Man., have started to instal their new machinery, and work will be pushed with all haste so as to have their plant in operation in the early spring.

The Lufkin Rule Company, a corporation incorporated under the laws of the State of Michigan, have been granted a license to manufacture all kinds of measuring articles, tools, machinery, etc., in Ontario.

The Craig Harness Company has been incorporated with a share capital of $100,000, and head office to be at Ottawa. The provisional directors will be R. Craig, J. H. Cameron, and C. H. Clendenning, of Ottawa.

The Canada Cycle and Motor Company, of Toronto, intend holding an opening at their factory, after the first of the year, and will display goods manufactured by them, such as, automobiles, bicycles and skates.

The Shedrick Rigby Co., Montreal, have been incorporated with a capital of $20,000, to manufacture machinery, electric appliances, etc. The charter members include C. E. Shedrick, J. S. Rigby and P. C. Ryan, Montreal.

New Liskeard, Ont., will invite tenders for the erection of a new bridge over the Wahbi River. It will be a steel span for a bridge seventy-five feet long, driveway twenty-two feet, and a walk on each side five feet wide.

The Dominion Pipeworks and the Patterson Boiler Works of New Westminster, B.C., are in course of construction, and work will be started, on two other important industries, the Crystal Glass Works, and the soap factory.

The Gundy-Clapperton Co., Toronto, have been incoporated with a capital of $40,000, to manufacture cut glass, silver, jewelry, etc. The provisional directors include N. F. Gundy, H. G. Clapperton and W. H. Wise, Toronto.

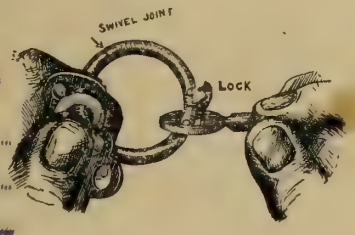
This has been a banner year in the building history of Brantford and beats all former records. Up to date building permits have been issued to the value of $408,625, against the total amount done last year valueing $197,860.

The Oil Well Supply Company, a corporation incorporated under the laws of the State of Pennsylvania, have received a license to deal in iron and steel, or any other metals, or any articles of commerce from metal or wood in Ontario.

The Clifton Sand, Gravel & Construction Co., St. Catharines, Ont., have been incorporated with a capital of $250,000, to manufacture stone, gravel, gas, oil, etc. The provisional directors include P. I. Price, H. Yale, and G. F. Peterson, St. Catharines, Ont.

The Western Rubber & Apparatus Co., Winnipeg, Man., have been incorporated with a capital of $25,000 to manufacture rubber goods, fire apparatus, etc. The provisional directors include R. M. McLeod, A. A. Andrews, and J. H. Anderson, Winnipeg, Man.

The Canadian General Industrial and Development Company, has been incorporated with a share capital of $150,000, with head office at Chatham, for the purpose of sinking wells, boring for oil, natural gas, etc. The provisional directors of the company will be O. B. Sargent, J. M. McCoig, and W. A. Hadley, of Chatham.



The Standard Concrete Construction Company has been incorporated with a share capital of $100,000 for general building construction, with head office to be in Toronto. Directors will be F. Rielly, G. Sutherland, E. Denton, J. B. Bartram and E. A. Scott, all of Toronto.

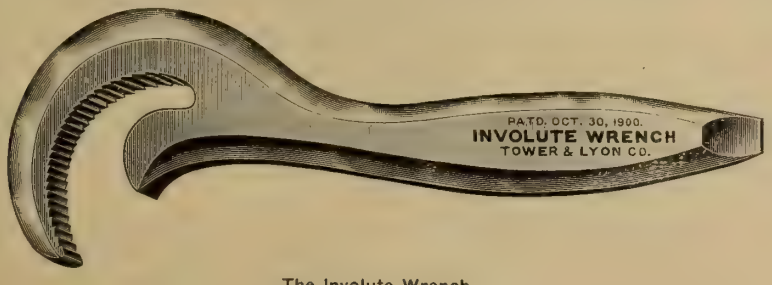
NOVELTIES FOR THE HARDWAREMEN

Readers desiring the addresses of the manufacturers or jobbers of the articles described, or any additional information, can secure the same from the Editor of HARDWARE & METAL.

A NOVEL KEY RING.

The trade will soon be shown a most interesting and practical key ring. This subject is one of interest to all hardware men, and of course it is desirable to keep pace with the newest devices in this line. The key-ring we refer to is

Novel Key Ring.



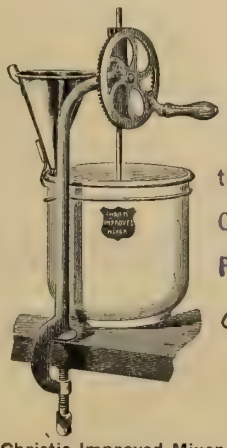
the "Morden." It enables one to lock keys on securely and quickly, has no projecting corners or spring to catch in the pocket, and is made on good mechanical lines.

A practical locking key ring is a subject which has engaged the thought of many inventors, and many thousands of dollars have been expended in experimental work, but it has remained for the Morden Manufacturing Company, of Waterbury, Conn., to produce a key ring which well merits careful examination.

To open the ring the inner projecting edge of the flat latch A is pushed outward, as represented in the illustration. This will expose a little point, under which the finger nail can be slipped and the latch lifted until it clears the joint B, when the gate part or swivel C should be sprung to one side. Keys may then be put on or removed instantly, saving time, fingers, and annoyance.

NEW INVOLUTE WRENCHES.

Tower & Lyon Co., 95 Chambers St., New York, are just putting on the market their Involute Wrench, a tool quite unique. At present they are prepared with the No. 1 size only. This tool is a solid steel forging 5½ inches long over all, with a capacity from ¼ to ½ in. on pipe, bolts, nuts, etc., of all shapes.



The Involute Wrench.

It is their purpose to follow this size with a larger one, No. 2, having a capacity of from ½ to 1 in., and will probably have it ready for the market early in the year. Other sizes will follow these if it is found there is a sufficient demand for them. The wrench derives its name from the curve of the jaws and the angle of the teeth to the fulcrum, which are tangent to the jaw. The wrench is polished, and weighs but three ounces. The end of the handle is formed into a screw driver blade.

CHRISTIE IMPROVED MIXER.

The Christie Knife Co., Tremont, Ohio, are putting on the market the mixing apparatus shown in the accompanying cut. It is very simple in construction and is described as follows:

First, a standard provided with a clamp for securely fastening it to the table, and a main gear wheel for operating the separate devices used. Next, a china mixing bowl encircled by a wire band, the outer point resting against the standard and the upright point supporting the oil cup. The oil reservoir is a nickel-plated, cone-shaped funnel, with a spout extending from the bottom to carry the oil away from side of the bowl and provided with an oil feed regulator on the inside. The cup is provided with a socket for receiving the wire clamping the bowl, holding same in position while operating the machine. The Mayonnaise Paddle has a shaft and gear, which when placed in head of machine is held in position by a clamping button, the gear engaging main gear on standard at top. The egg beater and cream whip, unlike the mayonnaise paddle, has two small gear wheels on the

shaft, engaging the large wheel at the top and bottom, causing the flyers to whirl both ways with great rapidity and ease. The flyers resting upon the bottom of bowl take up and thoroughly aerate every particle of egg or cream.

PAINTING THE LILY.

At a banquet held in a room, the walls of which were adorned with many beautiful paintings, a well-known college president was called upon to respond to a toast. In the course of his remarks, wishing to pay a compliment to the ladies present, and designating the paintings with one of his characteristic gestures, he said: "What need is there of these painted beauties when we have so many with us at this table?"

NOVEL SCHEME TO CATCH TRADE.

A unique idea has been adopted by a Pittsburg department store in the form of a little theatre playhouse, perfect in every detail. It has 200 opera chairs, four sets of scenery, a handsome drop and a stage equipped with every idea of a first-class theatre. It is the intention of the department store to give daily performances for the benefit of their customers and children. There is no charge for admission and four shows will be given daily, with a complete change of bill every week.

Without a well defined policy a store is like a ship without a rudder. It will find the rocks some day.

Paint, Oil and Brush Trades

PAINT AND OIL MARKETS DURING 1906.

A retrospect of the Paint, Color and Varnish trades for the year 1906, possesses more than ordinary interest, especially in regard to the great increase that has taken place in the cost of materials and consequent advance in prices all round.

Mixed Paint Ingredients.

The advent of White Lead Corroding Works into Canada less than two years ago, and the raising of the duty from 5 to 30 per cent., marked the first strong advance in the price of this staple paint. This was supplemented by an important increase in pig lead, which is higher now than it has been for twenty years. The effect has been the marking up of the price of white lead several times during the year, and the prices given out for 1907 are higher than have been known in Canada for a long time.

Zinc white, mainly owing to great absorption of metallic zinc for electrical purposes, and the absence of any new sources of supply, has also marked an advance of about 20 per cent. during the year.

As these two items form the staple ingredients in the best mixed paints, a corresponding advance in them, though not yet quite realised, is sure to come, and we are not surprised to learn that the leading makers of mixed paints not only raised their lists for 1907, but intimate a further advance to take effect during next spring and summer.

Oils and Turpentine.

Linseed oil has maintained a steady position during the entire year at an average of about 10 per cent. over the preceding year, the easing of prices which in the fall usually accompanies the new crop, has not materialized in 1906 and the tendency is therefore rather upwards for 1907.

Turpentine has ruled all the year at the extremely high rates which prevailed at the opening of the year. Whether the extraordinary high prices are due to restricted output, or whether they represent a "hold-up" or both, is a matter of much speculation; all the same the position represents a very serious tax upon the paint and varnish industry.

Varnishes and Colors.

Varnish gums have doubled their prices in the last ten or twelve years, and still continue their slow but steady advance.

The indications are that Canadian makers of varnishes, unchecked by the continuous advance in their raw materials, have strengthened their hold on the increasing trade of the Dominion so that the advance in output of this branch of manufacture has been very great.

Chemical colors have not been subjected to the same changes as other branches of the trade though chemicals are somewhat above the prices ruling in the last few years As the year closes, there is a growing firmness in all the markets for the items which contribute to this department.

Looking over the whole field covered by these industries in Canada, the position plainly is that manufactured goods have not increased in the same ratio as the materials of which they are composed, and we are forced therefore to the conclusion that as manufacturers clear off the stocks which have cost them lower than present values, the prices of manufactured goods will adjust themselves to the new market conditions and buyers will do well therefore, to keep their stocks well up.

A most serious change in value has developed in paris green, as arsenic costs a little more than double the price of fifteen months ago, and the advance on copper (the other essential ingredient) is about 60 per cent. We are not surprised, therefore, to find that the paris green 1907 price is higher than it has been in many years, and the consequent loss to the country will be correspondingly greater, always provided, that the dreaded potato bug puts in an appearance in battalions equal to those of recent years.

$56,000 FOR OIL RIGHTS.

The oil rights on Mr. Campbell's one hundred acre farm, eighth concession, Tilbury East, Ontario, have been sold by the Campbell Oil Company of Detroit to A. D. Akin, Spencerville, O., and C. Melvin Van Buren of Bolivar, N.Y., for $56,000 cash. This is only for the rights, as Mr. Campbell still retains title to the property, and he also gets every eighth barrel as his share of the drilling.

Looking Back Over 1906

if you have not been an Elastilite agent you can readily see where one mistake has been made.

Elastilite Varnish is an old reliable yet the up-to-the-minute line for 1907.

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 28, 1906

With very little doing in actual or possible business this week, the paint and oil trade is dead. Holiday dullness rules, and the commercial travelers are enjoying re-unions as well as their "bosses" and customers.

The firmness of linseed oil and turpentine is notable. White lead holds firmly to the advance of two weeks ago.

LINSEED OIL—We continue to quote: Raw, 1 to 4 barrels, 55c; 5 to 9 barrels, 54c.; boiled, 1 to 4 barrels, 58c.; 5 to 9 barrels, 57c.

TURPENTINE. — We are now quoting: Single barrel, 96c. per gal.; two barrels or over, 95c per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD.—The recent advance is being rigidly maintained and grinders have no trouble in getting the following prices: Best brands Government Standard, $7.25 to $7.50; No. 1, $6.90 to $7.15; No. 2. $6.55 to $6.90; No. 3, $6.30 to $6.55 all f.o.b., Montreal.

DRY WHITE ZINC.—We still quote as follows: V.M. Red Seal, 7½c to 8c; Red Seal, 7c to 8c; French V.M., 6c to 7c; Lehigh, 5c to 6c.

WHITE ZINC (ground in oil)—Manufacturers have raised their prices, and we now quote: Pure, 8½c to 9½c.; No. 1, 7c. to 8c.; No. 2, 5¾c. to 6¾c.

PUTTY — A heavy demand is shown. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—The following quotations are firm: Genuine red lead in casks, $6.00; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

PARIS GREEN—Prices are as follows: In barrels, about 600 pounds, 23½c. per lb.; in arsenic kegs, 250 lbs.. 23½c.; in 50 lb. drums, 24c.; in 25 lb. drums, 24½c.; in 1 lb. packets, 100 lbs. in case, 25c.; in 1 lb packets, 50 lbs in case, 25½c.; in ½ lb. packets, 100 lbs in case, 27c.; in 1 lb. tins, 26c. f.o.b. Montreal. Term three months net or 2 per cent. 30 days.

SHELLAC—Quotations are as follows: Bleached, in bars or ground, 46c per lb., f.o.b. Eastern Canadian points, Bone Dry, 57c per lb., f.o.b. Eastern Canadian points; T.N. Orange, etc., 48c per lb. f.o.b. New York.

SHELLAC VARNISH—The prices are: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c

BENZINE—We still quote 25 cents in barrels, and 30 cents in smaller quantities.

WINDOW GLASS—Our prices are: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, December 28, 1906

Turpentine still remains unchanged, but as predicted by us some time ago, an advance is looked for owing to the great scarcity of turps which was fully explained by us in last week's issue.

White lead remains the same, as does linseed oil. The demand is not very brisk at present, some paint manufacturers not booking orders beyond Jan. 1st, 1907. Travelers are, of course, off the road during the holidays.

WHITE LEAD—Ex Toronto pure white, $7.40; No. 1, $6.65; No. 2, $6.25; No. 3, $5.90; No. 4, $5.65 in packages of 25 pounds and upwards; 1-2c per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $7.00.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6.50; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.25.

DRY WHITE ZINC— In casks, 7 1-2c.: in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 80c. per gallon.

PARIS WHITE—90c. in barrels to $1.25 per 100 lbs.

WHITING—60c. per 100 lbs. in barrels; Gilders' bolted whiting, 90c. in barrels, $1.15 in smaller quantities.

SHELLAC VARNISH—Pure orange in barrels, $2.70; white, $2.82 1-2 per barrel; No. 1 (orange) $2.50; gum shellac, bone dry, 63c., Toronto. T. N. (orange) 51c. net Toronto.

LINSEED OIL—We still quote: Raw, 1 to 4 barrels, 57c.; 5 to 9 barrels, 57c.; boiled, 1 to 4 barrels, 60c.; 5 to 9 barrels, 59c. Toronto, Hamilton, London and Guelph; net 30 days. Advance of 2c. for delivery to outside points.

TURPENTINE—Single barrels, 97c.; 2 to 4 barrels, 96c.; f.o.b. point of shipment, net 30 days. Less than barrels, $1.02 per gallon.

GLUES—French Medal, 12 1-2c. per pound; domestic sheet, 10 1-2c. per lb.

PUTTY—Ordinary, 800 casks, $1.50; 100 drums, $1.75; barrels or bladders, $1.75; 100-lb. cases, $1.90;; 25-lb. irons, $1.85; 25-lb. tins (4 to case) $1.90; 12 ½ lb. tins (8 to case) $2.10.

LIQUID PAINTS—Pure, $1.20 to $1.35 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS—Gals., 70c. to 80c.

BRIDGE PAINTS—Gals., 75c. to $1.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

PARIS GREEN—Canadian manufacturers are quoting their base price at 25c and on the English, 25¾ is quoted f.o.b., Toronto.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

PRACTICAL PLAN FOR PUSHING PAINTS.

I carry one complete line of mixed paints and when a customer mentions paint I try to find out first what is to be painted and then proceed to sell the customer a special paint that is made for that particular purpose, and by doing so I show the customer I am interested in giving him what is right, writes a Minnesota hardware merchant, in an exchange. When he finds out on using the goods that I was right and the job is even better than he expected that man is sure to come again for paint or anything else he may need in my line.

I also display in a prominent place in my store, all the different kinds of paint I have, and keep my windows talking paint nine months out of the twelve. In many other ways, I keep reminding the public that I sell paint, and long before the painting season opens I have sold paint for several houses. I keep a record of each color of the house paint as it comes in, and it helps me to a great extent in ordering a new supply, as I can determine very quickly just how much of that particular kind I have sold in any given time.

I keep a record, a card index, of all the paint sold for outside painting, entering the date, quantity, different shades, and weather conditions, and in that way am not only able to determine when the paint was applied and under what conditions, in case of difficulty, but also have a means of interesting the new customer, for by referring him to or showing him where I have sold paint to Bill Smith and John Brown, men with whom he in the majority of cases is well acquainted, I impress upon him the fact that there must be some virtue in it or these men would not use it, and in this way I am also able to refer to houses which in many instances have been painted for a number of years.

MONTREAL PAINT MEN FAVORED.

The Montreal Board of Trade has formed a new branch, to be known as the Paint, Oil and Drug Section. This will include members engaged in the soap, oil, paint, varnish, drug, chemical and allied trades. The following firms were represented at the meeting where this move was decided upon:

Canada Linseed Oil Mills, Limited, Canada Paint Company, Limited, Henry Dobell & Company, R. C. Jamieson & Company, Limited, Watson Jack & Company, McCaskill, Dougall & Company, McArthur, Corneille & Company, Nation Drug and Chemical Company, A. Ramsay, Son & Company, Wilson, Paterson & Company.

INTEREST WOMEN IN PAINT.

"The best way to clean house is to paint," is a timely motto containing more of fact than fiction, says an exchange. Paint is a great renovator, not simply for brightening up, but literally making clean. Further, it is a little recognized insecticide, destroying both egg and adult; and those unfortunate in getting into apartments infested with vermin will find it a more satisfactory remedy than carbon bisulphide.

Convince a woman on one or two of these points, and you have an interested listener. Few women who have never substituted the paint brush for the scrub brush are aware that they can do the most of their own painting and varnishing. With prepared paint and a few simple directions regarding care and selection of brushes, which the dealer should be prepared to throw in, creditable work is not beyond the reach of the most inexperienced. But the successful salesman should familiarize himself with the common problems of the housewife, anticipating her needs and showing a cordial interest. He should know what colors harmonize—for the color cards are not fully satisfying to the novice; how to prepare sizing for the kitchen wall if it is not hard finished plaster; to warn her against using

As the White Lead is So is the Paint

The only white lead used in

"Anchor" and "English"
LIQUID HOUSE PAINTS

CELLAR OUTFIT

S. F. BOWSER & CO., Inc.

66-68 Fraser Ave. Toronto, Ont.

THE SURVIVAL OF THE FITTEST

Selling whiting, glue and color separately for kalsomined walls is a thing of the past.

The more modern method of selling whiting, glue and color ready mixed, in packages labelled different names, is **ALSO** a thing of the past, or fast becoming so.

Any compound which can be kept over night or several days without spoiling, is simply a preparation of glue and whiting or some other inert base, which depends on the glue in it to hold it to the surface, and in time decomposes, becomes diseased, rubs off and has to be washed off.

The ever-growing public demand is for a pure and sanitary wall coating that will not rub off and is ready for use with cold water.

ALABASTINE

fulfils the public demand. Made from crystaline Alabaster Rock, it is a cement that sets and hardens on the wall and improves with age. It is pure, permanent and sanitary, and as such

HAS NO COMPETITOR

ALABASTINE is being more and more fully appreciated by the public, and the orders are coming in by leaps and bounds.

Fortunately, we have opened a new mine, and hope to fill all orders promptly and on time; but we advise you to order **NOW**, with spring dating.

anything but iron paint on tin. These and other "kinks" will be appreciated and prove profitable on both sides; for the real home-maker delights in using her own hands in every possible way in beautifying her home, and the newly acquired manual skill will find two ways to use paint where one was found before.

SELECTION AND CARE OF BRUSHES.

One conspicuously famous brush maker has declared the art of brush making to be "an art preservative." The practical carriage and wagon painter is deeply concerned in the achievements of that art, because every distinct advancement made therein makes possible an equally distinct advancement in the art of painting. To a greater extent, perhaps, than any other class of painters, the carriage and wagon painter should be interested in making up his brush equipment of tools of the best quality.

The brush made of reliable stock, having the proper "hand" and point, and which balances like a "thoroughbred," is an excellent tool to buy, regardless of the price. The vehicle painter requires a brush made scientifically, by the outlay of honest workmanship, and of material that is wholly above suspicion. A brush that has simply the price to recommend it is usually an unreliable article and worketh evil, like a thief in the night, unexpectedly. In making choice of a brush for putting on priming, lead, and roughstuff, and for such other features of general use as requires a round or oval bristle brush, the painter may properly look at the filling of the tool. Deception, if practiced at all, is usually placed where is shows least.

The first-class brush is distinctively the brush that shows good quality—uniform quality—from centre to outside, says the Painter and Decorator. Other things being equal, the brush that is made up uniformly as to its bristle equipment will develop a good point, and all carriage painters are alive to the importance of this virtue in both paint and varnish brushes. Much of the usefulness of a brush depends upon the manner of caring for it when it comes into the paint shop. The bristle brushes used for priming, lead, and roughstuff require bridling until worn down somewhat.

There are many patent brush bridles now procurable at a nominal cost which tend to give a brush better shape than the shop-made bridle. If these are not at hand, the painter can take "tufting cord" (our friends the carriage trimmers keep it) and wind the brush securely but not too tightly; or he can take a piece of light-weight rubber cloth and, extending the piece well down to the handle, tie it at the proper distance around the bristles, the rubber side of the piece should be fastened next the bristles. Then from where it is tied around the bristles, fold the piece back into the handle and tie securely. Trim off, and a bridle is furnished that is perfectly water and paint proof, the cloth side of the rubber being folded inside. For a shop-made bridle the writer finds this a serviceable one. After bridling, drop a little oil paint into the heel of the brush and set it away in a dustproof compartment for a few days.

RICH OIL WELL.

A very rich oil well has been struck in J. A. Tremblays farm, in Romney Township, Ontario. Oil gushed in great force from the well before the workmen started operations one morning, and before they could plug the casing at least a thousand barrels flowed out on the frozen ground and ran in rivulets to the large ditches for which Romney is famous. The new well is about six miles south of the scene of active operations, and this means that the field has been greatly enlarged.

Only the prompt action of a crowd of oil men and helpers averted a very serious fire. Some person set fire to the oil in one of the ditches about half a mile from the well, and a sheet of fire swept up and down the stream. By damming the oil and sweeping the stream the fire was headed off from the well.

It's Strictly Up To You Mr. Dealer

Wishing Our Friends and Customers A Happy and Prosperous New Year

The Montreal Rolling Mills Co.

Hardware Dealers Should Wake Up—

to the fact that **SHEET METAL BUILDING GOODS** could be made a large and ever increasing factor in their business. Farmers, manufacturers and all owners and builders are daily demanding these goods because they fill satisfactorily the gap which is being left by the diminishing supply of good and cheap timber. Some dealers have already established a considerable trade in this line, proving that it can be done, but it's "only as a drop in the bucket" compared to what's to come. If the **HARDW R[P] DEALERS** and **TINSMITHS** don't look after this valuable trade, they will live to regret it. **Some one else will reap the harvest.**

Don't say—"**There's nothing in it for me**"—because there certainly is, providing you have the **RIGHT GOODS** and the **RIGHT FIRM** behind them. It doesn't matter about the manufacturers who sell direct to the consumer. One good, square firm, who will **PROTECT** and **HELP** a good orginization of agents, can, with those agents, do more business than three or four of the other kind.

We can show you—all we need to prove to you how this combination will work in 1907 is some more good agents—we've got the goods and the other qualifications. One of our representatives will be along your way soon after New Years to talk to you on the subject. If you are interested drop us a line at once and make certain that you will not be missed.

Plumbing and Steamfitting

PRIZE AWARDED TO "HYDROSTATIC."

A Halifax Plumber Wins the Prize Offered for the Best Answer to our Recent Question on Closet Connections to Soil Pipe Stack.

The editor is pleased to announce that a great deal of interest has been manifested in our last competition, when the question to be answered was:

> **In your judgement is it essential that every closet connection to soil pipe stack should be provided with a Breaksyphon?**
>
> **If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a Breaksyphon, and give the reasons why it would not be required.**

As explained at the time correspondents were expected to furnish sketches indicating their ideas and in this connection we have had very satisfactory results, and the absence or merit of such sketches has had an effect in finally determining who should be declared the winner of the prize.

One feature of the competition was the practically unanimous opinion that under certain circumstances a breaksyphon may be omitted, though there was some difference of opinion respecting the conditions under which it need not be used, and while we are of opinion that there are defects in every sketch sent, and room for debate upon many of the points raised, we are, nevertheless, satisfied that the plumbers of this country have a good idea of the physical condition that obtains inside a system of plumbing.

While it is our intention to publish from week to week a number of letters, and illustrations received in connection with the competition, we publish herewith only that which, in our judgment, has the most merit, not only because the reasoning is for the most part good, but because the sketch is one of the best sent in.

We would point out, however, that in our opinion, no vents whatever are required in the system shown, for the reason that the traps are close to the stack and that there is no drop between the latter and the former, and in consequence no syphonic action, can be set up, and no back pressue can be exerted by a flush of the upper fixture on the seal of the lower one, because of the free opening to the atmosphere through the foot vent inside the street tap.

In addition the lowest closet connection and the vertical stack should enter the horizontal drain through Y's instead of T's as shown and the soil pipe stack should increase in size just before passing through the roof so that the passage will not be filled up with hoar frost.

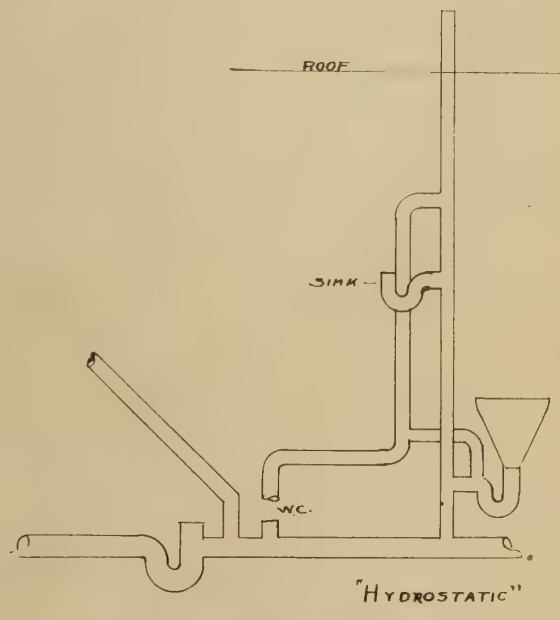
We have, therefore, decided to award the prize to "Hydrostatic," of Halifax, and trust that future competitions will be regarded with as much interest as the ones that are passed have aroused.

* * *

Halifax, Nov. 19, 1906.

In answer to your question in re ventilation of every w.c. trap, I would reply that I consider it necessary to ventilate every w.c. or other trap with a proper sized vent pipe, arranged so that same will not become clogged from any cause and become useless, and will give you some reasons why I think so.

It frequently happens that under certain conditions the fresh air valve will allow the house trap or part of soil pipe to freeze, the result of which is that the occupant plugs up the opening of same. In that case the writer has known the wind to move the water out of a 2-inch trap twenty feet from the top of stack, and also to agitate the valve on a w.c. thirty feet from top of stack. As an illustration I enclose sketch of piping.



If the fixtures were vented into a separate stack carried through roof probably some distance from soil pipe, the result would be somewhat different.

Then again, take a syphon action w.c., with unventilated trap placed in a dormitory, a pail of water is emptied in same or just sufficient to flush the closet, and the cistern is not operated, the result is that very little seal is left in the trap which could be easily waved out. If the trap should lose its seal by evaporation, capilliary attraction or otherwise, or if the closet should get loose at its connection with soil pipe at floor, the vent pipe would be an advantage in carrying off some odor that would otherwise escape into the room. Another reason might be quoted, and that is, that dead ends should be avoided as far as possible.

I might continue to give other reasons, but I think the foregoing sufficient.

Yours truly,

Hydrostatic.

ANOTHER QUESTION PROMISED.

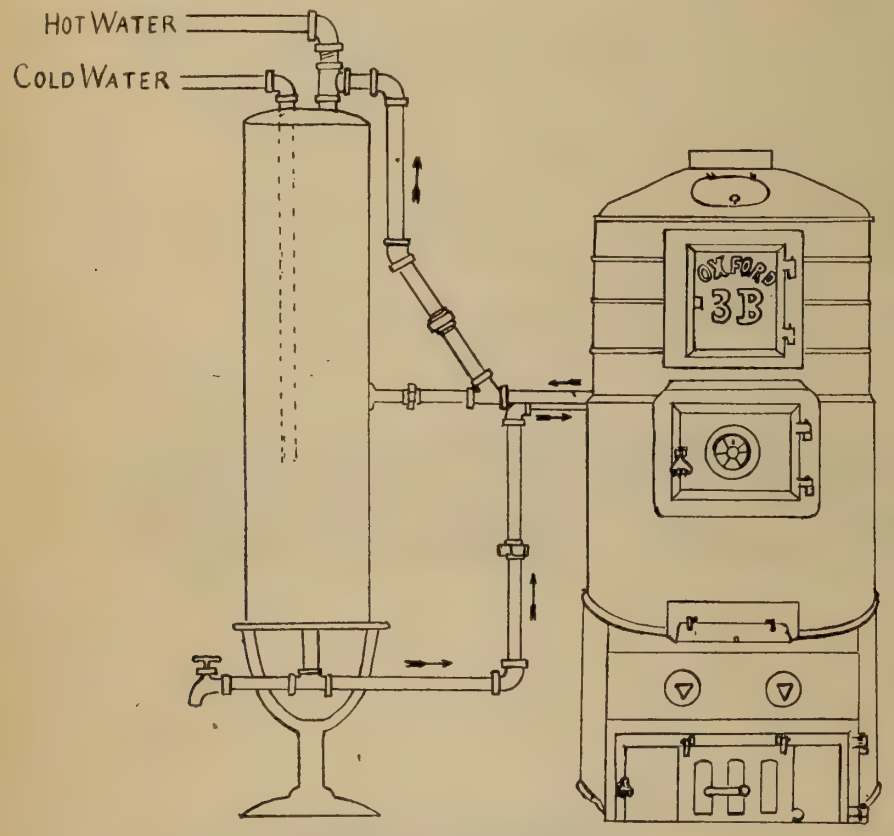
Other answers to the question answered by "Hydrostatic," of Halifax, will be published during January and another question will be propounded in our issue of January 26.

These questions and answers are creating considerable interest amongst the trade throughout Canada and are very valuable and helpful in encouraging Canadian plumbers and fitters to express their views on subjects which a discussion is of educational value to many in the trade.

WANT WORK DONE LOCALLY.

Toronto brass workers have asked the Board of Control to award the contracts for supplying stop cocks for the waterworks department to the local trade instead of the Niagara Machine Tool Company, which had submitted the lowest tender.

INTERESTING DOMESTIC HEATER PROBLEM



Answered by C. E. Oldacre, Toronto, Member of the American Society of Heating and Ventilating Engineers

An Ottawa correspondent sends the following interesting problem, illustrated by a sketch showing the trouble he met with:

"The feed from furnace has only 1-4 inch of rise to the boiler, and makes a terrible noise. I made a connection from feed to the hot water pipe, and it still makes the same noise. I took out the domestic heater and put in two one-inch pipes, with return bend with same result. All pipes are clear. Can you show me what to do?"

Mr. Oldacre's Answer.

The accompanying sketch shows the proper connections to be made from an auxilliary water heater for domestic hot water supply to the circulating boiler, and to the supply pipes for same.

Interesting Hot Water Heating Problem.

In the inquiry made there is certain data missing so that a direct answer can not be given or a direct explanation made of the cause of the trouble in this particular case. But if the directions herein given are followed out, it will lead to the rectifying as well as the location of the cause of this trouble in the instance cited. The data or information not mentioned by your correspondent is the size of the boiler (circulating) used, the sizes of the circulating pipes and the connections used, the size of tappings on the boiler, and the position of the auxiliary water heater in the hot water boiler.

Also, it is to be noted, that at what time these noises occur is not stated, as also the nature of these noises; whether or not they occur soon after starting a fire in the hot water boiler, or after the circulating boiler is thoroughly heated throughout, nor is it stated whether or not the water for the domestic supply gets very warm, nor whether there is a tendency of the water in the circulating pipes to reverse the direction of the circulation in the same.

With such information missing, it is not possible to directly point to the cause of the trouble complained of by your correspondent, as any or more of several things might cause trouble.

On making the connection to the auxilliary water heater, it is advisable to see that the flow connection (the circulating pipe which carries the water to the top or side of the circulating boiler) is taken from the outlet in the auxilliary heater that may be a trifle the highest, and that the auxilliary heater is not so tilted in the hot water boiler that the reverse is the case.

The Proper Connection.

The circulating pipes forming the connections between the auxiliary heater and the circulating boiler, should be of one inch galvanized iron, brass or copper pipe, and it should be observed no reductions are made at any point in the size of the pipe or fittings. It is important that the pipes are properly reamed after cutting the various lengths required to make connections, so that there may be no decrease in the bore of the pipe—this is essential in all pipe work where hot water is circulated, as it allows of a freer circulation.

Circulating boilers used in connection with the smaller sized hot water heaters should be not less than 50 gallons capacity, and those used in connection with the large sized heaters should have not less than 80 gallons capacity.

The connection that is to be preferred is the one leading to the top of the circulating boiler, having an immediate connection to the hot water supply pipe leading to its various outlets. When the flow circulating pipe is connected into the side of the "T" directly at the top of the circulating boiler, provision is so made for an easy outlet for any accumulation of air that might otherwise hinder the circulation and cause trouble.

No neccessity exists for making the flow connection to the side of circulating boiler, and it can be dispensed with as well as not, as the one leading to the top of the boiler will provide for the proper circulation of the water. The side connection to the circulating boiler by itself should not be used except where there can be some elevation or rise to the flow circulating pipe, which can generally be had by placing the boiler (circulating) on a high stand or one built of the proper height from iron pipes and fittings.

Before placing the auxiliary water heater in position in the hot water boiler, it should be seen that there is no stoppage in the auxilliary heater—that it is absolutely clear throughout the whole of its interior. Failure to observe this point may lead to trouble.

A good supply of hot water for domestic service can be depended on if the details cited are looked after and the directions given followed.

These domestic water heaters may also be successfully attached to horizontal circulating boilers as well as vertical ones as shown—the circulating boiler being securely suspended near the hot water boiler from the ceiling of the basement or cellar ceiling, or the hori ontal and vertical circulating boilers may be located on a floor above the hot water boiler.

LINDSAY PLUMBER BANQUETED.

James Boxall, of Boxall & Matthie, plumbers and steamfitters, Lindsay, who was banquetted in that town on December 4th, was recently elected Supreme President of the Order of the Sons of England. Mr. Boxall has been a persistent worker for the Order, and is equally esteemed by his brother members as well as by the plumbing trade throughout Ontario, to whom he is well known.

Charles Morrison of the James Morrison Brass Manufacturing Company, Toronto, has been sponding the holidays in Chicago.

ELECTRICAL AND LIGHTING

DECORATIVE LIGHTING OUTFITS.

The Canadian General Electric Company, Toronto, are supplying the trade with little folders describing their decorative lighting outfits. The outfit is simple, flexible, thoroughly constructed, perfectly safe, and forms a most serviceable device which should be in every electrically lighted home. It is a valuable household possession, always ready for the decoration of the dinner table, walls, columns, balustrades, chandeliers or Christmas tree, and for enhancing the natural beauty of flowers and foliage. Wherever electric light is available, the most dainty and beautiful decorative effects may be obtained by the use of miniature incandescent lamps. These tiny points of light, gleaming like many colored fairy lanterns, impart an added charm to decorations. Having no flame, they are safe and clean to handle. They are lighted by the touch of a button, and will burn as long as desired without attention.

The first cost is low, considering that the miniature lamps are included, and an outfit once purchased will last for years and can be used repeatedly with no additional expense.

THAWING WATER PIPES BY ELECTRICITY.

A considerable amount of information has already been printed on the subject of thawing frozen water pipes by means of electricity, says the Metal Worker. It was explained that ordinarily the most convenient methods were those which involved the use of alternating current, for the reason that by means of a transformer the pressure or voltage of the alternating current could readily be regulated to suit the conditions met with. By controlling the pressure it is possible to control the amount of current allowed to flow, and it is, of course, the current meeting with the resistance of the pipe line that produces the heating effect. Alternating current pipe thawing outfits of this general description, now manufactured by electric machinery manufacturing companies, as stated in these articles, are unavailable except where the local electric distributing system is an alternating one, and make it necessary, moreover, to have the apparatus relatively near the source of current in order to tap the electric lines conveniently.

On account of this limitation an interesting outfit is one that was developed in 1905 in Gloversville, N.Y. It consisted in brief of a thawing equipment mounted complete on a sleigh and including a gasoline engine and an alternating current generator. The equipment was built to thaw out a pipe as large as 16in. in diameter, but apparatus of smaller capacity and of lighter weight for thawing small house pipes could doubtless be built along the same lines. The gasoline engine was direct connected to the generator and the unit mounted on a steel frame of I-beams placed on the sleigh bobs. The generator had a rating of 15 kw., though it carried 22 kw. safely in the winter temperature out of doors for four or five hours. Its armature, which was of the stationary type, had its coils provided with terminals so that various series and multiple arrangements could be made, giving voltages of 110, 55, 27½ and 15 volts, and a rheostat or voltage regulator was employed to obtain intermediate voltages. The engine was a Westinghouse two-cylinder machine of 24 h.p. rating. Rubber covered braided cable was used to carry the current to the frozen pipe. With the machine it was possible to thaw a pipe in any part of the city and, as will be noted, it did not include any transformers.

ELECTRIC ROOM HEATING.

In the warming of room enclosures by electric heaters or connectors, as they are called, for average conditions 1 watt of electrical energy should be contributed per cubic foot, it is stated which is taken to mean 1 watt per cubic feet of space warmed. Such being the case, it will be interesting to note the relation between this figure and the corresponding figures for steam radiation. There are 746 watts in 1 hp. and 1 hp. is equivalent to 2,545 heat units per hour, so that 1 watt is equivalent to 3.4 heat units per hour. This, the author explained, was the amount of energy needed per cubic foot. For 100 cubic ft. of space there would then be given off 340 heat units per hour. As 1 square ft. of steam radiation is ordinarily credited with a capacity of 250 heat units the 340 heat units are equivalent to 1.36 square ft. of steam radiation. In other words, the use of 1 watt of electric heater capacity for 1 cubic ft. at the rate of 1.36 square ft. of steam radiation per 100 cubic ft. of space, or 1 square ft. of direct steam radiation to $100 \div 1.36 = 73.5$ cubic ft. In other words, where steam radiation supplied in the ratio of about 1 to 75 sufficies, electric heaters, it would seem, will give satisfaction when their combined capacity in watts is the same as the number of cubic feet warmed. —Metal Worker.

RETURN OF LIGHTNING ROD.

The return of the lightning rod is the subject of an article in the Electrical World. While statistics show that lightning rod production and installation have fallen off very materially in the last few decades there are evidences of a judicious revival of the lightning rod, particularly in rural districts. The large use of steel building and of brick and stone in cities has lessened the chief danger from lightning, which is fire. Statistics collected by a leading fire insurance company covering the past 10 years show a steady increase in losses from this cause, over 80 per cent. of the estimated loss by fire to farm and country property being traced to lightning. Fire insurance companies expect, therefore, to advance rates on farm property not protected against lightning. The suggestion is made in the article that instead of a single copper rod the bird cage construction should be used—that is, 8 or 10 galvanized wires let down to ground level from the roof, all tied together at the top and at the bottom by horizontal wires.

ELECTRICAL NEWS.

The Welland Electric Street Railway Company is applying for a charter at Welland, Ont.

The Woodstock Electric Light Company have been given the contract for electric lighting at Woodstock, N.B.

The Board of Trade of Raymond, Alta., have appointed a committee to look into the question of installing an electric light plant.

The Canadian General Electric Company are installing an electric plant at Dorchester, N.B., for street and commercial lighting.

The proposition to install a new electric light plant at Windsor, Ont., will likely be submitted to a vote of the ratepayers in January.

The new works of the Plymouth Cordage Company, Welland, will be operated by electricity, the Cataract Power Company, of Hamilton, having secured a contract to supply 1,200 h.p.

The ratepayers of Wolfville, N.S., are considering the acquisition of the electric plant for both street and commercial lighting. If acquired, an all-night service will probably be adopted.

The Canadian White Company made a proposition to take over the street railway franchise at Edmonton, Alta., but it did not receive favorable consideration, as the council have in view the operation of an electric street railway as a municipal enterprise.

The Bell Telephone Company have contracted for 83,000 poles for delivery next year for the extension of telephone lines in Canada. This represents 2,500 miles of construction. The rural telephone service of the province of Manitoba will be doubled in extent. There are some 2,000 farmers connected at present.

Welland, Ont., Town Council, have given the contract for street lighting to the Stark Electric System, Limited, of Toronto. The contract is for 40 arc lights of 2,000 c.p., and the price is $40 per light per year, all public buildings belonging to the corporation to be lighted free. The rate for private lighting is to be 8 cents per kilowatt, with 25 per cent. discount if paid by the 15th of each month.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, December 28, 1906.

Notwithstanding the holidays, trade has kept up remarkably. The chance for annual stock taking has been precluded by the unusual amount of business.

Iron piping is expected to advance any day.

RANGE BOILERS—There is a good demand and the following prices are, well maintained: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—Primary markets are still rising, and pipe is firmer. We still quote 5 per cent. discount f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c per hundred lbs extra; f.o.b. Hamilton, 10c per hundred lbs. extra.

IRON PIPE FITTINGS—The usual trade is being done at unchanged prices. we quote: Discounts on nipples, 1-4 inch to 3 inch, 75 per cent., 3½ inch to 2 inch, 55 per cent.

IRON PIPE. — Supplies continue short and an advance is expected. We still continue to quote as follows: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, 11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27.00; 2 inches, $36.50, discounts on black pipe, 1-4 inch, 61 per cent.; 3-8 inch, 61 per cent.; 1-2 inch, 70 per cent.; 3-4 inch and upwards, 72 per cent.; Discounts on galvanized pipe:1-4 inch, 46 per cent.; 3-8 inch, 46 per cent.; 1-2 inch, 60 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 70 per cent., and for galvanized 60 per cent.

SOIL PIPE AND FITTINGS—Our prices remain as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Quotations are unchanged. Our prices are: Bar solder, half-and-half, guaranteed, 25c; No. 2 wiping solder, 22c.

ENAMELWARE.—We still quote: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65 special, $18.65; plate E11 and E21 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, December 28, 1906

With the exception of adavance of soil pipe predicted by us last week, there has been little of an important nature in the plumbing markets this week. The change in soil pipe has not been made at time of writing, but will be made before the new year, quotations on medium and extra heavy pipe and fittings up to 6 inches being advanced from 65 per cent. discount to 60 per cent. Light pipe is changed from 50 and 10 to 50 per cent., and light pipe fittings advanced from 60 per cent. to 50 per cent. and 10 per cent.

As predicted last week we look for an advance on hot water boilers to take effect the first of the year.

The holiday week has been rather quiet so far as business is concerned. The shortage in iron pipe continues, and there is still considerable demand for heating supplies. In plumbing goods, the jobbers are catching up with their back orders on closet tanks, the shortage having been caused by difficulty in securing copper for linings. The demand for plumbing supplies is, of course falling off owing to the winter season.

LEAD PIPE — The discount on lead pipe continues at 5 per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 6c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS.—New lists will show advances as follows: Medium and extra heavy pipe and fittings, 60 per cent.; light pipe 50 per cent.; light fittings, 50 and 10 per cent.; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—The scarcity is not being relieved and work is being delayed. One-inch black pipe is now being quoted at $4.80 and one-inch galvanized at $6.43. Full list in current market quotations.

IRON PIPE FITTINGS — New lists are as follows: Cast iron elbows, tees, crosses, etc., 62½ per cent.; cast iron plugs and bushings, 62½ per cent.; flange unions, 62½ per cent.; nipples, 70 and 10 per cent.; iron cocks, 55 and 5 per cent.; Canadian malleable, 30 per cent.; malleable unions, 55 and 5 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain 65 per cent.; cast iron floor, 70 per cent.; hook plates, 60 per cent.; expansion plates, 65 per cent.; headers, 60 per cent, hangers, 65 per cent.; standard list.

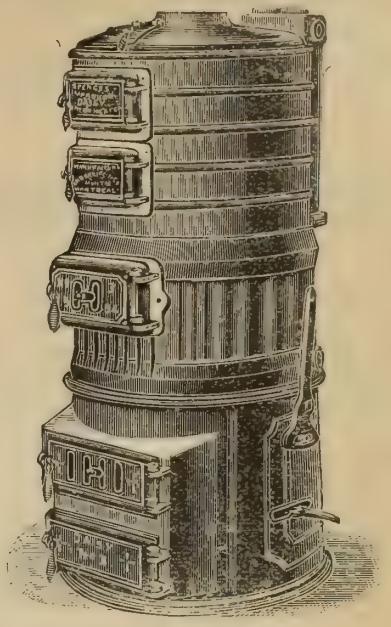
GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. Copper range boilers are now net list.

RADIATORS—Prices are very stiff at: Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance after New Years.

SOLDER — Quotations remain firm as follows: Bar solder, half-and-half, guaranteed, 27c.; wiping, 23c.

ENAMELWARE—We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25: plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

THE APPRENTICE GOT BUSY.



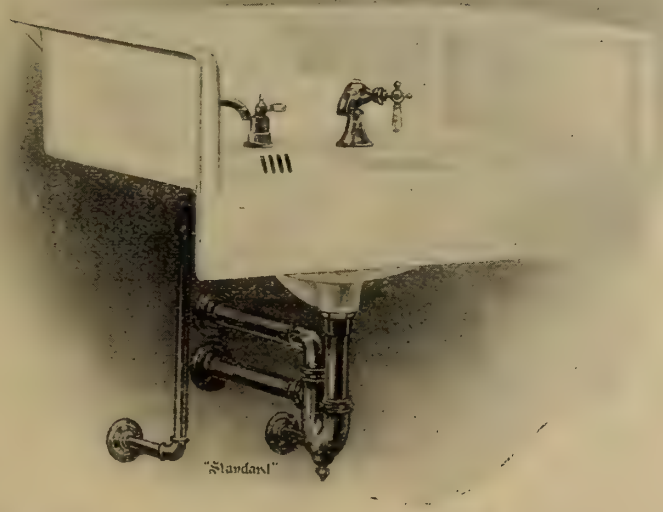
The industrious apprentice was recently viewed in a new light says The Metal Worker. Three men were at work on the roof of an old building within easy view from a certain office on the top floor just across the street. Two were full-fledged plumbers, one an apprentice, who was occasionally called on to drive a nail or two for his fellows. What he was doing the rest of the time was a mystery—for a while. The boy selected a piece of tin, long and narrow, and hammered at it for some time, finally getting it into rounded shape, like a small section of stove pipe. Then he soldered the edges at the side and laid it down while he helped drive another nail. In his next period of leisure he hunted up a piece of tin which he cut into a circle; this he placed on the end of the stove pipe affair and hammered away furiously. The soldering iron came into play again. By this time the plumbers were getting interested, and they got on either side of the apprentice as he punched two holes in the pipe and inserted a piece of wire. At this point the uncertainty as to the object in view ended, for the apprentice held out his hand, received a coin from one of the others, and climbed down the ladder. It was easy, after that; the three were very thirsty. Five minutes later they were taking turns satisfying their thirst.

The output of coal of the Nova Scotia Steel and Coal Company for the month of November amounted to 71,045 tons of coal, which is the highest on record.

The Strongest Argument

of our imitators is that their boiler is "almost" like the

"DAISY"



The Daisy Hot Water Boiler is the pioneer of hot water boiler construction; it is the leader which all others try to follow.

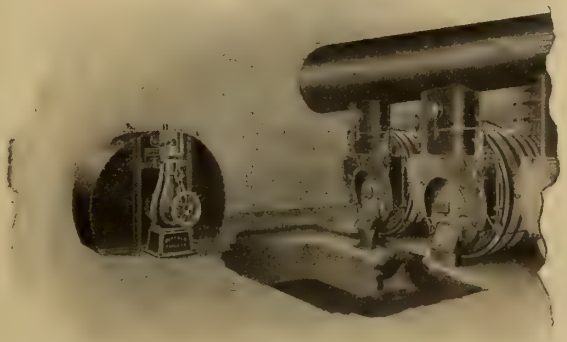
Mechanical Draft



An application of fans for securing the highest efficiency of fuel and the greatest steaming capacity of boilers—Fiske.

THERE is nothing new or irrational about Mechanical Draft—It dates back from the first use of bellows, and is best appreciated in the latest and largest power plants.

Buffalo Electric "B" Volume Exhauster

MECHANICAL DRAFT means a positive control over your boilers. No dependence on weather conditions. No fixed limit to boiler capacity. Quick response to demands for steam.

A typical Buffalo Induced Draft Plant.

Left Hand Bottom Horizontal Discharge Fan with Cylinder below shaft engine.

MECHANICAL DRAFT means no tall, expensive chimneys. Perfect combustion of low-grade fuels. Realizes, in connection with fuel economizers, the highest possible boiler efficiency.

MECHANICAL DRAFT has long ceased to be an experiment, but is well defined and accepted engineering practice. The best results are only possible when installations are designed and executed by specialists in this service. Bring your draft problems to us.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.
